It is easy when we win to smile, and it is hard to smile when we lose; but I like a graceful loser, and while I lacked only a few votes yesterday to make the fight successful, I appreciate some of the arguments that were used to keep others from

voting with me. I therefore join with my good friend from Ohio in wishing each and every one of my colleagues a merry Christmas and a happy New Year, and I trust that the next year will be the most prosperous year that we have ever known. [Applause.]

THE LATE SAMUEL W. PEEL

Mr. TILLMAN. Mr. Speaker, yesterday at Bentonville, Ark., Col. S. W. Peel, who represented the third district of Arkansas for 10 years, something like 30 years ago, and who was a colleague of the Speaker of the House, died at the advanced age of 93 years. I ask unanimous consent that I may extend my own remarks in the Record in a brief eulogy of the life and character of this distinguished citizen.

The SPEAKER. The gentleman from Arkansas asks unanimous consent to extend his remarks in the Record in the manner indicated. Is there objection?

There was no objection.

Mr. TILLMAN. Mr. Speaker, I first saw Colonel Peel in the old courthouse at Fayetteville. I was a small boy; he a handsome young prosecuting attorney making the closing argument in a murder case.

I saw him last, one month before his death, sitting on the side of his bed, bowed under the burden of his 93 years. He was stricken with bodily infirmities, but cheerful and smiling as of old, facing the swift-coming end with a fortitude that became him, gamely proclaiming his readiness to cross the bar and put out to sea for the final voyage. When I told him good-by I knew I would never see him again.

He had no cause to dread death. He told me so. Full of years and honors, why should he fear to die?

Why shun the gentle sleep,
The rising star,
The love that beckons from the deep
Of Life afar?
The wheat grain dies, and upward through the earth
It grows in loveliness beneath the sun.
So immortality finds birth
When life is done.

He loved his friends and his family as few men do. His family and friends loved him loyally. During his long and useful life he was the best loved citizen of the district.

Colonel Peel was born in Independence County September 13, 1831. He entered the Confederate Army as a private and rose to the rank of colonel of the Fourth Regiment Arkansas Infantry. He served with distinction in Congress, besides holding other positions of public trust.

The game of life is a fighting game, and the political game particularly is a fighting game, and Colonel Peel was a red-blooded fighter and a man's man.

The color of the ground was in him, the red earth, the smack and tang of elemental things, the rectitude and patience of the cliff, the good will of the rain that loves all leaves, and the friendly welcome of the wayside well.

He fell like a stately oak, and leaves a lonesome place against the sky.

He was a born leader of men in peace as in war. But he rides no longer at the head of the troop.

The chief is fallen, so the troop
To-day rides slowly;
Sad heads bend low—broad shoulders droop
Where death lies holy;
And there are tears in weary eyes,
As rain from winter's weeping skies,
Where every sobbing south wind sighs
A requiem lowly.

The chief is fallen. Halt the guard
For voiceless prayer.
Love's pale lilies crown the sward
Above him there;
And through the lonesome trees that sway
Above his rose-crowned rest to-day
Life's lost winds whisper on their way
Love's deep despair.

No answer now from white lips pressed
And unreplying;
Still hands upon a silent breast
Forever lying;
But out from God's white land of light,
Beyond the field, beyond the fight,
His clear voice rings across the night
With strength undying.

A long good night to you, Colonel Peel. You gave the world more than the world gave you. Loving father, loyal friend, incorruptible servant of the people, hail and farewell.

WILLIAM J. OLIVER

Mr. TAYLOR of Tennessee. Mr. Speaker, I ask unanimous consent to reproduce in the Record an editorial appearing in the Knoxville Journal and Tribune of December 17 last bearing on the bill for the relief of William J. Oliver which is now the unfinished business on the Private Calendar.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to extend his remarks in the Record in the manner indicated. Is there objection?

Mr. BLANTON. Mr. Speaker, I shall not object, but if this editorial writer had approved of the move to send this case to the Court of Claims to be decided judicially upon law and equity it would have more force than just the mere asking of Congress to pay over a big amount of money.

Mr. TAYLOR of Tennessee. Well, I will ask the gentleman from Texas if he will carefully read this editorial?

Mr. BLANTON. I have read it; it was sent to me direct. [Laughter and applause.]

Mr. TAYLOR of Tennessee. Then, let the gentleman read it again.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. TAYLOR of Tennessee. Mr. Speaker, under the leave granted to extend my remarks in the Record I insert the following editorial from the Knoxville Journal of December 17, 1924:

COLONEL OLIVER'S CLAIM

There is now before Congress a bill to compensate Col. William J. Oliver for losses he sustained in the operation of his plant during the World War. The sum recommended, that of \$170,000, is believed to be grossly inadequate to the false arrest of Colonel Oliver in connection with the manufacture of shells on order from the American Government but intended for and used by the Italian Government. The sum sought by Colonel Oliver was \$1,000,000, but the Claims Committee of the House has reported in favor only of the sum of \$170,000, and it appears that Congressman TAYLOR, of this district, and other Members of Congress favorable to the Oliver claim will have to wage their bitterest fight in order to put over the smaller amount. They have been fighting valiantly. They should win.

Since he was struck down by a motor truck some two years ago Colonel Oliver has been physically unable to look after his claim, the pushing of which has been left to his counsel and his friends. The small sum approved by the Claims Committee falls far short of recompensing the manufacturer for the injustice done him by way of false accusation and the money damage suffered in the taking over of the plant by the United States Government.

Congressman TAYLOR believes that the entire claim should be paid. Thousands of others right here in Knoxville feel the same way. It has always been believed here that Oliver was the victim of a frame up, that he was done an irreparable injury throughout the whole proceedings back in 1918, and that he should be recompensed in proportion as he was humiliated and made to suffer financial loss. He was tried and vindicated. Nothing was found against him. Meantime he has been ruined. His plant has been sold for a song. His health has been impaired for at least two years. For weeks his life has been despaired of.

Why should not this great body of Americans, representing American freemen, make some measure of restitution to this man who has been humiliated and ruined through the action of the Government that he was trying to serve so loyally; in whose service his son had enlisted and whose life, possibly, was at stake if things were not as they should have been with those shells that the loving father was making? Great was the wrong done him. The reparation, so far as dollars and cents are concerned, should be in proportion to the falsity of the charges against Oliver, in proportion to the humiliation suffered. Pay, and pay well.

SETTLEMENT OF DEBT WITH LITHUANIA

Mr. GREEN. Mr. Speaker, I rise for the purpose of having a correction made in a public document. At the time of the discussion on the bill for the settlement of the indebtedness of Lithuania with the United States the Committee on Ways and Means presented a report accompanying the bill, in which a copy was made of a public document which was purported to be a copy of the settlement made with Lithuania. In that report of the agreement that had been entered into with Lithuania, subject to the approval of Congress, there was an error in reference to the rate of interest which accrued on the original amount of the obligation, and on page 5 of the report there is a statement of the amount of principal and also of the interest accrued, according to the document, at 4½ per cent interest. As a matter of fact, the original agreement provided

for 4½ per cent interest, and it was so calculated; but there was a mistake in the printing of the document; that is, I suppose it occurred in that way.

Mr. CRISP. If the gentleman will permit, I desire to say that I wrote the report and incorporated in the report the Senate Executive document, and my information is that the Printing Office in printing the Senate Executive document had the rate of interest specified at 4½ per cent, when it should have been 4¼ per cent. I do not think the matter affects the transaction in the slightest, because the bill, of course, controls, and it is correct. This is simply an error of the Printing Office in printing the rate of interest in the Executive document at 4½ per cent, when it should have been 4¼ per cent.

Mr. GREEN. The only importance is if anyone should read this report and make a computation of the interest he would come to the conclusion there was something wrong. As a matter of fact, the interest rate was 4¼ per cent. Now, I do not know whether it is in the power of the House to have the original document corrected.

The SPEAKER. The Chair does not see how the House could. The committee can make the correction if it wishes it, but the gentleman has stated it so it is in the RECORD in regard to the error. The Chair does not think Congress can take any action.

Mr. GREEN. As stated by the gentleman from Georgia, the legislation passed is correct, and the only trouble that could possibly arise would be in case of some one who went over those figures to verify the calculation.

Mr. WINGO. If the gentleman will yield, I would like to get a little information. Can the gentleman take the House into his confidence and advise us whether in the refunding program of the Treasury it is intended to refund our debts by new bond issues, and instead of issuing bonds bearing interest of only 3 or 3½ per cent is it intended to keep up the policy of putting out 4 per cent bonds, as it has done recently?

Mr. GREEN. The gentleman is inquiring with reference to the policy of the Treasury, over which the committee has no direct control, and at this time I can not advise the gentleman as to the intent and purpose of the Treasury.

Mr. WINGO. Well, I felt sure the gentleman's position and responsibility, as well as the natural curiosity of the gentleman, would have enabled him to have at least some information as to what is going to be done with these billions of refunds. I should think when he came to consider the question of approving the settlements with these foreign nations that he and his committee would have considered that, because the gentleman knows that one of the pledges we made to the American people was that we would make our foreign debtors pay us the same rate of interest that the taxpayers are having to pay on the billions we borrowed to loan to Europe, and notwithstanding the present rate of the investment market the bonds recently have been issued bearing 4 per cent. In other words, long-term bonds covering the refund on the bonds which were issued to get the money to loan those nations are now being issued at 4 per cent. Has the gentleman any justification for that?

Mr. GREEN. I do not understand fully the question of the gentleman from Arkansas.

Mr. WINGO. I am surprised. Does the gentleman justify the issuing of 4 per cent Government bonds in the present condition of the bond investment market?

Mr. GREEN. I can not inform the gentleman accurately as to the present condition of the investment market. Long-time bonds, however, may sometimes necessarily bear a rate of interest greater than the call rate, or even the short-time rate.

Mr. WINGO. But the gentleman knows, if he has studied and kept track of it—as he is sure to have done, occupying the position which he occupies—that there is a certain enhancement for all long-time Government bonds over the short-time bonds of the same rate and character by reason of their investment value, and the gentleman knows that the level of Government credit on long-time bonds at the present time is below 4 per cent. Why issue them above the level?

Mr. GREEN. I do not think that statement is strictly accurate. It is true that sometimes long-time bonds can be sold at a lower rate of interest than the short-time bonds.

Mr. WINGO. In what particular does the gentleman say my statement is incorrect? Does the gentleman challenge the statement that the interest level of Government long-term credit at the present time in the bond market is not below 4 per cent?

Mr. GREEN. The gentleman heard my statement.

Mr. WINGO. I want to know if the gentleman challenges the accuracy of the statement I make that the interest level of Government long-term credit at the present time in the bond

market is not below 4 per cent? Does the gentleman challenge that?

Mr. GREEN. The gentleman may find a fraction of a difference somewhere, but does the gentleman know of anything that is being negotiated at long time for less than 4 per cent?

Mr. WINGO. Yes. If the gentleman will investigate the quotations in financial magazines, he will know that the yielding or income rate on long-term Government bonds runs from 2.8 to 4.

Mr. GREEN. That depends on the purpose for which the bonds are issued. Some bonds are issued for the purpose of securing circulation of national-bank notes. Such bonds can be negotiated at a lower rate of interest.

Mr. WINGO. Has the gentleman read the memorandum of the Treasury covering that very question?

Mr. GREEN. Oh, yes.

Mr. WINGO. Does he not know that according to that memorandum the highest comparable credit of the Government was 3.88? The gentleman challenges the statement of the Treasury when he challenges my statement.

Mr. GREEN. I do not care to get into any such discussion.

Mr. WINGO. I have disclosed what I was seeking, Mr. Speaker, and that is the frank admission of the chairman of the Committee on Ways and Means that, notwithstanding the refunding of billions of debts owed to this Government, he has not inquired into that, and does not know anything about it.

Mr. BLANTON. Mr. Speaker, I make the point of order that the gentleman from Arkansas should question some one closer to the Secretary of the Treasury than is the chairman of the Committee on Ways and Means.

Mr. WINGO. The gentleman admits that the gentleman from Iowa knows nothing about the value of Government securities.

Mr. GREEN. I know that the gentleman from Arkansas does not.

HEALTH AND MORALS UNDER PROHIBITION

Mr. UPSHAW. Mr. Speaker, I ask unanimous consent to address the House for one minute.

The SPEAKER. The gentleman from Georgia asks unanimous consent to address the House for one minute. Is there objection?

There was no objection.

Mr. UPSHAW. Mr. Speaker, some of my genial colleagues have asked me, as the holidays approach, if I was going to deliver my annual sermon on the proper, constitutional demeanor of lawmakers during the Christmas holidays. [Laughter.] I am going to announce, for the relief of a certain element here, that I am not going to deliver that speech. [Applause.] Mr. Speaker, I appreciate the "damp" source of that applause. [Laughter.] I could lift no higher standard of Christmas conduct than that every official in Washington and everywhere will spend Christmas as sober and in a manner as exemplary as he would have his own son to spend it.

Instead of delivering that speech, however, I want to ask the privilege of making a real contribution to the constitutional enforcement of our prohibition law and to personal obedience to that law in extending my remarks in the RECORD by printing a very remarkable utterance of that great Christian physician, Dr. Howard A. Kelly, of Johns Hopkins University, on "Prohibition and health." I think it will make all men and women who read it better constitutional lawmakers.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. UPSHAW. Mr. Speaker, under permission granted me to-day by the House, I am making a wholesome Christmas present to the friends of constitutional prohibition and personal and national sobriety by publishing a remarkably strong article on "Health and morals under prohibition" by that famous surgeon and Christian patriot, Dr. Howard A. Kelly, of Johns Hopkins University.

HEALTH AND MORALS UNDER PROHIBITION

(By Howard A. Kelly, M. D., Baltimore, Md.)

The weakness and utter collapse of the liquor case is admirably bared in an article entitled "Health and Morals vs. the Volstead Act," in the January issue of *Health*, by its own doughty champion, Dr. S. Dana Hubbard, of New York, who, in an artistic concession to prohibition, first paints a lurid picture of intoxicants which he declares to be "the cause of a long record of crimes, poverty, disease, ruined hopes, wrecked ambitions, broken homes, destroyed families, orphaned children, besotted intellect, warped judgment, perverted moral faculties, ravaged physiques, and riot with reason." His indictment of alcohol is faultless. But, with a curious lack of logic he almost in the same breath hints darkly

at "animus, prejudice, bad reasoning, and deliberate falsehood and vilification," talks of elucidating the problem "in all its peregrinations," and then asserts as a climax to his argument (sic) "Prohibitory laws (and here we include all kinds) are unwise, and their adoption will be opposed, and it is a settled fact that legislation can not perfectly extirpate the use of intoxicating liquors as a beverage." What a farrago! Who can digest it, and what follows?

Without a blush this alcoholic protagonist goes on to voice for the nth time in histrionic basso profundo the sorry, ancient gag about the dangerous precedent of "interference with personal liberty," as though, in a civilized state, in any organized social body, any sane man really wants such an incommensurable, stupid thing as personal liberty, liberty for every man to follow the lead of his selfish desires and his passions. The man who marries, has children, engages in business, acquires property, and seeks protection in the enjoyment of these privileges and rights, ages ago, with the making of the very first laws, recognized his status as a social being and abjured his personal liberty as an evil encumbrance, fit for the savage and not conformable with civilized life. Personal liberty forsooth; it is the veriest claptrap and befuddlement of the demagogue playing on weak minds. I pause to deal somewhat fully with this folly, often cited as a potent argument against prohibition.

Let our wily doctor who blows hot and cold with the same breath, and all his ilk, learn that at the foundation of all law is the principle laconically expressed in four words, "Lex suprema salus populi." Be it known that it lies within the purview of the state to enact any law whatsoever, a law commanding citizens to abstain from eating or from drinking or from doing anything by which the law-making body, representing a majority of the citizens, judges that the public weal is jeopardized. Read here Eli F. Ritter's Civil Law and Moral Law, One and the Same Thing. I notice incidentally that while he steps on the forte fortissimo pedal when discussing personal liberty, as a liquor apologist he poses pianissimo and with averted face, when we inquire whether the control of the sale of narcotics is not obnoxious to his personal liberty and whether or not these cases are parallel.

I hasten to confess, before Doctor Hubbard himself makes the damning discovery to taunt me with it, that I come from one of the saddest States in the Union, one of the original noble thirteen, which has lapsed into utter degradation, with a governor who, though a lawyer by profession, and a man of astuteness and ability, is a strong opponent of a part of the Constitution of the United States which interferes with his "personal liberty" ideas; a State harassed by a legislature which joined it in unholy matrimony to the gamblers of the country, and, in addition, committed the supreme folly of voting for the prohibition amendment and then refused to take the necessary steps to make it effective. Alas, in Baltimore our finances, our courts, and the general management would in many parts be benefited if they were intrusted to a class of grammar-school boys. But under these extreme discouragements such is the efficiency of our national prohibition forces that we are markedly better off even under unaided Federal supervision.

I am puzzled to know how my New York colleague can declare that prohibition fails here or in his own lawless State, where it has never really honestly been tried. Is it not simply a piece of blind folly and befuddlement to declare that prohibition is a failure in a section where it has never been tested? In what contempt would he justly hold my judgment if I insisted vehemently that a laudable and wisely used operation was no good, and when asked, "Have you ever tried it?" I answered "No."

We look on with benignant satisfaction down in this border State, when a certain wet HILL, whom Doctor Hubbard eagerly clutches under the alias of "a gentleman from Maryland (God bless him)" at last nestles in the embrace of such an intellectual peer and running mate. Verily, the wisdom of the ages is justified and liquor is damned in the house of its friends, the saloon keepers, the bootleggers, the brewers, the distillers, the Hubbards, and the Hills, and "The wicked is snared in the work of his own hands."

Let us, however, not fall to learn a salutary lesson from our opponents, who harp also on the maxim "you can not legislate people into righteousness." The gist of that matter clearly is this: Our laws are our standards of righteousness in our social relations; they are not designed to express the average opinion of the mob but the best judgment of the best men elected to make them; they must have the support of a considerable number of our best people to be wholly effective, those who favor good laws must make it their chief concern to win the sympathy and adherence of all who disagree with them. This was expressed in a Book written 2,000 years ago, which declared "I will put my laws in their minds and in their hearts will I write them."

It is the business of the State to enforce all its legislative enactments impersonally and impartially; it is the business of Christian people to win all the people to love good laws and to keep them from their hearts; in this duty I fear we have failed.

In senses, perhaps, not obvious to the writer, this antiprohibition article is a gem in our controversial literature, and I hope it will be

widely circulated as one of the strongest arguments for our great cause with the superscription, "He made a pit and digged it and is fallen into the ditch which he made." How often has this proven true in the lives of the liquor men, in their sons and daughters, and in all that makes life worth living; all sacrificed to the alcoholic demon just to grasp wealth.

Let me here cite for Doctor Hubbard and for all who care for facts some dogmatic statements for their better instruction that he that runs may read.

FACTS THAT OVERWHELM THE "WETS"

No other social policy formulated in legislation has ever produced such immediate and beneficial results affecting the health, prosperity, and morals of a nation as the ratification of the eighteenth amendment and the passage of the Volstead Act. Its record of achievement in four years would be incredible if it were not that it is plainly written in the official figures of the Census Bureau, the health boards of the various States, the records of insurance companies, the published reports of police chiefs, and in the mass of economic data issued regularly by national trade organizations.

Former opponents of prohibition, including members of the famous committee of fifty, such as President Emeritus Elliot, of Harvard University, and Prof. Henry W. Farnam, of Yale University, are to-day among its ardent advocates, won by the results achieved in spite of the organized opposition of the traffic.

From a physician's standpoint, the most interesting change is the decreased mortality; the crude death rates issued by the Bureau of the Census are for the years named:

1913	14.1
1914	13.6
1915	13.6
1916	14.0
1917	14.3
1918	18.1
1919	12.9
1920	13.1
1921	11.6
1922	11.8

1923 is not yet stated officially. Reports from 65 cities, received each week during 1922 and 1923, show a death rate of 13.0 for 52 weeks of 1923, as compared with 12.5 for the same period in 1922. On the basis of the ratio between the death rate of these cities and the Nation in 1922, the death rate for 1923 may be estimated at 12.2 per 1,000 population. The average annual death rate from 1913 to 1917 was 13.92 per 1,000. Since the influenza epidemic made the 1918 rate abnormal, it may be ignored, although the greater mortality among users of alcohol definitely increased the toll of death. Had the average rate of the five wet years prevailed in the years of prohibition, 873,075 more deaths would have been recorded. Prohibition did not save all of these lives, but no other single factor affecting the entire people did so much to reduce mortality.

The decrease in the death rate from tuberculosis of all forms is significant. This was between 140 and 150 per 100,000 in the years before prohibition, the lowest figure recorded in the wet years being 14.2 in 1916. The following figures, as issued by the Bureau of the Census, show the continuous decrease since alcohol was outlawed as a beverage:

1919	125.9
1920	114.2
1921	99.4
1922	97.0

One might quote like decreases in the death rate in other diseases in which the use of alcohol depresses vitality and breaks protective barriers.

The decrease in deaths from alcoholism under prohibition appears in the following figures.

Alcoholism death rates per 100,000 policy holders in the Metropolitan Life Insurance Co., Industrial department:

1912	5.3
1913	5.2
1914	4.7
1915	4.1
1916	5.1
1917	4.9
1918	1.8
1919	1.4
1920	.6
1921	.9
1922	2.1

Alcoholism death rate—United States Census Bureau:

1912	5.3
1913	5.9
1914	4.9
1915	4.4
1916	5.8
1917	5.2
1918	2.7
1919	1.6
1920	1.0
1921	1.8
1922	2.0

The increase for 1922 is marked, due probably to the propaganda of opponents of prohibition, but is still far below the lowest recorded for the license era. This is the more significant, since the intoxicants obtainable are usually poisonous. If any considerable fraction of the former quantities of liquor was now being used, the dangerous beverages of the bootlegger would send the alcoholism death rates soaring. That these rates continue to fall is good evidence of the effectiveness of prohibition in greatly decreasing liquor consumption.

BETTER LAWS AND BETTER MORALS

These gains in health are echoed in better law observance and morals. While it may not be possible to make a people moral by statute, it is possible to remove the world's greatest incentive to immorality and lawlessness by prohibiting the sale of intoxicants. The United States Census Bureau declares that "The comparable ratios of prisoners to 100,000 population for July 1, 1922, and July 1, 1917, are 137.2 and 143, respectively." This decrease of 5.4 per 100,000 means, on the Census Bureau's estimate of 109,248,393 population of 1922, 5,986 fewer prisoners for the year 1922 as compared with the year 1917.

Judge Gemmill, of Chicago, eminent authority on criminology and criminal statistics in America, declares that the decrease in the ratio of drunkenness arrests in 1922 as compared with the preprohibition rate is equivalent to 500,000. The daily evidence lies patent to any observer, however prejudiced, that an intoxicated man is to-day a rare sight on our streets, where they were seen by scores four years ago.

With this decrease in drunkenness has faded the brothel and with it much venereal disease. Sober men were not often patrons of the baguio in the past nor are they to-day. We record our venereal cases to-day with more care, and the reporting of cases is in many States compulsory. Where comparable figures exist, they demonstrate a decrease since prohibition banned both the saloon and its foster child, the house of prostitution.

The national economic gains of prohibition are the natural result of the diversion of the former drink bill, totalling billions of dollars annually, into the channels of legitimate business. The increased efficiency of the worker, the reduction of production costs through elimination of costly industrial accidents, the transfer of thousands who were charges upon society because of destitution or crime caused by drink into producers of wealth, the larger buying power of former saloon patrons, have contributed in no small degree to stimulate the healthiest as well as the greatest period of prosperity we have ever known.

BILLIONS OF DOLLARS SAVED

The addition of a billion dollars to savings accounts, the purchase of a billion dollars in life insurance monthly, the almost incredible increase in home building, in retail trade, in purchase of luxury goods as well as the necessities of life, the countless millions spent upon radio, theaters, automobiles, and other forms of recreation and entertainment which cater to the former patrons of the saloon as well as to the general public, testify to an unparalleled prosperity. When we emptied the saloons we depleted jails, poorhouses, inebriate asylums, and alcoholic wards, and in their stead we now support churches, schools, banks, stores, factories, theaters, and playgrounds.

The amendment could not have been ratified by the liquor man's beloved "referendum," for the Constitution defines clearly the one proper and legal course that was followed in the ratification of the eighteenth amendment. The autoschediastic opinion of Doctor Hubbard—that the amendment is unconstitutional, an invasion of State rights and State sovereignty, and an interference with the personal liberty of the citizen—is diametrically opposed to the decisions of our Supreme Court of the United States. Shall we consider abandoning our Supreme Court and inviting the bramble bush from the hillside to cast his agis over us?

The charge that prohibition does not represent the will of the people of the United States is a falsification, for under our system of government as provided by our Constitution the people, by popular vote, elect their representatives who are to make their laws. At the time the eighteenth amendment became effective 33 States had previously by State action adopted the prohibition policy, and in a number of the remaining States a large portion of their territory was dry by virtue of the will of the people expressed in local-option elections. Albeit these were times when the liquor men bated the referendum.

If the antiprohibitionists have ever adverted to this pregnant fact, it must have been in a voice so bated that only a microphone could detect it. The modus operandi was this: The resolution submitting the eighteenth amendment was passed by a two-thirds vote of Congress; it was then submitted to the legislatures of the States, and ratified by the legislatures of 46 out of the 48 States. This was equivalent to the approval of two Federal legislative bodies—the House of Representatives and the Senate—and of 92 State legislative bodies, since each legislature is composed of two branches, making a total of 94 legislative bodies elected by the people of the United States concurring in this colossal policy of national regeneration.

It was only necessary, in order to defeat the eighteenth amendment, to secure its rejection by a single branch of the legislature in 13 States. The fact that its opponents could not do this demonstrates clearly the

relative strength of the parties. If, as suggested by our erudite doctor, the sentiment of the people is so strongly against national prohibition, it is pertinent to inquire, Why, then, is not the eighteenth amendment repealed? Instead we find each succeeding Congress elected since the amendment drier than its predecessor.

Most of our States have even passed laws strengthening their enforcement codes. The ignoble exceptions are in the East—New York, Massachusetts, and, alas, our poor blind Maryland—all soaking prior to the eighteenth amendment. The present inaction of these States does not represent any reversion of sentiment.

AFTER 50 YEARS OF BATTLE

Prohibition came to stay after the fullest discussion of the subject for 50 years, during which every possible form of control of the iniquitous, lawless liquor traffic was tried and failed. This very incorrigible lawlessness and corruption of the liquor manufacturers and dealers, as they well know, and the crime, insanity, pauperism, and death bred by their traffic made prohibition inevitable. Yes, dear doctor, as you surmise, this great national blessing was prayed down upon us from heaven, a little despised and ridiculed band of women out in Ohio kneeling outside the saloons and asking our Father in His infinite mercy and grace to purge this curse from our land. Such prayers, I opine, have all been one-sided, for I don't think anyone ever prayed for the liquor traffic in any shape whatever. What an answer the prayers of those humble saints have had!

In our present age of high-speed machinery alcoholic beverages are an anachronism, introducing an element inimical to human life, affecting both user and public. The flying autos on our highways, swift machinery in our factories, express trains and limited trolley cars ban intoxicants. This saving of life and limb appeals to me strongly as a surgeon. Do you, too, care for prevention?

The economic subcommittee of the committee of 50 made a detailed study of the relation of liquor to pauperism and crime through a case study of 36,000 individuals. It found pauperism directly attributable to liquor in 25 per cent of the cases in charity organizations, in 37 per cent of the paupers in almshouses, and in 46 per cent of the children becoming public charges. It found that the liquor habit was a primary cause of crime in 31 per cent of the cases studied, and that it was one of the causes in 50 per cent. That these estimates were conservative is shown by the decrease in pauperism, crime, and other ills since prohibition has become our established national policy.

Wiser public sentiment to-day demands stricter enforcement of the law. Aside from a little clamorous group of wets, there is no real demand for "liberalizing" and so weakening the law. Behind our prohibition legislation stand the churches of America, the wives and mothers who are now voters, the business and industrial interests, and such great labor organizations as the railroad brotherhoods and others embracing the more highly skilled trades, the health authorities, and many others. No man is made wealthier, healthier, wiser, or happier by being alcoholized, while those who manufacture the poison batter on the bodies and souls of the consumers, of their wives, their children, and the public at large. Let us band all this alcoholic fraternity together and dub them with a suitable title as the great Order of the Anthropophagi, or man-eaters, veritable cannibals in our midst.

My colleague asks with alcoholic incoherency, "Is a prescription for brandy, gin, rum, or whisky for the sick, ordered in strictly medical practice and in due form by an honest physician, to be construed for beverage purposes?"

Let me inform him that medicinal liquor is expressly excluded from the classification by the Volstead Act. Permits are issued to physicians, who may prescribe liquor, if deemed necessary, and the needed apparatus for supplying medicinal liquor is provided by the law—but how often that confidence is abused! Not the Volstead Act but the laws in 12 States forbid prescribing intoxicating liquors, while 11 other States permit the use of pure alcohol only. The American Medical Association has gone on record as discouraging the prescribing of intoxicants. That alcohol has been used "from time immemorial to relieve the ill and hasten convalescence," as remarked, does not prove that it was ever really beneficial, for goose's, peacock's, and cow's dung, scrapings and nails, roaches, and spiders have been prescribed for the same purpose, while modern medical science rejects them to-day, just as multitudes of practitioners reject alcohol.

MEDICAL PROFESSION DON'T NEED ALCOHOL

I do not myself believe that the medical profession is conscious of any pressing need of alcohol, for it is not known as a remedy or an important or necessary adjuvant in any disease. The ailment where its use has been generally asserted to be beneficial is diabetes in an advanced stage, and here insulin has come within a few months to supplant it. On the other hand, I take it that even though we were to concede the occasional need of alcohol, its possible usefulness is far outweighed by the enormous harm done by a horde of doctors, who are utterly uncontrollable, prescribing indiscriminately to all comers. Myriads of drunkards and narcotic victims have been created in the past by medical prescriptions. With the advent of prohibition we have discovered that many medical men have ideals not one whit above a

bartender; witness the doctors who pour out their prescriptions for alcohol daily until their blanks run out. The indiscriminate prescribing of alcohol was the disgrace of the generation out of which I came, given, as it was, almost invariably as a placebo.

Charles Edward Russell, in the January Century, analyzing the argument that customs and habits are fixed, declares that "Slowly thoughtful men abroad are coming to see that forces are at work stronger than brewery trusts, stronger even than the ancient manifest conditions now developing in this world, the advertised failure of prohibition in America begins to lose its point. In the way alone important to economic Europe, prohibition has not failed in America but has eminently succeeded. The only test of prohibition that counts is economic, and Europe is getting ready to own, in ways to cause some astonishment, that under such proving American prohibition stands up well."

The invocation of the vanished intoxicating beverages by a handful of men who are fanatics about drink is doomed to a dismal failure, for no little group of liquor dealers or addicts can rule this vast Nation. In clearest terms, the majority has spoken in terms of law. That majority has borne in patience the persistent lawless attempts to nullify its will. To-day, in tones heard in every State of the Union, that majority voice is speaking ever more loudly for enforcement and yet more enforcement, for prohibition means health, wealth, morality, and happiness to an entire nation of over a hundred million souls.

"I can call spirits from the vasty deep," said Glendower. The reply was made, "Aye, so can I or any other man, but will they come?"

In the first great criminal case in the world, tried before the final Arbitrator of all men, the defendant who had murdered his brother through jealousy, thinking to prove an alibi, impudently cried out to the Judge, "Am I my brother's keeper?" He left that August Presence crying, "My punishment is greater than I can bear." My brethren brewer and distiller, dispenser and defender of liquor, conscienceless, successful business and society man, repent before it is too late and join us in this service and receive enduring wages and reap fruit for the life eternal, and seek praise and honor of God and not of poor men whose breath is in their nostrils.

PERMISSION TO ADDRESS THE HOUSE

Mr. MOORE of Virginia. Mr. Speaker, I ask unanimous consent to address the House for two minutes.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. MOORE of Virginia. Mr. Speaker, referring to the very friendly remarks made a few moments ago by the gentleman from Ohio [Mr. LONGWORTH], it seems to me it would be rather ungracious for some one on this side not to make an acknowledgment of our appreciation. We all hope he may have the same experience he has wished us.

The gentleman has shown ability and fortitude in his leadership of the House, even when he has found himself, as has frequently occurred, in the midst of a sea of troubles. Personally I congratulate him on the success which has marked the discharge of his duties, and particularly—which is something always to be commended—on the unvarying good nature and suavity which he has displayed, even under the most trying circumstances. [Applause.]

Mr. LOWREY. Mr. Speaker, I rise to prefer a unanimous-consent request, appropos to the remarks of the gentleman from Florida [Mr. SEARS] on Miami. I ask that in a spirit of fairness the gentleman from California [Mr. LEA] be given a few minutes, if he wishes it, while we wait, to discuss the climate and products of California. [Applause.]

Mr. LEA of California. Mr. Speaker, I am not moved by the spirit at this time, so that I will retain my seat. [Applause.]

RECESS

Mr. LONGWORTH. Mr. Speaker, if no other gentleman desires to occupy the floor on this occasion, I ask unanimous consent that the House stand in recess, subject to the call of the Chair.

The SPEAKER. The gentleman from Ohio asks unanimous consent that the House stand in recess, subject to the call of the Chair. Is there objection?

There was no objection.

Accordingly the House (at 12 o'clock and 50 minutes p. m.) stood in recess, subject to the call of the Chair.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 1.12 o'clock p. m.

NAVAL APPROPRIATION BILL

Mr. THATCHER. Mr. Speaker, I ask unanimous consent to extend my remarks in the Record on the naval appropriation bill.

The SPEAKER. The gentleman from Kentucky asks unanimous consent to extend his remarks in the Record on the naval appropriation bill. Is there objection?

There was no objection.

Mr. THATCHER. Mr. Speaker, as a contribution to the discussion on the naval appropriations bill I desire to submit certain information concerning the cost to our Government of the United States battleships "scrapped" agreeably to the Limitation of Arms Conference Treaty and the salvage values realized therefrom. There have been so many varying statements made concerning the subject that I have deemed it wise to apply to original sources for correct data. With this thought in mind on December 19, 1924, I addressed to Hon. Curtis D. Wilbur, Secretary of the Navy, a letter asking for the facts, and to that letter I received a reply, dated December 31, which now follows and speaks for itself:

NAVY DEPARTMENT,

Washington, December 31, 1924.

MY DEAR MR. THATCHER: I duly received your letter of December 19, 1924, requesting certain information regarding naval vessels disposed of under the Limitation of Arms Conference Treaty.

It would seem that a comparison of the original cost of the vessels as against the net proceeds from their sale would not be useful. In the construction of these vessels, a great quantity of materials suitable only, or largely, for military purposes, was employed. Even the composition of some of the metals made use of was of a sort adapted for their use only in men-of-war. The equipment and machinery were of a design which inevitably unfitted much of it for commercial use.

You will perceive, therefore, that the actual cost of that part of the construction and installation completed bore no relation to the ultimate return to the Government of the materials actually scrapped and sold, whether the sales were made on a tonnage basis or the ships sold "as is where is" for ultimate demolition under the terms of the treaty.

The cost of the fabrication of these ships, i. e., the cost of labor entering into such fabrication, is little reflected, if at all, in the scrap value of the material sold. Of course, also, ship-breaking firms in bidding on vessels to be scrapped must in their bids have in contemplation the cost to themselves of demolition, including the expense of cutting up the materials so as to make them available for ordinary commercial scrap purposes.

The total original cost of the vessels was about \$96,000,000 for the completed ships, and about \$98,000,000 for those under construction. This latter sum includes expenditures to June 30, 1924. The average number of years in commission of the completed ships was 16.

A large amount of armor plate has been set aside by the Navy for possible future use, and a further amount has been given to the Army for use on the Panama Canal.

When building on scrapped vessels was stopped, there was on hand a large amount of steel plates and shapes and other articles which had been purchased for incorporation into the vessels under construction. The disposal of this material was given very careful consideration. Material in such forms as to be generally usable on other vessels was merged with the general stock of such materials on hand. Special items were listed, and before new material is acquired for use on vessels whose construction was continued or for alterations or repairs, these lists are examined to determine whether any material is already on hand which can be used. Much of this material has already been so used and it is expected that a further quantity will be used in the modernization of battleships.

A great part of the special treatment steel was retained, as well as most of the steel plates, 10 pounds per square foot and over, and the angles, channels, "I" beams, etc. Special treatment and nickel steel protective deck plates were shipped to the ordnance plant, South Charleston, W. Va., for possible future use. Part of the material bought for use on the *Massachusetts* and *Washington* was used on the airplane carriers *Lexington* and *Saratoga*.

All ordinary stock material was merged into stock for general use as needed. There was also retained for future use of the Navy such items as: Turbo generators, main propelling motors, main circulating pumps, forced lubricating pumps, ventilating blowers, Worthington pumps, air compressors, boilers, boiler plate, pipe, searchlights, refrigerating plant, main boiler feed pumps, boiler tubes, laundry equipment.

The returns received by the Government from the sale of these ships, or parts of ships, have been due principally to the sale as scrap of structural steel, armor to be turned into scrap, and non-ferrous metals such as brass, copper, and lead. As a result of the sale of materials from these vessels sold as scrap, there has been returned to the Government in cash \$1,557,590.00. The process of the disposal of scrap is still continuing and hence there will be additional receipts.

Without taking on a special clerical force for the purpose, it is not possible to give the value of the material retained for naval uses—it is certainly a large amount. However, the statement that "when our Government scrapped its ships under the treaty agreement it was

possible to salvage from the scrapped ships material and equipment equal to the total original cost of the ships" is not correct. Under any conditions conceivable, such an accomplishment would have been impossible, and would have been contrary to economic laws.

Sincerely yours,

CURTIS D. WILBUR,
Secretary of the Navy.

Hon. M. H. THATCHER,
House of Representatives, Washington, D. C.

MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Craven, one of its clerks, announced that the Senate concurs in the amendments of the House to the joint resolutions of the Senate of the following titles:

S. J. Res. 157. A joint resolution extending appropriation in connection with Columbia Basin investigation; and

S. J. Res. 159. A joint resolution providing for the control and eradication of the European fowl pest and similar diseases in poultry.

ENROLLED JOINT RESOLUTIONS SIGNED

The SPEAKER announced his signature to enrolled joint resolutions of the Senate of the following titles:

S. J. Res. 157. A joint resolution extending appropriation in connection with Columbia Basin investigation; and

S. J. Res. 159. A joint resolution providing for the control and eradication of the European fowl pest and similar diseases in poultry.

ADJOURNMENT

Mr. BEGG. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 16 minutes p. m.) the House, under the concurrent resolution, adjourned until Monday, December 29, 1924, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

750. A communication from the President of the United States, transmitting, with a letter from the Director of the Bureau of the Budget, a draft of proposed legislation for the Department of Agriculture making available \$100,000 of the appropriation of \$3,500,000 for eradication of the foot-and-mouth disease and other contagious or infectious diseases of animals, to enable the Department of Agriculture to control and eradicate the European fowl pest in the United States, to remain available until June 30, 1926 (H. Doc. No. 499); to the Committee on Appropriations and ordered to be printed.

751. A letter from the Postmaster General, transmitting a schedule of papers and documents which are not needed in the transaction of public business and which have no permanent value or historical interest; to the Committee on Disposition of Useless Executive Papers.

752. A letter from the chairman of the Grant Memorial Commission, transmitting a draft of a bill "To provide payment for additional work on the Grant Memorial, Washington, D. C."; to the Committee on the Library.

753. A letter from the chairman of the War Finance Corporation, transmitting seventh annual report for the year ended November 30, 1924 (H. Doc. No. 486); to the Committee on Banking and Currency and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. RAKER: Committee on the Public Lands. H. R. 9688. A bill granting public lands to the city of Red Bluff, Calif., for a public park; without amendment (Rept. No. 1062). Referred to the Committee of the Whole House on the state of the Union.

Mr. LUCE: Committee on the Library. S. J. Res. 152. A joint resolution to accept the gift of Elizabeth Sprague Coolidge for the construction of an auditorium in connection with the Library of Congress, and to provide for the erection thereof; without amendment (Rept. No. 1063). Referred to the Committee of the Whole House on the state of the Union.

Mr. SINNOTT: Committee on the Public Lands. H. R. 6710. A bill to authorize the Secretary of the Interior to lease certain lands; without amendment (Rept. No. 1064). Referred to the Committee of the Whole House on the state of the Union.

Mr. SINNOTT: Committee on the Public Lands. H. R. 6713. A bill to define trespass on coal land of the United States and to provide a penalty therefor; without amendment (Rept. No. 1065). Referred to the House Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. CABLE: A bill (H. R. 11028) to license hotels and regulate hotel rates within the District of Columbia; to the Committee on the District of Columbia.

By Mr. CRAMTON: A bill (H. R. 11029) to consolidate the office of public buildings and grounds under the Chief of Engineers, United States Army, and the office of superintendent of the State, War, and Navy Department Buildings; to the Committee on Public Buildings and Grounds.

By Mr. HAWLEY: A bill (H. R. 11030) to revive and reenact the act entitled "An act authorizing the construction, maintenance, and operation of a private drawbridge over and across Lock No. 4 of the canal and locks, Willamette Falls, Clackamas County, Oreg.," approved May 31, 1921; to the Committee on Interstate and Foreign Commerce.

By Mr. HILL of Washington: A bill (H. R. 11031) authorizing the issuance of patent to the Pioneer Educational Society and its successors for certain lands in the diminished Colville Indian Reservation, Wash.; to the Committee on the Public Lands.

By Mr. MCKENZIE: A bill (H. R. 11032) to amend in certain particulars the national defense act of June 3, 1916, as amended, and for other purposes; to the Committee on Military Affairs.

By Mr. UPSHAW: A bill (H. R. 11033) to promote the safety of employees and travelers upon railroads engaged in interstate commerce by requiring automobiles and other vehicles to stop at railway grade crossings; to the Committee on Interstate and Foreign Commerce.

By Mr. WOODRUFF: A bill (H. R. 11034) authorizing an appropriation to be expended under the provisions of section 7 of the act of March 1, 1911, entitled "An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers," as amended; to the Committee on Agriculture.

By Mr. KELLY: A bill (H. R. 11035) granting the consent of Congress to the county of Allegheny and the county of Westmoreland, two of the counties of the State of Pennsylvania, jointly to construct, maintain, and operate a bridge across the Allegheny River at a point approximately 19½ miles above the mouth of the river in the counties of Allegheny and Westmoreland, in the State of Pennsylvania; to the Committee on Interstate and Foreign Commerce.

By Mr. KELLER: A bill (H. R. 11036) extending the time for the construction of the bridge across the Mississippi River in Ramsey and Hennepin Counties, Minn., by the Chicago, Milwaukee & St. Paul Railway Co.; to the Committee on Interstate and Foreign Commerce.

By Mr. MORROW: A bill (H. R. 11037) to provide for the payment of one-half the cost of the construction of a bridge across the San Juan River, N. Mex.; to the Committee on Interstate and Foreign Commerce.

By Mr. GARNER of Texas: Joint resolution (H. J. Res. 313) extending the time during which certain domestic animals which have crossed the boundary line into foreign countries may be returned duty free; to the Committee on Ways and Means.

By Mr. BRITTEN: Resolution (H. Res. 387) authorizing and directing the Secretary of State to furnish to the House of Representatives certain information in connection with the modernization of certain capital ships of the United States Navy; to the Committee on Naval Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BRIGGS: A bill (H. R. 11038) granting an increase of pension to Cella Ann Powell; to the Committee on Invalid Pensions.

By Mr. DAVEY: A bill (H. R. 11039) granting an increase of pension to Edward McCloskey; to the Committee on Pensions.

By Mr. DEMPSEY: A bill (H. R. 11040) granting an increase of pension to Grace E. Joyce; to the Committee on Pensions.

Also, a bill (H. R. 11041) granting an increase of pension to John S. Ormsby; to the Committee on Pensions.

By Mr. ELLIOTT: A bill (H. R. 11042) granting an increase of pension to Thomas P. Bright; to the Committee on Pensions.

By Mr. FOSTER: A bill (H. R. 11043) granting an increase of pension to Sarah M. Lant; to the Committee on Invalid Pensions.

By Mr. HILL of Washington: A bill (H. R. 11044) granting an increase of pension to Millie Lawson; to the Committee on Pensions.

By Mr. KOPP: A bill (H. R. 11045) granting an increase of pension to Mary A. Graham; to the Committee on Invalid Pensions.

By Mr. KURTZ: A bill (H. R. 11046) granting a pension to Florence L. Lowe; to the Committee on Invalid Pensions.

By Mr. MANLOVE: A bill (H. R. 11047) granting an increase of pension to Sophonia E. Adams; to the Committee on Invalid Pensions.

By Mr. MOORE of Ohio: A bill (H. R. 11048) granting a pension to Elizabeth Gille; to the Committee on Invalid Pensions.

By Mr. MORGAN: A bill (H. R. 11049) granting an increase of pension to Matilda Smith; to the Committee on Invalid Pensions.

By Mr. OLDFIELD: A bill (H. R. 11050) granting a pension to Kate McGhehey; to the Committee on Pensions.

Also, a bill (H. R. 11051) granting an increase of pension to Elizabeth Hampton; to the Committee on Pensions.

By Mr. ROGERS of Massachusetts: A bill (H. R. 11052) for the relief of D. Murray Cummings; to the Committee on War Claims.

By Mr. ROMJUE: A bill (H. R. 11053) for the relief of Lewis Scarlett; to the Committee on Military Affairs.

By Mr. SCHAFER: A bill (H. R. 11054) for the relief of Thomas J. Porter; to the Committee on Military Affairs.

Also, a bill (H. R. 11055) for the relief of Paul Wallerstein; to the Committee on Military Affairs.

Also, a bill (H. R. 11056) for the relief of Leroy Overpeck; to the Committee on Military Affairs.

By Mr. SWING: A bill (H. R. 11057) granting an increase of pension to Joseph H. Mayo; to the Committee on Pensions.

By Mr. TAYLOR of Tennessee: A bill (H. R. 11058) granting a pension to Malinda J. Walker; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11059) granting an increase of pension to Mary E. Armstrong; to the Committee on Invalid Pensions.

By Mr. TREADWAY: A bill (H. R. 11060) granting an increase of pension to Julia F. A. Browning; to the Committee on Invalid Pensions.

By Mr. VESTAL: A bill (H. R. 11061) granting an increase of pension to Charles L. Berkheimer; to the Committee on Pensions.

Also, a bill (H. R. 11062) granting an increase of pension to Adam F. Addington; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

3272. By the SPEAKER (by request): Petition of Women's Christian Temperance Union, Federation of St. Louis, favoring the distribution of literature by Congress to schools and homes and the incorporation of regular instruction in narcotics in curriculums of schools and colleges; to the Committee on Printing.

3273. Also (by request), petition of Benj. Stone, Jr., Post, No. 68, G. A. R., favoring the repeal of the law authorizing the coinage of 5,000,000 50-cent pieces to be sold to the Stone Mountain Confederate Monumental Association; to the Committee on Coinage, Weights, and Measures.

3274. By Mr. KIESS: Petition of residents of Potter and McKean Counties, protesting against the passage of Senate bill 3218; to the Committee on the District of Columbia.

3275. By Mr. MORROW: Petition of J. O. Seth, Santa Fe, N. Mex.; O. M. Botts, Santa Fe, N. Mex.; M. C. Mechem and F. W. Vellacott, Albuquerque, N. Mex.; J. C. Gilbert, Roswell, N. Mex.; John F. Simms, Albuquerque, N. Mex.; Fred Sherman, Deming, N. Mex.; Howard L. Bickley, Raton, N. Mex.; H. B. Gerhart, Santa Fe, N. Mex.; Geo. C. Taylor, Albuquerque, N. Mex.; Daniel K. Sadler, Raton, N. Mex.; Milton J. Helmick, attorney general, Santa Fe, N. Mex., various members of the State bar, in behalf of Senate bill 3363 and House bill 9221, increasing salaries of Federal judiciary; to the Committee on the Judiciary.

3276. By Mr. RAKER: Letter from California State Branch, National Association of Postal Supervisors, of San Francisco, Calif.; letter of National Federation Post Office Clerks, San Francisco, Calif.; letter from United National Association of Post Office Clerks, Austin, Tex.; letter from Douglas Dunlap, Sacramento, Calif.; letter from S. W. Jarvis, Sacramento, Calif.; letter from clerks and carriers of Bristol, Va.; letter from C. R. White, Sacramento, Calif.; letter from Manley L. Harris, Sacramento, Calif.; letter from John I. Wentworth, Sacramento, Calif.; letter from Harold G. McKellips, Sacramento, Calif.; letter from H. E. Glenn, Sacramento, Calif.; letter from W. B. Ladue, Sacramento, Calif.; letter from Railway Dining and Sleeping Car Training Service, Los Angeles, Calif.; letter from Gilbert Egan, Broderick, Calif.; letter from Mrs. L. J. Clark, Sacramento, Calif.; letter from Thomas W. White, Sacramento, Calif.; letter from Mabel Goodridge, Sacramento, Calif.; letter from C. E. Chenoweth, Sacramento, Calif.; letter from A. K. Pilz, Sacramento, Calif.; letter from Burnice Stuart, Sacramento, Calif.; letter from Geo. E. Labrie, Sacramento, Calif.; letter from Joint Committee Post Office and Railway Mail Employees, Sacramento, Calif.; letter from R. D. Grow, Sacramento, Calif.; letter from Los Angeles Branch Railway Mail Association, Los Angeles, Calif.; letter from Sacramento Branch Railway Mail Association, Sacramento, Calif.; letter from C. J. Larrable, Sacramento, Calif.; resolution adopted by American Federation of Labor at El Paso, Tex., in convention assembled; telegram from George F. Webster, Nevada City, Calif.; letter from J. W. Rains, sr., Sheridan, Calif.; letter from C. A. Beever, Auburn, Calif.; letter of National Federation of Post Office Chauffeurs and Mechanics, San Francisco, Calif.; letter of Henry P. Hook, San Francisco, Calif.; letter of Mrs. M. E. Fellows, Roseville, Calif.; letter of Richard C. Tennant, Roseville, Calif.; letter from Mrs. Jessie E. Astill, Roseville, Calif.; letter of J. P. La Rue, Roseville, Calif.; letter of A. L. Vance, Sacramento, Calif.; letter of E. J. Kilroy, Nevada City, Calif.; letter and resolution from Theo. E. Kaiser, St. Louis, Mo.; letter from Geo. J. Webster, Nevada City, Calif.; telegram from Hon. George L. Jones, judge of the superior court, Nevada City, Calif.; telegram from D. T. Norton, Nevada City, Calif., all indorsing and urging immediate passage of Senate bill 1895, for the increase of salaries to postal employees; to the Committee on the Post Office and Post Roads.

3277. By Mr. WATKINS: Petition of 200 citizens of Portland, Oreg., protesting against the passage of Senate bill 3218; to the Committee on the District of Columbia.

SENATE

MONDAY, December 29, 1924

The Chaplain, Rev. J. J. Muir, D. D., offered the following prayer:

Lord, Thou hast been our dwelling place in all generations before the mountains had brought forth or ever Thou hadst formed the earth and the world. Thou art everlasting. We bless Thee this morning. Thou art the same yesterday, to-day, and forever. As thus we convene in this assembly, thinking of the responsibilities attached to the work and the manifold duties requiring careful attention, we ask, our Father, for Thy guidance, the wisdom which cometh from above. Help us amidst the closing days of the year that we shall rejoice in work well done. Through Jesus Christ our Lord. Amen.

RALPH H. CAMERON, a Senator from the State of Arizona, appeared in his seat to-day.

The reading clerk proceeded to read the Journal of the proceedings of Saturday, December 20, 1924, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

CREDENTIALS

The PRESIDENT pro tempore laid before the Senate the certificate of the Governor of the State of Georgia, certifying to the election of WILLIAM J. HARRIS as a Senator from that State for the term beginning on the 4th day of March, 1925, which was read and ordered to be filed, as follows:

STATE OF GEORGIA,

EXECUTIVE DEPARTMENT, ATLANTA.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that on the 4th day of November, 1924, WILLIAM J. HARRIS was duly chosen by the qualified electors of the State of Georgia a Senator from said State to represent said State in the

Senate of the United States for a term of six years, beginning on the 4th day of March, 1925.

Witness his excellency our governor, Clifford Walker, and our seal, hereto affixed at the capitol, this 20th day of December, in the year of our Lord nineteen hundred twenty-four.

[SEAL]

CLIFFORD WALKER, Governor.

By the governor:

S. G. McLENDON,
Secretary of State.

The PRESIDENT pro tempore also laid before the Senate the certificate of the Governor of the State of Rhode Island and Providence Plantations, certifying to the election of JESSE H. METCALF as a Senator from that State for the term beginning on the 4th day of March, 1925, which was read and ordered to be filed, as follows:

STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that on the 4th day of November, 1924, JESSE H. METCALF was duly chosen by the qualified electors of the State of Rhode Island and Providence Plantations a Senator from said State to represent said State in the Senate of the United States for the term of six years, beginning on the 4th day of March, 1925.

Witness his excellency our governor, William S. Flynn, and our seal, hereto affixed at Providence, this 23d day of December, in the year of our Lord nineteen hundred twenty-four.

[SEAL]

WILLIAM S. FLYNN, Governor.

By the governor:

ERNEST L. SPRAGUE,
Secretary of State.

GRANT MEMORIAL COMMISSION

The PRESIDENT pro tempore laid before the Senate a communication from the chairman and members of the Grant Memorial Commission, submitting a draft of a proposed bill, accompanied by an itemized statement for an additional appropriation of \$8,926.12 on account of the construction of the Grant Memorial in the east end of the Botanic Garden grounds in the District of Columbia, which was referred to the Committee on the Library.

WITHDRAWALS AND RESTORATIONS OF PUBLIC LANDS

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of the Interior, transmitting, pursuant to law, a report of withdrawals and restorations of public lands under the act of June 25, 1910 (36 Stat. 847), during the period from December 1, 1923, to November 30, 1924, inclusive, which was referred to the Committee on Public Lands and Surveys.

CONDITION OF RAILROAD EQUIPMENT

The PRESIDENT pro tempore laid before the Senate a communication from the chairman of the Interstate Commerce Commission, transmitting, in compliance with Senate Resolution 438, of February 26, 1923, a report for the month of November, 1924, showing the condition of railroad equipment and related information, which was referred to the Committee on Interstate Commerce.

DISPOSITION OF USELESS PAPERS

The PRESIDENT pro tempore laid before the Senate a communication from the Postmaster General, transmitting, pursuant to law, a schedule of papers and documents on file in the department which are not needed in the conduct of business and having no permanent value or historical interest, and asking for action looking to their disposition, which was referred to a Joint Select Committee on the Disposition of Useless Papers in the Executive Departments. The President pro tempore appointed Mr. STERLING and Mr. McKELLAR members of the committee on the part of the Senate, and ordered that the Secretary notify the House of Representatives thereof.

PRESIDENTIAL APPROVAL

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that on December 22, 1924, the President approved and signed the joint resolution (S. J. Res. 157) extending appropriation in connection with Columbia Basin investigation.

REPLICA OF THE HOUDON BUST OF WASHINGTON (S. DOC. NO. 176)

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying papers, referred to the Committee on the Library and ordered to be printed:

To the Congress of the United States:

I transmit herewith a report by the Secretary of State, recommending an appropriation of \$1,000 for the purpose of securing a replica of the Houdon bust of Washington for lodgment in the Pan American Building, in fulfillment of a decision that each Government which is a member of the Pan American Union should present a white marble bust, with a suitable pedestal, of the national hero of such country.

The request of the Secretary of State has my approval, and I strongly recommend the request to the favorable consideration of Congress.

CALVIN COOLIDGE.

THE WHITE HOUSE,
Washington, December 29, 1924.

PETITIONS AND MEMORIALS

The PRESIDENT pro tempore laid before the Senate a resolution of the South San Francisco (Calif.) Chamber of Commerce, favoring the enactment of Senate bill 1898, providing increased compensation for postal employees, which was referred to the Committee on Post Offices and Post Roads.

He also laid before the Senate a resolution unanimously adopted by the board of directors of the Maritime Association of the Port of New York, favoring improvement and modernization of the naval service so that the full naval strength as proposed in the Disarmament Conference may be adequately maintained, which was referred to the Committee on Naval Affairs.

He also laid before the Senate a resolution adopted by members of the Seventh Day Baptist Church of Walworth, Wis., favoring distribution by Congress of literature on the narcotic traffic to schools and homes, etc., which was referred to the Committee on Education and Labor.

He also laid before the Senate a telegram and letter in the nature of memorials, signed by L. A. Beckstead, secretary, on behalf of The Lahontan Valley Water Users' Association, at Fallon, Nev., remonstrating against alleged propaganda for the Spanish Springs irrigation project and requesting an investigation of the subject matter, which were referred to the Committee on Appropriations.

Mr. WILLIS. Mr. President, I ask unanimous consent to have referred to the Committee on Foreign Relations and printed in the RECORD certain resolutions adopted by Egbert Camp, No. 10, of the Spanish War Veterans at Toledo, Ohio, relative to the Isle of Pines treaty.

There being no objection, the resolutions were referred to the Committee on Foreign Relations and ordered to be printed in the RECORD as follows:

Whereas there is now pending before the Senate of the United States a certain treaty, whereby the United States Government will relinquish all right, claim, or title in and to the territory known as the Isle of Pines, which island was ceded to the United States by virtue of the treaty of Paris between our country and Spain at the close of the Spanish-American War; and

Whereas a full and complete study of the details of the treaty of Paris will conclusively demonstrate to the unprejudiced mind of the clear title of the United States to the Isle of Pines; and the subsequent acts of President McKinley and officials of our Government, particularly in offering inducements to citizens of the United States to invest their capital and savings in business and homes in the Isle of Pines under color of title in the United States Government, is full and convincing proof of the ownership of said island; and

Whereas the flower of the man power of our Nation voluntarily enlisted in the cause of humanity at the call of President McKinley to free Cuba and other islands from the inhuman rule of Spain; the Spanish war volunteers suffered the hardships of battle, braved the elements on sea and land and endured the insanitary conditions of camp life with the resultant injuries therefrom, all without hope of recompense or reward; and

Whereas our great war President, William McKinley, was the strongest supporter of the title to the Isle of Pines in the United States Government and would never and would not at the present time sanction or approve this indignity to the sufferers and survivors of the Spanish-American War: Therefore be it

Resolved, That Egbert Camp, No. 10, of Spanish war veterans in meeting assembled this 9th day of December, 1924, in respect and honor of the memory of our departed Commander in Chief, William McKinley, and in respect and honor of the memory of thousands of our departed comrades, their widows and orphans, and in honor and fairness to our living comrades, sincerely and solemnly protest the passage of this unfair, unreasonable, and unwarranted treaty, relinquishing the title of the United States Government to the Isle of Pines; and be it further

Resolved, That copies of these resolutions be forwarded to our honorable President, Calvin Coolidge; our United States Senators from

Ohio, Hon. FRANK B. WILLIS and Hon. SIMON D. FESS; to the Representative of the ninth congressional district of Ohio, Hon. ISAAC R. SHERWOOD; to the press; and that a copy be spread upon the minutes of this meeting.

CHAS. S. WRAAG,
Chairman, Legislative Committee.

JAMES STIFES,
Commander Egbert Camp, No. 19, Toledo, Ohio.

Mr. WILLIS also presented the memorial of D. M. Butler and 75 other citizens of Sebring, Ohio, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. CAMERON presented a letter relative to grazing conditions in forest reservations, which was referred to the Committee on Agriculture and Forestry and ordered to be printed in the RECORD, as follows:

PHOENIX, ARIZ., December 5, 1924.

Hon. RALPH CAMERON,
United States Senate, Washington, D. C.

MY DEAR SENATOR: On behalf of a number of clients in this State who are engaged in the cattle business, I am writing to invite your attention to conditions at present existing in this State and in other States in which there are forest reservations.

In this State a large percentage of the range cattle are grazing on forest reservations, and the cattle industry in this State and all the other so-called Mountain States is vitally affected by the regulations enforced by the Forest Service.

Several years prior to the war, when the cattle industry was prosperous, the grazing fee for cattle ranging on forest reservations was fixed at 35 cents per head. This charge under then existing conditions could be easily met by the cattlemen, and they had no cause for complaint, but since that time the grazing fees have been gradually increased, until the charge is now \$1 per annum per head for all cattle grazing on these reservations, and I have been informed that plans have been considered for making a still further increase in grazing fees.

As you know, and as the forest officials undoubtedly know, the cattle industry in the Southwest is now and for several years has been laboring under very adverse conditions. Numerous cattlemen in this State, including many of the largest owners, have been forced into bankruptcy, and under bankruptcy and foreclosure proceedings many thousands of cattle have been forced on the market for whatever they would bring, thereby keeping the prices at the minimum, and taking from the ranges many stock cattle which should be kept on the ranges as breeders.

By reason of the fact that my clients are mostly cattlemen who are operating throughout the State, I am very familiar with the conditions, and believe that practically all of the cattlemen have been operating at a loss during the last four years. In few, if any, cases have profits realized been sufficient to cover the grazing fees exacted by the Forest Service. Practically all the cattlemen of my acquaintance are looking for an opportunity to get out of the business. Breeding cows which should be kept on the ranges are being sold for whatever they will bring, and it seems inevitable that the next few years will witness a shortage of cattle unless something can be done to aid the grazing sections.

While this situation primarily affects the cattle growers of the range States from which most of the feeders are drawn to be fattened and put on the market as beef, it will ultimately affect the entire country, since a shortage of cattle necessarily means a large increase in the price of beef.

I note by the President's message that it will be his policy to assist the agricultural sections in getting back to a normal basis, and I assume that he will be equally interested in doing whatever can be reasonably done to assist the grazing sections which are at present in far greater need of assistance than the farming sections, and I wish to suggest that all the grazing States would be greatly benefited by the elimination of the very substantial reduction of these grazing fees during the next two years.

The cattlemen are economizing in every way possible, and in most cases which have come to my notice have been able to arrange credits for the minimum of groceries, salt, and other supplies which are absolutely essential, but in a very large number of cases they have been absolutely unable to secure money for the payment of grazing fees at the rate of \$1 per head for their cattle.

The cattlemen of Arizona are looking to you to do whatever may be possible to assist them, and it has occurred to me that a resolution might be put through Congress suspending the collection of grazing fees for the years 1925 and 1926.

In this connection I wish to invite your attention to the fact that fully 50 per cent of the area of the State of Arizona has been withdrawn for forest and other reservations, thereby reducing to this extent the lands in the State which would be available for taxation.

As a result of this the tax rate in the State is unreasonably high and the cattlemen, who, as a rule are entirely without cash assets, are not only called upon to pay these high taxes but in addition thereto to pay the grazing fees levied against them by the Government. The authorities of the various counties understand the conditions under which the cattlemen are laboring, and there have been, so far as I know, but few, if any, sales for taxes, the authorities allowing these taxes to remain in default, but the Forest Service demands cash for these grazing fees and the cattlemen have not the cash to pay.

Yours very sincerely,

JOHN R. HAMPTON.

Mr. CAMERON also presented a telegram relative to development in the lower Colorado River, which was referred to the Committee on Irrigation and Reclamation and ordered to be printed in the RECORD, as follows:

PHOENIX, ARIZ., December 26, 1924.

Senator RALPH CAMERON, Washington, D. C.:

The undersigned, delegation of Arizona citizens interested in the welfare of the future of this State and being disturbed over the proceedings in Washington with reference to proposed development in the Colorado River as provided for in the Swing-Johnson bill, called upon Governor Hunt this morning for the purpose of urging upon him the necessity of taking every possible means to preserve intact Arizona's rights in the Colorado River. You are aware of the fact that since the war the business depression in the mining industry and in agriculture has been particularly felt in this State, which has made it difficult to raise by taxation the revenues necessary to conduct the State government and also provide adequate funds to make the surveys and investigations necessary to demonstrate Arizona's contention as to the practicability of irrigating several million acres of land in Arizona in addition to the immense power development. We called upon the governor to assure him that in order to protect our rights in the Colorado River we favored asserting every legal right Arizona possesses as a sovereign State; that it is our desire that we maintain friendly relations with our sister States in the Colorado River Basin, but that we do not intend to be intimidated, browbeaten, or coerced into any position which will jeopardize the interests of this State. With flood control as a pretext, California is trying to force through the Swing-Johnson bill, which will give California water and power, but which will make the irrigation of millions of acres of land in Arizona impossible. This should not be permitted, and the attempt to do so will meet with all the resistance it is possible for us to develop in this State. The welfare of California does not make it necessary that Arizona's interests should be sacrificed. The building of the Boulder Canyon Dam will flood the river at places where dams should properly be built if Arizona is to have any large agricultural development. With dams properly located, it will be possible to have flood control, full power development, and also irrigate several million acres of land in Arizona. This will be putting the river to its highest and greatest beneficial use and development. The State of Arizona is putting a survey party in the field this week to obtain definite information as to disputed engineering questions at Spencer Canyon and other places on the Colorado River and in Arizona. We hope to have more complete information to be submitted to Congress for its consideration in a short time. We urge you to utilize every means at your command as Arizona's representative in Congress to assert and protect the rights of the State and to prevent legislation that would be ruinous to us.

D. P. KIMBALL,
A. L. BOEHMER,
ED. RUDOLF,
E. T. IRVINE,
VERNON L. CLARK,
H. L. GREDES,
W. C. LEHAN,
FRANK T. ALKIRE,
R. F. GARNETT,
ROBT. H. WILLIAMS.

Col. WM. A. GLANFORD,
WILL GLEASON,
Senator J. J. COX,
E. J. FLOCK,
HOWARD L. MILLER,
GEO. W. STURDEVANT,
Senator H. A. DAVIS,
Senator FRED T. COLTER,
C. W. STEELE,
C. W. GOODMAN.

Mr. FESS presented a memorial signed by 60 citizens of Alliance, Ohio, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. CURTIS presented a resolution of the Kansas Engineering Society, favoring the passage of the so-called Temple bill, providing for the completion of the work of preparing topographic maps of the United States, etc., which was referred to the Committee on Public Lands and Surveys.

Mr. LADD presented a resolution of the Jamestown (N. Dak.) Chamber of Commerce, favoring the passage of legislation to more adequately carry out the intent of the national defense act, which was referred to the Committee on Military Affairs.

Mr. CAPPER presented the memorial of High Prairie Local, No. 752, Farmers' Union, at Baldwin, Kans., remonstrating against the passage of legislation increasing postal rates, which was referred to the Committee on Post Offices and Post Roads.

He also presented memorials of sundry citizens of Decatur County, Liberal, and Kansas City, all in the State of Kansas, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which were referred to the Committee on the District of Columbia.

Mr. SHIPSTEAD presented memorials of sundry citizens of Staples, of Winona and vicinity, and of Itasca County, all in the State of Minnesota, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which were referred to the Committee on the District of Columbia.

He also presented a memorial of 408 members of the Chippewa Band of Indians of Minnesota, remonstrating against the passage of the departmental draft of the so-called "jurisdictional bill," covering matters in dispute between the Chippewa Indians of Minnesota and the United States of America, which was referred to the Committee on Indian Affairs.

Mr. McLEAN presented a resolution of the Woman's Club of Killingly, Conn., favoring the passage of Senate Joint Resolution 99, providing an appropriation to defray the expenses of the quinquennial meeting of the International Council of Women, which was referred to the Committee on Foreign Relations.

He also presented petitions of the general executive committee Woman's Missionary Society of the Methodist Church at Forestville, and sundry members of the Woman's Foreign Missionary Society of the Methodist Episcopal Church of Ansonia, all in the State of Connecticut, praying for a reconsideration of the so-called alien exclusion act, with a view to fostering the bonds of friendship between the United States and other nations, which were referred to the Committee on Foreign Relations.

He also presented the petition of the officers of Local No. 73, Journeymen Barber's Union of America, of Hartford, Conn., praying for the passage of Senate bill 3218, providing for the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a telegram and a letter in the nature of petitions of the Woman's Christian Temperance Union of Hartford and the Woman's Christian Temperance Union of Winsted, in the State of Connecticut, praying for the passage of House bill 6645, proposing to amend the national prohibition act, to establish a bureau of prohibition in the Treasury Department, and to place its personnel under the civil service, etc., which were referred to the Committee on the Judiciary.

He also presented a resolution adopted at the annual meeting of the Connecticut Fish and Game Protective Association, at New Haven, Conn., favoring the passage of Senate bill 2913, the so-called game refuge public shooting ground bill, which was referred to the Committee on Agriculture and Forestry.

He also presented resolutions adopted by the Lions Club of New Haven and of the Fifth District Republican Club, both in the State of Connecticut, favoring the passage of legislation granting increased compensation to postal employees, which were referred to the Committee on Post Offices and Post Roads.

He also presented a telegram and letters in the nature of petitions from Henry L. Converse, secretary, Branch No. 895, National Association of Letter Carriers, of Putnam; of Russell Circle No. 1, National Circle Daughters of Isabella; and of War Mothers' Association No. 1, of New Haven, all in the State of Connecticut, praying for the passage of legislation granting increased compensation to postal employees, which were referred to the Committee on Post Offices and Post Roads.

REPORT OF COMMITTEE

Mr. BROOKHART, from the Committee on Military Affairs, to which was referred the bill (S. 3534) to correct the military record of Thomas C. Johnson, deceased, reported it with an amendment and submitted a report (No. 826) thereon.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. FERNALD:

A bill (S. 3761) granting a pension to Joseph Simpson (with accompanying papers); and

A bill (S. 3762) granting a pension to Chastena H. Haskell (with accompanying papers); to the Committee on Pensions.

By Mr. BALL:

A bill (S. 3763) to further regulate certain public-service corporations operating within the District of Columbia, and for other purposes;

A bill (S. 3764) to create and establish a commission, as an independent establishment of the Federal Government, to regulate rents in the District of Columbia; and

A bill (S. 3765) to authorize a five-year building program for the public-school system of the District of Columbia which shall provide school buildings adequate in size and facilities to make possible an efficient system of public education in the District of Columbia; to the Committee on the District of Columbia.

Mr. SHIPSTEAD. I introduce a bill as a substitute for Senate bill 3649, to extend the time of the Chicago, Milwaukee & St. Paul Railroad for completion of bridge across the Mississippi River, now in the Committee on Commerce.

By Mr. SHIPSTEAD:

A bill (S. 3766) to extend the time to the Chicago, Milwaukee & St. Paul Railway Co. for commencement and completion of bridge across the Mississippi River; to the Committee on Commerce.

By Mr. CUMMINS:

A bill (S. 3767) to amend section 198 of the Criminal Code, as amended; to the Committee on the Judiciary.

By Mr. SHEPPARD:

A bill (S. 3768) for the relief of Josephine Rollinson (with accompanying papers); to the Committee on Claims.

By Mr. NORBECK:

A bill (S. 3769) authorizing the issuance of patents to the State of South Dakota for park purposes of certain lands within the Custer State Park, now claimed under the United States general mining laws, and for other purposes; to the Committee on Public Lands and Surveys.

By Mr. CAPPER:

A bill (S. 3770) to extend the provisions, limitations, and benefits of the acts of July 27, 1892, June 27, 1902, and March 4, 1917, to any person who rendered 30 days' service or more against the Indians between January 1, 1859, and January 31, 1891, inclusive; to the Committee on Pensions.

By Mr. BORAH:

A bill (S. 3771) granting an increase of pension to Annie J. Jones (with accompanying papers); to the Committee on Pensions.

By Mr. McLEAN:

A bill (S. 3772) to authorize the reduction of and to fix the rate of interest to be paid by carriers upon notes or other evidences of indebtedness heretofore issued under the provisions of section 207 of the transportation act, 1920, or section 210 of said act, as amended by an act approved June 5, 1920; to the Committee on Interstate Commerce.

By Mr. COUZENS:

A bill (S. 3773) to prevent and punish the use of political influence in the appointment or promotion of Federal employees; and

A bill (S. 3774) to provide for the retirement of Clarence W. Sessions, judge of the District Court for the Western District of Michigan; to the Committee on the Judiciary.

A bill (S. 3775) for the relief of William H. Crampton, formerly a captain in the United States Army; to the Committee on Military Affairs.

A bill (S. 3776) granting a pension to Margaret H. Haan; to the Committee on Pensions.

AMENDMENTS TO MUSCLE SHOALS BILL

Mr. LADD submitted sundry amendments intended to be proposed by him to House bill 518, the so-called Muscle Shoals bill, which were ordered to lie on the table and to be printed.

AMENDMENT TO NAVY DEPARTMENT APPROPRIATION BILL

Mr. FLETCHER submitted an amendment proposing to appropriate \$100,000 for submarine base extension at Key West, Fla., intended to be proposed by him to House bill 10724, the Navy Department appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

PROPOSED COMMITTEE ON WORLD WAR VETERANS' LEGISLATION

Mr. SHEPPARD submitted the following notice, which was read and ordered to lie on the table:

I hereby give notice of my intention to offer an amendment to Rule XXV, Standing Rules of the Senate, for the purpose of creating a committee on World War Veterans' Legislation.

POSTAL SALARIES

Mr. NORBECK. I present a communication from the Post Office Department relative to postal salaries, which I ask may

be referred to the Committee on Post Offices and Post Roads and printed in the Record.

There being no objection, the communication was referred to the Committee on Post Offices and Post Roads and ordered to be printed in the RECORD, as follows:

OFFICE OF THE POSTMASTER GENERAL,
Washington, D. C., December 19, 1924.

Hon. PETER NORBECK,
United States Senate.

MY DEAR SENATOR NORBECK: Replying to your request, I hand you herewith a copy of a memorandum dated November 28, 1924, which shows salaries and average salaries in the Postal Service and a comparison with salaries in like occupations outside the service.

Sincerely yours,

HARRY S. NEW, Postmaster General.

NOVEMBER 28, 1924.

(Memorandum for the Postmaster General)

The act approved July 2, 1918, provided increased compensation of \$200 per annum to clerks and carriers in post offices and to railway postal clerks, and approximately \$240 per annum to rural carriers. In addition there were increases in compensation to a large number of the supervisory force.

The act of November 8, 1919, further increased the compensation of postal employees from \$100 to \$200 per annum.

The act of June 5, 1920, generally known as the reclassification act, provided further increases in compensation ranging from \$200 to \$300 for clerks and carriers and railway postal clerks, and \$260 for rural carriers, and in addition there were substantial increases in salaries of the supervisory force ranging from \$200 to \$600.

The effect of these increases in salary grades over those in effect during the fiscal year 1918 may be summarized as follows:

An increase of \$600 granted to clerks and carriers in post offices.

An increase of \$500 granted to railway postal clerks.

An increase of \$600 granted to rural carriers.

The following summary shows the additional expenditures on account of increased compensation over and above the expenditures under the salary scale that was in effect during the fiscal year 1918 as the result of the three acts of Congress above referred to for the fiscal years 1919 to 1924, both inclusive:

Fiscal year:	
1919	\$33,202,600
1920	68,901,000
1921	110,756,000
1922	118,221,000
1923	122,882,500
1924	129,884,576
Total	583,847,676

These amounts are cumulative; that is, the amount stated for the year 1920 also includes the amount which was additional for the year 1919.

SALARIES PAID IN THE SERVICE

The following is the range of salaries of officials and employees in the Postal Service:

Post-office clerks and carriers	\$1,400.00 to \$1,800
Special clerks	1,900.00 to 2,000
Average salary, post-office clerks, 1923	1,691.68
Average salary, post-office carriers, 1924	1,743.81
Railway postal clerks	1,600.00 to 2,300
Average salary of railway postal clerks, 1924	2,111.00
Average salary of railway postal clerks, including travel allowance	2,294.00
Clerks at division headquarters of the Railway Mail Service and post-office inspectors	1,600.00 to 2,300
Chief clerks in post-office inspectors' headquarters	2,600.00
Laborers in post offices and the Railway Mail Service	1,350.00 to 1,450
Superintendents of mails, post-office service	2,100.00 to 4,400
Assistant superintendent of mails, post-office service	2,200.00 to 3,800
Foreman, post-office service	2,100.00 to 2,300
Postal cashiers, post-office service	2,600.00 to 4,000
Money-order cashiers, post-office service	2,300.00 to 3,600
Assistant chief clerks, Railway Mail Service	2,500.00
Chief clerks, Railway Mail Service	3,000.00
Assistant division superintendents, Railway Mail Service	3,200.00
Division superintendents, Railway Mail Service	4,200.00
Post-office inspectors	2,300.00 to 3,700
Post-office inspectors in charge	4,200.00

AVERAGE SALARIES OF POST-OFFICE CLERKS, POST-OFFICE CARRIERS, AND RAILWAY POSTAL CLERKS

Comparisons of the average salaries in the Postal Service with average salaries of like or similar employments in other governmental services and in business institutions must be made with the average salaries of clerks, carriers, and railway postal clerks. These salaries in the Postal Service are as follows:

Average salaries, fiscal year 1924, of—	
Post-office clerks	\$1,691.68
Post-office carriers	1,743.81
Railway postal clerks	2,111.00
Railway postal clerks, including travel allowance	2,294.00

AVERAGE SALARIES OF LIKE EMPLOYEES IN THE DEPARTMENTAL SERVICE IN WASHINGTON

A reliable estimate of the average of salaries for employees for grades 1 to 7, inclusive, in the clerical, administrative, and fiscal services in the District of Columbia places it at \$1,704 per annum, and for the same for grades from 1 to 6, inclusive, \$1,659 per annum.

SALARIES PAID IN BUSINESS INSTITUTIONS THROUGHOUT THE COUNTRY

In May, 1924, the department secured through direct investigation by its special officers detailed to the work the range of salaries paid to persons employed by business institutions throughout the country. Investigations were made in the following cities whose populations range from 1,972 to 5,600,000:

New York, N. Y.; Chicago, Ill.; Detroit, Mich.; Boston, Mass.; Kansas City, Mo.; New Haven, Conn.; Des Moines, Iowa; Scranton, Pa.; Utica, N. Y.; St. Joseph, Mo.; Harrisburg, Pa.; Montgomery, Ala.; Hagerstown, Md.; Jackson, Tenn.; Geneva, N. Y.; Guthrie, Okla.; Illon, N. Y.; Herkimer, N. Y.; Americus, Ga.; Tuscaloosa, Ala.; Salem, Ohio; Cadillac, Mich.; Webb City, Mo.; Seneca Falls, N. Y.; Bryan, Ohio; Danville, Ky.; Corinth, Miss.; Portland, Ind.; Ravenna, Ohio; Elkton, Md.; Newport, Pa.

The general average for the entire group of these offices for each class of employee below named was found to be as follows:

Bank clerks	\$1,382
Stock clerks	1,223
Shipping clerks	1,119
Railroad clerks	1,455
Stenographers	1,299
Bookkeepers	1,398
General office clerks	1,176
Cashiers	1,033
Stenographers	1,299
Typists	1,029
Freight handlers	1,273
Express handlers	1,357
Express clerks	1,492
Delivery drivers	1,377

It is not argued from comparisons with salaries paid employees in general business that it is not just to pay to postal employees a scale of wages somewhat higher. The conditions under which employment is undertaken in the Postal Service and those under which it is undertaken in general business are different. We expect to attract to the Postal Service those who will make it a life work. Consequently the scale of salaries should be high enough to insure permanent continuance in the service. This means a scale sufficiently high to enable the employee to take upon himself all the obligations of citizenship and his place in society. However, a careful comparison of rates of compensation paid to postal employees and those paid to others in like grades of commercial lines shows that generally the advantage rests with the postal employee.

LABOR TURNOVER IN THE POSTAL SERVICE

The following statements show for clerks and carriers in the Postal Service the number of resignations.

CARRIERS

Fiscal year	Number in service	Number of resignations	Percentage
1919	35,024	2,025	5.78
1920	36,142	2,528	6.99
1921	38,532	1,348	3.50
1922	39,485	637	1.61
1923	40,134	858	2.17
1924	43,829	921	2.10

CLERKS

Fiscal year	Number in service	Number of resignations	Percentage
1919	44,681	4,961	11.10
1920	47,598	7,473	15.70
1921	53,703	5,161	9.61
1922	56,029	3,112	5.55
1923	57,183	3,365	5.88
1924	63,182	4,144	6.56

The following shows a comparative statement showing the resignations of clerks and carriers during the five months' period ended November 30, 1923 and 1924:

Month	Clerks resigned		Carriers resigned	
	1923	1924	1923	1924
July	266	284	79	60
August	402	196	86	62
September	400	329	90	62
October	260	421	88	91
November	800	232	91	64
Total	2,128	1,462	434	339

MAINTENANCE OF LISTS OF ELIGIBLES POSTAL CLERKS AND CARRIERS

There does not appear to be any greater difficulty in maintaining lists of eligibles at this time than there was when this matter was before Congress last spring. In general there appears to be no difficulty in maintaining these lists to fill vacancies. There are certain localities, however, where difficulty does exist, these being large cities or industrial communities affected in the one case by high costs of living due to metropolitan conditions and in the other case by the higher wage scale and living costs prevailing in the industrial communities.

The latest reports from 76 offices of the country show a general condition of unemployed available time of substitute clerks and carriers. These are shown in the following table for the 76 largest offices as a whole:

	Number	Work equivalent to whole time	Surplus
Substitute clerks.....	6,334	4,343	2,010
Average per office.....	83	56	26
Substitute carriers.....	5,440	3,731	1,742
Average per office.....	71	49	23

RAILWAY POSTAL CLERKS

There is no difficulty experienced in securing a sufficient number of eligibles to fill vacancies in the Railway Mail Service except in very few States, such as those having very small populations, as Nevada, Wyoming, and Arizona. There is no more trouble in filling vacancies in the Railway Mail Service than there was before the war.

There are approximately 10,000 eligibles on the list at the present time, and there were 27,000 applicants for examination held throughout the country by the Civil Service Commission on May 3, 1924.

STEWART.

WOODROW WILSON FOUNDATION

Mr. FLETCHER. Mr. President, last night at the Hotel Astor, in New York, two very notable addresses were delivered at a meeting conducted under the auspices of the Woodrow Wilson Foundation. I ask to have printed in the RECORD, in order that they may be permanently preserved, these addresses, one by Mr. Norman H. Davis as it appears in the New York World on page 2, and the other by Viscount Cecil as it appears in the New York Times on page 2.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

The matter referred to is here printed, as follows:

[From the New York World of Monday, December 29, 1924]

EQUAL RIGHTS FOR ALL NATIONS WAS WILSON'S AIM, SAYS DAVIS

In his presentation speech Mr. Davis said:

"In the world's history it is only at rare intervals, and at some period of crisis, that any marked advance has been made by men in their long struggle to overcome and rise above conditions which have hampered their freedom and growth.

"On such occasions men of faith and vision, with the spirit and courage of pioneers, have always pointed out the way and taken the lead. After such an advance a long period has been required to fortify the ground gained and to move forward those of lesser faith and courage who were opposed to it and chose to remain behind.

"In the recent and terrible crisis in world affairs it was Woodrow Wilson who took the lead and pointed out to men and to nations the way leading from their difficulties to peace and progress. He saw, with a vision vouchsafed to few, that the conditions of life and the relationships among nations had been so transformed by scientific and industrial developments that further progress could not be made unless new and more modern methods were devised for dealing with the many economic, social, and political problems that had been created.

FOR LAW BASED ON JUSTICE

"He proposed in effect that the principles of democracy which have served as the foundations of individual freedom shall be applied to the relationships between nations; that privilege as between nations shall give way to equal rights for all nations, and that the hostile grouping of nations into alliances based on force shall be superseded by a system of cooperation between all the powers for the maintenance of law and order based on justice.

"As the war progressed and its horrors and losses increased, the feeling and conviction grew in the heart and mind of Woodrow Wilson that the only justification for such a terrible sacrifice of human life would be to make it a war to end all war and to make this world a better and a happier abode for man.

"He directed his great influence and ability to that task with such a spirit of consecration that he succeeded in lifting the divergent aims of the war into a moral atmosphere, where they were transformed and molded into the aims of democracy.

"Although the lessons of the war and the exalted aims for which it was waged were almost submerged by a wave of passion and intense nationalism that came in its wake, the world was infinitely better off for having seen, even for a moment, the vision which Woodrow Wilson held before it, and the advance forces of civilization had gained ground from which they could not be dislodged.

GREATEST STEP TOWARD PEACE

"Woodrow Wilson made only such concessions to the postwar reaction as were necessary to secure a treaty of peace, but in exchange insisted on inserting in the treaty a covenant to establish an organized system of international cooperation around which the moral forces of mankind could rally and work for a lasting peace.

"The system thus established has already become an integral part of international life. It is not perfect, and probably never will be, for there are no perfect governments to make it so; but whatever its defect, it is the most far-reaching attempt in all history to substitute reason and law for force and war and the greatest advance ever made toward the banishment of war and the maintenance of peace.

"To Woodrow Wilson must be given the chief credit for this organized system of international cooperation, and to Lord Cecil that of collaborating effectively with him in its creation and of developing it and making it work.

"Few statesmen since the war have been able to rise above the plane of political expediency and work for the upbuilding of a comprehensive system of peace. Lord Cecil stands out as one of the few who have not faltered, nor doubted, nor retreated, but who, year in and year out, have worked in all the fields of international life for higher standards of ethics and a better understanding between nations.

"That the League of Nations was not used for other purposes than those for which it was intended during those first few trying years of post-war reaction, when fear, prejudice, and blind selfishness were such potent forces, is largely due to his faith and consecrated efforts.

"His work for disarmament has been both practical and constructive. He has succeeded to a great extent in making clear that a substantial reduction in armaments can only be brought about by reducing the feeling of fear or insecurity, and by establishing international justice and safety.

"It is therefore fitting that we should show our appreciation to Lord Cecil, who has believed in and does so much to give effect to the ideals and the great plan for world peace for which Woodrow Wilson gave his life.

"As part of the award, I have the pleasure to present to Lord Cecil this plaque, which will serve as a permanent record. In presenting it I desire to express publicly on behalf of the foundation our sincere thanks to Mr. Ivan Mestrovic, the eminent Yugoslav sculptor, who has made this beautiful work of art as a labor of love.

"This ideal is not only beautiful, but it is symbolic of Mr. Wilson's three chief attributes: Wisdom, justice, and love of humanity."

[From the New York Times of Monday, December 29, 1924]

TEXT OF VISCOUNT CECIL'S LEAGUE OF NATIONS SPEECH

Following is the full text of Viscount Cecil's speech at the Woodrow Wilson Foundation dinner at the Hotel Astor last night:

"In the first place, let me try to express to you something of the gratitude which I feel for the great honor that has been done me by my becoming the first recipient of this award. I can very truly and honestly say that there is no honor which I should more value in the world than this, and the gratification is increased very much by the fact that the award has been made to one of my nationality by the very distinguished jurors that have had to consider the question. It does seem to me a very fine thing to have done. There are, as we all know, many American citizens who have done magnificent work for peace, and the fact that the jury should have looked outside their own country for the first award shows a spirit of national generosity which is, I venture to say, characteristic of the American Nation, and evidence of the greatness of its spirit. Accept, then, from the bottom of my heart, my warmest, my sincerest thanks.

"I will not weary you with trying to enumerate the many gratifying aspects this event holds for me, but there is one to which I should wish to allude. The fact that it is connected with the name of Woodrow Wilson is a great element in the pride with which I regard it. I had the privilege of the acquaintance,

may I not say the friendship, of Mr. Wilson, and I am not going to attempt any elaborate eulogy of him to-night. He was a very great man. He was a great American—a great citizen of the world. There is no title to fame higher than that. He possessed, as we all know, a very remarkable combination of the qualities of the student and the statesman, a rare combination, and as admirable as it is rare. It gave to him not only the cultured eloquence which we all admire, but that capacity for action which is not always found with academic training. But beyond all this, and beyond many other intellectual and moral qualities which he possessed he was by the admission of all an idealist, that is to say, a man who set before him some definite object of achievement, to attain which he thought no personal sacrifice too great. He knew his moments of great popularity, he knew his moments of adversity, and through all he maintained that steady course which the pursuit of ideals alone renders possible.

TWO PICTURES OF WILSON

"I have two pictures of him in my mind which will remain as long as I live. One is of his arrival in London after the armistice. I see crowded streets, cheering multitudes, all the marks of enthusiastic admiration which have rarely, if ever, been paid by the masses of my fellow countrymen to one who was not one of their nation. No foreign statesman or foreign potentate has, I believe, ever been received as President Wilson was received at the end of 1918, and he was greeted not only for himself but because he embodied the passionate aspiration of the peoples of the world for peace. He was regarded as the apostle of peace, and as such he was received in London, in Rome, and in Paris with unbounded enthusiasm.

"Then I have another picture of him in a quiet house in Washington, where I saw him 18 months ago. The contrast was striking. He was broken in health; he had no longer any official position; his power was apparently gone. He received me in private, laboring under grave physical disabilities, but his manner, his attitude of mind remained unchanged. There was the same courtesy, calm and dignified, which I had known when I called upon him in his presidential lodgings in Paris, and he talked to me just as he had talked to me then. And as I rose to take leave I asked him something about my own doings in this country and whether he approved of them. He replied with his usual kindness. Then he added these remarkable words:

"But remember we are winning; make no concessions." A very striking phrase. I am not here to express agreement or disagreement with its sense. Some will think it wise and others unwise; some will think it prudent and far-seeing, and others will think it the reverse; but I can not believe that there will be anyone who will not admire such an indomitable spirit, such lion-hearted courage. It is only to idealists that an attitude of that kind is possible. Devotion to an idea, to something beyond and above one's self alone makes courage of that kind possible.

PEACE BASED ON UNITY

"And what was this idea? Peace. Undoubtedly; but it was something more definite and precise than that. It was rather peace based on the unity, the solidarity of mankind, the idea that humanity was in the last analysis one and that if they could be made conscious of this unity peace would be possible.

"I have another recollection of Mr. Wilson. This time it was in a not very large room in the Hotel Crillon, at Paris, a meeting of the League of Nations Commission of the Peace Conference. Very hot and crowded it was, men from many nationalities being there, all representatives of the Allies in the Great War, still affected by the war mind—ultranationalistic, perhaps, one may say of them—and in the course of some discussion President Wilson spoke to them; and to that audience, perhaps as difficult as it is possible to conceive, he urged this doctrine of the solidarity of mankind, finishing with a glowing phrase to the effect that in the future—it might be the distant future—the time would come when loyalty to humanity would be as imperative a duty as was now patriotism to one's country.

"It was a moving appeal, and even that unresponsive assembly felt it so. I do not, of course, pretend that the idea was a new one. It is, is it not, at least 1924 years old? Since then many of the noblest teachers—religious, moral, as well as political—have held it, but it was never put forward with greater force or greater conviction than by President Wilson. How has it fared?

EVERY NATION FOR ITSELF

"Let us look back to the state of things that existed before the war.

"At that time undoubtedly the dominant conception of international relations was 'every nation for itself and the devil take the hindmost.' No doubt there were exceptions. There had been efforts, such as the Red Cross movement at Geneva and The Hague Court of Arbitration, to humanize and even to facilitate arbitration instead of war. There had been great international experi-

ments, too, of which the most celebrated of recent times was the effort to organize Europe for peace after the Napoleonic wars—often misleadingly referred to as the Holy Alliance. That was a system of conferences between the great powers of Europe which did much for peace but broke down in 1822 for want of a definite constitution and continuous machinery such as that established by the covenant of the League of Nations.

"Later there were the arrangements known as the concert of Europe for dealing with the affairs of southeast Europe—a very vague and formless system which yet did something for peace while it lasted. On this side of the Atlantic, too, there was the Monroe doctrine, which has been of great, if limited, value for the same cause.

"But these were essentially exceptions. The general international rule was the crudest form of the struggle for life. Unrestricted international rivalry was preached almost as a duty irrespective of the obvious fact that the only logical outcome of such a doctrine was war sooner or later. International anarchy diversified by war was, broadly speaking, the pre-war system. No one can doubt the evil of that state of things.

MENACING TO CIVILIZATION

"It was portentous, menacing to civilization itself. Its danger had been demonstrated to all but the blindest by the World War, and it was obvious that if it was to be cured or even mitigated some new conception of international relations, some insistence on the real unity of mankind, must be pressed upon the world. Nor was the success of such an enterprise so hopeless as some may think it at first, for, after all, the desire for unity, for corporate life is one of the strongest of human instincts, as strong as the opposite instinct of competition. We see it at work in a thousand forms in our national life. It is the basis of a vast number of our institutions, of our schools, our colleges, our States, our nations, our churches, and it doesn't seem in itself impossible that this great force should be used to bring about an increased solidarity of mankind.

"Obviously, if that is to be done, the first thing is to foster international cooperation by all means in our power. Do not mistake me. That is not to weaken patriotism. There is no opposition between this conception of international cooperation and that of patriotism. Indeed, no man will be a good citizen of the world unless he has shown himself a loyal and devoted citizen of his country. The nations can only unite with one another if they are already firmly united in themselves.

"Nor am I claiming that the League of Nations is the only expression of the new conception of international solidarity. On the contrary, there have been other manifestations of the same spirit in the recent past, though I am myself convinced that it is only through permanent machinery continuously operating, such as you have in the league, that you can hope for a really effective expression of world unity. That is why I am so profoundly convinced that Mr. Wilson was wise in insisting that the covenant of the league should form the first part, the essential foundation—at once the corrective and the basis of the peace treaties signed at Paris. But the principles which underlie the covenant extend beyond its actual terms, and in what I am about to say I shall pray in aid of all recent examples of international cooperation, whether the fruit of the league machinery or not. For in attempting a survey of world movements the widest outlook is the best.

ADVANCE IN INTERNATIONAL UNITY

"Let me say at once, with great confidence and profound conviction, that in the last five years the advance in the direction of international cooperation has been little short of marvelous. Much of the work has been done so smoothly that it has escaped notice, and I am not going to attempt to try even your patience by a complete catalogue of what has been accomplished. But even the broadest survey will bring to light the great extent of the work and how it has touched every branch of international relations.

"Some one told me the other day that in the first eight months of this year no fewer than 76 international conferences and commissions have met at Geneva, dealing with every sort of topic. That is typical of what has been going on during the last five years. Take, for instance, what may be called the social relations of nations. It is much, surely, to have rescued from imprisonment and banishment some 450,000 prisoners of war and restored them to their homes; to have liberated many hundreds, if not thousands, of Christian women who had been interned in harems.

CARE OF RUSSIAN REFUGEES

"Much, too, has been done in taking care of and repatriating tens of thousands of Russian refugees, and I might prolong the list of such undertakings considerably.

"Or take the question of health. It is by cooperation of the nations of the world that the epidemics threatening Europe from the war-swept areas of eastern Europe have been prevented. By

the same agency is being carried out the valuable inquiries into such diseases as malaria and cancer, the standardization of biological remedies, such as sera, and the interchange of medical officers among the nations of the world so that they shall learn what has been done in other countries to cope with the problems which they also have to meet.

"Or among the humanitarian activities of the league, take the struggle with that very difficult and complex question, the suppression of the traffic in noxious drugs, such as opium and cocaine. Even now, as we know, an international conference is sitting, and whatever its difficulties may be I am confident it will obtain important progress in that arduous struggle. Nor does opium stand alone. There is the still more terrible evil of the traffic in women and children, where much that has been of the greatest importance has already been achieved, and I hope the day is not far distant when that blot on our civilization will be merely an evil memory. So, too, with the troublesome and disgusting problem of obscene publications. International agreement has been arrived at, and effective steps are being taken to limit that pest, so far as it is international in character. In this connection the recent appointment of a commission to inquire into the position of that hoary evil of slavery should not be forgiven.

IN THE ECONOMIC SPHERE

"So, too, in the economic sphere much has been done. One of the first steps taken was the general economic conference at Brussels to examine the economic problems of the world left by the war, and on the basis of that examination most of the work that has since been done has been built. There have also been conferences to facilitate international transit, to simplify and standardize the laws about such matters as bills of exchange and commercial arbitration. And even an attempt is being made to bring about an agreement to reform the absurdities of the calendar.

"I merely give these as examples which could be considerably extended and which show how far international cooperation in matters of this kind is going. More attention has been paid to other activities which are, perhaps, in themselves not more valuable than those to which I have referred—I mean the political questions that have been submitted to the new methods and new spirit. There was the peaceful and successful settlement of the controversy between Sweden and Finland about the possession and government of the Aland Islands. There was the adjustment of the serious difficulties between Albania and Serbia, which stopped the invasion of Albania and for a time at least restored harmony to those two countries.

"There was the less complete solution of the controversy between Poland and Lithuania over the possession of Vilna, which at any rate stopped actual hostilities, and there was the much-discussed settlement of the Silesian question between Poland and Germany, which, whatever may be said about some of its features, is in practice working smoothly and well.

"More recently we have seen an admirable piece of international work accomplished in the settlement of the government of the territory of Memel, to which our chairman to-night so splendidly contributed by his tact and wisdom. That was a controversy which had troubled Europe for two or three years and had defied the ordinary diplomatic methods of settlement. Yet, applying the new spirit and principle of international unity to it, bringing it into the atmosphere which prevails in Geneva when the representatives of nations come together, not to obtain victories over one another but to secure agreement—in that atmosphere the difficulties of the Memel question rapidly disappeared and in three months the commission presided over by Norman Davis was able to present for adoption a solution which bids fair to be permanent.

THE CORFU INCIDENT

"I mustn't forget in this connection to deal with one or two questions in which it has been alleged that the same success has not been attained. There is the Corfu incident of last year. I think so far from that incident being a failure it is really one of the most distinguished successes of the new international conception.

"Here was a case of a bitter quarrel between two nations caused by an occurrence of the most deplorable character—the murder of four Italian officers on Greek territory. It was the kind of case which in the past had often produced, if not actual war, at any rate prolonged embitterment of international relations. After all, it was just such an incident as that which gave rise to the World War itself. Yet in a very few weeks the matter was adjusted, partly by the league and partly by another international body, the conference of ambassadors.

"Let me here stress one point. It can not be too often repeated that the league is not a superstate. Its purpose is to promote international agreement and not to impose on disputing nations settlements from outside. It matters nothing through what agency that agreement is reached. Sometimes the parties may agree to accept the decision of the court of justice. In other cases the

council itself will seem to them a more suitable tribunal. Or it may be they will select, as in the Corfu case, an arbitral or mediatory body of a different character. That is for the parties to settle. The league's function has been discharged when it has brought them together and put them on the road to agreement, and that function was most successfully accomplished in the Corfu case. Whether the solution actually arrived at was an ideal one or not may be the subject of a difference of opinion; but the broad fact remains that peace was preserved; that the integrity of Greek territory was maintained, and that the relations between the two countries suffered only a passing shadow.

EGYPT AND THE LEAGUE

"Quite recently there has been talk of another question which has been thought to have some resemblance to the Corfu incident. I mean the question of Egypt. There, too, a horrible murder took place, not in a remote mountainous district, but in the streets of Cairo as the climax of a series of outrages directed against foreigners, and especially Englishmen. Demands were made by England in consequence of the murder and ultimately accepted by the Egyptian Government, and people asked why was not the league called upon to intervene. The answer is simple enough.

"The league is there to deal with international relations, not with realtions affecting the national administration of any country. Relations between England and Egypt are of a very special character. Until 1922 Egypt was under the protectorate of England, and when that protectorate came to an end certain questions were reserved, including the protection of the lives and properties of foreigners in Egypt, to be dealt with by the British Government as though the protectorate still existed, until some further agreement was made between Egypt and England. When, therefore, the terrible murder of Sir Lee Stack took place it was part of the national obligations resting on the British Government to take whatever steps it was advised were necessary in order to secure the safety of its own nationals and other foreigners in Egypt. I do not propose to ask you to consider whether everything that was done and said was right, though I am myself confident that in broad substance no objection can be justly raised to British action.

NOT AN INTERNATIONAL MATTER

"But the point is that it was not an international matter, and, as a matter of fact, there was not even any dispute between the British and the Egyptian Governments on the subject. True, the existing Egyptian ministry resigned after granting part of the British demands. But it was succeeded by another ministry constitutionally appointed, which accepted the remainder. Internationally the incident was closed. Yet even so the British representative on the Council of the League felt that it would be in accordance with the new spirit of international relations publicly to offer to lay before the Council of the League a full statement and account of British action in Egypt if any member of the league desired that should be done.

"To my mind that is one of the most striking testimonials to the progress of the idea of international unity that has yet taken place. Here was a matter admittedly outside the cognizance of the league as to which the British Government was none the less ready to give explanations, because it desired to pay tribute to the international authority and position of the League Council. So far from the authority of the league being flouted, as some have ignorantly suggested, it has been openly and emphatically indorsed.

"Closely allied with these strictly political questions have been a number of other activities of a politico-economic character. I refer, of course, to the great and so far brilliantly successful efforts for the reconstruction of Austria and the not less successful proceedings in Hungary. There the principle of international cooperation has been used in order to bring assistance to struggling members of the family of nations; in Austria by the international guaranty of a loan coupled with provisions for the rehabilitation of Austrian finance; in Hungary by utilizing the international machinery in order to restore to that country financial credit and confidence without any guaranty.

"Perhaps an even more striking instance is what has been and is being accomplished in Greece. There a State not in serious financial difficulties was suddenly faced with the terrific problem of providing for a great stream of national refugees equal to one-quarter of its whole population suddenly thrust upon its shores by the fortune of war.

"The league, for it was done through the league, used its machinery to give confidence to the world that money lent to Greece would be applied in reproductive work for dealing with this great problem. As in Hungary, we have had the assistance of distinguished American citizens to direct the operations in the country itself, and it has been to me extraordinarily striking that when the recent loan to Greece was put upon the London

market it was recommended to the investors mainly upon the ground that since the league was taking an interest in its administration they might be satisfied that the money would not be wasted. I do not know how the loan went here, but in London it was subscribed fifteen times over within a couple of hours of its being offered.

"There has, of course, been also the greatest of all the international reconstruction efforts, that for dealing with the reparation question in Germany, which was the subject of what is called the Dawes report. While the formulation of the Dawes report and the plans for making it effective were quite outside the field of the league, nevertheless the members of the Dawes committee (to whose success the contribution of the American delegates was so great and so invaluable) have themselves pointed out that their plan was built upon principles established in the cases of Austria and Hungary, which came under league supervision. To my mind, what I hope will be the great success of the Dawes scheme is just as much a result of the new international conception for which Woodrow Wilson stood as anything that has been done by the league itself.

THE AGREEMENT ON MOSUL

"Before I part with these political questions, there is one about which a word should be said, and that is the question of Mosul. In that case the two parties, Turkey, which is not yet a member of the league, and Great Britain have agreed to refer the delimitation of the northern frontier of Mesopotamia to the council of the league. The council, following what is becoming a common practice, has referred the technical question to a small committee presided over by Count Teleki, an ex-Prime Minister of Hungary, which will make an inquiry on the spot and report to the council. I am glad to say that both countries have already agreed to accept the decision of the council, whatever it may be—a good example of the growing power of the new spirit.

"Finally, there is one branch of international political activity of great and growing importance. By a number of treaties signed at Paris and since, most of the central European states have come under an international obligation not to discriminate against racial and linguistic minorities within their borders. These treaties constitute a charter of freedom for some 40,000,000 people in those countries, and its execution is intrusted to the supervision of the league. A delicate function, to judge between a government and a section of its subjects.

"An organization has been created at Geneva which receives complaints, circulates them to the members of the council, and, if endorsed by any member of the league, an inquiry takes place. The object, as always, is a settlement and not a victory, and every effort is made to secure an agreement between the parties; sometimes the court of justice is called in to advise on any legal points involved. In all cases the government complained of is given the fullest opportunity to deal with the complaint in the first instance. Sometimes a hearing takes place before the council. In the end in every case some settlement—not satisfying, perhaps, everyone, but approximating to justice—is arrived at. Not long ago, as a result of such methods, a state paid over \$500,000 as compensation to certain farmers of a minority race who had been unjustly expelled from their farms.

GREEK AND BULGARIAN ALIENS

"Here, as in other matters, the new spirit is making way. The league representatives grow in authority and confidence. Let me give you an instance: By an arrangement between Greece and Bulgaria, alien population of the two races in each country are to be exchanged, and the work is proceeding under the supervision of two commissioners appointed by the league. Recently a minorities treaty came into force in the same districts and the governments agree to entrust the same commissioners with the supervision of the rights and obligations under these treaties also.

"I must hurry on, but I can not omit without any mention the great international institutions which have sprung up as part of the general scheme of international cooperation in close connection with the league. There is the international labor office, which aims at establishing standardized labor conditions of employment all over the world, so that no advantage shall accrue to any country by inhuman exploitation of labor.

"There is the permanent court of international justice, where we have at last seen the fruition of ideas and efforts long and hitherto unsuccessfully made to create a genuine international court of justice. It is functioning with remarkable success and has already disposed of a number of international controversies which would otherwise have created a festering sore in the common life of the nations of the world. Then there is the mandates commission, where you have now a skilled international body to whom annual reports are presented on the administration of a number of territories inhabited by less advanced peoples and

where the principle has been accepted that the administering country is the trustee of its powers for the benefit of the inhabitants themselves and for the interest of the world at large.

THE MANDATES COMMISSION EULOGIZED

"I wish I had time to describe more fully the work of the mandates commission, but anyone who has read their reports will agree with me that the sober, impartial, practical spirit that pervades them is of the happiest augury for the future of this very interesting experiment.

"Quite recently two other very interesting international experiments have been begun. By the generosity of the French Government an institution fostering intellectual cooperation is to be established under the auspices of the league at Paris. Already valuable work has been done by some of the chief thinkers of the world in meeting together to discuss international intellectual problems, and this new institute is to strengthen and coordinate their exertions.

"Further, at the last council meeting the Italian Government offered to establish an institution, also under the league, for considering the prospects of the unification of private law. This is not the codification of international law. But that object, the dream of so many an idealist, has not been forgotten. It is a difficult question, but a beginning has been made.

"At the last assembly a small expert committee was appointed to study what subjects of international law are ripe for codification. The lines to be followed are somewhat those laid down by Mr. Elihu Root in the commission which drew the statute of the international court in 1920. Here, too, we have American help in the person of Mr. George Wickersham, so that the work will proceed under the aegis of two American jurists of more than national reputation.

"Here surely is a splendid record of five years' work. Not that any of us should be satisfied that all that could be done has been done. There are great and outstanding questions still to be tackled and none greater than that of armaments. Here, too, many efforts have been made mainly on two lines. One is to control the traffic in arms.

THE PROBLEM OF ARMAMENTS

"Certainly it is a paradox of a startling character that we should recognize that the dealing with such things as cocaine and opium is so dangerous to humanity that it ought to be the subject of international control, but we have made very little effort so far to supervise even in the most elementary way the international trade in instruments expressly designed to slaughter and mutilate our fellow men. However, as the result of very laborious negotiations there does seem a hope now that a conference will meet in the coming year, if possible, to agree upon the very important step of securing publicity for international transactions in articles of this character. That will be, at any rate, a beginning.

"Then, with regard to the larger problem of the limitation and reduction of national armaments, one great step was taken by the conference at Washington which has resulted in the limitation of battleships among the chief naval nations of the world. That is a very important precedent, though, of course, it only deals with a fraction of the naval part of the problem. There remains the rest of the naval problem—cruisers and submarines—and the whole of the land and air forces of the world to be dealt with.

ACTIVITY OF THE LEAGUE

"In this matter the league and other international agencies can not be charged with indifference. They have been working hard at it for the last four years. Last year a preliminary proposition was made, called the draft treaty of mutual assistance, the object of which was to secure, first, a general acceptance of the principle that no aggressive war should be tolerated; secondly, that there should be a general scheme of international disarmament; thirdly, a promise by the disarming nations to protect those who disarmed from suffering for their action. This proposition was replaced this year at Geneva by a new one called the protocol, which included, in addition to the general principles of the previous scheme, the idea of compulsory arbitration for all international disputes.

"I am not going to assert that a solution of these very difficult matters has been yet arrived at, but it is truly a great step forward that any scheme with that object should have been accepted by the representatives of 47 nations represented not by mere 'cranks and crocheteers,' but by the foremost statesmen of the 47 nations concerned. I am not at all disturbed by the slowness of the advance toward the solution of this question. It is, of course, the very heart of the matter. Disarmament is the goal to which all intelligent lovers of peace must desire to tend, but the difficulties in the way are prodigious and it will need all the new

spirit of which I have spoken to secure success. To me the fact that the problem is taken seriously and is now being grappled with is in itself an immense encouragement, and I look confidently forward to substantial advances being actually secured in the course of the next few months.

THE ADVANCE TOWARD PEACE

"Well, ladies and gentlemen, if I haven't wearied you and you have been able consequently to follow what I have tried to say, I am sure you will agree with me that we who believe in peace and still more believe that it is a cause worthy of our utmost exertion have much to be thankful for. Especially may those take courage who have felt the inspiration of the great ideal for which Woodrow Wilson was content to sacrifice his health and also even his life. The advance which that ideal has made during the last five years has been greater than that of any similar human movement with which I am acquainted. We have to encourage us a record of great and even marvelous achievement, and we may look forward to an even greater promise for the future.

"Nor must it be thought for an instant that in recounting that great work done by the league I have overlooked the splendid contribution made by America in recent years, as always, to the cause of world peace. I have already alluded to the Washington conference on reduction of naval armaments, to the success of which Mr. Secretary Hughes and other distinguished American statesmen made such an invaluable contribution. Nor have I failed to note the splendid work done by our chairman of tonight and by other individual Americans in the cause of world reconstruction and other beneficent activities of international organs and agencies.

A TRIBUTE TO AMERICA

"We in the Old World have never failed to recognize the strength of American devotion to peace and good will among the nations of the world. We know that you plan no conquests; that you nurse no ambition for territorial expansion. The unguarded Canadian frontier is a proof that we have no fear of American militarism. No nation in the world has stood so consistently for peace as yours.

"Nor will you hear from me one word of criticism as to your attitude toward the league or any suggestion that it springs from lack of sincerity or conviction in your horror of war. No intelligent supporter of the league could do otherwise than recognize unreservedly that it is part of the essential sovereignty of each nation—a sovereignty which is the very basis of the league constitution—to settle for itself what shall be its external policy. That is for America and for America alone.

"We of the league have our task. We believe that to us has been entrusted a great mission for peace. We see that much has already been done and that still more remains to be accomplished. The seed planted by Woodrow Wilson and his colleagues at Paris has already grown and flourished beyond the most sanguine expectation. Let it be ours to foster its growth, and, not wasting our time in criticism or regret, let us press forward toward that glorious prize which even now seems almost within our grasp."

FEDERAL TRADE COMMISSION INVESTIGATIONS

Mr. NORRIS. Mr. President, I submit a Senate resolution and ask unanimous consent for its present consideration. The resolution (S. Res. 286) was read, as follows:

Whereas it has been alleged on the floor of the Senate and in the public press that a power trust exists in the United States and that many public utility and power companies are wholly or partly controlled through stock ownership, interlocking directorates, and various other means and methods by various combinations of water-power companies, large manufacturing and industrial corporations, and by banking and other institutions: Now therefore be it

Resolved, That the Federal Trade Commission be, and it is hereby, directed to investigate and report to the Senate the present degree of concentration and interrelation in the ownership, control, direction, financing, and management through legal or equitable ownership of stocks, bonds, or other securities or instrumentalities, or through interlocking directorates or holding companies, including trade associations, or through any other device or means whatsoever of power companies, transmission companies, public-utility companies, and other companies and associations (not including telegraph companies and common carriers by rail, water, or air) engaged in what is commonly known as the public-utility field of business; and also particularly to investigate and report, together with other and pertinent facts, the extent to which banks and trust companies and the principal companies manufacturing electrical equipment and apparatus or owning important patents for the manufacture of such equipment and apparatus and other important industrial companies, or the officers, directors, and stockholders thereof, have a legal or equitable interest in the stock, bonds, or other securities of any of the public utility and holding companies and associations above referred to, or through interlocking directorates, or

otherwise exercise partial or complete control or direction of the financing and management of such companies and associations or have contractual relations with any of them affecting the management or scope of their business.

Resolved further, That the President of the United States be, and he is hereby, requested to direct the Secretary of the Treasury to permit the said Federal Trade Commission, in making such investigation, to have access to all official reports and records in any or all of the bureaus of the Treasury Department.

The PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

Mr. EDGE. Mr. President, I want to ask the Senator from Nebraska a question. The resolution is far-reaching, and if it is of such extreme importance as would be indicated by the rapid reading of the same at the desk, there is no question that the information to be received would be of great benefit. But a resolution of such tremendous importance should at least be referred to the Finance Committee for some consideration before the Senate acts upon a resolution that would probably require the expenditure of millions and millions of dollars even to touch the high spots of the entire investment world of the country. While I am in no way in opposition to having the facts or that portion of the facts which may be of use for public consumption and public consideration and public protection, yet it does seem to me that a resolution of that character, so broad in its scope, should at least follow the usual form and go to the committee designed for the purpose of considering such resolutions.

The PRESIDENT pro tempore. Does the Senator object?

Mr. EDGE. I object.

Mr. NORRIS. Will the Senator withhold his objection for a moment?

Mr. EDGE. I will.

Mr. NORRIS. Mr. President, I would like to say to the Senator from New Jersey that in my opinion he is mistaken when he says it will cost millions and millions of dollars to make the investigation. As a matter of fact, I introduced the resolution because in my own research on the Muscle Shoals proposition I have found what convinces me of the fact that there is just such a trust, and I have made the charge myself on the floor of the Senate. I have at considerable length outlined those who are parties to it. I got that information with the assistance of some investigators in a brief space of time. It appeared to me to be of such importance, however, that the investigation ought to be made by some official bureau or body that would give it an official standing when the results were obtained.

I am opposed to and I shall oppose any motion to refer the resolution to a committee. The resolution asks simply what has often been asked and usually granted by unanimous consent. I have no objection, of course, to the objection being made, so that under the rule the resolution will go over a day in order that Senators may acquaint themselves with its import.

The PRESIDENT pro tempore. The resolution will go over under the rule.

Mr. EDGE. Just a moment, if the Chair please. It would seem to me in the very nature of things that to carry out its purpose it would require additional help, additional appropriations, and some preparation. For that reason I felt that committee consideration was the orderly method to pursue. I am perfectly ready to give the matter further thought, but for the present I object.

Mr. HARRISON. Mr. President, will the Senator from New Jersey reserve his objection for just a moment? I merely desire to say to the Senator from Nebraska that it seems to me it would be very appropriate to pass such a resolution, but it ought to be amended in view of a statement which I have read this morning in the Washington Post emanating and issued from Baltimore by the head of the Fertilizer Trust. It would seem to me that the Federal Trade Commission might very well investigate the Fertilizer Trust while Muscle Shoals is being considered by the Senate, if they are to investigate the Power Trust. Here is the statement which I read in the Post:

FERTILIZER HEAD ASSAULTS UNDERWOOD SHOALS BILL

The Underwood bill for the disposal of the Government properties at Muscle Shoals, Ala., was assailed in a statement yesterday by Gustavus Ober, Jr., of Baltimore, president of the National Fertilizer Association, as threatening demoralization to the fertilizer industry.

I merely desire to say—

Mr. NORRIS. Mr. President, may I interrupt the Senator?

Mr. HARRISON. Yes.

Mr. NORRIS. I would like to call the Senator's attention to the fact that early in the last session of Congress, or perhaps

the preceding session, when the Muscle Shoals question was under discussion and a great deal was said about the Fertilizer Trust, I introduced a similar resolution in regard to the Fertilizer Trust. It was adopted by the Senate and directed the Federal Trade Commission to make just the investigation to which the Senator has referred. They have made the investigation and their report is on file and has been on file a long time. I am pursuing in this instance exactly the same course that I pursued in the other case. I want to get the information before the Senate and before the country.

Mr. HARRISON. I have no objection in the world to the resolution, but I presume that many Senators will be as forgetful of what is in the report touching the Power Trust when it shall have been received, as they are forgetful of the report that has been made with reference to the Fertilizer Trust. It had passed from my memory that the Senate had passed even a resolution of that character with reference to the fertilizer association.

I noticed in the testimony before the committee given while fighting over the Ford proposal to lease Muscle Shoals, that this same gentleman—Mr. Ober—who is the head of the fertilizer association, and who said in his statement in the paper this morning that the association of which he is the head comprises 90 per cent of the fertilizer manufacturers of the country, appeared before the committee and testified quite at length and, I may say, most eloquently against the Government leasing Muscle Shoals to Mr. Ford. In the course of his testimony it developed that Mr. Ober was not only against Mr. Ford leasing Muscle Shoals but had taken other positions in the past with reference to the question. Here is what happened during the taking of testimony before the committee:

Senator HARRISON. May I ask you what is your view? Do you believe that nitrate plants should be maintained in time of peace for the manufacture of fertilizer?

Mr. OBER. Senator, I will come to that in a minute. We are interested in any advance that chemistry can make in producing a new material or that can give us information on the subject of fertilizers. If Muscle Shoals can produce that, we are glad to have them produce it.

Senator HARRISON. You are in favor, then, of utilizing Government agencies for accomplishing that purpose?

Mr. OBER. I will explain that in a moment.

Senator HARRISON. I would like to ask you that now. You are?

Mr. OBER. We are in favor of using it, but allowing any person who has a process that looks sound to use it. We are not in favor—in other words—

Senator HARRISON. You mean run by the Government or by private parties?

Mr. OBER. I don't see any objection to the Government and private parties working together on it.

He gave the impression to the committee in his opposition to Ford leasing the property that he was in favor of Government operation at Muscle Shoals, and yet we presented to him a pamphlet that he had written some time previously, when the Congress had the Wadsworth-Kahn bill before it, providing for Government operation of Muscle Shoals, it was shown he had taken just the opposite position. Mr. Ober, as the head of the Fertilizer Trust, who now tries to convert the country against the Underwood bill, said at that time:

In fact, real danger exists to-day that this Muscle Shoals plan may become the entering wedge for state socialism. If the Government makes and sells nitrates, it will be but a short step to the manufacture and marketing of other fertilizer materials and even of complete fertilizers.

He closes by saying:

How much better this would be than to prevent the development of private industry by Government competition. * * * It is best to keep this steam power in stand-by condition, thus holding in reserve not only the ammonium-nitrate plant but also the source of power with which to operate it.

The Muscle Shoals problem is solved—

Says the head of the fertilizer association:

It has been solved by the decision of the War Department to place the plant in stand-by condition. It remains only for the War Department to adhere against any political pressure to the wise decision it has already made.

So when the committee were considering the Ford proposal and we were about to report it favorably the head of the Fertilizer Trust was against it. When Congress, a few years ago, was about to pass the Kahn-Wadsworth bill for the Government to carry on the work Mr. Ober said it was state socialism, and he was against it. Now, when we are about to pass

the Underwood bill, which first gives to the President the opportunity to lease this plant, and, failing to do so, authorizes the Government to operate it, he is against that and he says the plant should remain "in stand-by condition," so that if we ever have war we can then make the nitrates.

Thus the head of the Fertilizer Trust speaks.

Mr. BRUCE. Mr. President, let me say that it is impossible for me to hear such a slighting, not to say contemptuous, reference made to one of the most conspicuous and honorable of our citizens in Baltimore as has been made by the Senator from Mississippi [Mr. HARRISON] without repelling and quickly repelling the inferences that he desired to be drawn from what he said.

The Ober family has for several generations been engaged in the fertilizer business in Baltimore city, and there are no citizens of Baltimore that I have ever known in my time who have enjoyed a higher reputation than the members of that family have for probity, industry, and intelligence; and I could truly say, if I were not indisposed to make an invidious comparison, that of all the present members of that family, good as is the strain of them all, this gentleman to whom the Senator from Mississippi referred in a derisive fashion is in some respects the flower.

A man more highly esteemed, more sincerely respected, than Captain Ober does not exist in the city of Baltimore. Not only is he one of the very best of our citizens in time of peace but he proved himself to be one of our very best citizens in time of war, volunteering at the beginning of the World War, and coming out of that war as a captain, after inspiring the soldiers who served under him with the same measure of respect and cordial regard as that with which he has inspired all of us who have known him in private life. So I trust that some day the Senator from Mississippi may have the pleasure of meeting Captain Ober and forming a more accurate conception of just what he is than his fltering reference to him would imply.

I, for one, am not to be intimidated by these vague references to "trusts." There are trusts, of course, that should be restrained by the strong curb of the law. We all know that. We all know that wealth has its dangers, though no greater dangers than poverty. Many years ago the distinguished Speaker of the House, Thomas B. Reed, of Maine, declared that a statesman was a dead politician; and so, when you run it down, you find that one-half of these mythical trusts, these ogres, these octopuses, these fabled monsters, are nothing but legitimate business combinations that have happened, solely by their skill and close attention to business and good management, to attain an extraordinary degree of success.

How far Captain Ober has been inconsistent in his relations to Muscle Shoals I am in no position to say, not having followed in detail the testimony that has been taken by the Senate with regard to Muscle Shoals; but I recall, of course, as you all probably do, the old saying that "None but a fool never changes his mind." That saying is as true as the companion saying, "Consistency, thou art a jewel." If Captain Ober has changed his mind, knowing him as I do, prizing as I do his sincerity and honesty of character, it is, I am certain, because he has sincerely reached the conclusion that he had good reason for changing it.

It makes no difference to me in my attitude toward the Underwood substitute what position Captain Ober takes with reference to it—not the slightest—because he can not be any more opposed to it on any special grounds of his own than I am on my own public grounds. I am hostile to it because I think that the Government has no right to enter into competition with its own citizens in any ordinary industrial line of business, and I regard the proposition to have it establish a commercial fertilizer factory or factories at Muscle Shoals as the longest stride that has ever been taken in its history toward the general socialization of industries of all sorts in the United States.

Up to this time we have had it, of course, occasionally undertaking some great work, like the Panama Canal. There is no objection to that. If for no other reason the Government, rather than some private agency, should have built that canal because it was to be a thing of vital concern to the Government in time of war.

We find the Government sustaining other business or industrial relations, but almost always back of the relationship there has been some special motive originating in the real necessities of government. You can run down every instance, and you will find that that is all but invariably true. But here is nothing less than a bare, undisguised proposal to have the Government enter into competition with its own citizens in a field which should be left to private effort.

I have offered an amendment excising from the Underwood substitute all power on its part to establish a commercial fertilizer factory at Muscle Shoals. Suppose I had extended my amendment so as to forbid the Government from entering at Muscle Shoals into the business of manufacturing hats or shoes, or any other manufactured product that you chose besides fertilizers, including plows and agricultural implements of one sort or another in which the farmers are especially interested; is there anybody here who would have supported such an extension? I trust not; though I, for one, am beginning to think that there is a general movement throughout the United States in the direction of the socialization of all industry. Before I became a Member of this body I had never formed any due conception of the extent to which this process was eating into the very core of our national life. Now, it seems to me, we have reached a point where almost every day of the world we have a clash between the old American ideas with reference to the true functions of the State and these modern ideas about them.

We are all familiar, of course, with the ancient sectional struggle between the North and the South. It turned simply upon a difference of opinion as to the extent to which a State had the right to secede from the Union. Apart from that, the South and the North were faithful to the same organic instrument and cherished the same general constitutional ideas and ideals. I say now, after having been a Member of this body for some time, that the line of division between North and South in that sectional struggle is nothing like as deep as the line of division that I have seen developed here day after day between the West and the East as respects the true functions of government.

The conflict between East and West at the present time, as I see it, is nothing less than a conflict between two wholly different and mutually repugnant systems of government. I am not speaking now of everybody in the West, because we all know that there are no sounder thinkers anywhere than are at times to be found in the West; but I am speaking of a large number of the present representatives in the Senate from the West. They seem to have almost arrived at the conception of the Government as a great wet-nurse. I sometimes think that we should tear down the Statue of Liberty from the summit of this Capitol and place a big black pap bottle in its place. The idea seems to be that the Government is something to which resort is to be incessantly had for the coddling and artificial stimulation of private interests.

This thing has gone on until the South itself, which used to be the chosen seat of State sovereignty and of individual initiative enterprise and self-reliance, seems to be slowly succumbing to the same paternalistic notions. The representatives from the solid South still call themselves Democrats; but if there were not just one powerful influence solidifying them, and properly and naturally solidifying them, I wonder whether many of them, too, would not go off on the same lines of aberration from true constitutional principles as the Northwest.

Here you have gentlemen from the South—a section of this country that for years and years was wedded to the idea of local self-government and of State sovereignty—ready to vote to establish a great national commercial fertilizer factory at Muscle Shoals. For every reason, for every public reason, every party reason, I regret the fact. One result, of course, is that the difference between the two great national parties now has become largely artificial, and no one, I repeat, knows just what the solid South would do if it were not kept together by the cohesive influence of just one single compelling fear.

I am opposed to the further material centralization of Federal power—absolutely opposed to it—and if I were not opposed to it for any other reason, I should be opposed to it because of the overwhelming disaster which overtook the Democratic Party at the last election. What I have been saying points to the real cause of that defeat.

The Democratic Party has recently been identifying itself to such an extent with departures of one sort and another from all the old true American ideas and ideals that it has lost for the time being the confidence of the country, which it had enjoyed so long as it was true to its time-honored principles and the leadership of Thomas Jefferson and Grover Cleveland.

No! We Democrats now, like Sisyphus in the classic fable, must roll our great, heavy stone uphill again, and we never will roll it uphill again unless there shall be a reversion on the part of the party to its former sound ideas of the proper relations between the States and the National Government and between governmental activity and private industrial activity.

So I say—to get back, as the French say, to our mutton—that Captain Ober did a real service, no matter what his motive was in doing so, when he took the stand that he did with refer-

ence to the Underwood substitute. I for one have been trying hard to vote for that substitute. From the very beginning I have been disposed to vote for it, though in so many respects it violates my ideas of true public policy, because I thought this matter of turning out nitrates for war explosives, to commence with, was a matter of supreme, transcendent importance, and because I thought that it might not be a bad thing even for the Government to go down to Muscle Shoals and manufacture nitrates merely for industrial purposes. But now we have reached such a point that not only are the sponsors of the substitute inclined to set up commercial fertilizer factories at Muscle Shoals, but in their aggressive determination to put their substitute through at any cost are even disposed to cast totally unwarranted aspersions upon one of the most conspicuous, one of the most upright, and one of the most useful of our Baltimore citizens in time of peace and one of the most gallant of our Baltimore citizens in time of war.

Mr. ASHURST. Mr. President, I always listen, if not with delight at least with interest, to the remarks of the able Senator from Maryland [Mr. Bruce]; and I was not surprised at his reference to the classics—to Sisyphus and the ancient fable. The American people, however, are not so much disturbed now about Sisyphus as they are by the fact that they are constantly required to steer between Scylla and Charybdis, the Scylla of high-cost living and the Charybdis of official indifference. I will leave that observation for the Senator from Maryland to comprehend, as he is familiar with the classics and will understand any reference I make thereto.

The Senator intimated that Jefferson opposed and eschewed paternalism. Quite true; but was Jefferson paternalistic when he smuggled from France, in the pockets of his surlout, the rice seed and gave it to our Government to propagate the rice industry of America in order to subsist her people?

John Quincy Adams is regarded as one of the standpatters of early times; but was John Quincy Adams a standpatter or paternalistic when he announced in his message that the Government should build astronomical observatories for the people? He was ridiculed for this recommendation, but he said in reply: "These astronomical observatories will be lighthouses of the sky." John Quincy Adams, reactionary that he was, wished the people to have light, illumination, and information. The Democrats must not be accused of "socialism" and "paternalism," because we wish the Government to go into competition here and there with some gigantic monopoly which may be curbed only by governmental competition. Jefferson, the founder of our Democratic Party—indeed, its patron saint—was not paternalistic; he was a philosopher and statesman.

The Senator did not refer to the Constitution, although he is able to do so, and there is not a Senator here who can explain the Constitution more learnedly than can the Senator from Maryland. We all believe in the Constitution; we take an oath to support it. In all legislation Democrats must ask, "Is this bill institutional as well as constitutional?" Jefferson found the Constitution in his way when he contemplated the purchase of Louisiana. Said he, "I will perform this act, as it is institutional; I will purchase Louisiana, and leave it to the people to ratify my unconstitutional act, because I would be guilty of moral treason to my country if I failed to seize advantage of this fugitive opportunity which may never come again to do a service to millions of Americans yet unborn." I am not arguing that men ought to violate the Constitution, but I am arguing that it is never wrong to do right.

The argument against the Government entering into competition with the citizen ought to be answered here and now. As a governmental policy I say we ought to be careful and chary respecting governmental competition with the citizen. But reflect a moment on what we have seen. Gigantic combinations in control of the people's necessities of life. Think of the fact that the American people are between hades and the ironworks, the producers crushed by monopoly. Are we to sit here like statues and take root because we are fearful that we will make a mistake? A \$29,000,000 fine is imposed upon the Standard Oil Co., and oil tanks and golf sticks careen in the air, but the \$29,000,000 fine does not disturb Mr. John D. Rockefeller. If he had it to pay—which, of course, he did not—he would simply have raised the price of oil to pay the fine. He knows he would not be imprisoned, because this Government is not going to imprison a man with \$29,000,000. Therefore the only recourse for the American people is to relieve themselves from the grasp of monopoly by offering some competition. And pray tell who can compete with a huge, oppressive monopoly except the Government? Tell me, trained lawyer that you are, what relief do you propose for the

people when greed crushes out their blood and controls their life? Will you point the way out?

When William III was about to be placed on the English throne, after James II had abdicated, some statesman in Parliament—and I can envisage my learned friend from Maryland—said, "I refuse to place William III upon the throne. We have no King, it is true; but I fear it would be unconstitutional to place him on the throne." He said, "I am lost, but I will travel only upon the King's highway; but truly I do not know where the King's highway is." He was effectively answered by another statesman, who said, "If you wait until you find the King's highway, you will stand there forever." So if we wait until fines and threats of imprisonment restrain the greedy, we will wait until we all grow gray.

The effective, indeed the only, solution to this question of Government competition is that when a trust or monopoly grows so powerful that it can and does defy the law, and almost defy the law of economics, the only plan workable is to oppose it through competition by the Government, and thereby compel greed and avarice to reduce its prices to a just figure and to deal fairly with the people.

In my judgment, Mr. President, the Democratic Party can not win victories if it adopt the mournful philosophy of my learned friend from Maryland. The Democratic Party will win victories, and will only win victories, when it becomes more democratic.

This is a progressive age. Merely to live is a complex proposition. Not only to earn a living but to live after you have earned the wage in this intense, hurrying age is quite difficult. The party that will win victories in the future, the party that will be triumphant, must be a living, breathing, vital, militant party which will take hold of great questions and grapple with them in accordance with the needs of the hour.

So, whilst I listen with delight to the words that fall from the lips of the scholarly, contemplative statesman from Maryland, he does not afford me any lighthouse for the future; he does not afford any illumination to the pathway that now seems dark.

With perfect friendship and most amicable relations, I do not seek his advice politically, but seek rather the opinions of those who believe that government has but one reason to exist, to wit, to make the life of its people easier, safer, more useful, and more graceful; and if a government does not do that, it has no excuse to live. Can you name another reason why a government should live other than to make the life of its people easier, safer, more useful, and more graceful?

This Constitution, the laws we pass, and our system of government are simply a harness to assist in drawing civilization's load. I do not feel any apprehension when I see the Government building armor-plate factories to compel the Steel Trust to reduce its prices to a reasonable figure.

I do not feel at all alarmed when I see the Government proposing to operate the plant at Muscle Shoals to come into competition with the Fertilizer Trust, if there be one, and give to the farmer fertilizers at reasonable prices.

So much has been said in the parlors of the dilettante and at banquet boards about the farm bloc that I now say a word about that subject. I have sat where it would have been unbecoming and impolite to reply, and have heard bitter scorn and contumely poured out upon those who belong to a farm bloc; but I think that the answer to that is that we can this winter wear the old coat of last winter, and the slouch hat I now wear I wore last year, sir, but the people must have three wholesome meals every day if they are to subsist.

Mr. President, in the West is a great river—the Colorado—the third largest river in the Nation and at times the second largest river in the Nation—the most flashy and the most temperamental river in the world. I will say to the Senator from Louisiana [Mr. RANSDELL], a Senator who has so faithfully guarded and fought for his people, that the Mississippi is not a more flashy or a more temperamental river than is the Colorado. Quantities of hydroelectric energy, potentially gigantic, can and will be developed on that river; and is there a man here so blind as to fail to perceive that hydroelectric power and petroleum are the great horses of God that are always on the road and that never grow weary? On that river may be developed in the future 4,000,000 horsepower—do I hear him aright? I hear the learned Senator from Florida [Mr. FLETCHER] say 4,000,000 horsepower. Indeed, 4,000,000 horsepower, yen, 6,000,000 horsepower. What are 6,000,000 horsepower? That is equivalent to 50,000,000 men working night and day forever. Do you think for a moment we are going to permit greedy private interests and private

capital to seize that which belongs to the people of this country and exploit them? No; the power that may be generated there, the potential energies for the heat and illumination of the people and the motive power of engines that may be generated there will remain in the hands of the Government, except where the Government has already committed itself.

Next to the inborn and ineradicable desire to care for the species, the most powerful human law is the desire to get money. No other law but one is more powerful than the desire to get money. We are living in an age that is money mad, the only thing the present age thinks is worth more than a dollar is a dollar and a half. Are we to sit here and draw our salaries and afford no relief to the people?

Sir, for 10 years I voted against river and harbor bills; but I have seen a light. The scales have fallen from my eyes, and hereafter when the roll is called I shall vote for the river and harbor bill, not against it. On all constitutional and institutional measures on which the Senate takes action looking toward making the life of our people easier, safer, and freer and more useful and more graceful, I am with you. Is the land overflowed? Is the land arid? Take the water off, if it be overflowed; if it be arid, place the water thereupon. That may be prosaic, but that is my idea of statesmanship.

In conclusion, let us not forget—

that words are the daughters of earth, and that deeds are the sons of heaven.

The American people want from their Congress some "sons of heaven" at this juncture.

Mr. HARRISON. Mr. President, I do not know why the Senator from Maryland [Mr. BRUCE] should become aroused over anything I said. Why should he flutter? Truly, I mentioned Mr. Ober, a citizen of Baltimore, and I mentioned a fertilizer trust. Either the one or the other of those two things must have irritated him. Mr. Ober, so far as I know, is a splendid man. He is certainly a successful business man. I have met him personally. He appeared before the committee. With other members of the committee I questioned him. There was nothing in my remarks touching Mr. Ober to which the Senator from Maryland, in his wildest imagination, could rightfully take offense. It must have been my mention of a "trust"—a "fertilizer trust." It has become a habit with some gentlemen in this Chamber to ascribe to themselves the duty of being the defenders of trusts. That custom with some has ceased to be occasional, and has become habitual. The Senator from Maryland can take that to himself, if he desires.

I am sure that we on this side of the aisle, Democrats as we are, do not relish sitting quiescently and have it said that the Democratic Party has lost the confidence of the country. That might have been expected from some one on the other side of the aisle. Indeed, it might come with good grace from some gentlemen over here. I might accept the suggestion from some Senators and pass it without attention, because there are Senators over here who have stood shoulder to shoulder and fought our ancient enemy on the other side. They have a right to their opinions, and even though they might not meet my approval their open declaration of them would give no offense to me. This Chamber has been the scene of many political clashes. These floors have held many tattered and torn policies. This Chamber has witnessed the repulses, as well as defeat, of many Democratic onslaughts. But we have always fought cleanly and generally unitedly. Our organized forces thought we were waging war for Democratic principles and Democratic ideas. We have not "marked time," neither as an organization have we walked backward. We have breathed the spirit of the new day. We carry the same progressive weapons and employ the same progressive war paint used by Jefferson and worn by Jackson. We are not now, and we have never been, a reactionary party, unmoved by distress and uninfluenced by the progressive spirit of the times. There is not room in the United States for two reactionary political parties, and whenever the Democratic Party attires itself in the garb of reactionism it will cease to function and be numbered among the political relics of antiquity. Some gentlemen who masquerade within the party may mark time and hesitate, but it will not and can not hold back the rest of us in keeping step with progress and action.

I say that there are some Senators over here who could tell me that we have lost the confidence of the country, and I would pass it by, but Senators who make the allegation must be pure of heart and true in record. It must at least reveal some semblance of adherence to Democratic principles and Democratic cooperation. Only that would give them a standing to

entitle them to say publicly that we have lost the confidence of the American people. We have done nothing of the kind. For four weeks this Congress has been in session, and during that time politics has stood abashed in the consideration of important legislation. No politics has heretofore been brought into any discussion at this session. It is a pity that the first voice to be raised in this Chamber against the Democratic Party is by an alleged Democratic Senator proclaiming that the Democratic Party has lost the confidence of the country. I ask that Senator what is it that has inspired him to try to lecture me and my colleagues and say that we by our record and our actions have caused the country to lose confidence in the Democratic Party? Do such utterances upon the part of Democratic office-holders reflect credit upon themselves or aid in the restoration of their party?

What encouragement is offered them in such discouraging sentiments? Oh! Mr. President, if the people but knew that in some instances—aye, in many instances—when we were fighting the people's fight here, when we were fighting to cleanse this Government of corruption, when we were trying to relieve the burdened and stooped shoulders of the American taxpayer of some taxes, while most of us cooperated, most of us pulled together and did our best as a minority to lift that load, although it was a very heavy one, that the Senator from Maryland, who now proclaims that we and our party have lost the confidence of the country, did not help us.

Who was it in those stirring days that was giving succor and aid and assistance to the leaders on the other side of the aisle to thwart our plans and defeat our program? To ask the question is to answer it. You know who it was. I know of but one instance in the whole history of the Democratic Party in this Chamber when a Democratic Senator failed to vote for one of his own Democratic colleagues when that colleague was a candidate for the position of chairmanship of a senatorial committee.

Oh, I know the excuse that was offered—that he was afraid we were trying to cooperate with and enter into some agreement with certain progressive Senators on the other side. It is well that such betrayal should be based upon such a flimsy excuse. The trouble is that the name "progressive" was a stench in his very nostrils and for fear that progressivism might triumph he refused to keep step with his Democratic colleagues and voted against them.

And yet that is the Senator who has the audacity upon the floor of the Senate to rise and lecture his Democratic colleagues and to say to the country that we have lost the confidence of the American people.

When we did not and could not believe in the principles handed to us by Secretary of the Treasury Mellon to give a greater reduction in the higher surtaxes than upon the taxes of the less-favored many, what Senator was it on this side of the aisle who failed to keep step with his Democratic colleagues and voted with those on the other side of the aisle who were championing the Mellon policy? That policy which he enfolded to his bosom was repudiated by this body, repudiated by the other branch of Congress, and finally, in the signing of the bill, repudiated by the President of the United States. The Senator who attempts to lecture me upon my democracy, upon my loyalty and allegiance to it and its principles and policies must come with clean hands and not be tainted with reactionism and Republican allegiance.

I realize that if the Democratic Party is to be reactionary in the United States, it has no place in America's history. I believe in the principles of my party. I believe in the principle of State rights, as well as my friend from Maryland believes in it, and yet I realize to-day that there is just about as much sentiment for State rights in the Democratic Party as there is in the Republican Party. I rose on the floor of the Senate to read an article from Mr. Ober, a courteous gentleman. He may be in every way all right. I grant it. I have said nothing to the contrary; but he is the head of a great fertilizer association, the membership of which is 90 per cent of all the fertilizer manufacturers in the country. He stated that himself before the committee. When the head of that organization comes before the Committee on Agriculture and Forestry of the Senate and objects first to the Ford proposal, when it was about to pass, and then fights the Government ownership and operation proposition, and now changes front and tries to crystallize public opinion against the Underwood bill, it shows that he is inconsistent, and I have a right to speak against that. This gentleman occupies a big place in the fertilizer world, and I can not understand, for the life of me, simply because he sojourns and habitates in the beautiful and wonderful metropolis of Baltimore, represented in part by my distinguished friend from Maryland, why the Senator should feel

it his duty to rise here in all his majesty and defend Mr. Ober and at the same time criticize the Democratic Party and say it has lost the confidence of the country.

I am not surprised that the Senator is weakening on the Underwood bill. I have never felt that he was very strong for it, and I have been afraid that when the time would come and the pinch would arise that he might desert the ship. It would not be our first experience. We have been confronted with that situation before. That specter has ever been before my eyes whenever we have engaged here in a close fight. And so, after all, it may be that the article printed in the morning paper and given out by Mr. Ober, the head of the fertilizer association, has caused my friend to weaken in his steadfastness and loyalty to the Underwood bill.

Ah, Senators, I hold in my hand an amendment about which the Senator from Maryland has talked much. It is the Senator's amendment. What is its object? He spoke eloquently and long about it. He has taken more interest in this debate, with few exceptions, than any other Senator. By his amendment he has sought to strike from the Underwood substitute the provision that gave to the Government the right to manufacture nitrates for fertilizer purposes and sell them in time of peace. That is what Mr. Ober wants to do. Ober wants this plant to be maintained and operated only in time of war and then only to make nitrates for war purposes, but in time of peace he desires that it stand still and remain idle. Those ideas are well expressed in the amendment offered by the distinguished Senator from Maryland. I hope that my good friend, genial as he always is, able as he has shown himself to be, will not again rise here and attempt to lecture the Democratic Party and some of us by proclaiming that it has lost the confidence of the country.

Mr. BRUCE. Mr. President, the Senator from Mississippi [Mr. HARRISON], if I may be allowed to say so, has exhibited such a very limited degree of tact and good judgment, to say nothing of good feeling, in his defense of the Underwood substitute that I think that the absent Senator from Alabama [Mr. UNDERWOOD] will have another and an additional reason when he reads the remarks of the Senator from Mississippi for deploping his present sickness. It was said by Lord Lyndhurst, in commenting upon Lord Campbell's Lives of the English Chancellors, that Lord Campbell had added another pang to death; and so I venture to predict that the Senator from Alabama, when he finds out with what degree of skill and sound discretion his function in looking after his substitute has been performed by the Senator from Mississippi, will say that the Senator from Mississippi has added another measure of distress to illness.

All of us will recollect that a painfully incorrect impression was entertained of the intellectual capacity of Benjamin Harrison before he became President, and even after he became President he was subject to no little unjust disparagement. Upon one occasion it is said that a citizen of Indiana went to the White House to have an interview with him, and that the messenger who took the request of this citizen into him reported: "The President says that you can not see him." "Well," said the citizen of Indiana, "I know that he is damned small, but I did not know that he was so small that he could not be seen." I knew that the Senator from Mississippi was a narrow, contracted, small-bore partisan, but I confess that I did not begin to take the real measure of his dimensions as a statesman until I became the subject of the coarse diatribe which he has just directed against me.

What can he mean by saying that the Democratic Party has not lost the confidence of the country? Of course, I meant temporarily lost it, as every party does at times in the course of party vicissitudes. Is it not a fact that Calvin Coolidge received the largest plurality that any candidate for the Presidency ever received in American history? Is it not a fact that in no less than 12 of the States of the Union our party polled a smaller vote than a third party which had sprung up almost like a mushroom in the night? Even that, however, of course does not necessarily signify the loss of the confidence of the American people permanently.

I was endeavoring in my feeble way to point out some of the admonitions of such a party disaster. I have been hoping that we would take to heart the lessons that it ought to teach us and build up our party again upon surer, firmer, and most lasting foundations, upon foundations, in other words, worthy of its noble and world-famous founders, Thomas Jefferson, Andrew Jackson, the hero of New Orleans, and Grover Cleveland, that old, gray, lichen-covered rock to which our hearts might so well turn at this crisis in the history of our party. I was voting the Democratic ticket when the Senator from Mississippi was born. I made a speech in behalf of that gal-

lant soldier, Winfield S. Hancock, when he was the Democratic candidate for the presidency of the United States, even before I was old enough to vote for him, and from that day to this my voice, my pen, my purse, my vote have been consistently employed in the maintenance of true Democratic principles and in securing the success of Democratic candidates, even when, as in this last presidential contest, it seemed to me that nothing could be clearer than the fact that the party was steering right on to a jagged and destructive rock.

The Senator from Mississippi may think that he is a truer Democrat than I am, but he is not. In the language of the old English battle hymn, "I love that broad red banner." At times I have followed it exultantly to victory, and at times I have followed it sorrowfully to defeat, but I shall always continue to follow it whether it flutters triumphantly on high or droops, because no matter what errors the Democratic Party falls into, no matter what mistakes it makes, there is a principle of inextinguishable vitality in its bosom that sooner or later makes it a militant thing again. It is like one of those spirits of which Milton speaks in *Paradise Lost*—"Vital in every part, yet except by annihilating can not die." It has survived all the shocks that have come to it in its history and it will survive the shock that it received last November if it will only be true to itself and to its real leaders, and if some of its pseudo leaders will only exhibit the just measure of tolerance which even the most extreme party man ought to exhibit in relation to the honest opinions and views of his party associates.

I have had nothing to apologize for since I have been a Member of this body. If I had the opportunity to repeat the experience of last session, I should repeat it. If it did not smack of personal vanity in me to say it, I might say that at the last session of this body it was perhaps my personal judgment that was right and perhaps the judgment of Members of this body and of our party, like the Senator from Mississippi, that was wrong. I have no excuses to make for voting for the distinguished and useful Member of this body who presides over its deliberations as chairman of the Senate Interstate Commerce Committee. It is a fact that with the concurrence of both sides of this body his name as chairman of that committee was actually set up in print, it being recognized on every hand as the proper thing, not only from the public point of view but from a party point of view; also that the chairmanship of that committee should go as the chairmanship of each of the other Senate committees went—to a Republican. And by whom, pray, was this side of the Chamber diverted from the intention of making the Senator from Iowa [Mr. CUMMINS] the chairman of the Interstate Commerce Committee? There is not a Member of the Senate, I venture to say, who is not familiar with the real personal influence that brought about that change. It was brought about by the Senator from Montana [Mr. WHEELER], whose seat is just behind me. It was at his suggestion; it was upon his insistence, as I am informed, that all the existing ideas of the Democratic Members of the Senate with reference to the true policy of the party in relation to the Senate Interstate Commerce Committee were reversed, the printed name of the present President of this body deleted as the chairman of that committee, and all of us Democrats called on at a moment's notice to vote for a Democratic Member of this body, the Senator from South Carolina [Mr. SMITH], as chairman in place of the Senator from Iowa [Mr. CUMMINS].

That, in my opinion, was the beginning of the train of irresistible, tragic, fatal causes that resulted in the defeat of the Democratic Party at the last presidential election. If I had had it in my heart to reproach one of my colleagues, and I did not nor have I it now, I certainly should have done so when I more than once picked up a newspaper during the last presidential campaign and saw that the Senator from Montana [Mr. WHEELER], as the candidate for the Vice Presidency on the La Follette ticket, was denouncing the party of which he had been supposed to be a member, as nothing but a dead, putrid corpse.

In view of these facts, can it be said that at the last session of the Senate I took any stand in regard to the Senate Interstate Commerce Committee that might not have been taken by any sensible, judicious, true party man?

Then the Senator says, most unjustly, that I was slack in promoting the investigations into official misconduct that were prosecuted by this body at our last session. Never once did my vote fail to be cast in favor of such investigations. I never threw a pebble, a twig, a straw, in the way of any such investigation. If I may say so, I have been too much a student of political history, too long a member of legislative bodies, not to know that one of the highest functions of a legislative body

is that of investigation under such circumstances. Notwithstanding the sincere respect that I entertained for the President of the United States, when he undertook to throw himself across the pathway of those investigations I was one of the very first Members of this body who rose and said that I for one did not know how to set any limits to the legislative investigation of official misconduct. But I have always thought, and I think now, that the result of those investigations might have been entirely different if they had been organized and conducted in a different manner.

I am betraying no secret when I say now—though no human power could have induced me to breathe the words before—that after Mr. Davis had been campaigning for weeks during the last presidential contest he said to me on one occasion, "Senator BRUCE, I can not see that there is the slightest reaction in the United States anywhere to the oil scandals." I replied, "But suppose that those investigations had been just a little freer from partisan extravagance than they were; suppose that the members of those investigating committees had in some instances been just a little more carefully selected than they were, and suppose that those investigations had been conducted in a more impartial, judicial spirit; might not the result then have been different? Might not some real effect on public opinion have been worked?" In my humble opinion these questions can be answered only in the affirmative.

Bad as were the scandals that were exposed, the people of the United States came to believe that they were nothing like as bad as they were represented to be for extreme partisan purposes of one sort or another. And so from those investigations, which seemed to be such fair, luscious fruit for a political campaign came nothing but Dead Sea ashes.

I suppose that the Senator from Mississippi finds fault with me because, exercising my sense of constitutional duty, I did not see fit to ask the President to remove Secretary Denby. I am proud of the fact that I did not. Nothing could ever be more clearly established in the course of legislative proceedings than the fact that this body had no lawful power to make such a request, and it had no effect except that of influencing public opinion throughout the United States adversely to our party.

No! Even as a Democrat of the strictest, straightest sect, I have no hesitation in laying my record in this body alongside that of the Senator from Mississippi. I may not be so susceptible to partisan virulence and extravagance as he is; I may not be so amenable to the party whip; I may not be so servile when the decree of the party caucus is pronounced; but when my votes in this body are canvassed by any fair-minded Democrat it will be found that I have been quite as true to Democratic principles as the Senator from Mississippi or any other Democratic Senator in this body.

Does the Senator from Mississippi know or does he not know that when I took the stand that I did with reference to the election of the President of the Senate to the chairmanship of the Interstate Commerce Committee, from every part of this broad land, and from no quarter more noticeably than the South, came floods of letters and telegrams to me declaring the sympathy of the writers with me in the stand that I had taken?

Mr. HARRISON. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from Maryland yield to the Senator from Mississippi?

Mr. BRUCE. I yield.

Mr. HARRISON. Does the Senator know whether they were from Democrats or Republicans?

Mr. BRUCE. I know it well. If the Senator from New Jersey [Mr. EDWARDS] were here, he would tell you that one of his constituents wrote to him commenting upon the vote that he had cast with reference to the chairmanship of that committee and inclosing a batch of Democratic editorials approving my course and, though it seemed to me that the process was just a little like seething a kid in its mother's milk—to use the scriptural illustration—asking my friend the Senator from New Jersey to be so kind as to show these editorials to me. The editorials approving my course came from far-away San Antonio, Tex., from New Orleans, from Charleston, from the length and breadth of the land—East and West, North and South. Astonishing as the statement may seem, to this day I personally have no reason to believe that one solitary Democratic paper in the United States disapproved of my course.

Somebody told me—I do not know whether it is true or not—that even the editor of a newspaper in the home town of the Senator from South Carolina [Mr. SMITH], and a personal friend of his, came out in an editorial in which he said that he thought it was bad politics for the Democrats in the Senate to do anything but elect a Republican to the headship of the

Committee on Interstate Commerce; and not more general was the approval given to my course in that matter than to my course in relation to Secretary Denby.

Yes! I have had but one polestar in my life as a public man—sometimes, perhaps, it has cast only a flickering and uncertain light on my path—and that has been to reach the most correct conclusion that I could under the given set of circumstances that confronted me, without regard to any secondary considerations whatsoever. Should I be true to nothing else, in the course of the remainder of my political life I trust that I shall at least always be true to my own intellect and conscience.

It was not my course at the last session of the Senate that was disapproved by the people of the United States or the Democratic press throughout the United States; it was the course pursued by the Senator from Mississippi himself. There never was a fairer prospect in the world for party success than was presented to the Democratic Party at the last session of this body. It looked as if all that we had to do was to reach out our hands and clutch the cluster of grapes. But when the people of the United States saw the lack of moderation that was exhibited in so many respects in the party policies that we pursued at the last session of the Senate, when they saw us drawing closer and closer, apparently, to a group of public representatives with whom we had absolutely nothing in common—and whose ideas are regarded with the deepest distrust by the majority of the American people—our sky became more and more overclouded: popular confidence more and more deserted us; and finally, when our national convention came and we undertook the absolutely impossible task of straddling two horses going in diametrically opposite directions we had no reason whatever to anticipate anything except what did actually happen.

Nowhere in the United States was that situation accepted with more sorrow—genuine, unspeakable sorrow—by Democrats than in the State of Maryland. For some years past our party had been at high tide. We thought that we had gotten back to the era that ensued immediately after the Civil War. In recent years all of our Democratic candidates have been elected to the highest offices in the gift of the people of Maryland by phenomenal majorities. Our party was as lusty and as strong and as hopeful and confident as the Democratic Party ever was in the State of Mississippi or in the State of Louisiana or in the State of Texas or in the State of South Carolina. But I knew, as soon as that convention had completed its work, that we were doomed to disaster; and it is the honest truth that I never once heard any Democrat in the State of Maryland, at any time after the nominations were made by the Democratic convention in New York, predict the success of the Democratic ticket. We Maryland Democrats came up to the polls on election day exactly as the gallant Confederates led by Pickett came up to the heights at Gettysburg—with undaunted courage and loyalty, but with the certainty in the hearts of all of us that election day in November would not be our day, but the day of our old, immemorial antagonist.

The wise thing for us to recognize at the present time, is the fact that we did lose the confidence of the people; but that is no reason why we should not aspire to regain it. In my opinion we shall regain it if we are only true to our old traditional principles and to the best leadership by which the party has been led in the past.

The Senator from Mississippi seems to think that I also committed an unpardonable sin when I supported the Mellon tax plan, and that in supporting it I was simply obeying the ordinary impulses of subservience which mark my relations to the great trusts and organized wealth. So far as I recollect, he did not use the word "octopus," though at one time I thought that would certainly issue from his lips, or the word "ogre," or the word "monster," or the word "Frankenstein," or some other word that is framed in excited moments in the inflamed cells of the human brain.

No man ever gave any better proof of his utter lack of subservience to anything or anybody in connection with public life than I did in connection with the Mellon tax plan itself. The Senator from Nebraska [Mr. Norris] at least will recollect that, so far from being entirely ductile in the hands of Secretary Mellon, I was one of the most outspoken supporters upon the floor of the Senate of his tax-publicity provision; and if there was anything in the course of our discussions at the last session of the Senate that was more obnoxious to the organized wealth of the country than another, it was the tax-publicity provision of the Mellon plan. But I supported the Mellon tax plan in the main because my experience had demon-

strated to me that the idlest thing, the most fruitless thing in the world, is to heap up a great load of oppressive taxation on the backs of any class of taxpayers whatsoever, because just as certainly as you do the process always turns out to be the cry of a dog when sheared—"all cry and no wool."

One of the wisest things that ever was said about taxation was said by Colbert, the French Minister, when he declared that "the art of taxation consists in plucking the goose without making him squawk." What was presented to me was the fact that taxes on incomes above \$200,000 a year had gone down from upwards of a billion dollars to \$150,000,000. How best was that lost taxation to be recovered and the revenue that it represented to be wooed back into the channels of productive enterprise? I thought that the method suggested by the Secretary of the Treasury was the right method, but the Senator from Mississippi did not agree with me.

I was amused this morning when my friend, Captain Ober, was taxed with inconsistency in connection with his views about the Muscle Shoals plant by the Senator from Mississippi. At the last session of the Senate, as I understood it, one of the most ardent, one of the most uncompromising advocates of the tax-publicity provisions of the present revenue law was the Senator from Mississippi, but imagine my surprise when I saw, on glancing at the Congressional Digest this morning, that the stool of repentance had been brought in, that the Senator from Mississippi has entirely recanted his heresy, and that what seemed to him so fair and bright last June appears now hopelessly forbidding and repellent, and that just as soon as the tax-publicity proposition comes up again, he was prepared to eat any amount of "crow" that might be pressed to his lips, and to vote against the tax-publicity provisions of the present revenue law. Hardly does it lie in his mouth, it seems to me, to tax my friend, Captain Ober, with inconsistency.

I will cease in a moment or so now, but let me draw just a little further the parallel between the Senator from Mississippi and myself as a Democrat. Though I am not intolerant, like the Senator from Mississippi, in my views of my colleagues who differ from me, I suppose that if there is any test at the present time, in the part of the world, at least, where I live, that determines the character of a true Democrat, it is his attitude toward the child-labor amendment to the Federal Constitution. To our Democrats in Maryland the most searching question that you can ask of a Democrat at this time is, whether he is opposed to or favors this amendment. Is he in sympathy with the steady process of centralization that is going on week after week, day after day, and hour after hour in the operations of the Federal Government, or is he at enmity with it? Does he think that the Federal probe ought to be pushed even into the inner core of child life and industrial activity in the States? Does he think that a child in one of the States should be tied up to the leading strings of the Federal Congress, of an authority far removed from the immediate authority by which his young life is habitually sheltered? Or does he think that each of the States of the Union should in the matter of child labor, as in all other matters relating to the domestic concerns of the States, be left to form its own views of policy, unmolested by the intrusive, ever-growing power and authority of the Federal Government? These are the questions, I repeat, that are now being asked of Democrats from one end of the United States to the other, and that have been answered in no uncertain terms by the Legislatures of Louisiana, Georgia, and South Carolina.

Yet we have the Senator from Mississippi—the State once represented by the illustrious leader of the Southern Confederacy, Jefferson Davis; the State of Lucius Quintus Cincinnatus Lamar, and many another great man who wore his spurs with gallantry and distinction in this body—voting to extend the authority of the National Government to the regulation of the labor of every individual in every one of the 48 States who happens to be under 18 years of age.

So really, now that I have reviewed the political record of the Senator from Mississippi a little, I think that he ought to postpone his reply to me just for a little while—

Mr. HARRISON. There is nothing to reply to, may I say to the Senator?

Mr. BRUCE. Perhaps that was due to the incapacity of the speaker to whom I was attempting to reply.

Mr. HARRISON. Of the speaker who is making the speech.

Mr. BRUCE. We will ask the Senate to decide upon whose foot that reproach should be put. I must say that in replying to the Senator I experienced the difficulty of the duelist who refused a challenge before the Civil War on the ground that his antagonist was so thin that it was absolutely impossible for any aim really to hit him.

Let the Senator, I say, go off into some quiet corner—not answer me rashly and impulsively, as the Senator, with all his talents and essential good nature, is prone to do at times—and think over what he said and ask himself whether I really said anything this morning in defending my friend, Captain Ober, of Baltimore, that justified his intemperate attack upon me, both personally and as a party man.

As for his charge that I am amenable to the influence of trusts and business combinations, I might well not dignify it with notice, but if not another single one of his poisoned arrows fell broken and impotent at my feet, that one did. It just so happens that for 12 years of my life, under the appointments of three successive governors of Maryland, I was the general counsel of the public service commission of Maryland, which is charged with the duty of regulating the conduct of all the public-utility corporations of that State. If the Senator has any doubt as to the principles by which my official conduct in relation to moneyed combinations of any sort was shaped, all that he has to do is to go to Maryland and ask the people just why it was that when I became a candidate for the United States Senate, without the slightest rift of sentiment in the Democratic Party or any element of which it is composed, I was nominated and elected to a seat in this body.

I am not connected with any trust or even any corporation, except the Maryland Life Insurance Co., of which I have been the general counsel for many years. I owe no personal obligations of any sort to any business interests; and anybody who knows anything about me in the State of Maryland knows that in my official relations to private business I have never been influenced in the slightest degree by anything except what I conceived to be the obligations of my public duty.

Benjamin Franklin said, as we all know, "It is hard for an empty sack to stand upright." I am glad to realize that if there is no other reason why I have been independent of selfish control in public life one is to be found in the fact that, though beginning life without a dollar, I contrived, by the practice of my profession through a long course of years, before I gave myself up to public duties, to make myself peculiarly independent of anyone's favor. But I have doubtless said even more on this subject than I should have said.

In conclusion, I merely wish to say to my party associates in this Chamber that in my first remarks I had no disposition whatever to utter anything censorious about them, or to withhold from them the same right to form their individual views as to public and party policies that I reserve for myself. Now that we are altogether again, somewhat like a lot of refugees on an island in the Mississippi River after a devastating flood, we should all feel that we are a band of brothers, "all for each and each for all," and resolve by every means in our power to renew the strength of our party in such a manner that when we hold our next Presidential convention it will be absolutely invincible.

ORDER OF BUSINESS

Mr. CURTIS. Mr. President, I had intended to ask unanimous consent this morning that after the conclusion of the routine morning business the unfinished business might be set aside and the Senate proceed to the consideration of unobjected bills on the calendar. I am informed that the leader on the other side, the Senator from Arkansas [Mr. ROBINSON], can not be here to-day, and he wanted only a certain class of bills called, but I have since been informed that at least two Senators will object to those. So I concluded not to ask unanimous consent to-day, but I give notice that to-morrow I will ask unanimous consent that we shall proceed to the consideration of unobjected bills on the calendar, and that to-day, after the routine morning business shall be disposed of—and I understand there is one more order—

The PRESIDING OFFICER (Mr. McNARY in the chair). Concurrent and other resolutions are in order.

Mr. CURTIS. I hope the unfinished business may be laid before the Senate, and the Senator from Louisiana [Mr. RANSDELL] and the Senator from Pennsylvania [Mr. REED] and others who desire to address the Senate may take up the time. I give notice that then we will have a short executive session, after which I will ask an adjournment.

The PRESIDING OFFICER. If there is no further morning business, the morning hour is closed, and the Chair lays before the Senate the unfinished business, which is House bill 518.

MUSCLE SHOALS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 518) to authorize and direct the Secretary of War, for national defense in time of war and for the production of fertilizers and other useful products in time

of peace, to sell to Henry Ford, or a corporation to be incorporated by him, nitrate plant No. 1, at Sheffield, Ala.; nitrate plant No. 2, at Muscle Shoals, Ala.; Waco Quarry, near Russellville, Ala.; steam power plant to be located and constructed at or near Lock and Dam No. 17 on the Black Warrior River, Ala., with right of way and transmission line to nitrate plant No. 2, Muscle Shoals, Ala.; and to lease to Henry Ford, or a corporation to be incorporated by him, Dam No. 2 and Dam No. 3 (as designated in H. Doc. 1262, 64th Cong., 1st sess.), including power stations when constructed as provided herein, and for other purposes.

RIVER AND HARBOR APPROPRIATIONS

Mr. RANSDELL. Mr. President and Senators, I desire to call the attention of the Senate for a very few moments to what to me is one of the most remarkable and libelous editorials I ever read, an editorial which appeared in the Washington Post, of this city, on the 22d day of this month, entitled "Progress and pork." Many of the Senators doubtless read this article. The purport of it is that the river and harbor bill now pending in the House is a "pork barrel" bill—a "bill containing millions of dollars of sheer grabs." The editorial speaks of that measure in this way, after going on to discuss certain phases of it in very general terms:

That [policy], however, would defeat the very aim of logrolling and back scratching which the present system was designed to promote. . . .

Thus the Member from Wayback will not vote to appropriate a million dollars to make the approach to the Washington Navy Yard navigable by our vessels unless at the same time \$100,000 is appropriated to pump enough water into Wildcat Creek to make it navigable for the skiffs of muskrat hunters.

Was there ever such an outrageous attack made by a reputable journal since the foundation of our country on a great piece of legislation which was recently reported to the House of Representatives by its Committee on Rivers and Harbors?

Mr. President and Senators, I would like to know for whom this paper speaks. Whom does the editor who writes this kind of an article represent? Does he represent the administration of this great Government? I can not believe it. Does he represent the railroads of this country, which compete with the transportation developed by improved rivers? I do not believe it. I can not conceive for whom this editor speaks.

He has, in my judgment, uttered a slander against the American Congress, and I call upon him here and now to make good his accusations or to apologize for them. His charges are all very general. He admits that there are "probably some items in the bill in question which ought to be enacted and which the President would approve if they were presented to him separately." "Some good items in the bill," but the intimation is there are a great many vicious items.

Now I say to Senators and to that editor, in all fairness is not the American Congress entitled to at least as good treatment as an ordinary criminal, who, when charged with a crime, is served with a copy of the indictment against him, which alleges the time, the place, the circumstance, and everything connected with the crime. He is not required to answer the charge until he knows what he is accused of.

I say to the editor of the Washington Post, "What are we, the American Congress, accused of in this charge which you have made of 'pork' in the river and harbor bill? What items in the pending bill are bad? Do you assail, sir, that great item proposing to deepen the Hudson River up to the city of Albany at a cost of \$11,500,000, making a seaport of that great city and of Troy and Schenectady and the capital section of the Empire State of this Republic? Do you, sir, assail the item of \$10,000,000 for the harbor of Los Angeles in California, a harbor which had the second greatest commerce in imports and exports of any city in America in 1923, a city which itself is spending enormous sums to improve its harbor? Do you assail the great intracoastal canal project along the coast of Louisiana and Texas, running from the Mississippi River to Corpus Christi, giving a great waterway there nearly 700 miles long, with a depth of 9 feet and a width of 100 feet, at an estimated cost of \$16,000,000? Which one of those projects do you attack?"

"The bill carries about \$53,000,000. There are 35 projects in it. The three that I have enumerated aggregate \$37,500,000 out of the total of \$53,000,000. Will you be kind enough, sir, to show us what projects are bad and wherein they are bad?"

Let me call to the attention of the Senate a very interesting and eloquent letter published in the Washington Post this morning, from the distinguished senior Senator from Florida [Mr. FLETCHER], entitled "River and Harbor Legislation." In

that letter Senator FLETCHER explains in great detail how river and harbor appropriations are made. He shows that before Congress can make an appropriation for any item connected with rivers and harbors there must first be enacted a law authorizing a survey of the project with a full detailed report thereon. When this act of Congress has been passed the Chief of Engineers sends instructions to the district engineer to examine the project. The district engineer sends his report to the division engineer. The division engineer then sends it to the Board of Engineers of Rivers and Harbors, sitting in this city, a board composed of seven engineer officers, the lowest in rank being a major. If they act favorably upon it, it then goes to the Chief of Engineers of the Army, and not until he approves it is it sent to Congress. No project for river and harbor appropriations is deemed to have legislative status until it has run this gantlet; first, a bill providing for the survey; second, a favorable report by the district engineer; third, a favorable report by the division engineer; fourth, a favorable report by the Board of Engineers for Rivers and Harbors; fifth, a favorable report by the Chief of Engineers; and, sixth, its reference to Congress for action. Congress in many instances then calls for a number of witnesses. In all of the very important projects many witnesses appear and testify before the committee prior to favorable action on the bill.

I would ask, Mr. President, that the editorial to which I have referred and the very able letter of the Senator from Florida [Mr. FLETCHER] in reply to it be published as a part of my remarks.

The PRESIDING OFFICER (Mr. Ladd in the chair). Without objection, it is so ordered.

The editorial and letter are as follows:

[From the Washington Post, Monday, December 22, 1924]

PROGRESS AND PORK

The \$55,000,000 river and harbor improvements bill is apparently doomed. This is no time for "pork." Confident that a bill containing millions of dollars of sheer grabs, or at best of nonurgent expenditures, the House prudently thinks it not worth while to waste time and energy in passing it; an eminently wise conclusion.

The incident illustrates again the unfortunate—we might say, the pernicious—character of our present system of grouping a lot of appropriations of varying degrees of merit and demerit all in one bill, to be approved or vetoed as a whole. There are probably some items in the bill in question which really ought to be enacted, and which the President would approve if they were presented to him separately. But they are inseparably linked with others which ought not to be enacted at this time, if at all, and which could not be approved. If, as a matter of convenience or for any other good reason, it is desirable to put a number of appropriation items in a single bill, then it is desirable to invest the President with the power to approve certain items and veto others.

That, however, would defeat the very aim of logrolling and back scratching which the present system was designed to promote. The idea is that money shall be apportioned to the various congressional districts for public works not according to the actual public need, but simply in such a way as will give every part of the country a share of the funds. Thus the Member from Wayback will not vote to appropriate a million dollars to make the approach to the Washington Navy Yard navigable by our vessels, unless at the same time a hundred thousand dollars is appropriated to pump enough water into Wildcat Creek to make it navigable for the skiffs of muskrat hunters.

In such fashion in many former bills good and desirable items have been made to carry iniquitous ones through to enactment. But now the outlook is that the bad items will cause the defeat of the good ones. It is an unfortunate, unprofitable, and discreditable state of affairs, in which "pork" defeats or at least delays much-needed progress.

[From the Washington Post, Monday, December 29, 1924]

RIVER AND HARBOR LEGISLATION

To the EDITOR OF THE POST.

SIR: Referring to editorial in the Post of to-day headed "Progress and pork," permit me to direct your attention to the fact that the first paragraph of the bill referred to reads:

"That the following works of improvement are hereby adopted and authorized, to be prosecuted under the direction of the Secretary of War and the supervision of the Chief of Engineers, in accordance with the plans recommended in the reports hereinafter designated."

In order that you and others who are apparently misinformed regarding the procedure leading up to the introduction of such a bill—a bill providing appropriations for the improvement of rivers and harbors—I will say that it is first necessary for a bill to be introduced and passed authorizing and directing the Secretary of War to cause preliminary examinations and surveys to be made of proposed projects in order that it may be determined whether the needs of navigation and commerce justify the expenditure of public funds.

After the passage of such a bill and its approval by the President, the district engineers and assistants make very careful personal investigations into each proposed project, free from any political or other influence, and in a great many instances the reports are adverse and in the majority of cases the Chief of Engineers approves such adverse reports. In fact, it is not unusual for the Chief of Engineers to disapprove favorable reports made by the district engineers. District engineers submit their reports on all projects to division engineers, who review them carefully and transmit them to the Chief of Engineers with a recommendation—favorable or unfavorable, as the case may be. The Chief of Engineers refers the report, in each case, to the Board of Engineers for Rivers and Harbors, composed of seven Army engineers, none below the rank of major, for further examination and recommendation.

Assuming that the report of a district engineer and a division engineer and the Board of Engineers for Rivers and Harbors and the Chief of Engineers is favorable to the adoption of a project, the Chief of Engineers submits his report, together with detailed information, including an estimate of the cost, to the Secretary of War, who in turn may disapprove or approve the project; but assuming that he approves the several reports on the project, it is then, and not until then, ready to be included in the rivers and harbors bill. Congress never adopts a project that has been adversely reported on by the Secretary of War, and he never favors a project that has the disapproval of the Chief of Engineers.

I dare say there are no river and harbor improvement projects recommended by a district engineer, a division engineer, the Board of Engineers for Rivers and Harbors, the Chief of Engineers, and the Secretary of War for adoption by Congress based upon political influence of any kind or character anywhere along the line. Nor is it true that appropriations are made for such improvements based upon "logrolling" by Members of Congress. No appropriation can be made until the project is adopted by Congress, and that is done in the general rivers and harbors bill. I must, therefore, conclude that your editorial was written by one who is not familiar with the law and procedure in reference to legislation, investigations, reports, approval, and recommendations by officials of the War Department who are in no wise personally, as individuals, concerned in the outcome.

The procedure referred to above defeats the very aim of "logrolling" and "back scratching" mentioned in the editorial, which states "the present system was designed to promote." There is no money paid out of the Treasury which is so thoroughly and abundantly safeguarded as that disbursed for river and harbor improvements.

DUNCAN U. FLETCHER.

UNITED STATES SENATE, December 22.

Mr. RANDELL. I also ask that the first page and a half of the report of the Rivers and Harbors Committee, accompanying the House river and harbor bill, submitted to the House on December 17 last, be printed as a part of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

[H. Rept. No. 1053, 68th Cong., 2d sess.]

RIVER AND HARBOR BILL

Mr. DEMPSEY, from the Committee on Rivers and Harbors, submitted the following report, to accompany H. R. 10894:

The Committee on Rivers and Harbors respectfully submits the following report in explanation of the accompanying bill authorizing the construction, repair, and preservation of certain public works on rivers and harbors, and recommends that the bill do pass.

The bill contains the following provisions as to the expenses of prosecuting the projects adopted in this act: (1) That no money shall be expended on any of the projects adopted in this bill during the fiscal year ending June 30, 1926; (2) that there shall be expended on all such projects during the fiscal year ending June 30, 1927, not to exceed \$10,000,000; (3) that there shall not be expended to exceed \$10,000,000 during any succeeding fiscal year.

In prosperous years, when factories are running full time and the farms produce large crops, the railroads of the country are unable to carry all of its commerce and we can only provide for transportation of all the shipments offered by utilizing our waterways.

The railroads transported in the year 1923, 2,333,787,044 tons of freight, while our waterways carried 442,097,328 tons. In other words, the waterways carried more than one-sixth as much freight as the railroads. For the year 1923 the railroads set aside \$1,077,000,000 for improvements. On the same basis we should expend \$180,000,000 annually on our waterways. In view of these facts, the expenditure of not to exceed \$10,000,000 for the fiscal year 1927 on the projects adopted by the bill which this report covers and of not to exceed \$10,000,000 annually thereafter on such projects until these projects are completed is so small as to be almost insignificant. Nor does the comparison grow less by taking into consideration projects already adopted, for all of them can be completed by an expenditure of \$204,000,000, one-fifth of the amount appropriated by the railroads for like purposes for the single year 1923.

The amount to be expended under this bill is small, too, when we compare it with previous bills adopting new projects. For instance, the act approved June 25, 1910, adopted 179 new projects at an estimated cost of \$263,728,009, while the present bill—the first bill in three years—adopts only 35 projects and authorizes the expenditure for their improvement of only \$10,000,000 for the fiscal year ending June 30, 1927, and of \$10,000,000 annually thereafter until they are completed, the total cost being estimated at \$58,565,650, less than one-fifth of the amount authorized by the 1910 bill.

But the figures quoted do not give the real difference in the cost to the country, for in 1910 the wealth of the country was but \$143,139,573,114, while in 1922 our total wealth was \$320,803,862,000, and the burden of a country's expenditure is in proportion to its wealth at the time the tax is paid.

It is to be borne in mind, too, that the freight of the country doubles every 10 years and that the pressure for facilities for shipment is twice and a half as great now as it was in 1910.

National expenditures for rivers and harbors have been and are small, too, in comparison with not alone the aggregate of local expenditures but even with some of the single instances of expenditures in a locality. For instance, the port of Greater New York has entered upon a program of expenditure there to coordinate with Government improvements at a cost to that locality of about \$600,000,000. Los Angeles is starting a program, as we are advised, of expending approximately \$40,000,000. Philadelphia has recently built a single marine terminal at a cost of \$50,000,000. Even a comparatively small city like Wilmington, Del., is expending \$2,500,000 on port facilities, and Mobile, Ala., is expending \$10,000,000 for like purposes, and Houston, Tex., approximately \$20,000,000. New Orleans has expended approximately \$40,000,000 for port facilities. Like illustrations for nearly every large port in the country can be given.

A scrutiny of the proposed projects will, the committee is convinced, commend them to an impartial judgment as based on these sound principles.

Mr. RANDELL. The editorial to which I have referred speaks of "appropriations." The bill in question is not an appropriation bill. It is a legislative bill approving certain projects, which in the aggregate will cost, if finally appropriated for by Congress, something like \$53,000,000. The bill does not carry any appropriation whatsoever for those projects. There is a provision in it, however, which especially says that not one dollar out of the general river and harbor appropriations for the fiscal year ending June 30, 1926, shall be expended on any of the projects carried in that bill, and it goes on to provide that not in excess of \$10,000,000 shall be expended in any one year on the projects carried in the bill. So, while the bill does authorize and approve projects costing in the aggregate \$53,000,000, it does not appropriate for them, and it limits the expenditures which may be made for them to \$10,000,000 per year. It is not an appropriation at all.

Mr. President and Senators, I have now been a Member of Congress nearly 26 years, and I have been a pretty close student and observer of public affairs during all that time. I say in all sincerity to the Members of this body that there is no project or purpose for which money is appropriated by Congress that is safeguarded with anything like the care that river and harbor appropriations are safeguarded. It is practically impossible to appropriate one dollar improperly for a river and harbor project. Who are the men who must pass upon every one of these projects? Why, Senators, they are the honor men of West Point. The Engineer Corps of the Army is composed of the honor men of West Point; and I have just shown to you that 10 of those honor men must agree upon the merits of a river and harbor project before it can be acted upon favorably by Congress, before Congress will consider it, before it has any legislative status.

Does that apply to anything else? If Congress wishes to pass a public buildings bill do we have such safeguards thrown around it? If Congress wishes to provide appropriations for highways, are such precautions taken? If we wish to provide an appropriation for irrigating the arid lands of the West, are those safeguards thrown around that appropriation? Oh, no, Senators; we summon witnesses before us in regard to the ordinary appropriation bills, and we get the best testimony we can. My belief is that most of those witnesses are honest and sincere, but after all they are local men; they are men interested in the various projects presented to Congress; they have the frailties of human nature; and they are going to present their side of the case very strongly.

That is not so with river and harbor items. Congress itself has designated who shall be the witnesses in the case of river and harbor appropriations. I say to you after a study of more than a quarter of a century of these great bills that it is a slander to charge them with being pork barrels, it is a slander

to say that there is more pork in them than in any other legislation. I repeat, sir, if there is any pork in this bill, I do not know it.

Now, Mr. Editor of the Post, I give you this opportunity, sir. You have slandered the Congress. You have said what to me is a very bad thing for you to say. A great many people read your journal. A great many people consider it a great journal, a molder of public opinion here in the Nation's Capital. I say to you now, in all fairness prove your accusation, and if you prove to the Members of the United States Senate that any item among the 35 carried in the pending river and harbor bill is improper in the slightest degree I think I can promise you, sir, that everyone of them will vote against it. I know I will vote against it and will do my best to defeat that item.

Mr. FLETCHER. Mr. President, will the Senator allow me to interrupt him?

Mr. RANDELL. I am glad to do so.

Mr. FLETCHER. The Senator referred to his long experience in Congress. I know that most of that time he has been closely related to legislation with reference to river and harbor improvement, in the House as a member of the Rivers and Harbors Committee and in the Senate as a member of the Commerce Committee, which handles such legislation. I would like to ask the Senator if he recalls any instance in all his experience where Congress has approved a project that has not passed through all the stages of a favorable report and recommendation by the various engineers up to the Chief of Engineers and finally the Secretary of War?

Mr. RANDELL. I do not recall any, though I have a vague recollection that many years ago former Senator William Alden Smith, of Michigan, got through a very small item of a few thousand dollars for some matter which he pressed very strongly upon Congress from his personal knowledge of it, a small project that had not had the approval of the Engineer Corps. Certainly, if the exception proves the rule in anything, that one exception would prove the rule in this matter. Probably the Senator from Florida is more familiar with that case than I am.

Mr. FLETCHER. I think there was some such case some 12 or 14 years ago involving an appropriation of something like probably \$50,000. But as a general proposition I inquire of the Senator if it is not the rule—we might say the rule and the practice—to require, before a project can ever be expected to be adopted by the Congress, that it shall have back of it this favorable report after a study and investigation by the engineers?

Mr. RANDELL. That is absolutely true.

Mr. FLETCHER. It is also true, I think, that there are a number of projects—something like 200, as I recall, though I have not looked up the figures lately—which have already been favorably reported on by the engineers and have not yet been adopted by Congress; so that it does not follow, even after a project has been favorably reported on by the engineers, that the Congress will adopt it and make an appropriation for it.

Mr. RANDELL. That is quite true. There are a great many such projects. I can not name exactly how many, but there are many which have run the gantlet of the engineers and yet Congress has refused to make the appropriation.

Mr. FLETCHER. Refused to adopt the projects?

Mr. RANDELL. Yes; Congress has refused to adopt the projects and later on refused to appropriate because they can not appropriate until they have first adopted the projects.

Let me repeat briefly to show how different rivers and harbors legislation is from other matters. Suppose the Senator from Florida had some project in his State that needed approval and appropriation. He can not go before the Committee on Appropriations and ask for it. His process is to go before the Rivers and Harbors Committee of the House, or the Commerce Committee of the Senate and secure the passage of a law authorizing a survey to be made of the improvement he has in mind. Until that law is enacted the engineers have no discretion or jurisdiction whatsoever to make the survey. So it will be readily seen how different a river and harbor bill is from other things that come before the Congress for appropriation. It is safeguarded in every way. When any project runs the gantlet of the splendid men of the United States Engineer Corps, who have a most remarkable record of public service, who are not interested locally, and who serve all over this great Republic and our foreign possessions, and those men with practical unanimity agree on its merits, no decent man can say there is "pork" in it.

I, therefore, respectfully and earnestly appeal to the usually fair-minded editor of the Post to correct the slanderous charges which have been made in this editorial.

THE FRENCH DEBT

Mr. REED of Pennsylvania. Mr. President, I wish to speak very briefly on the matter of the recent publication, apparently official, in which the Government of France contrasted its assets and liabilities, and in making that contrast omitted from its table of liabilities all mention of the debt which the French Republic owes to the United States of America.

Mr. President, I speak from the standpoint of one who has a warm sympathy for France. I admire the beauty that she creates. I admire the thrift of her people. I admire the industry that they show, and I wish that many things that we see in France could be duplicated in America. I believe that we would be the better for it. I admire, and I will never cease to admire, the bravery with which she met the attack of greater forces than her own, the inflexible will that she showed in meeting the German advance from 1914 to 1918; and I speak with a full recognition of the tribulations under which France has labored since the armistice. I know, because I have seen it again and again with my own eyes, how her industrial districts were shattered. I know how much she has lost in man power, and I know how difficult it is for her to make her budget balance and pay the interest on her current obligations. All of those things I know, and I speak with the sympathy that follows that understanding.

But, Mr. President, during 1917 and 1918, while America was in the war, we borrowed from our own people and turned over promptly to France a vast amount of money. It was not money that lay in the American Government Treasury, handed over to France without an effort, but money which we borrowed from our own people for the benefit of France; and we borrowed it by giving our own indorsement on the French obligation. It was an American obligation that our people received when they advanced that money to France, and as an American obligation it must be honored by us.

In that way we advanced to France in 1917 and 1918 \$2,933,171,672.48. After the armistice we sold her war material which amounted to \$407,341,145.01. The current interest on the latter debt of \$407,000,000 has been paid by France regularly since the debt was incurred; but she has not paid one penny of the interest on the original war-time loan of \$2,933,000,000, nor has she paid one penny on account of the principal of that loan. Our Government, which had issued its bonds to raise that money, has met the interest currently; and that interest, since the money was advanced to France, which we have taken from American taxpayers to pay to those bondholders, has amounted, up to the 15th of November of this year, to \$796,711,537.08. In other words, Mr. President, we have taken from our taxpayers, in order to pay the current interest which French taxpayers should have paid, approximately \$800,000,000 in the last six years.

The principal of those loans, and the interest that comes due in the future, are still to be paid. The bonds are outstanding that were issued for the benefit of France and Italy and Belgium and these other European countries to which we advanced money. That money still has to be paid. The question is, Who shall pay it?—whether it shall be taken from American taxpayers through long years in the future or whether it shall be paid by the Governments whose promise to pay it now lies in the American Treasury.

We have not dunned those nations for the payment of their obligations. I do not think we should. It ought not to be necessary. But, Mr. President, we can not forget and we ought not to pretend to ignore the fact that a very large part of the high taxation that we are extracting from the American people to-day is extracted to meet the obligations on which those countries are the primary debtors.

We have a full understanding of France's difficulties. We understand how hard it is for her and for Italy and for Belgium and these other countries to collect what is coming to them from Germany, and that is why our people have not wished us to press unduly for the payment of these foreign debts; but the debtor nations have taken no steps toward refunding the debt, they have paid no interest upon it, and they have not even given authority to any of their official representatives to come to any terms with our country toward refunding.

Mr. Parmenter came here in 1922 absolutely naked of authority to come to any settlement, or even to recommend any settlement to his own Government, as far as we were able to learn. The French ambassador, Mr. Jusserand, has done the best that his great talent enables him to do, but he is without authority. He has done much to keep the situation placid. He deserves the gratitude of his country to an extent that I believe few of his own countrymen as yet understand, because his efforts have gone far toward preventing this question from

becoming acute. But now, Mr. President, from France itself, and from Paris, and from the cabinet of the present administration, comes a step which our people can not fail to regard as being some evidence of an official intention to repudiate that war-time debt—the publication of a balance sheet, listing the obligations of the French Republic, that absolutely omits the debt to America or the debt to Great Britain incurred during the time of the war—and I do not believe that the United States Senate ought to take an adjournment after the publication of that balance sheet without some voice being raised in protest against it.

I make no threats. I do not believe that anyone in the Senate desires to make any threats. I know that I speak wholly out of friendship for France, but with an acute realization of the fact that American taxpayers are paying every day a debt that France owes. France must be told by her friends that her inaction in this matter throughout the past five years has puzzled those of us who look toward her most affectionately, and she should be told that this publication of last week has alarmed her friends and alarmed them very gravely. France must be made to see—and when I speak of France I speak of her because this publication comes from the French ministry, although what I say applies as well to the other countries that are still in the same position—that her present course can result only in a chilling of that affection that she has found to exist here in America throughout the past decades. It can have only that result, Mr. President, and she must be told it by her friends, and she must be told that each day of delay in achieving a refunding of that debt makes it more difficult to grant her leniency in terms of payment. Her taxpayers deserve consideration. Their sufferings must be remembered, and the terms of payment must take into account the difficulties of payment on her part, but each day that she waits makes that more difficult of achievement. And, finally, she must be told by her friends that future French loans in America would be made impossible by a repudiation of the existing debt.

France, in my judgment, has done the prudent and necessary thing in making military preparation to withstand another attack from hostile neighbors. In my judgment, her preparation has been only reasonable in extent. I believe that the menace is ever present before the French eyes, and that we in her place would make the same military preparation that she has been making. But, Mr. President, she must see that the core of all military preparation is the preservation of her credit. If this attack against which she is preparing shall come she will need credit first of all things, and she must see that a repudiation of her debt of the last war would fatally cripple her borrowings in that "next war" against which she is preparing.

She must see that. Of what avail is it to make military preparations against invasion if she does not keep alive that essential of all military preparation, a sound credit?

Mr. SHIPSTEAD. Mr. President, will the Senator yield?

Mr. REED of Pennsylvania. I yield to the Senator.

Mr. SHIPSTEAD. I should like to ask the Senator if, in this financial statement of the French Government, the Government carries as a credit on this balance sheet funds that France has been loaning to the "little entente" for military purposes in the last few years?

Mr. REED of Pennsylvania. I believe that that is so. I believe that all advances which she has made since the armistice are included as assets on the other side of this balance sheet; but she has not included as assets those advances made to Russia and other allies during the period of hostilities.

Mr. SHIPSTEAD. If the Senator will permit me, I should like to state that a statement by the Bank of France, issued on the 29th day of August, gave us information that the Government of France had at that time very recently loaned something like 5,000,000 gold marks to the "little entente," and that made a total of about 5,000,000,000 that the French Government had loaned to the "little entente," and almost every cent of it had been spent for armaments. I think that statement is interesting at this time, because we have been lenient with France in regard to this debt in the interest of peace; and if France is spending vast sums of money for military purposes I should like to have it explained how that can be in the interest of peace.

Mr. REED of Pennsylvania. Mr. President, I am not familiar with the details of the French policy toward the nations that are known as the "little entente," and it was not my purpose to discuss it here to-day. I want to keep, if I can, to the subject on which I began to speak.

We have heard in the Senate within the last few days some criticism of the attitude of the British Government because

they have announced that they will expect to be treated proportionately well by France if any settlement is made with America. Great Britain occupies toward France the same position that we do. She is a war-time creditor, and Mr. Churchill has recently announced that it is his policy to demand that Great Britain shall have proportionately favorable treatment of her claim against France, if any settlement is made by France with America. That attitude of the British has been criticized here in the Senate, but, to my mind, there is no justification for that criticism. I think Great Britain in that regard has done exactly what we would do if the shoe were on the other foot, and what we will do, I hope, if a settlement is made between France and Great Britain that disregards us. It is the simplest principle of business honesty that creditors should be treated uniformly, and I believe that that obtains between nations, and that whatever settlement is made by France with us should be accompanied by a similar settlement by France with Great Britain. I do not think we have any room to criticize that policy of the British, and I hope that we will take the same policy if circumstances are reversed.

Finally, Mr. President, the tax burden upon the British people is terrific. There has been no nation in history, so far as I can discover, that has borne such a burden of taxation as the British Nation is bearing at this minute. Its taxes are very much higher per capita than those of France or Belgium or Italy. The burden on each individual citizen is greater in Great Britain; and yet Great Britain has taken the manly course, has taken the lead in making a settlement and refunding of her whole war-time debt to this country, and she is observing with scrupulous fidelity the terms of that settlement. In spite of the burden that her people are carrying, she has not flinched under the load, and she is carrying it manfully. As a result of that, her credit is flawless. She can borrow to-day, and does borrow to-day, at a very advantageous rate of interest, which these other nations about which I am talking can not duplicate.

Is not the moral of it plain, Mr. President, that these other countries for their own sake must follow the same policy? If they did, at once their credit would stand higher, their ability to borrow would be vastly improved; and all the world knows their necessity for continued borrowings. So, that from a selfish standpoint alone, as well as from the standpoint of future military preparedness, it is vastly to their interest to honor their obligations that we hold.

Mr. FESS. Mr. President—

Mr. REED of Pennsylvania. I am about to finish.

Mr. FESS. Will the Senator yield?

Mr. REED of Pennsylvania. I yield for a question.

Mr. FESS. I think that the statement of the Senator is most timely, and ought to be made by some one who has frequently expressed his sympathy with France, as the Senator has. I also approve of everything he has said.

There is one other thing about which I would like to ask the Senator's opinion. The credit of France seems to be fairly good, as expressed by the sale of her bonds, floated by a great American banking house. I am raising the question whether that policy should be permitted in case there should be a repudiation of France's obligations to our Government, in view of the fear that that would be cultivating a desire on the part of great bankers to see our Government obligations canceled in order that their payments would be more assured. I would like to have the opinion of the Senator upon that particular thing, because capital is flowing to France from private investors at the very moment when we are wondering whether France is going to repudiate her obligations to our Government.

Mr. REED of Pennsylvania. I would answer the Senator in this way: I see no evidence on the part of any bankers to improve the status of their own securities by encouraging a repudiation by France or by granting absolution to France in the matter of her debt due this Government. I have heard from some men who were in the banking business arguments in favor of a cancellation of the foreign debts. What the Senator suggests may have been the motive that underlay those arguments; I do not know. But whatever the motive is, I am convinced that the argument is futile, because I believe that the entire American Congress and about 99.9 per cent of the American people are fixedly determined not to cancel one red cent of the debt.

Mr. FESS. If the Senator will permit, it is the argument for cancellation that led me to raise the question, and then the logic that would follow, that if it is difficult for France to pay, it would be to their advantage that the repudiation should come to our obligations first, rather than to their own.

Mr. REED of Pennsylvania. I do not think there is the slightest possibility of cancellation. I think most of us here would oppose it to our last breath. I think we feel it is our duty to our own citizens to oppose it, and I do not believe that the chance of cancellation is sufficiently substantial to require a reply to the arguments about which we are speaking.

Mr. WATSON. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Pennsylvania yield to the Senator from Indiana?

Mr. REED of Pennsylvania. I am glad to yield.

Mr. WATSON. Does the Senator believe in making any more liberal terms with France than were made with Great Britain?

Mr. REED of Pennsylvania. The question will have to be negotiated. I should not like to commit myself in advance as to just the extent to which my generosity would lead me, but I think it is obvious that France would need a somewhat longer moratorium. I think it is also obvious that for the next few years at least she would need a lower rate of interest. I would rather not be any more specific than that.

Mr. WATSON. Would not that lead inevitably to changing the terms we have made already with Great Britain?

Mr. REED of Pennsylvania. I do not see any connection whatever between them.

Mr. WATSON. Then the Senator thinks we can deal differently with our different debtors without involving ourselves?

Mr. REED of Pennsylvania. Every banker that I know of does so.

Mr. WATSON. That is quite true with regard to different debtors in different states of solvency, but I am wondering whether or not internationally we could make a distinction as between our debtors; and if we made more liberal terms for France than we have made for Great Britain, is it not likely that Great Britain would then ask that we make the same terms with her?

Mr. REED of Pennsylvania. She might ask it, but I should think it quite unlikely that the request would be granted.

Mr. WATSON. The Senator is aware that from the close of the World War down to the present time, in making a statement of her indebtedness to the various nations, France has carried her debt statement in two columns, one of which has been marked at the head "War debts," and the other just "Debts," leaving the inference that the "debts" would be paid, but that the "war debts" might or might not be paid?

Mr. REED of Pennsylvania. I saw that, but I did not draw that inference. It seemed to me that there never was an occasion for that inference to arise until the publication of this balance sheet last week.

Mr. WATSON. I want now to ask whether or not recent acts and recent statements have not given something of authenticity to the suspicion that that one column was carried all the time with a view to final repudiation of the war debts, at least as far as we are concerned? The Senator has not said squarely that he believed that France did not intend to pay her debts, but he said that he rather suspected that might be the effect finally. In other words, what I am trying to get at is this—and the Senator has studied the question—does he believe, from the actions of France from the close of the World War to this hour, in the light of the statements recently made, that France is preparing to repudiate her debt to us?

Mr. REED of Pennsylvania. I will answer that in this way: Most of the French public men with whom I have talked—and I have talked with many of them, both in France and here—say that France intends to pay her debt; but the publication of this statement of last week can mean nothing else, in my judgment, than that the present ministry, and particularly the present Minister of Finance, does not expect to; and I believe that this is the occasion when the friends of France should tell her—not threaten her, but tell her, in all sincerity and friendship—that her course is mistaken, even from her own selfish standpoint, and that it can not have anything but a bad effect. But I hope that what I have said will not be taken as the statement of a belief that the intention of the French people as a whole is the same as that of the ministry. I do not believe it is.

Mr. EDGE. Mr. President, as it might have some bearing upon their intention, does the Senator recall whether any credit at all was carried in this balance sheet to which he refers representing possible reparations or payments from Germany?

Mr. REED of Pennsylvania. Yes; and I think the best thing to do would be to put in the entire balance sheet. I have not a copy here at my desk, but I can put it in to-morrow.

In answer to the Senator's question, I will say that it does contain an item covering what France estimates she will receive from Germany under the Dawes plan. That is carried as an asset.

Mr. EDGE. I asked that question because of the Senator's statement that there was no reference on the debit side to the indebtedness to Great Britain or to the United States or to other countries.

Mr. REED of Pennsylvania. It does, however, include the indebtedness to France from Germany under the Dawes plan.

Mr. SHIPSTEAD. Mr. President—

Mr. REED of Pennsylvania. I yield to the Senator.

Mr. SHIPSTEAD. The Senator referred to the tax rate in Great Britain. We all know that the taxes there are high, and I believe it is also true that a nation's most certain source of income is the power to tax its citizens. As a matter of fact, the people of France, during the war and since the war, have not been taxed to support the Government and pay the interest on the debts to the extent to which the people of England and of the United States have been. I believe I am correct.

Mr. REED of Pennsylvania. They certainly have not been taxed to the extent per capita to which the people of Great Britain have been, and I believe that their taxes are less per capita than those of the United States.

Mr. WATSON. They are.

Mr. REED of Pennsylvania. Now, Mr. President, I have finished. I have made these remarks out of a sense of duty, and I can not reiterate too often that I have said it in sincerest friendship for these nations which are our debtors. I say it not as a threat, not as a warning, but as a plea of one friend to another.

I am confident that the French nation as a whole is honest. I am confident that the French nation, when its will is known, will not repudiate one penny of its debt, and that, both because of the wisdom of that policy and the essential honesty of it, the French nation will back up any government that honors all of the obligations of that Republic.

Mr. BRUCE. Mr. President, I just wish to say at this point, because it seems to me to be the proper point at which to say it, that I can not agree with the Senator from Pennsylvania in thinking that the people of the United States will be unwilling to discharge France from one "single solitary red cent" of the debt that she owes to us. Of course, we propose to collect that debt in due time and in the right way. I think there is practical unanimity of sentiment on the part of the people of the United States in that regard. Our people do not differ from the people generally that Poor Richard had in mind when he said that "Creditors are a superstitious sect; great observers of fixed days and times."

There is, however, one allowance which, I believe, ought to be made to France when her debt to us is provided for. The fact seems to have been entirely forgotten that during the War of the Revolution, when we were struggling for our independence, France did not simply make loans to us. She made loans to us, and large loans, indeed, loans beyond the measure of her strength, partly from selfish but partly, too, from generous motives, and those loans were all repaid to her, as I recollect—I am speaking on the spur of the moment. She granted us, if I am not mistaken, the moratorium that we desired; gave us time in which to meet our obligations; and, as I have said, we paid all that we legally owed her. But the circumstance should not be forgotten that, in addition to the large loans which France made to us during our struggle for independence, she also made us some most generous gifts, and by no one was the generosity of those gifts more eloquently acknowledged than by Benjamin Franklin himself. It is a well-known fact that when our national horizon was very dark, indeed, Franklin went on one occasion to the minister of Louis XVI and solicited a loan, only to be told that the king was not willing to make a loan to us, but was willing to make a gift, and that gift was made.

I turn to a letter which Franklin wrote to Robert R. Livingston on August 12, 1782, in which, after stating that the whole indebtedness then due by the United States to France amounted to 18,000,000 livres, exclusive of the Holland loan, which was guaranteed by the King of France, he added:

In reading it—

That is, the statement of account—

you will discover several fresh marks of the King's goodness toward us, amounting to the value of near two millions. These, added to the free gifts before made to us at different times, form an object of at least twelve millions, for which no returns but that of gratitude and friendship are expected. These, I hope, may be everlasting.

As one American citizen I echo that hope.

There is another letter, an even more feeling and significant letter, in which Franklin acknowledged the obligations of the people of the United States to the French Government for gifts made by the French Government to us during the War of the Revolution, but I am unable to refer to it at the moment.

So I do say that, however strict we may be in other respects in asking what is justly due to our country on account of the loans that we made to France, we should not, when the proper time comes, fail to take into account the fact that France made us the object of that splendid self-sacrificing generosity during our war for independence.

Mr. JONES of New Mexico. Mr. President, the question now raised here is, of course, of very great consequence, and I do not think this is the time to discuss the matter in all its phases. I desire, however, to make the suggestion that the problem involves some other factors of at least as great importance as those referred to by the Senator from Pennsylvania [Mr. REED].

It is easy enough to talk about a debtor paying his debts, but I think that simple statement is not all that should be considered in connection with this particular debt. The ability to pay must receive due consideration. I have no doubt that the distinguished Senator from Pennsylvania, who is a member of the Finance Committee of the Senate, has already given much thought to that part of the problem which relates to the question of the manner and ability to pay.

I was very much impressed a few days ago in reading a statement regarding our national balance sheet with the rest of the world. Since the war closed there have been floated in this country the securities of other governments and their nationals to the amount of about nine and one-half billion dollars, not taking into account the indebtedness to the Government of the United States. If that be taken into account, the rest of the world owes the United States to-day more than \$20,000,000,000. The present annual interest upon this indebtedness to our nationals amounts to not less than three-quarters of a billion dollars a year. It is estimated that we have to-day, of the money gold of the world, about four and one-half billion dollars, which is more than one-half of all the gold in the world used as a medium of exchange. If we were to bring together all the gold in the world outside of the United States and take it into our own Treasury, it would not be sufficient to pay more than about one-fifth to one-fourth of the present indebtedness of the rest of the world to the United States. So it seems to me that we should consider in a very serious way how it is possible for France or other nations to pay the indebtedness to the United States and her nationals.

We are keeping up a foreign trade. We are exporting to-day more than we are importing. We are exporting by the hundreds of millions of dollars in excess of what we are receiving. We are exporting our cotton, our wheat, our corn, our copper, and hundreds and hundreds of millions of dollars worth of manufactured products; and we are receiving in payment to-day not the commodities of other countries, not the gold of other countries, but mere pieces of paper. I should like to inquire how long it may be expected that this condition of things can last? How could France or the other nations of the world manage to pay their indebtedness to the United States within any reasonable period of time? The annual interest debt accruing now of about three-quarters of a billion dollars a year, not including the interest due to the Government of the United States, is an important thing.

I submit that in the last analysis the only way in which the indebtedness can be paid is not in gold, but it must be done in commodities. The Senator from Pennsylvania [Mr. REED], as a member of the Finance Committee, I trust will seriously consider the advisability of maintaining the high tariff wall which we have now and which operates as a barrier over which or through which the foreign nations and their nationals are unable to climb and thereby pay their indebtedness to this country. I submit that the situation to-day is one of the most serious from a commercial and financial point of view that this country has confronted. It is simply a question of endurance. How long can the foreign trade of this country be continued when we are simply swapping our commodities for pieces of foreign paper?

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened and the Senate (at 3 o'clock and 10 minutes p. m.) adjourned until to-morrow, Tuesday, December 30, 1924, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate December 29, 1924

ASSISTANT DIRECTOR, BUREAU OF FOREIGN AND DOMESTIC COMMERCE

John Matthews, jr., of New York, to be Assistant Director, Bureau of Foreign and Domestic Commerce, Department of Commerce, vice Robert A. Jackson, resigned.

UNITED STATES ATTORNEY

Harold P. Williams, of Massachusetts, to be United States attorney, district of Massachusetts, vice Robert O. Harris, removed.

CONFIRMATIONS

Executive nominations confirmed by the Senate December 29, 1924

POSTMASTERS

ARKANSAS

Viola Leake, Altheimer.
Nettie M. O'Neill, Earl.
Marion M. Parker, Griffin.
Luther H. Presson, Mansfield.
Arrie M. Wood, Marshall.
John H. Martin, Russellville.
Andy R. Cheatham, Stephens.

COLORADO

James S. Bradbury, Silt.

INDIANA

William G. Greemann, Batesville.
Alleary A. Anderson, Churubusco.

IOWA

Clyde W. Edwards, Adair.
Samuel W. Campbell, Anthon.
Gay S. Thomas, Audubon.
Samuel A. Garlow, Avoca.
Homer C. Thompson, Bayard.
Verne T. Herrick, Bridgewater.
William W. Gundrum, Casey.
Orwin W. Masching, Exira.
John T. Bargenholt, Orient.
Joseph J. Clark, Portsmouth.
Clarence D. Bourke, Pringhar.
Bruce R. Mills, Woodbine.

MINNESOTA

Arthur F. Johnson, Dent.
Bernhard E. Anderson, Elbow Lake.
Frederick A. Cooley, Heron Lake.
Frank L. Hoagland, Marshall.
Leonore M. Thorp, Shevlin.

MONTANA

J. Clarence Manix, Augusta.
Curtis Burns, Coffee Creek.
Charles E. June, Forsyth.
Graham B. Laird, Grassrange.
Andrew K. Resner, Roman.
Clarence C. Peterson, Ryegate.
Roy D. Beagle, Savage.
George B. Cameron, Whitetail.

NEW YORK

Eleanor C. Griffing, Shelter Island.

NORTH DAKOTA

Erick Myhre, Hampden.

HOUSE OF REPRESENTATIVES

MONDAY, December 29, 1924

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Our blessed Heavenly Father, with hope and courage we turn our faces toward Thee and the future. Do Thou help us to keep the zest of life and the passion for service. What might seem to us a fearful cost and a crushing burden, may it be to us a sacrament and a blessing. O God, direct us in the performance of all duty. May all the Christian virtues gain strength in us as the time runs along. Give us the sweet and the abiding assurance that because God is we shall be also.

Dedicated as we are to the duties that involve the vital interests of our country, the Lord be with us abundantly and richly from day to day. Amen.

The Journal of the proceedings of Saturday, December 20, 1924, was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, one of its clerks, announced that the Senate had passed Senate Concurrent Resolution No. 23, and in pursuance to the provisions of said resolution the President pro tempore had appointed the following Senators on the part of the Senate as members of the joint committee to arrange for inauguration of the President elect of the United States on the 4th day of March next: Mr. CURTIS, Mr. HALE and Mr. OVERMAN.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL

Mr. ROSENBLUM, from the Committee on Enrolled Bills, reported that on December 20 they had presented to the President of the United States, for his approval, the following bills:

H. R. 6941. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war; and

H. R. 8687. An act to amend section 98 of the Judicial Code, providing for the holding of the United States district court at Shelby, N. C.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

A message in writing from the President of the United States, by Mr. Latta, one of his secretaries, who also informed the House of Representatives that the President had approved bills of the following titles:

On December 18:

H. R. 8687. An act to authorize alterations to certain naval vessels and to provide for the construction of additional vessels.

On December 22:

H. R. 10650. An act to authorize the settlement of the indebtedness of the Republic of Lithuania to the United States of America; and

H. R. 10651. An act to authorize the settlement of the indebtedness of the Republic of Poland to the United States of America, and for other purposes.

On December 23:

H. R. 6941. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war.

On December 24:

H. R. 8687. An act to amend section 98 of the Judicial Code, providing for the holding of the United States district court at Shelby, N. C.

EXTENSION OF REMARKS

Mr. WINGO. Mr. Speaker, I ask unanimous consent to extend my remarks by printing in the Record an editorial by that incomparable editorial writer, Col. George Harvey, on the French debt.

Mr. BEGG. Reserving the right to object, Mr. Speaker, what is that editorial?

Mr. WINGO. It is an editorial, as I stated, by Col. George Harvey, who, as I have said, is an incomparable editorial writer. I think it expresses the viewpoint of the administration. It is a very fine editorial and ought to go in the Record, because there is very apt to be more intemperate discussion of it in the next few weeks, and I thought it was a wise idea to start the discussion with a temperate statement by a man who is close to the administration.

Mr. BEGG. Does the gentleman think we ought to publish editorials in the Record every morning?

Mr. WINGO. No; but I think that coming from the arbiter elegantiarum of the administration it expresses the viewpoint of the administration.

Mr. BEGG. Mr. Speaker, I think I will object for the present at least.

Mr. WINGO. I regret that; because I think it is a very able presentation.

M'FADDEN BRANCH BANKING BILL

Mr. FREAR. Mr. Speaker, I ask unanimous consent to extend my remarks in the Record on the banking bill.

The SPEAKER. The gentleman from Wisconsin asks unanimous consent to extend his remarks in the Record on the banking bill. Is there objection?

There was no objection.

Mr. FREAR. Mr. Speaker, an examination of hearings on H. R. 6855 and H. R. 8887 reveals a careful consideration by the committee of the banking situation, and to disagree from the conclusions expressed in the bill may seem presumptuous.

The purpose of Chairman McFadden and of the committee is in no way criticized, because solution of the branch-banking problem is a matter of individual opinion, but to use an illustration suggested in the committee hearings, if the house is on fire it is better to put out the fire than to throw on kerosene. If we are living for to-day, the bill possibly serves as a temporary makeshift, but if for a permanent policy, then in my humble judgment it hastens the end of individual banking, National or State, by stamping Federal approval of branch banking that to-day has absorbed practically all the banking business in Canada, Australia, and many countries of Europe.

Two sides, of course, exist to the branch-banking issue, and possibly no permanent relief against State branch banking can be afforded even if desired by Congress; but this bill, without apparently furnishing any material relief to national banks, does rapidly advance, by legislation, the branch-bank car of Juggernaut.

State-wide branch banking exists to-day in nine States, to wit: Arizona, California, Delaware, Georgia, Maryland, North Carolina, Rhode Island, South Carolina, and Virginia. County branch banking exists in two States—Maine and Louisiana—and city-wide branch banking exists in nine States—Kentucky, Michigan, Pennsylvania, Tennessee, Wyoming, Massachusetts, Mississippi, New York, and Ohio (p. 46, hearings). These rights are limited by statute in some of the States but in others are authorized or permitted by State officials. In a limited form, several branch banks in Wisconsin established prior to May 14, 1909, are permitted to do business, but none organized since that date.

GROWTH OF OUR BANKING SYSTEM

Relative to State and national banks the following data is illuminating: In 1904 there were in this country 6,923 State banks and 585 trust companies, with combined resources of \$5,240,000,000. National banks then numbered 5,331, with resources of \$6,656,000,000. In 1924 State banks had increased to 17,436, trust companies to 1,664, with combined resources of \$25,140,000,000, while our national banks had increased to 8,085, with resources of \$22,556,000,000. In other words, the population of the country increased from 75,994,575 in 1900 to 105,683,108 in 1920, or about 40 per cent in 30 years, during which time State banking resources increased nearly 500 per cent and national banks considerably over 300 per cent. The apparent disparity between increase in numbers of national banks and State banks during the 30-year period is explained in part by the average increase in national-bank resources just quoted, indicating national-bank consolidations, with which we are somewhat familiar.

National banks of 1924 over 1923 show \$195,706,000 increased profits, as I interpret the comptroller's report, and indicate a continued growth, which, considering the abnormal number of national-bank failures—138—last year and other business burdens later discussed, is beyond average profits in other lines of business.

The McFadden bill, urged by the comptroller, we are told, is to prevent national banks from surrendering their charters because of inability to compete with State banks that enjoy branch-banking privileges in several of the States. Other reasons, I submit, may have placed national banks at a disadvantage. After reading hearings before the banking committee held on this bill I received a speech made by Congressman FULMER, June 7, 1924, in which he discussed the Federal Reserve System and its alleged unjust treatment of national banks. If his statements are correct the complaint of national banks against the Federal reserve administration will not be cured by the removal of branch-banking restrictions in several States, while this bill at best is only a temporary expedient that hastens wiping out individual banking, both State and national, in this country.

Mr. FULMER, after some experience in practical banking and study of the subject, contends that national banks are leaving the Federal reserve because of onerous conditions imposed on national banks by the reserve board.

ALLEGED BURDENS PLACED ON NATIONAL BANKS

Without presuming to express any opinion why national banks have not increased in number during the last two or three years or why, notwithstanding 138 failures last year, the total resources due to consolidation and other causes have steadily grown larger every year, I quote from one paragraph of Mr. FULMER's speech, wherein he says:

The Government put only \$83,000 into the system (Federal Reserve) to start the machinery in motion, yet . . . the members furnish capital, surplus, balances, amounting to \$2,333,000,000, practically free of charge.

Referring to other alleged unjust treatment accorded national banks and extravagance of Federal reserve officials he criticizes fat salaries enjoyed by the Federal Reserve Bank of New York. Sixty per cent of the employees, he says, never before received more than \$1,500 to \$2,500, but now draw salaries as high in some cases as those paid Cabinet officers (\$12,000)—a fairly rapid increase in income within eight years.

He further says that salaries paid 30 officers of the New York Federal Reserve Bank alone, exclusive of salaries of other employees, amount to as much as the combined salaries of one-half of the United States Senators (48) plus salaries of both President and Vice President of the United States.

From his statement giving names and amounts it further appears that five officers of the New York Federal Reserve Bank have more than doubled their combined salaries within the same eight years, and to-day these five officers receive more than the nine judges of the United States Supreme Court added to the salary of the Vice President and one or more Senators or Representatives thrown in for good measure.

New Federal bank buildings, sites, and so forth, make a single item of \$76,727,000, while other cases of alleged extravagance and burdensome Federal-reserve conditions, now largely supported by national banks, may explain in part the failure of national banks to increase their number. Illustrations cited indicate the disease, not its extent. These objections are different in character from those mentioned by the comptroller in the hearings. It is significant, however, that the comptroller condemns unreservedly the system of branch banking, yet recommends this bill.

These matters are referred to at the outset in order that other conditions may be examined to ascertain why national banks as a whole are hampered by conditions not materially affected by extending limited branch-banking privileges in the several States, as provided in this bill.

FEDERAL RESERVE BOARD FAVORS FAR WIDER BRANCH BANKING

For the purpose of argument I am assuming that the absence of branch-banking privileges, as suggested by the comptroller, is alone responsible and prevents an increase in numbers of national banks. A real purpose of the bill with powerful interests, however, may lie in the fact that the Federal Reserve Board, supporting the bill, favors permitting national branch banking throughout the country, according to testimony of Mr. Platt, of New York, member of the board, whose statement appears on page 206 of the hearings, as follows:

Mr. PLATT. I think I may fairly add that the members of the board regret that this liberalizing feature of the bill does not go to the full limit of permitting the establishment of branches in all cities large enough to have need for outlying banking facilities, as a matter of right and without regard to the limitations of State laws. It would seem that the national banks might sometimes be permitted to take the lead in a matter of sound banking which every competent banker and every economist approves.

In other words, the Federal Reserve Board that is alleged to have placed heavy burdens upon the national banking system, according to authority quoted, also believes that branch-banking limitations should be removed so that national banks may be permitted to establish branches in cities in every State, whether authorized by the State to its own banks or not. In that event, for the protection of its own State banks, the State would necessarily by law have to authorize branch banking, and that is an early prospect offered by the McFadden bill, which thus would become only an entering wedge. Soon Wisconsin, Minnesota, Illinois, and all of the 48 States will be open to national branch banking pursuant to the Federal Reserve Board's views as above expressed by Mr. Platt.

Bill H. R. 8887, to amend the national bank and Federal reserve act, has had the careful attention of the committee. The limited extension of branch banking to national banks is a question primarily of policy, set forth as follows:

Section 8 reenacts section 5190 of the Revised Statutes of the United States by adding new language the effect of which is to prohibit a national bank from establishing a branch bank in any State which does not authorize State banks to have branches, and in those States which permit State banks to have branches the national banks are permitted, upon approval by the Comptroller of the Currency, to have branches only within the corporate limits of the municipality in which they are located; in cities, however, having 50,000 to 100,000

population only two such branches will be allowed national banks, and in cities having population of 25,000 to 50,000 population only one such branch is permitted.

The above limitation temporarily prevents national banks from wide rights of competition possessed by State banks, but these restrictions will be wiped out by legislation at the first opportunity. If the policy approved by the Federal Reserve Board is to be followed, national banks will take the lead in branch banking "without regard to the limitation of State laws."

This bill would authorize at least two branches to any national bank in San Francisco or in Los Angeles, but the Bank of Italy has 14 branches and the Mercantile Trust Co. has 28 branches in San Francisco, while 2 banks in Los Angeles combined have 51 branches in that city (p. 36). What competition would be afforded by this bill to meet conditions in those cities? If competition is necessary to maintain the Federal reserve system, then unlimited branch banking which the board tends to favor will be next demanded.

THE CAMEL'S NOSE UNDER THE TENT

The branch-banking section from the committee bill suggests a vital problem faced by independent bankers, both State and national, and by those who believe branch banks already are a menace. Under this bill Federal sanction is to be given Federal banks, with continual enlargement of Federal and State branch-banking rights certain to follow until all restrictions are soon wiped out.

Where State branch banks have existed under State laws these banks and their branches occasionally have heretofore been nationalized and thereafter retained their branches under a national banking act of 1865. The National Bank of California in San Francisco, for illustration, has branches established in Seattle, Tacoma, and Portland, and has had for some years (p. 215, hearings).

Of the 25,521 State and national banks in 1924, Comptroller Dawes now reports that 517 State banking institutions have in operation 1,675 branches. In New York 251 State banks have branches, Michigan has 300 branch banks, and California has 475 branches, of which 224 branches belong to four banks. In other words, nearly two-thirds of all branch banks in the country are in these three States. To meet competition of branch banks this bill would now extend rights in addition to the existing law to national banks to establish branches within the limitations of section 8 referred to.

The comptroller offers data to show national banks are being transferred to State banks and that New Orleans now has only one national bank, while four State banks and trust companies have 31 branches. How this bill will increase the number of national banks in New Orleans he fails to state. He believes, however, this bill will benefit certain national banks and reports a slight increase in the total number of banks during the past year. During the same time 138 national banks, with a capital of \$9,575,250, failed for the year ended October 31, 1924 (comptroller's 1924 report, p. 73). Since 1865, or during 59 years, total national-bank failures numbered 849, or one-sixth of all these failures occurred within this last year. Of 25 reasons given for such failures (comptroller's report 1924, p. 75) none are suggested because of failure to enjoy branch-banking privileges.

The report says:

Of the 138 banks placed in charge of receivers since October 31, 1923, 8 were closed on account of the inability to realize on loans, 10 injudicious banking, 9 crop loss, 1 injudicious banking and adverse business conditions, 8 depreciation of securities, 4 inability to meet demands, 6 closed by run, 1 large losses, withdrawals, and insufficient credit, 21 heavy withdrawals, 4 defalcations of officers, 1 large losses and injudicious banking, 11 large losses, 4 unable to realize on assets, 3 defalcations of former cashier, 9 bad management, 15 depleted reserve, 4 irregularities, 1 deficient reserve and unable to realize on loans, 4 excessive loans, 1 crop loss and depreciation of securities, 1 bad paper, 1 deflation, 1 insufficient credit, 1 injudicious banking and depleted reserves, 2 bad paper taken over from old organization, and 7 information not available.

NO LOSSES THROUGH LACK OF BRANCH-BANKING FACILITIES

With the foregoing 138 nice distinctions in causes for failures or losses to depositors and stockholders, not one loss resulted from lack of branch-banking facilities. In fact, out of more than 8,000 national banks in the country, not one depositor out of many millions is reported to have lost or suffered from branch banking. The demand for such extensions rather comes from the Federal Reserve Board, that on October 20, 1924, showed resources in the 12 Federal reserve banks of \$4,897,269,000.

The purpose and protection afforded by the Federal Reserve Board needs no defense. On the other hand, bankers are financial shoppers who seek the best bargains and business to be had, thereby benefiting their depositors, themselves, and their community through increased safety by growth in profits, surplus, and deposits. Banking primarily is for the benefit of such depositors and borrowers and of the community served.

If the Federal Reserve Board places unnecessary burdens on national banks through large noninterest-bearing deposits or balances, by enormous Federal bank building operations, by extravagant salary lists, and otherwise, bankers will probably shop elsewhere and release their national-bank charters. If branch banking means the ultimate extinction of individual banking, with lasting injury to depositors and borrowers, who make up the community, then the McFadden bill does not help meet the problem.

Branch banking is a paramount issue with many interests, and I submit herewith the judgment of the Government's highest banking adviser on the subject:

BRANCH BANKING PRODUCES GLORIFIED PAWNSHOPS

In the comptroller's 1924 report, page 3, he says of branch banking:

First. Branch banking is opposed to public policy as being in its essence monopolistic.

Second. Branch banking is absentee banking and is conducted for the sole purpose of saving dividends for the stockholders rather than of service to the community.

Third. With the development of large chains of branch banks the responsibility for the mobilization and transfer of funds would rest with individuals whose prime motive would be personal profit. The resources of banks are in a large measure the trust funds of a community, and the conditions which justify the transfer of funds from one community to another should be passed upon and the action controlled by disinterested governmental authority removed from the influence of personal profit.

Fourth. Branch banking is peculiarly inconsistent with the American idea of local self-government and Federal coordination. The banking system of the United States is closely analogous to the governmental structure. Under the Federal reserve system local independent units are coordinated while branch banking proposes that they should be consolidated.

Fifth. As a direct result of absentee control the human element and moral responsibility of the creditor would necessarily be largely eliminated. Absentee control must obviously be exerted through employees governed by rigid rules operating under the most limited discretion. Under such conditions a bank would eventually degenerate into a glorified pawnshop from which collateral had excluded character as an element of credit.

The comptroller then says that an overwhelming majority of bankers of the United States are opposed to the principle of branch banking, yet he approves this bill because he alleges national banks must be given branch-banking privileges or some of them will surrender their charters and withdraw from Federal reserve membership (1924 report, p. 4).

On the subject of "glorified pawnbroker shops," to which the comptroller refers, this banking adviser of the Government further said in committee hearings (p. 11, hearings, H. R. 6855):

In branch banking, character loans are impossible * * *. The development of America is dependent on nothing more than on independent unit bankers of vision, courage, and independence whose first interest in the creditor is his character. * * *

The coercive power of a branch banker bent on expansion is very great. He is able to temporarily reduce interest rates until he gets banking control, and the cost of this can easily be reimbursed after he has secured a monopoly * * *. When an acute emergency arises in the community it is impossible to get prompt and effective assistance where a local representation is compelled to refer back to the head office in another city. The great system of unit banks which forms the national system has been the bulwark against monopoly and branch banking, but the time has come when the national banks can not carry on much longer. * * *

BRANCH BANKING IS ESSENTIALLY MONOPOLISTIC

Referring specifically to "glorified pawnshops" in foreign countries, Comptroller Dawes further says:

The essentially monopolistic nature of branch banking can not be successfully controverted. * * *

In 1942 there were in England 429 banks and in 1922 (50 years thereafter) only 20 banks. Of these 20 banks, 5 controlled practically all the banking of the nation. There are about 7,900 branches in

operation. In Scotland there are only about 9 banks with about 800 branches.

In 1885 in Canada there were 41 independent banks. Under the operation of branch banking the number was reduced to 35 by the year 1905. I am informed that at the present time there are only 14 banks in Canada operating about 5,000 branches. There are no independent unit banks in western Canada, in fact none west of Winnipeg. Banking control through the branch system is concentrated in the cities of Montreal and Toronto. (Hearings, p. 12.)

Yet this is the system that Mr. Platt and members of the Federal Reserve Board for whom he speaks appear to approve.

California already has 475 branch banks, and the effect is discussed dispassionately before the committee by witness Whipple, president First National Bank, Turlock, Calif. His own bank has capital, surplus, and undivided profits of \$110,000, with deposits of about \$1,000,000, while a State bank of which he is also president has capital, surplus, and undivided profits of \$150,000 and deposits of \$1,200,000. These two banks with over \$2,000,000 deposits are the local financial advisers for the city of Turlock's 4,000 inhabitants and for the surrounding country. Not much more than a drop in the bucket when compared with the National City Bank, of New York City, or other big concerns, yet an institution of great importance to the little city of Turlock. Whipple is a banking student, living in the midst of California's branch banking.

Confirming the observations of Comptroller Dawes as to "glorified pawnshops" in other countries Whipple says, quoting McLeod, a Canadian banking authority:

In Canada * * * the "big three" banks in 1922 controlled 58.81 per cent of the banking resources of the nation against 39.11 per cent 10 years ago (or 50 per cent increase of control in 10 years). In 1900 there were 36 banks in Canada; in 1912, 26; in 1922, 17; and now 14.

FRENCH BRANCH BANKS TURNED TAIL DURING WAR

Whipple continues (hearings, p. 189):

In England five banks control over 87 per cent of the banking resources of the nation, and the process of absorption continues. In France and Germany the same centralization continues. In France four great branch banking systems cover the nation, with little competition. When the Great War broke out they alone of all French banks turned tail and ran to cover, leaving the financial support of the country to the Bank of France and what few provincial and unit banks were still left. * * * The French branch banks which purchased the Russian and Balkan State bonds at the rate of sometimes 10 per cent have resold the bonds to thrifty French investors at a 5 per cent rate.

Possibly that record is being imitated by great banks in this country to-day, but they do not yet control the entire banking and investing field. They may do so if the camel's nose is inserted under the canvas by this bill.

Continuing, Whipple says of disasters in branch banking:

In Australia, in 1893, out of 28 banks with 1,700 branches, 13 failed in six months for £90,000,000. This necessitated a moratorium for five years.

The president of the Canadian Bankers' Association testified a year ago that "out of 1,219 banks operating in western Canada 419 are operating at an actual loss" (ascribed to too great duplication).

In Canada failure of the Home Bank, with its 78 branches, the forced absorption of the Merchants Bank, with 400 branches, and the merger of several other banks has caused nation-wide concern of the banking structure of Canada (hearings, pp. 192-193).

In South Africa where but two great banking systems, the Standard and National Bank of South Africa had the field to themselves, the difficulties of the latter obliged the South African Government to go to the rescue, and he concludes this may be a straw * * * when through mergers and otherwise banking in both England and Canada and possibly even in California * * * the government will be obliged to take them over.

The mania for size is due no doubt to the widely held tenet that the public nowadays admires success more than any other thing—measured by the yardstick of financial size.

Whipple hopefully says (p. 195):

It is axiomatic that no part of America will long tolerate what amounts to virtual monopoly in banking either with or without its accompaniment of political power not always used for the public good. Nor will it when informed, permit the superimposition on it of the principle of branch banking which represents the opposite of the traditional American principles of opportunity and unalterable opposition to the money power.

WILL WIPE OUT INDIVIDUAL BANKING (CALIFORNIA) IN TEN YEARS

Mr. Morrish, president of the First National Bank of Berkeley, another California bank, states his two banks have deposits of

about four and a half million dollars (hearings, p. 174). He was delegated to represent before the committee the independent banks of the State of California, both National and State. He says:

My judgment is that within 10 years if the bars are let down, independent banking in California will be a thing of the past. There will be no independent banks in California outside of probably the cities of Los Angeles and San Francisco or other large centers where a bank has opportunity to build up a deposit liability of large sums in commercial funds.

He further says:

It has been my personal experience that about 75 per cent of the independent bankers (in California) give up their independence because of fear of the other organizations. The small country banker stands in awe of the large city banker, with the large amount of capital that he controls. * * * He has seen his friends, one by one, succumb to the large branch-banking systems, and it is no wonder that when a branch banking institution desires a branch in any given community that the only thing they have to do is to state that they want to go into that community, and almost any bank in the community is ready to sell out to them.

Speaking of the power of branch bankers to put him out of business, he said:

Absolutely—and I have talked to nearly a hundred independent bankers in the State (California)—I think I know their feelings pretty well in that regard. The concentration of funds of our Nation in the hands of a few large branch bankers, which is the ultimate and logical conclusion of the branch-banking system, is something I hope never to see accomplished. Their claim that they do not wish to go outside of State limits is a mere subterfuge. It will be just as easy to step over the State line as it is the city line.

THE LAMB INSIDE THE WOLF

Comparing individual banking and branch banking based on the California situation, Morrish says:

My judgment is that they can exist side by side only like the wolf and the lamb, with the lamb on the inside (p. 181).

President Macdonnell, of the First National Bank of Pasadena, Calif., First Trust and Savings Bank of the same city, was no less positive in his testimony as to branch-banking methods. He says:

These people in California are in a race for size and power which comes down to be pretty largely a question of personal ambition on the part of a few men. It leads to a curious willingness to make almost any kind of deal for a new bank that will get it (p. 161).

He also gave incidents in his own experience to illustrate the methods pursued to secure branch-banking control and the elimination of individual banking.

In response to a question whether a real danger exists in California that will ultimately develop into a banking monopoly between a half dozen leading banking institutions, Macdonnell responded:

I have no doubt of it.

Q. Similar to Canada?—A. Yes, sir (p. 166).

Mr. Macdonnell said this bill would, to an extent, result in a monopoly, but it was not his idea that the branch-banking system could be "unscrambled." He was opposed to national banks engaging in a state-wide branch-banking business, but as this bill limits branch banking to certain cities, it was accepted by him as the best port in a storm.

That branch banking in California will control the situation ultimately seems certain based on the testimony submitted before the committee, although between the devil and the deep sea such witnesses are not opposing this bill.

While the testimony of Comptroller Dawes and the three bank presidents, supported by American, Canadian, and European branch-banking statistics, is convincing to the average mind of the danger of branch banking, it is not undisputed.

In the words of President Macdonnell (p. 158), when referring to branch-banking witnesses, the committee hearings also contain testimony from "a professor of international law and lately a banker," from another who has practiced law and is now a trust company banker, and from the attorney for the California banking department. The presence of all these, according to Macdonnell, shows the "power" of the branch-banking people. These gentlemen believe in branch banking, and they answered the committee's questions without equivocation.

Possibly the ablest witness who represented nearly one-half of all the 475 branch banks in California can be cited. His interest in branch banking is in part explained by the following:

FOUR BANKS HAVE 225 BRANCHES

Mr. DRUM. There are 700 banks in California, of which 423 are State banks and 275 are national banks. The number of State banks having branches is 88, the number of branches about 460 to 480. (Hearings, p. 100.)

Q. How many branch banks under the institution you are connected with?

Mr. DRUM. There are 46, 27 of them in San Francisco; 10 in territory outside of San Francisco. * * * The banks that Mr. Elliott and I represent here to-day are five of the larger State banks, namely: The Pacific Southwest Trust & Savings Bank, the Security Trust & Savings Bank, the Bank of Italy, the American Bank of Oakland, and the Mercantile Trust Co. Those banks represent an aggregate in capital and deposits of nearly \$1,000,000,000. * * * We speak for these five. The Bank of Italy has 75 branches, made up of 12 in the parent city, 63 outside of the parent city; the Mercantile Trust Co. has 46, 27 in San Francisco and 19 outside of San Francisco; the Pacific Southwest had 75, 33 in Los Angeles and 42 outside of Los Angeles; the Security Trust & Savings Bank has 28, 15 in Los Angeles and 13 outside of Los Angeles; * * * of deposits we have about 45 to 47 per cent of all the banks in California. (Hearings, pp. 105-6.)

In other words, Messrs. Drum and Elliott represented 5 State banks in California out of a total of 475, and 4 of these 5 banks have 225 branches, or nearly half of the entire number of branch banks in the State, and the 5 banks hold nearly one-half of all bank deposits in the State. The centralization of branch banking in California needs no diagramming nor of the interests subserved by Messrs. Drum and Elliott.

Another witness came from New York City, where limited branch banking exists. Mr. J. Bach is vice president of the Public National Bank, of New York, which has a capital, surplus, and undivided profits of \$9,500,000 and deposits of \$98,000,000, with a number of branch banks in that city. His was a State bank in 1917 and became a national bank that year. At the present time his bank has five branches and six tellers' windows, or what are described as "subterfuge branch banks." Mr. Bach has the strict business viewpoint, and says his bank caters to the foreign element. That 33 per cent of his bank's deposits—or about \$33,000,000—has been coaxed out of patrons "who otherwise would have invested in mattresses, in rugs, and in bureaux."

Several questions and answers are enlightening (hearings, p. 97):

Q. With bank deposits of \$95,000,000 you could have 50 or 60 banks with \$2,000,000 of deposits each?

Mr. BACH. That is very true. * * * Most of those independent units in the city of New York are for sale, because they are not paying propositions.

Q. Do you think that a branch bank as a rule gives as good service as the unit in the particular community where it is located?

Mr. BACH. Better; they afford better trade, help, and assistance. * * *

Q. There are people who come to us from places where branch banking has prevailed for years and say if they were starting over again they would never have branch banks. They also come from Canada and say that branch banking is not the best thing for the country.

BRANCH BANKING "ABSOLUTELY PERFECT"

Mr. BACH. There are some people who complain at the present time, but I think it is absolutely perfect. (Hearings, p. 100.)

Q. If you got big enough and strong enough to take care of the banking business in all the States by the establishment of branch banks, you think that would be a good thing?

Mr. BACH. I see no reason why it should not be (p. 102).

Q. How many [tellers' windows] do you have applications for?—A. We have seven more in contemplation, all of which have been allowed by the comptroller.

Q. Seven more have been allowed?

Mr. BACH. Some were disallowed and the other locations were allowed.

In other words, Mr. Bach, backed by \$98,000,000, has 11 branch banks and tellers' windows in New York City. Seven more have been allowed, but not in the locations selected by Mr. Bach, because presumably designed to drive out individual banks.

Recently an address by one of Wisconsin's recognized banking authorities came to my notice. It was delivered two years ago by Hon. Andrew H. Frame, of Waukesha, a man whose four score of years eminently qualifies him to speak on banking, although he is not engaged in the present banking bill controversy. Mr. Frame then said:

From a practical banking experience in the United States for more than 60 years, I have seen wildest currency and wildest banking expunged from all the States tolerating these excrescences. In fact, in Wisconsin as one of the chief slayers, I was chairman of a

banking committee that drew the 1903 statute which, thanks to our splendid bank commissioner's administration of the law, has resulted in but three small failures in 19 years wherein a depositor has lost a dollar of his capital! I have also seen Old-World banking recede from independent banking freedom to monopolistic banking, colossal failures, and appalling losses to depositors which should be object lessons to warn our statesmen to pause before handing over our destinies to the tender mercies of any autocratic banking power. May we ask: "Has not autocracy and oppression wrecked the equilibrium of the whole world?" We must concede some small advantages may accrue to a favored few under branch banking, but in the language of the immortal Lincoln "The greatest good to the greatest number" would be practically eliminated. There are some natural monopolies. Surely branch banking is not one of them.

After citing some gigantic branch-banking failures in other countries and lessons learned, Mr. Frame closed his address with the admonition:

The object lessons of monopoly, arrogance, and oppression of the past decade in the Old World should warn us that the American freedom should not be superseded by any oligarchy. Branch banking is a calamity to any city, State, or nation.

"Man's inhumanity to man makes countless thousands mourn."

I can offer no advice as a layman that will be of value compared with the many words from those who have devoted a lifetime to the business of banking. In practical legislation we have knowledge of a constant pressure toward monopoly, and the money monopoly feared by Mr. Frame is in keeping with the trend of the times. The McFadden bill is the first specific legislative recognition by Congress of national branch banking. After the testimony of Messrs. Platt, Bach, Drum, and others of ability and persuasiveness, it is not a far step to take before embarking on the branch-banking system of other countries.

The chain-bank system that has had a stormy time in several Western States requires no discussion or criticism here. It is a puny imitation of the branch-banking system, and every national or State bank, with few exceptions, may well fear the effect of both systems. My own State of Wisconsin is no more concerned than any other State in this bill, because we have good banking laws and fine supervision. The following showing was had on October 31, 1924, of Wisconsin State banks:

State banks.....	816
Mutual savings banks.....	6
Trust companies.....	15
Land mortgage associations.....	2

Total (State banking institutions with resources of \$546,384,442.98)..... 828

For the purpose of comparison it appears that on October 10, 1924, Wisconsin also had 157 national banks—exactly the same number as in Massachusetts—with total resources of \$422,452,000, or about 80 per cent of the combined State banking institutions.

From State Banking Commissioner Dwight T. Parker I have received the following additional data:

Prior to 1922 there were practically no bank failures in Wisconsin. During that year there were two failures, and in 1923 six banks were permanently closed by the department, and thus far—December 10, 1924—five State banks have been permanently closed and two new banks organized. The closed banks were all small and located principally in the smaller towns.

It is evident that the "chain system" has no place in our State, and bank failures have been held to a comparatively low figure for the three hard years named.

It may seem presumptuous to question this bill. I am certain the committee of able Members took the course that to them seemed right and most expedient. To protect the Federal reserve system they were advised it is necessary to protect national banks that to-day are being discriminated against in States where branch banking is authorized by legislative enactment. Danger to the national banking system from this cause does not appear imminent, judging from the gradual increase in number of national banks and an increase of 300 per cent in resources compared to a 40 per cent increase in population during the last 30 years, as cited at the outset of these remarks. On the other hand, danger that branch banking will eventually wipe out individual banking is a matter of belief among conservative men, and they fear letting down the bars will follow the passage of the McFadden proposal.

POURING OIL ON THE FLAMES

National banks should certainly be placed on a par with State banks in States that permit branch banking, provided such action does not constitute an added menace to the whole individual banking business of the country, but to my mind

this bill pours oil on the flames so far as the safety of the building is considered. Its passage will naturally result in an early movement toward congressional and State legislative enactments in breaking down the protection heretofore afforded individual banking. That movement will be swift and certain judging from the experience of other countries. The concentration of practically all other lines of business is now in a few hands, and it is fair to assume the money power which we profess to fear in business, politics, and government will be supreme when the bars have been let down for branch banking.

The Pujo congressional investigation disclosed tremendous strides in power already have been made by great financial concerns, particularly through interlocking directorates. Some legislative efforts to curb that power followed. With a surrender to the demand for branch banking by great interests, of which Mr. Bach and Mr. Platt, both of New York, are spokesmen, the time is not far distant when this country, like Canada, England, France, and Germany, will be under the domination of a handful of men and of a less number of banks than can be counted on the fingers of both hands. The next and final step is not far to take, for monopoly sooner or later becomes centered in one concern, and that will then control government as well as business.

I do not presume here to discuss the constant tendency of centralization in all lines of business tending toward one gigantic monopoly like Standard Oil that already controls banks, railways, and oil while the Sherman law that sought to unscramble the eggs, and every other legislative act of prevention, seems fruitless against monopoly.

"Big" business is the tendency the world over as testified in the committee hearings and it may seem hopeless to offer resistance because the spirit is found in the man who starts with an apple cart and soon controls all the apple carts of the city; with the man who from a small unit finally controls chain 10-cent stores, groceries, drugs, and other lines of business. It is human nature and so it is idle to prophesy what the situation will be when practically every line of business will have become absorbed by one central controlling financial power with all others subordinated to branch agencies or insignificant cogs in a wheel that eventually may break from the force of its own revolutions.

Naturally we of to-day are more concerned in the present and with existing problems of business and government than with what will occur 10, 20, or 50 years hence and no solution to such problems is here suggested. When Shylock's pound of flesh was denied and fixed interest limitations were secured by usury laws, public sentiment took a pronounced stand against greed and cupidity.

Unlimited profits, avoidance of tax laws, and rapid consolidations of various lines of business into monopolies are exercised to-day by those who believe Government should keep hands off without restrictions.

The bill before us extends branch banking to national banks for the assumed maintenance of our Federal financial system. The bill is only an expedient at best. Who can justify limiting national banks to one or two branches in cities of a certain size when State banks across the street may have 60 or more branches in the same State, as in cases cited in California? If a national bank is dependent upon its branches for ability to compete, it will soon demand the same privileges as the State bank; and if not given, it will then surrender its national-bank charter. Why not, unless some special privilege is possessed to offset the disadvantage? Or if the Federal Reserve Board here seeking relief recommends branch banking for national banks irrespective of State laws, what will be the result?

TWO HORNS IN THE BRANCH-BANKING SITUATION

If branch banking is the beginning of the end, as suggested by witnesses before the committee and as evidenced by the experience of other countries, then why not scotch the snake before it gets a stronger hold on the country; or if it can not be destroyed or controlled, then why place unjust restrictions on national banks that seek to compete with State banks?

I hold no brief to represent individual bankers in my State or in any other State, and yet I can not believe that this bill offers protection to bankers, State or National, anywhere, although it purports to limit branch banking by giving national banks new branch-banking privileges in certain States, to be extended to all States if Mr. Platt is an authorized spokesman for the Federal Reserve Board.

I do not offer any praise for our pioneer bankers, many of whom still remain in control among the thousands of individual banks scattered throughout the country. Their encouragement, both financially and by advice, has been of untold value

in building up the country, and the policy thus inaugurated has given financial and business backbone to countless communities where confidence and faith were needed to insure success. Neither do I offer any statement as to branch-banking conditions such as exist in Canada, England, France, and other countries, and in California in our own country. Comptroller Dawes has covered the question completely, and President Morrish sums it up in a sentence when he says the individual banker's short struggle against the powerful branch-banking establishment, if protection is withdrawn, would be another case of the wolf and lamb, with the wolf lying on the outside.

The problem is real and should be squarely faced if any relief or protection can be offered. To my mind it presents two alternatives with the middle of the road policy taken by this bill affording no hope to the individual banker, whether State or National, or to the countless communities that are equally interested in the maintenance of individual banking.

Congress, of course, has no power to control State banks and it is a question how far Congress can squarely meet the situation. What added banking privileges, if any, can be given by Congress to individual banks to offset or curtail the branch-banking race for power? What restrictions can be placed upon branch banking by Congress that will discourage destruction of the great individual banking system which has been the pioneer in America's development? What, if any, control of the mails or of interstate commerce or by its taxing power can be undertaken by Congress to meet the situation? These are not original suggestions and I know have to some extent been considered by able members of the banking committee.

Several years ago, when discussing the case of *Bailey v. Drexel Furniture Co.*, 259 U. S., p. 20 (child-labor case), I remember an opinion therein of Chief Justice Taft wherein he said:

It is the high duty and function of this court in cases regularly brought to its bar to decline to recognize or enforce seeming laws of Congress dealing with subjects not intrusted to Congress, but left or committed by the supreme law of the land to the control of the States. We can not avoid duty, even though it requires us to refuse to give effect to legislation designed to promote the highest good.

That court then set aside the child labor law because it was only a "seeming law." *Venzle Bankers v. Fenno* (8 Wallace 533) is cited in the *Bailey* decision and therein was distinguished. It relates to taxation of circulating notes of State banks increased to a rate of 10 per cent, or a 900 per cent increase. The highest court sustaining that law then said:

The first answer to this is that the judicial can not prescribe to the legislative departments of the Government limitations upon the exercise of its acknowledged powers. The power to tax may be exercised oppressively upon persons, but the responsibility of the legislature is not to the courts but to the people by whom its members are elected.

The power of Congress is set forth quite fully in the briefs offered in the *Bailey* case, whereby the taxing power has been exercised for social and economic ends, although denied by the court in the child-labor case.

Those who have the responsibility for banking legislation are more acquainted with the facts and the law than the average member, so that I do not assume to propose legislation to meet the situation, even if the Supreme Court or a majority of its members permits Congress to act when the constitutionality of such legislative action is challenged.

I do contend that if nothing can be done to prevent the growth of branch banking then this bill should not restrict national banks to limitations that will hamper competition with State banks now having unlimited branch-banking privileges. It seems to me there is no escaping this conclusion.

I do believe that something should be attempted to restrict or prevent the present wild race in branch banking, and if found impossible under existing legislative powers, then by constitutional amendment, which is sometimes an alternative whereby to overrule five to four court decisions.

Let me say in conclusion that great banking interests of the country that enjoy branch banking in New York City are already more powerful than Congress or any educational or industrial agency of the country. Eventually they will be merged into one or more financial concerns that will then largely dominate our industrial, financial, and political life.

If after studying the facts our banks, or any considerable portion, are persuaded that branch banking is a good thing for the country, or that this bill will not be harmful, then the prairie fire which eventually will wipe out independent banking is for them to handle, and the community interest which they represent is in their hands.

My protest is lodged against a system that is rapidly undermining our individual banking business. If the destruction can not be stayed because of our dual system of government, or if the principle of branch banking is to be formally approved by the Federal Government, then, I submit, all restrictions contained in the pending bill where branch banking is permitted or which restrains national banks from fully competing with State banks should be removed. The influence of the Federal Reserve Board that approves national branch banking in all States will soon remove the remaining restrictions. Individual banking must yield to branch banking unless the situation is met by drastic legislation. This bill, in my judgment, is an additional wedge against the individual banking system.

AMERICAN BANKERS' RESOLUTION IN 1922 OPPOSES BRANCH BANKING

The American Bankers' Association, comprising 23,000 members, at its annual session in October, 1922, adopted the following resolution:

Resolved by the American Bankers' Association, That we view with alarm and hereby express our disapproval of and opposition to branch banking in any form in the United States.

Resolved, That we regard branch banking or the establishment of additional officers by banks as detrimental to the best interests of the people of the United States. Branch banking is contrary to public policy, violates the basic principles of our Government, and concentrates the credit of the Nation and the power of money in the hands of the few.

The answer to this resolution and many others of like character that might be submitted is possibly that the McFadden bill only gives limited branch-banking rights to certain national banks in order to preserve the Federal reserve system. A clipping credited to the American Banker, New York, is as follows:

We believe with Mr. Crissinger that the best thing is not to have branch banking in any form, and we also believe that the preservation of our independent system is more important even than the preservation of our national banking system. Let us hope that the comptroller, instead of encouraging national banks to go into branch banking from a defensive viewpoint, will cooperate in legislation to stop the extension of branch banking in the States.

(Memorandum by Wisconsin's State Banking Commission)

BRANCH BANKING

Even as amended the McFadden bill is a dangerous measure and certainly should not be supported by independent bankers.

1. The Hull amendment, upon the strength of which the United States Bankers' Association Opposed to Branch Banking has withdrawn its opposition to the McFadden bill, is not a part of this bill as reported for passage to the House. The independent bankers no doubt have assurance from Mr. McFadden and the supporters of this bill that they will accept the Hull amendment, but this must be done on the floor. Probably there will be no hocus pocus in this matter, but the independent bankers can scarce afford not to watch developments very closely when the bill actually comes up for passage.

FUTURE AMENDMENTS WILL REMOVE RESTRICTIONS

2. Despite the Hull amendment there is no real guaranty that national banks located in States which do not now permit branch banking will not hereafter be permitted to establish branches. One Congress can not bind another; and even if the Hull amendment is adopted, a subsequent Congress can always extend the permission for branch banking. It seems to me, moreover, that if the McFadden bill becomes law it will prove very difficult to defeat attempts made to extend the permission given to national banks to establish branches in other States which, subsequent to the passage of this bill, legalize branch banking. If, for instance, Illinois should hereafter legalize branch banking, what possible argument can be made against permitting national banks in Illinois to establish branches, in view of the fact that this McFadden bill allows national banks in California and other States to establish branches on the theory that this is necessary to meet the competition of State banks which are allowed to have branches. If branch banking is once recognized by Congress anywhere, no amendment to the effect that the question whether branches are to be permitted or not in a given State is to be settled on the basis whether at the time of the passage of this act such State authorized branch banking will for any considerable length of time check the demand for the legalization of branch banking everywhere. The very fact that Congress has legalized branch banking in some States will compel it to legalize it ultimately in all States, or at least in all States whose laws may hereafter be amended to permit State banks to operate branches.

NATIONAL BANKS TO START THE BALL ROLLING

3. There is real danger that the McFadden bill itself may be interpreted as legalizing branch banking in many States in which the State banks can not now establish branches. This danger arises because six States—Alabama, Florida, Indiana, New Jersey, Washington, and Wisconsin—in their laws against branch banking allowed State banks which had already established branches to continue these branches.

Section 8 of the McFadden bill prohibits national banks from establishing branches "in any State which does not by law or regulation authorize banks created or existing under the laws of such State to own, establish, maintain, and operate such banks." Since in these six States some of the banks now actually have branches, it is at least a possible construction of section 8 of the McFadden bill that national banks may establish branches in these States.

This danger is illustrated by our situation in Wisconsin. Our laws against branch banking reads as follows: (Stat. 1923, sec. 221.04(1) (f)) " * * * but no bank shall establish more than one office of deposit and discount or establish branch offices or branch banks, provided that this prohibition shall not apply to any branch office or bank established prior to May 14, 1909." Under the proviso in this statute three State banks in Wisconsin now operate branches (which were all established prior to May 14, 1909), namely, the Bank of Wisconsin, at Madison; the Marshall & Isley Bank and the Second Ward Savings Bank, both of Milwaukee. These branches are recognized by our law and are in all respects lawful. In view of this fact I query whether Wisconsin is a State "which does not by law or regulation authorize banks created or existing under the laws of such State to own, establish, maintain, and operate such banks" within the meaning of section 8 of the McFadden bill. If this bill does mean that national banks can hereafter establish branches in Wisconsin, they are thereby granting a privilege denied to State banks in this State.

THE PROBLEM IN A NUTSHELL

Commissioner Parker, of Wisconsin, hits the nail squarely on the head when he says no Congress can bind its successor. One legislative body, whether State or National, will struggle and quibble over hair-splitting amendments in an effort to overcome objections and finally compromise with objectors. A bill heralded as an important compromise may then be accepted and approved by all parties concerned. Next session thereafter those with financial or other business interests to be served again appear on the scene, while those who have struggled for the unorganized side finally yield to systematic hammering from the powerful lobby that ever supports self-interest and is always on the job. The next Congress or next legislature can then be depended upon to widen the gap and push wide open all legislative doors.

The compromise McFadden branch banking bill, with or without the Hull amendment, gives Federal recognition and will be interpreted to give approval to branch banking both by the Federal Government and by States that have been heretofore opposed to the proposition. Henceforth it is to be a race without limit until independent banking in this country will have been laid away permanently alongside many thousands of individual banking graves in Canada, England, Scotland, France, and other countries.

Let us not deceive ourselves as to the issue or outcome offered by the McFadden branch banking bill.

A PROTEST AND AFFIRMATIVE PROPOSAL

No effort has been made to organize opposition to the McFadden bill. That is a field for others to undertake if the facts warrant. I am content to submit the objections here offered, but among protests received by me as late as December 29, this year, the following resolution passed unanimously by the Kansas State Bankers' Association speaks for itself. I submit the resolution as a part of my remarks because it comes from a reputable organization, presents a vigorous protest against the McFadden bill and also a constructive program for meeting and overcoming the branch-banking menace.

Resolution passed unanimously by the Kansas State Bankers' Association at Wichita, Kans., October 24, 1924

Resolved by the Kansas State Bankers' Association in annual convention at Wichita, Kans., assembled, That we hereby reaffirm our opposition to and condemnation of branch banking in any form, in city, State, or Nation. We deplore the present-day attempt by some bankers to multiply branch banks.

We believe that our marvelous economic development and great prosperity are due to our independent system of banking, which is democratic and in keeping with the traditions of our people.

Instead of passing a law to increase the number of branch banks and thus give national recognition to a practice conceded by all authorities to be monopolistic and dangerous to our economic welfare,

we respectfully petition the Members of the House of Representatives and the Senate of the Congress of these United States to enact legislation prohibiting any bank in the United States from having and operating branches. And we suggest this could be accomplished in any one of three ways.

(1) By prohibiting any bank with branches being a member of the Federal reserve system.

(2) By taxing branch banks out of business in the manner in which Congress, in 1863, taxed State bank currency 10 per cent and stopped its issue.

(3) By prohibiting any bank with branches from using the United States mails.

CALL OF THE HOUSE

Mr. BLANTON. Mr. Speaker, I make the point of order we have not a quorum present.

The SPEAKER. The gentleman from Texas makes the point of order there is no quorum present. It is clear there is not a quorum present.

Mr. BEGG. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, when the following Members failed to answer to their names:

[Roll No. 14]

Ackerman	Edmonds	McLaughlin, Nebr.	Rogers, N. H.
Anthony	Fairchild	McLeod	Rouse
Arnold	Fairfield	McNulty	Sabath
Bacharach	Fitzgerald	McSwain	Sabon
Bacon	Fredericks	McSweeney	Sanders, Ind.
Beers	Free	MacGregor	Sanders, N. Y.
Bell	French	MacLafferty	Schafer
Berger	Fulbright	Magee, Pa.	Schall
Bixler	Fulmer	Martin	Scott
Bloom	Gallivan	Mead	Seeger
Boles	Garrett, Tenn.	Mezitt	Shallenberger
Bowling	Geran	Michaelson	Sherwood
Boylan	Gibson	Miller, Ill.	Shreve
Brand, Ohio	Gifford	Milligan	Simmons
Brand, Ga.	Glatfelter	Mills	Sites
Briggs	Goldsbrough	Minahan	Smithwick
Browne, N. J.	Graham	Mooney	Snell
Brunn	Green	Moore, Ill.	Snyder
Buckley	Griffin	Moore, Ohio	Speaks
Burton	Hammer	Morgan	Spearing
Byrnes, S. C.	Hastings	Morin	Stalker
Casey	Haugen	Morris	Stegall
Carew	Hawes	Nelson, Me.	Stephens
Caser	Hekey	Newton, Mo.	Stevenson
Christopherson	Hill, Ala.	Nolan	Strong, Pa.
Clancy	Holaday	O'Brien	Sullivan
Clark, Fla.	Hooker	O'Connell, N. Y.	Summers, Wash.
Clarke, N. Y.	Howard, Nebr.	O'Connell, R. I.	Sweet
Cole, Ohio	Hull, Tenn.	O'Connor, La.	Swoope
Collins	Johnson, W. Va.	O'Connor, N. Y.	Taber
Connally, Tex.	Johnson, Tex.	O'Sullivan	Tague
Conner	Jost	Oliver, N. Y.	Taylor, Tenn.
Connolly, Pa.	Kearns	Oliver, Ala.	Temple
Cooper, Ohio	Keller	Palge	Tinkham
Corning	Kelly	Parks, Ark.	Tucker
Crosser	Kendall	Peavey	Tydings
Cullen	Kent	Peery	Upshaw
Curry	Kerr	Perkins	Wainwright
Dallinger	Kindred	Perman	Ward, N. Y.
Darrow	Knutson	Phillips	Ward, N. C.
Davey	Kuns	Porter	Weaver
Deul	Langley	Prall	Weller
Denipsey	Larson, Minn.	Quayle	Welsh
Dendson	Lazaro	Ramseyer	Wertz
Dickstein	Leibach	Randley	Wilson, Ind.
Dominick	Lilly	Reed, N. Y.	Winslow
Doughton	Lindsay	Reed, Ark.	Wolf
Doyle	Logan	Reed, W. Va.	Woodrum
Drane	Lowrey	Richards	Wright
Drewry	Luce	Roach	Zihlman
Driver	Lyon	Robison, Ky.	
Eagan	McDuffie	Rogers, Mass.	

The SPEAKER. Two hundred and twenty-five Members have answered to their names. A quorum is present.

Mr. BEGG. Mr. Speaker, I move to dispense with further proceedings under the call.

The SPEAKER. Without objection it is so ordered.

There was no objection.

The doors were opened.

EXTENSION OF REMARKS

Mr. WINGO. Mr. Speaker, I wish to renew my request to extend my remarks by printing in the Record an editorial which appeared in the Washington Post of yesterday, by Col. George Harvey, on the French debt.

The SPEAKER. The gentleman from Arkansas asks unanimous consent to extend his remarks by printing the editorial mentioned. Is there objection?

Mr. UNDERHILL. Mr. Speaker, reserving the right to object, did I understand the gentleman to say it is an editorial?

Mr. WINGO. Yes.

Mr. UNDERHILL. I object.

TREASURY AND POST OFFICE APPROPRIATION BILL

Mr. MADDEN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 10982) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1926, and for other purposes; and pending that motion, I would like to ask the gentleman from Tennessee [Mr. BYRNS] whether we can agree upon the time for general debate.

Mr. BYRNS of Tennessee. I will say to the gentleman that I have had several requests made of me recently for time involving possibly an hour in addition to such time as I may want to consume. I do not know whether there will be any further requests on this side or not.

Mr. MADDEN. What would the gentleman think about three hours, an hour and a half on each side?

Mr. BYRNS of Tennessee. Could the gentleman make it two hours on each side? I do not know whether we will need it all on this side or not, but other requests may come in.

Mr. MADDEN. Then, Mr. Speaker, I ask unanimous consent that general debate continue for not exceeding four hours, two hours to be controlled by the gentleman from Tennessee and two hours by myself.

Mr. BLANTON. Mr. Speaker, reserving the right to object, I presume the gentleman from Illinois is going to be liberal with us under the five-minute rule?

Mr. MADDEN. Yes.

Mr. BLANTON. May I ask the gentleman a question?

Mr. MADDEN. Yes, indeed.

Mr. BLANTON. This bill appropriates for two departments and seeks to appropriate \$763,000,000, which is \$11,890,000 more than the similar bill of last year. How does the gentleman account for the \$11,000,000 increase under the present policy of economy?

Mr. MADDEN. I am not sure it is that amount; but if so, it is due to the fact that the increase in the business of the Post Office Department is about 7 per cent per annum, and that is \$22,000,000.

Mr. BLANTON. But while we are increasing it \$11,890,000 does not the gentleman from Illinois, who is a friend of the postal employees, believe we ought to put the money in this bill to take care of the bill which is going to be passed over the President's veto?

Mr. MADDEN. I will answer that question a little later.

Mr. BYRNS of Tennessee. I want to say in further answer to the request of the gentleman from Illinois that I suspect we will not consume over an hour and a half on this side.

Mr. MADDEN. Then, Mr. Speaker, I wish to modify my request and ask unanimous consent that general debate be confined to not exceeding three hours' time, one hour and a half to be controlled by the gentleman from Tennessee and one hour and a half by myself.

The SPEAKER. The gentleman from Illinois asks unanimous consent that general debate be limited to not exceeding three hours, one-half to be controlled by himself and one-half by the gentleman from Tennessee [Mr. BYRNS]. Is there objection?

There was no objection.

HOUDON BUST OF WASHINGTON

The SPEAKER laid before the House the following message from the President of the United States, which was read and, with accompanying papers, referred to the Committee on the Library:

To the Congress of the United States:

I transmit herewith a report by the Secretary of State recommending an appropriation of \$1,000 for the purpose of securing a replica of the Houdon bust of Washington for lodgment in the Pan American Building in fulfillment of a decision that each Government which is a member of the Pan American Union should present a white marble bust, with a suitable pedestal, of the national hero of such country.

The request of the Secretary of State has my approval, and I strongly recommend the request to the favorable consideration of Congress.

CALVIN COOLIDGE.

THE WHITE HOUSE,
Washington, December 29, 1924.

TREASURY AND POST OFFICE APPROPRIATION BILL

The motion of Mr. MADDEN was then agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. TILSON in the chair.

Mr. MADDEN. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the first reading of the bill be dispensed with. Is there objection?

Mr. BLANTON. Reserving the right to object, would the gentleman from Illinois be willing for the bill to be printed in the Record without reading for the information of the country?

Mr. MADDEN. I am willing to have it printed.

Mr. BLANTON. With that understanding, I will not object.

The CHAIRMAN. The Chair hears no objection, and it is so ordered.

The bill is as follows:

Be it enacted, etc.,

TITLE I—TREASURY DEPARTMENT

The following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the Treasury Department for the fiscal year ending June 30, 1926, namely:

OFFICE OF THE SECRETARY

Salaries: Secretary of the Treasury, \$12,000; Undersecretary of the Treasury, \$10,000; three Assistant Secretaries of the Treasury, and other personal services in the District of Columbia in accordance with the classification act of 1923, \$158,180; in all, \$180,180: *Provided*, That in expending appropriations or portions of appropriations contained in this act for the payment for personal services in the District of Columbia in accordance with the classification act of 1923, the average of the salaries of the total number of persons under any grade in any bureau, office, or other appropriation unit shall not at any time exceed the average of the compensation rates specified for the grade by such act, and in grades in which only one position is allocated the salary of such position shall not exceed the average of the compensation rates for the grade: *Provided*, That this restriction shall not apply (1) to grades 1, 2, 3, and 4 of the clerical-mechanical service, or (2) to require the reduction in salary of any person whose compensation was fixed, as of July 1, 1924, in accordance with the rules of section 6 of such act, (3) to require the reduction in salary of any person who is transferred from one position to another position in the same or different grade in the same or a different bureau, office, or other appropriation unit, or (4) to prevent the payment of a salary under any grade at a rate higher than the maximum rate of the grade when such higher rate is permitted by the classification act of 1923, and is specifically authorized by other law.

OFFICE OF CHIEF CLERK AND SUPERINTENDENT

Salaries: For the chief clerk, who shall be the chief executive officer of the department and who may be designated by the Secretary of the Treasury to sign official papers and documents during the temporary absence of the Secretary, Undersecretary, and Assistant Secretaries of the department, and for other personal services in the District of Columbia, in accordance with the classification act of 1923, \$261,324.

For the operating force of the Liberty loan and register's annex buildings and buildings for the accommodation of the Bureau of Internal Revenue and the necessary clerical assistance in the office of the chief clerk and superintendent, in accordance with the classification act of 1923, \$125,150.

For employees for the care and protection of buildings for the accommodation of such bureaus of the department as may be assigned thereto, in accordance with the classification act of 1923, \$24,435.

Treasury Department Annex, Pennsylvania Avenue and Madison Place: For personal services for the care, maintenance, and protection of the building, in accordance with the classification act of 1923, \$40,575.

Treasury garage: For personal services, in accordance with the classification act of 1923, \$6,300.

CONTINGENT EXPENSES, TREASURY DEPARTMENT

For newspaper clippings, financial journals, law books, city directories, and other books of reference relating to the business of the department, \$1,000.

For freight, expressage, telegraph, and telephone service, \$10,000.

For rent of buildings in the District of Columbia for the use of the Treasury Department, \$12,500.

For purchase, exchange, maintenance, and repair of motor trucks and bicycles, and maintenance and repair of one passenger automobile for the Secretary of the Treasury, all to be used for official purposes only, \$7,000.

For purchase of file holders and file cases, \$4,000.

For purchase of coal, wood, engine oils, and grease, grate baskets and fixtures, blowers, coal hods, coal shovels, pokers, and tongs, \$20,000.

For purchase of gas, electric current for lighting and power purposes, gas and electric-light fixtures, electric-light wiring and material, candles, candlesticks, droplights and tubing, gas burners, gas torches, globes, lanterns, and wicks, \$21,000.

For washing and hemming towels, purchase of awnings and fixtures, window shades and fixtures, alcohol, benzine, turpentine, varnish, baskets, belting, bellows, bowls, brooms, buckets, brushes, canvas, crash, cloth, chamolais skins, cotton waste, door and window fasteners, dusters; flower garden, street, and engine hose; lace leather, lye, nails, oils, plants, picks, pitchers, powders, stencil plates, hand stamps and repairs of same, spittoons, soap, matches, match safes, sponges, tacks, traps, thermometers, toilet paper, tools, towels, towel racks, tumblers, wire, zinc, and for blacksmithing, repairs of machinery, removal of rubbish, sharpening tools, street-car fares not exceeding \$300, advertising for proposals, and for sales at public auction in the District of Columbia of condemned property belonging to the Treasury Department, payment of auctioneer fees, and purchase of other absolutely necessary articles, \$13,000.

For purchase of labor-saving machines and supplies for same, including the purchase and exchange of registering accountants, numbering machines, and other machines of a similar character, including time stamps for stamping date of receipt of official mail and telegrams, and repairs thereto, and purchase of supplies for photographic copying machines, \$14,000.

For purchase of carpets, carpet border and lining, linoleum, mats, rugs, matting, and repairs, and for cleaning, cutting, making, laying, and relaying of the same, by contract, \$500.

For purchase of boxes, book rests, chairs, chair cane, chair covers, desks, bookcases, clocks, cloth for covering desks, cushions, leather for covering chairs and sofas, locks, lumber, screens, tables, typewriters, including the exchange of same, wardrobe cabinets, washstands, water coolers and stands, and for replacing other worn and unserviceable articles, \$4,500.

For operating expenses of the Treasury Department Annex No. 1 (Pennsylvania Avenue and Madison Place), including fuel, electric current, ice, ash removal, and miscellaneous items, \$13,000.

Darby Building: For heating, electric current, electrical equipment, ice, and miscellaneous items, \$4,500.

Stationery: For stationery, including tags, labels, and index cards, printed in the course of manufacture, packing boxes and other materials necessary for shipping stationery supplies, and freight for supplies purchased free on board factory, for the Treasury Department and its several bureaus and offices, \$437,760.

GENERAL SUPPLY COMMITTEE

Salaries: For personal services in the District of Columbia in accordance with the classification act of 1923 not exceeding \$75,000; necessary expenses, including office supplies and materials, maintenance of motor trucks, telegrams, telephone service, and traveling expenses, \$2,800; in all, \$77,800.

For salaries of employees, office equipment, fuel, light, electric current, telephone service, maintenance of motor trucks, and other necessary expenses for carrying into effect the Executive order of December 3, 1918, regulating the transfer of office materials, supplies, and equipment in the District of Columbia falling into disuse because of the cessation of war activities, \$43,700: *Provided*, That the said Executive order shall continue in effect until June 30, 1926, without modification, except that the price charged shall be the current market value at time of issue, less a discount for usage, but in no instance shall the discount be more than 25 per cent, and that the proceeds from the transfer of appropriations thereunder shall be covered into the Treasury as miscellaneous receipts: *Provided further*, That the heads of the executive departments and independent establishments and the Commissioners of the District of Columbia shall cooperate with the Secretary of the Treasury in connection with the storage and delivery of material, supplies, and equipment transferred under the foregoing order and for effecting the transfer or disposition of other surplus and waste material or supplies: *Provided further*, That typewriters and computing machines transferred to the General Supply Committee as surplus, where such machines have become unfit for further use, may, in the discretion of the Secretary of the Treasury, be issued to other Government departments and establishments at exchange prices quoted in the current general schedule of supplies or sold commercially.

Repairs to typewriting machines (except bookkeeping and billing machines) in the Government service in the District of Columbia may be made at cost by the General Supply Committee, payment therefor to be effected by transfer and counterwarrant, charging the proper appropriation and crediting the appropriation "General Supply Committee, transfer of office material, supplies, and equipment."

No part of any money appropriated by this or any other act shall be used during the fiscal year 1926 for the purchase of any standard typewriting machines, except bookkeeping and billing machines, at a price in excess of the following for models with carriages which will accommodate paper of the following widths, to wit: Ten inches (correspondence models), \$70; 12 inches, \$75; 14 inches, \$77.50; 16 inches, \$82.50; 18 inches, \$87.50; 20 inches, \$94; 22 inches, \$95; 24 inches, \$97.50; 26 inches, \$103.50; 28 inches, \$104; 30 inches, \$105; 32 inches, \$107.50.

All purchases of typewriting machines during the fiscal year 1926 by executive departments and independent establishments for use in the District of Columbia or in the field, except as hereinafter provided, shall be made from the surplus machines in the stock of the General Supply Committee. The War Department shall furnish the General Supply Committee, immediately upon the approval of this act, a complete inventory of the various makes, models, and classes of typewriters in its possession, the condition of such machines, and the point of storage, and shall turn over to the General Supply Committee such typewriting machines in such quantities as the Secretary of the Treasury from time to time may call for by specific requisition for sale to the various services of the Government. If the General Supply Committee is unable to furnish serviceable machines to any such service of the Government, it shall furnish unserviceable machines at current exchange prices, and such machines shall then be applied by the service of the Government receiving them as part payment for new machines from commercial sources in accordance with the prices fixed in the preceding paragraph. And in selling typewriting machines to the various services the General Supply Committee may accept an equal number of unserviceable machines as part payment thereon at the exchange prices quoted in the current general schedule of supplies.

OFFICE OF COMMISSIONER OF ACCOUNTS AND DEPOSITS

For Commissioner of Accounts and Deposits and other personal services in the District of Columbia, in accordance with the classification act of 1923, \$20,040.

DIVISION OF BOOKKEEPING AND WARRANTS

For the chief of the division and other personal services in the District of Columbia, in accordance with the classification act of 1923, \$164,386.

Contingent expenses, public moneys: For contingent expenses under the requirements of section 3653 of the Revised Statutes for the collection, safe-keeping, transfer, and disbursement of the public money, transportation of notes, bonds, and other securities of the United States, salaries of special agents, actual expenses of examiners detailed to examine the books, accounts, and money on hand at the several depositories, including national banks acting as depositories under the requirements of section 3649 of the Revised Statutes, also including examinations of cash accounts at mints and cost of insurance on shipments of money by registered mail when necessary, \$200,000.

Recoinage of gold coins: For recoinage of uncurrent gold coins in the Treasury, to be expended under the direction of the Secretary of the Treasury, as required by section 3512 of the Revised Statutes, \$3,000.

Recoinage of minor coins: To enable the Secretary of the Treasury to continue the recoinage of worn and uncurrent minor coins of the United States now in the Treasury or hereafter received, and to reimburse the Treasurer of the United States for the difference between the nominal or face value of such coins and the amount the same will produce in new coin, \$15,000.

DIVISION OF DEPOSITS

Salaries: For the chief of the division and other personal services in the District of Columbia, in accordance with the classification act of 1923, \$17,400.

PUBLIC DEBT SERVICE

For necessary expenses connected with the administration of any public-debt issues and United States paper-currency issues with which the Secretary of the Treasury is charged, including rent in the District of Columbia and including the Commissioner of the Public Debt and other personal services in the District of Columbia, in accordance with the classification act of 1923, \$3,260,000: *Provided*, That the amount to be expended for personal services in the District of Columbia shall not exceed \$3,118,414: *Provided further*, That the indefinite appropriation "Expenses of loans," act of September 24, 1917, as amended and extended, shall not be used during the fiscal year 1926 to supplement the appropriation herein made for the current work of the Public Debt Service.

For expenses incident to the discharge of the duties imposed upon the Secretary of the Treasury by the transportation act, 1920, the Federal control act, approved March 21, 1918, as amended, and for expenses arising in connection with loans and credits to foreign governments under the Liberty loan acts and the Victory Liberty loan act and in connection with credits granted or conditions entered into under the acts providing for the relief of populations in Europe and contiguous countries, and in connection with credits granted or conditions entered into under the act providing for the sale of surplus war material, including personal services in the District of Columbia, \$7,240.

Distinctive paper for United States securities: For distinctive paper for United States currency, national-bank currency, and Federal reserve bank currency, not exceeding 200,000,000 sheets, including transportation of paper, travelling, mill, and other necessary expenses, and salaries of employees and expense of officer detailed from the Treasury Department, \$50 per month when actually on duty; in all, \$1,407,775.

DIVISION OF APPOINTMENTS

Salaries: For the chief of the division, and other personal services in the District of Columbia in accordance with "the classification act of 1923," \$60,880.

DIVISION OF PRINTING

Salaries: For the chief of the division, and other personal services in the District of Columbia in accordance with "the classification act of 1923," \$66,240.

PRINTING AND BINDING

For printing and binding for the Treasury Department, including all of its bureaus, offices, institutions, and services located in Washington, District of Columbia, and elsewhere, including materials for the use of the bookbinder located in the Treasury Department, but not including work done at the New York customhouse bindery authorized by the Joint Committee on Printing in accordance with the act of March 1, 1919, \$834,750.

For postage required to prepay matter addressed to Postal Union countries, and for postage for the Treasury Department, \$1,000.

DIVISION OF MAIL AND FILES

Salaries: For the chief of the division, and other personal services in the District of Columbia in accordance with "the classification act of 1923," \$20,200.

OFFICE OF DISBURSING CLERK

Salaries: For the disbursing clerk and other personal services in the District of Columbia, in accordance with "the classification act of 1923," \$54,040.

CUSTOMS SERVICE

Division of Customs: For personal services in the District of Columbia in accordance with "the classification act of 1923," \$64,000.

For collecting the revenue from customs, and for the detection and prevention of frauds upon the customs revenue, including not to exceed \$15,000 for the hire of motor-propelled passenger-carrying vehicles, \$16,467,200, of which such amount as may be necessary shall be available for salaries of general appraisers retired under the provisions of section 518 of the tariff act of 1922, and \$62,480 shall be available for personal services in the District of Columbia exclusive of eight persons from the field force authorized to be detailed under section 525 of the tariff act of 1922.

Scales for customs service: For construction and installation of special automatic and recording scales for weighing merchandise, etc., in connection with imports at the various ports of entry under direction of the Secretary of the Treasury, \$95,000.

Compensation in lieu of moieties: For compensation in lieu of moieties in certain cases under the customs laws, \$30,000.

BUREAU OF THE BUDGET

Director, \$10,000; Assistant Director, \$7,500; for all other necessary expenses of the bureau, including compensation of attorneys and other employees in the District of Columbia in accordance with "the classification act of 1923," telegrams, telephone service, law books, books of reference, periodicals, stationery, furniture, office equipment, other supplies, travelling expenses, street-car fares, per diem in lieu of subsistence not exceeding \$4 for officers and employees while absent from the seat of government on official duty, \$147,500; in all, \$165,000.

For printing and binding, \$25,000.

FEDERAL FARM LOAN BUREAU

SALARIES AND EXPENSES

Salaries: For six members of the board, at \$10,000 each; for personal services in the District of Columbia in accordance with "the classification act of 1923," and for personal services in the field, \$139,600; in all, \$199,600, payable from assessments upon Federal and joint-stock land banks, of which amount not to exceed \$133,180 may be expended for personal services in the District of Columbia;

For salaries of 12 reviewing appraisers at not to exceed \$5,000 each per annum, and the travelling expenses of such reviewing appraisers, \$30,000; in all, \$90,000, payable from assessments upon Federal and joint-stock land banks;

For travelling expenses of the members of the board and its officers and employees; per diem in lieu of subsistence, not exceeding \$4; and contingent and miscellaneous expenses, including books of reference and maps; and for the examination of national farm loan associations, including personal services and traveling expenses, \$128,000, payable from assessments upon Federal and joint-stock land banks: *Provided*, That no person shall be employed hereunder at a rate of compensation exceeding \$2,500 per annum: *Provided further*, That \$1,260 of this sum may be expended for clerk hire in the District of Columbia;

In all, Federal Farm Loan Bureau, \$417,600.

OFFICE OF THE TREASURER OF THE UNITED STATES

Salaries: For Treasurer of the United States, \$8,000; for personal services in the District of Columbia in accordance with the classification act of 1923, \$1,065,000; in all, \$1,073,000.

For personal services in the District of Columbia, in accordance with the classification act of 1923, in redeeming Federal reserve and national currency, \$465,000, to be reimbursed by the Federal reserve and national banks.

OFFICE OF THE COMPTROLLER OF THE CURRENCY

Salaries: Comptroller of the Currency, \$5,000; for personal services in the District of Columbia, in accordance with the classification act of 1923, \$221,000; in all, \$226,000.

For personal services in the District of Columbia, in accordance with the classification act of 1923, in connection with Federal reserve and national currency, \$67,000, to be reimbursed by the Federal reserve and national banks.

For special examinations of national banks and bank plates, keeping macerator in Treasury Building in repair, and for other incidental expenses attending the working of the macerator, and for procuring information relative to banks other than national, \$1,500.

INTERNAL REVENUE SERVICE

Office of the commissioner: Commissioner of Internal Revenue, \$10,000; for the assistant to the commissioner, three deputy commissioners, and other personal services in the District of Columbia, in accordance with the classification act of 1923, \$810,000; in all, \$820,000.

For one stamp agent, \$1,800, to be reimbursed by the stamp manufacturers.

For salaries and expenses of collectors of internal revenue, deputy collectors, storekeepers, clerks, messengers, and janitors in internal-revenue offices, rent of offices outside of the District of Columbia, gaugers and storekeeper-gaugers at rates of compensation not in excess of those established for like services by "the classification act of 1923, telephone service, injuries to horses not exceeding \$250 for any horse crippled or killed, expenses of seizure and sale, and other necessary miscellaneous expenses in collecting internal-revenue taxes, \$4,450,000: *Provided*, That for purpose of concentration, upon the initiation of the Commissioner of Internal Revenue and under regulations prescribed by him, distilled spirits may be removed from any internal-revenue bonded warehouse to any other such warehouse, and may be bottled in bond in any such warehouse before or after payment of the tax, and the commissioner shall prescribe the form and penal sums of bond covering distilled spirits in internal-revenue bonded warehouses, and in transit between such warehouses: *Provided further*, That no part of this amount shall be used in defraying the expenses of any officer, designated above, subpoenaed by the United States court to attend any trial before a United States court or preliminary examination before any United States commissioner, which expenses shall be paid from the appropriation for "Fees of witnesses, United States courts."

For expenses of assessing and collecting the internal-revenue taxes, including the employment of the necessary officers, attorneys, experts, agents, accountants, inspectors, deputy collectors, clerks, janitors, and messengers in the District of Columbia and the several collection districts, to be appointed as provided by law, telegraph and telephone service, rental of quarters outside the District of Columbia and not to exceed \$11,500 for rental of quarters in the District of Columbia, postage, freight, express, necessary expenses incurred in making investigations in connection with the enrollment or disbarment of practitioners before the Treasury Department in internal-revenue matters, and other necessary miscellaneous expenses, and the purchase of such supplies, equipment, furniture, mechanical devices, law books and books of reference, and such other articles as may be necessary for use in the District of Columbia and the several collection districts, \$31,750,000, of which amount not to exceed \$10,750,000 may be expended for personal services in the District of Columbia: *Provided*, That not more than \$100,000 of the total amount appropriated herein may be expended by the Commissioner of Internal Revenue for detecting and bringing to trial persons guilty of violating the internal revenue laws or conniving at the same, including payments for information and detection of such violation.

For expenses to enforce the provisions of the national prohibition act and the act entitled "An act to provide for the registration of, with collectors of internal revenue, and to impose a special tax upon, all persons who produce, import, manufacture, compound, deal in, dispense, sell, distribute, or give away opium or cocoa leaves, their salts, derivatives, or preparations, and for other purposes," approved December 17, 1914, as amended by the revenue act of 1918 and the act entitled "An act to amend an act entitled 'An act to prohibit the importation and use of opium for other than medicinal purposes,' approved February 9, 1900," as amended by the act of May 26, 1922, known as "the narcotic drugs import and export act," including the employment of executive officers, agents, inspectors, chemists, assistant chemists, supervisors, clerks, and messengers in the field and in

the Bureau of Internal Revenue in the District of Columbia, to be appointed as authorized by law; not to exceed \$50,000 for dissemination of information and appeal for law observance and law enforcement, including the necessary printing in connection therewith; the securing of evidence of violations of the acts, and for the purchase of such supplies, equipment, mechanical devices, laboratory supplies, books, and such other expenditures as may be necessary in the District of Columbia and the several field offices, and for rental of necessary quarters; in all, \$11,000,000, of which amount not to exceed \$1,300,000 may be expended for personal services in the District of Columbia: *Provided*, That not to exceed \$1,329,440 of the foregoing sum shall be expended for enforcement of the provisions of the said acts of December 17, 1914, and May 26, 1922: *Provided further*, That not to exceed \$50,000 of the total amount appropriated shall be available for advances to be made by special disbursing agents when authorized by the Commissioner of Internal Revenue and approved by the Secretary of the Treasury, the provisions of section 3648 of the Revised Statutes to the contrary notwithstanding: *Provided further*, That no money herein appropriated for the enforcement of the national prohibition act, the customs laws, or internal revenue laws, shall be used to pay for storage in any private warehouse of intoxicating liquors or other property in connection therewith seized pursuant to said acts and necessary to be stored, where there is available for that purpose space in a Government warehouse or other suitable Government property in the judicial district wherein such property was seized, or in an adjacent judicial district, and when such seized property is stored in an adjacent district the jurisdiction over such property in the district wherein it was seized shall not be affected thereby.

COAST GUARD

Office of the commandant: For personal services in the District of Columbia in accordance with the classification act of 1923, \$220,000.

The services of skilled draftsmen and such other technical services as the Secretary of the Treasury may deem necessary, may be employed only in the office of the Coast Guard in connection with the construction and repair of Coast Guard vessels and boats, to be paid from the appropriation "Repairs to Coast Guard vessels and boats": *Provided*, That the expenditures on this account for the fiscal year 1926 shall not exceed \$10,000. A statement of the persons employed hereunder, their duties, and the compensation paid to each shall be made to Congress each year in the Budget.

For every expenditure requisite for and incident to the authorized work of the Coast Guard, as follows, including not to exceed \$1,000 for purchase, exchange, maintenance, repair, and operation of motor-propelled passenger-carrying vehicles, to be used only for official purposes:

For pay and allowances prescribed by law for commissioned officers, cadets and cadet engineers, warrant officers, petty officers, and other enlisted men, active and retired, temporary cooks, and surfmen, substitute surfmen, and one civilian instructor, \$13,675,035;

For rations or commutation thereof for petty officers and other enlisted men, \$727,000;

For fuel and water for vessels, stations, and houses of refuge, \$2,780,000;

For outfits, ship chandlery, and engineers' stores for the same, \$1,300,000;

For rebuilding and repairing stations and houses of refuge, temporary leases, rent, and improvements of property for Coast Guard purposes, including use of additional land where necessary, \$289,800;

For carrying out the provisions of the act of June 4, 1920, \$30,000;

For mileage and expenses allowed by law for officers; and actual traveling expenses, per diem in lieu of subsistence not exceeding \$4, for other persons travelling on duty under orders from the Treasury Department, including transportation of enlisted men and applicants for enlistment, with subsistence and transfers en route, or cash in lieu thereof, \$250,000;

For draft animals and their maintenance, \$27,000;

For coastal communication lines and facilities and their maintenance, \$50,000;

For compensation of civilian employees in the field, including clerks to district superintendents, \$79,000;

For contingent expenses, including communication service, subsistence of shipwrecked persons succored by the Coast Guard, for the recreation, amusement, comfort, contentment, and health of the enlisted men of the Coast Guard, to be expended in the discretion of the Secretary of the Treasury, not exceeding \$15,000; wharfage, towage, freight, storage, repairs to station apparatus, advertising, surveys, medals, labor, newspapers and periodicals for statistical purposes, and all other necessary expenses which are not included under any other heading, \$220,000;

For repairs to Coast Guard vessels and boats, \$950,000;

Total Coast Guard, exclusive of commandant's office, \$20,377,835.

BUREAU OF ENGRAVING AND PRINTING

Office of director: For the director, one assistant director, and other personal services in the District of Columbia in accordance with "the classification act of 1923," \$455,540.

For the work of engraving and printing, exclusive of repay work, during the fiscal year 1926, of not exceeding 190,242,300 delivered sheets of United States currency and national-bank currency, 95,075,700 delivered sheets of internal-revenue stamps, 130,000 delivered sheets of customs stamps, 2,700,000 delivered sheets of withdrawal permits, 550,000 delivered sheets of opium orders and special-tax stamps required under the act of December 17, 1914, and 7,241,817 delivered sheets of checks, drafts, and miscellaneous work, as follows:

For salaries of all necessary employees, other than employees required for the administrative work of the bureau of the class provided for and specified in the Treasury Department appropriation act for the fiscal year 1925, and plate printers and plate printers' assistants, to be expended under the direction of the Secretary of the Treasury, \$3,631,833; *Provided*, That no portion of this sum shall be expended for printing United States notes or Treasury notes of larger denominations than those that may be canceled or retired, except in so far as such printing may be necessary in executing the requirements of the act "To define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes," approved March 14, 1900.

For wages of plate printers, at piece rates to be fixed by the Secretary of the Treasury, not to exceed the rates usually paid for such work, including the wages of printers' assistants, when employed, \$1,780,000, to be expended under the direction of the Secretary of the Treasury; *Provided*, That no portion of this sum shall be expended for printing United States notes or Treasury notes of larger denominations than those that may be canceled or retired, except in so far as such printing may be necessary in executing the requirements of the act "to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes," approved March 14, 1900.

For engravers' and printers' materials and other materials except distinctive paper, miscellaneous expenses, including paper for internal-revenue stamps, and for purchase, maintenance, and driving of necessary motor-propelled and horse-drawn passenger-carrying vehicles, when, in writing, ordered by the Secretary of the Treasury, \$1,404,157, to be expended under the direction of the Secretary of the Treasury.

During the fiscal year 1926 all proceeds derived from work performed by the Bureau of Engraving and Printing, by direction of the Secretary of the Treasury, not covered and embraced in the appropriation for said bureau for the said fiscal year, instead of being covered into the Treasury as miscellaneous receipts, as provided by the act of August 4, 1886 (24 Stat. p. 227), shall be credited when received to the appropriation for said bureau for the fiscal year 1926.

SECRET SERVICE

Secret Service Division, salaries: For the chief of the division and other personal services in the District of Columbia in accordance with "the classification act of 1923," \$25,680.

Suppressing counterfeiting and other crimes: For expenses incurred under the authority or with the approval of the Secretary of the Treasury in detecting, arresting, and delivering into the custody of the United States marshal having jurisdiction dealers and pretended dealers in counterfeit money and persons engaged in counterfeiting, forging, and altering United States notes, bonds, national-bank notes, Federal reserve notes, Federal reserve bank notes, and other obligations and securities of the United States and of foreign governments, as well as the coins of the United States and of foreign governments, and other crimes against the laws of the United States relating to the Treasury Department and the several branches of the public service under its control; hire and operation of motor-propelled passenger-carrying vehicles when necessary; per diem in lieu of subsistence, when allowed pursuant to section 13 of the sundry civil appropriation act approved August 1, 1914, and for no other purpose whatever, except in the protection of the person of the President and the members of his immediate family and of the person chosen to be President of the United States, \$450,000; *Provided*, That no part of this amount be used in defraying the expenses of any person subpoenaed by the United States courts to attend any trial before a United States court or preliminary examination before any United States commissioner, which expenses shall be paid from the appropriation for "Fees of witnesses, United States courts"; *Provided further*, That no person shall be employed hereunder at a compensation greater than that allowed by law.

PUBLIC HEALTH SERVICE

Salaries, Office of Surgeon General: For personal services in the District of Columbia, in accordance with the classification act of 1923, \$101,500.

For pay, allowance, and commutation of quarters for commissioned medical officers, including the Surgeon General, assistant surgeon gen-

erals at large not exceeding three in number, and pharmacists, \$1,110,000.

For pay of acting assistant surgeons (noncommissioned medical officers), \$315,000.

For pay of all other employees (attendants, etc.), \$1,020,000.

For freight, transportation, and traveling expenses, including the expenses, except membership fees, of officers when officially detailed to attend meetings of associations for the promotion of public health, \$25,000.

For maintaining the Hygienic Laboratory, \$43,400.

For preparation for shipment and transportation to their former homes of remains of officers who die in the line of duty, \$3,000.

For journals and scientific books, \$500.

For medical examinations, including the amount necessary for the medical inspection of aliens, as required by section 16 of the act of February 5, 1917, medical, surgical, and hospital services and supplies for beneficiaries (other than patients of the United States Veterans' Bureau) of the Public Health Service and persons detained under the immigration laws and regulations at Ellis Island Immigration Station, including necessary personnel, regular and reserve commissioned officers of the Public Health Service, personal services in the District of Columbia and elsewhere, maintenance, minor repairs, equipment, leases, fuel, lights, water, freight, transportation and travel, maintenance and operation of motor trucks and passenger motor vehicles, transportation, care, maintenance, and treatment of lepers, court costs, and other expenses incident to proceedings heretofore or hereafter taken for commitment of mentally incompetent persons to hospitals for the care and treatment of the insane, and reasonable burial expenses (not exceeding \$100 for any patient dying in hospital), \$5,211,285, of which not to exceed \$257,778 may be expended for personal services in the District of Columbia; *Provided*, That the Immigration Service shall permit the Public Health Service to use the hospitals at Ellis Island Immigration Station for the care of Public Health Service patients free of expense for physical upkeep, but with a charge of actual cost of fuel, light, water, telephone, and similar supplies and services, to be covered into the proper Immigration Service appropriations; and moneys collected by the Immigration Service on account of hospital expenses of persons detained under the immigration laws and regulations at Ellis Island Immigration Station shall be covered into the Treasury as miscellaneous receipts; *Provided further*, That no part of this sum shall be used for the quarantine service, the prevention of epidemics, or scientific work of the character provided for under the appropriations which follow:

All sums received by the Public Health Service during the fiscal year 1926, except allotments and reimbursements on account of patients of the United States Veterans' Bureau, shall be covered into the Treasury as miscellaneous receipts.

Quarantine service: For maintenance and ordinary expenses, exclusive of pay of officers and employees, of United States quarantine stations, \$470,000.

Prevention of epidemics: To enable the President, in case only of threatened or actual epidemic of cholera, typhus fever, yellow fever, smallpox, bubonic plague, Chinese plague or black death, trachoma, influenza, Rocky Mountain spotted fever, or infantile paralysis, to aid State and local boards or otherwise, in his discretion, in preventing and suppressing the spread of the same, and in such emergency in the execution of any quarantine laws which may be then in force, \$328,772, including the purchase of newspapers and clippings from newspapers containing information relating to the prevalence of disease and the public health.

Field investigations: For investigations of diseases of man and conditions influencing the propagation and spread thereof, including sanitation and sewage, and the pollution of navigable streams and lakes of the United States, including personal service, \$282,054.

Interstate quarantine service: For cooperation with State and municipal health authorities in the prevention of the spread of contagious and infectious diseases in interstate traffic, \$22,530.

Rural sanitation: For special studies of, and demonstration work in, rural sanitation, including personal services, and including not to exceed \$5,000 for the purchase, maintenance, repair, and operation of motor-propelled passenger-carrying vehicles, \$75,000; *Provided*, That no part of this appropriation shall be available for demonstration work in rural sanitation in any community unless the State, county, or municipality in which the community is located agrees to pay one-half the expenses of such demonstration work.

Biologic products: To regulate the propagation and sale of viruses, serums, toxins, and analogous products, including arphenamine, and for the preparation of curative and diagnostic biologic products, including personal services of reserve commissioned officers and other personnel, \$45,000.

For the maintenance and expenses of the Division of Venereal Diseases, established by sections 3 and 4, Chapter XV, of the act approved July 9, 1918, including personal and other services in the field and in the District of Columbia, \$50,000.

MINTS AND ASSAY OFFICES

OFFICE OF THE DIRECTOR OF THE MINT

Salaries: For the Director of the Mint and other personal services in the District of Columbia, in accordance with the classification act of 1923, \$32,140.

New York (N. Y.) quarantine station: For miscellaneous repairs to buildings, coal dock and approaches, \$20,000.

San Francisco (Calif.) quarantine station: For repairs and alterations to buildings, \$1,000.

The foregoing work under marine hospitals and quarantine stations shall be performed under the supervision and direction of the Supervising Architect of the Treasury.

PUBLIC BUILDINGS, REPAIRS, EQUIPMENT, AND GENERAL EXPENSES

Repairs and preservation: For repairs and preservation of all completed and occupied public buildings and the grounds thereof under the control of the Treasury Department, and for wire partitions and fly screens therefor; Government wharves and piers under the control of the Treasury Department, together with the necessary dredging adjacent thereto; care of vacant sites under the control of the Treasury Department, such as necessary fences, filling dangerous holes, cutting grass and weeds, but not for any permanent improvements thereon; repairs and preservation of buildings not reserved by vendors on sites under the control of the Treasury Department acquired for public buildings or the enlargement of public buildings, the expenditures on this account for the current fiscal year not to exceed 15 per cent of the annual rentals of such buildings: *Provided*, That of the sum herein appropriated not exceeding \$115,000 may be used for the repair and preservation of marine hospitals, the national leprosarium, and quarantine stations (including Marcus Hook) and completed and occupied outbuildings (including wire partitions and fly screens for same), and not exceeding \$24,500 for the Treasury, Treasury Annex, Liberty Loan, Butler, and Auditors' Buildings in the District of Columbia: *Provided further*, That this sum shall not be available for the payment of personal services except for work done by contract or for temporary job labor under exigency not exceeding at one time the sum of \$100 at any one building, \$930,000.

Mechanical equipment: For installation and repair of mechanical equipment in all completed and occupied public buildings under the control of the Treasury Department, including heating, hoisting, plumbing, gas piping, ventilating, vacuum cleaning, and refrigerating apparatus, electric-light plants, meters, interior pneumatic-tube and intercommunicating telephone systems, conduit, wiring, call-bell and signal systems, and for maintenance and repair of tower clocks; for installation and repair of mechanical equipment for any of the foregoing items, in buildings not reserved by vendors on sites under the control of the Treasury Department acquired for public buildings or the enlargements of public buildings, the total expenditures on this account for the current fiscal year not to exceed 10 per cent of the annual rentals of such buildings: *Provided*, That of the sum herein appropriated, not exceeding \$100,000 may be used for the installation and repair of mechanical equipment in marine hospitals, the national leprosarium, and quarantine stations (including Marcus Hook), and not exceeding \$38,000 for the Treasury, Treasury Annex, Liberty Loan, Butler, and Auditors' Buildings, in the District of Columbia, but not including the generating plant and its maintenance in the Auditors' Building, and not exceeding \$10,000 for the maintenance, changes in, and repairs of pneumatic-tube system between the appraisers' warehouse at Greenwich, Christopher, Washington, and Barrow Streets and the new customhouse in Bowling Green, Borough of Manhattan, in the city of New York, including repairs to the street pavement and subsurface necessary incident to or resulting from such maintenance, changes, or repairs: *Provided further*, That this sum shall not be available for the payment of personal services except for work done by contract, or for temporary job labor under exigency not exceeding at one time the sum of \$100 at any one building, \$521,700.

Vaults and safes: For vaults and lock-box equipments and repairs thereto in all completed and occupied public buildings under the control of the Treasury Department, and for the necessary safe equipments and repairs thereto in all public buildings under the control of the Treasury Department, whether completed and occupied or in course of construction, exclusive of personal services, except for work done by contract or for temporary job labor under exigency not exceeding at one time the sum of \$50 at any one building, \$100,000.

General expenses: To enable the Secretary of the Treasury to execute and give effect to the provisions of section 6 of the act of May 30, 1908 (35 Stat. p. 537): For salaries of architectural and engineering personnel and inspectors in the District of Columbia and elsewhere, not exceeding \$428,900; expenses of superintendence, including expenses of all inspectors and other officers and employees on duty or detailed in connection with work on public buildings and the furnishing and equipment thereof, and the work of the Supervising Architect's Office, under orders from the Treasury Department; for the transportation of household goods incident to change of headquarters of supervising superintendents, superintendents, and junior superintendents of construction, and inspectors, not in excess of 5,000 pounds at any one time, together with the necessary expense incident to packing and draying the same, not to exceed in any one year a total expenditure of \$4,500; office rent and expenses of superintendents, including temporary, stenographic, and other assistance, in the preparation of reports and the care of public property, etc.; advertising; office supplies, including drafting materials, specially prepared paper, typewriting machines, adding machines, and other mechanical labor-saving devices, and exchange of same; furniture, carpets, electric-light fixtures, and office equipment; telegraph and telephone service; freight, expressage, and postage incident to shipments of drawings, superintendent's furniture and supplies, testing instruments, etc., including articles and supplies not usually payable from other appropriations: *Provided*, That no expenditures shall be made hereunder for

transportation of operating supplies for public buildings; not to exceed \$1,000 for books of reference, law books, technical periodicals and journals; ground rent at Salamanca, N. Y.; contingencies of every kind and description, traveling expenses of site agents, recording deeds and other evidences of title, photographic instruments, chemicals, plates, and photographic materials, and such other articles and supplies and such minor and incidental expenses not enumerated, connected solely with work on public buildings, the acquisition of sites, and the administrative work connected with the annual appropriations under the Supervising Architect's Office as the Secretary of the Treasury may deem necessary and specially order or approve, but not including heat, light, janitor service, awnings, curtains, or any expenses for the general maintenance of the Treasury Building, or surveys, plaster models, progress photographs, test-pit borings, or mill and shop inspections, \$521,960, of which amount not to exceed \$226,860 may be expended for personal services in the District of Columbia.

PUBLIC BUILDINGS, OPERATING EXPENSES

Operating force: For such personal services as the Secretary of the Treasury may deem necessary in connection with the care, maintenance, and repair of all public buildings under the control of the Treasury Department (except as hereinafter provided), together with the grounds thereof and the equipment and furnishings therein, including assistant custodians, janitors, watchmen, laborers, and charwomen; engineers, firemen, elevator conductors, coal passers, electricians, dynamo tenders, lampists, and wiremen; mechanical labor force in connection with said buildings, including carpenters, plumbers, steam fitters, machinists, and painters, but in no case shall the rates of compensation for such mechanical labor force be in excess of the rates current at the time and in the place where such services are employed, \$5,639,606: *Provided*, That the foregoing appropriation shall be available for use in connection with all public buildings under the control of the Treasury Department, including the customhouse in the District of Columbia, but not including any other public building within the District of Columbia, and exclusive of marine hospitals, quarantine stations, mints, branch mints, and assay offices.

Furniture and repairs of furniture: For furniture, carpets, and repairs of same, for completed and occupied public buildings under the control of the Treasury Department, exclusive of marine hospitals, quarantine stations, mints, branch mints, and assay offices, and for gas and electric lighting fixtures and repairs of same for completed and occupied public buildings under the control of the Treasury Department, including marine hospitals and quarantine stations but exclusive of mints, branch mints, and assay offices, and for furniture and carpets for public buildings and extension of public buildings in course of construction which are to remain under the custody and control of the Treasury Department, exclusive of marine hospitals, quarantine stations, mints, branch mints, and assay offices, and buildings constructed for other executive departments or establishments of the Government, \$750,000: *Provided*, That the foregoing appropriation shall not be used for personal services, except for work done under contract or for temporary job labor under exigency, and not exceeding at one time the sum of \$100 at any one building: *Provided further*, That all furniture now owned by the United States in other public buildings or in buildings rented by the United States shall be used, so far as practicable, whether it corresponds with the present regulation plan for furniture or not.

Operating supplies: For fuel, steam, gas for lighting and heating purposes, water, ice, lighting supplies, electric current for lighting and power purposes, telephone service for custodial forces; removal of ashes and rubbish, snow, and ice; cutting grass and weeds, washing towels, and miscellaneous items for the use of the custodial forces in the care and maintenance of completed and occupied public buildings and the grounds thereof under the control of the Treasury Department, and in the care and maintenance of the equipment and furnishings in such buildings; miscellaneous supplies, tools, and appliances required in the operation (not embracing repairs) of the mechanical equipment, including heating, plumbing, hoisting, gas piping, ventilating, vacuum cleaning and refrigerating apparatus, electric-light plants, meters, interior pneumatic-tube and intercommunicating telephone systems, conduit wiring, call-bell and signal systems in such buildings, and for the transportation of articles or supplies authorized herein (including the customhouse in the District of Columbia, but excluding any other public building under the control of the Treasury Department within the District of Columbia, and excluding also marine hospitals and quarantine stations, mints, branch mints, and assay offices, and personal services, except for work done by contract or for temporary job labor under exigency not exceeding at one time the sum of \$100 at any one building), \$3,100,000. The appropriation made herein for gas shall include the rental and use of gas governors when ordered by the Secretary of the Treasury in writing: *Provided*, That rentals shall not be paid for such gas governors greater than 35 per cent of the actual value of the gas saved thereby, which saving shall be determined by such tests as the Secretary of the Treasury shall direct: *Provided further*, That the Secretary of the Treasury is authorized to contract for the purchase of fuel for public buildings under the com-

trol of the Treasury Department in advance of the availability of the appropriation for the payment thereof. Such contracts, however, shall not exceed the necessities of the current fiscal year.

Lands and other property of the United States: For custody, care, protection, and expenses of sales of lands and other property of the United States acquired and held under sections 3749 and 3750 of the Revised Statutes, the examination of titles, recording of deeds, advertising, and auctioneers' fees in connection therewith, \$50.

MISCELLANEOUS ITEMS, TREASURY DEPARTMENT AMERICAN PRINTING HOUSE FOR THE BLIND

To enable the American Printing House for the Blind more adequately to provide books and apparatus for the education of the blind in accordance with the provisions of the act approved August 4, 1919, \$40,000.

TITLE II.—POST OFFICE DEPARTMENT

The following sums are appropriated in conformity with the act of July 2, 1836, for the Post Office Department for the fiscal year ending June 30, 1926, namely:

POST OFFICE DEPARTMENT; WASHINGTON, DISTRICT OF COLUMBIA OFFICE OF THE POSTMASTER GENERAL

Postmaster General, \$12,000; for personal services in the office of the Postmaster General in the District of Columbia in accordance with "the classification act of 1923," \$197,340; in all, \$209,340.

POST OFFICE DEPARTMENT BUILDINGS

For personal services in the District of Columbia in accordance with "the classification act of 1923," for the care, maintenance, and protection of the main Post Office Department Building, the Washington City Post Office Building, and the Mail Equipment Shops Building, \$225,632.

SALARIES IN BUREAUS AND OFFICES

For personal services in the District of Columbia, in accordance with "the classification act of 1923," in bureaus and offices of the Post Office Department in not to exceed the following amounts, respectively:

Office of the First Assistant Postmaster General, \$392,100.
Office of the Second Assistant Postmaster General, \$265,740.
Office of the Third Assistant Postmaster General, \$678,260.
Office of the Fourth Assistant Postmaster General, \$376,940.
Office of the Solicitor for the Post Office Department, \$57,760.
Office of the chief inspector, \$134,920.
Office of the purchasing agent, \$33,300.
Bureau of Accounts, \$38,280.

CONTINGENT EXPENSES, POST OFFICE DEPARTMENT

For stationery and blank books, index and guide cards, folders, and binding devices, including purchase of free penalty envelopes, \$27,000.

For fuel and repairs to heating, lighting, ice, and power plant, including repairs to elevators, purchase and exchange of tools and electrical supplies, and removal of ashes, \$54,000.

For telegraphing, \$6,500.

For miscellaneous items, including purchase, exchange, maintenance, and repair of typewriters, adding machines, and other labor-saving devices; not to exceed \$3,000 for purchase, exchange, hire, and maintenance of motor trucks and motor-driven passenger-carrying vehicles; street-car fares not exceeding \$540; plumbing; repairs to department buildings; floor coverings; postage stamps for correspondence addressed abroad, which is not exempt under article 13 of the Madrid convention of the Universal Postal Union, \$52,410, of which sum not exceeding \$14,500 may be expended for telephone service, and not exceeding \$1,800 may be expended for purchase and exchange of law books, books of reference, railway guides, city directories, and books necessary to conduct the business of the department, and not exceeding \$500 may be expended for actual and necessary expenses of the purchasing agent while traveling on business of the department.

For furniture and filing cabinets, \$8,000.

For printing and binding for the Post Office Department, including all of its bureaus, offices, institutions, and services located in Washington, D. C., and elsewhere, \$1,150,000.

For reimbursement of the Government Printing Office or Capitol power plant for the cost of furnishing steam for heating and electric current for lighting and power to the Post Office Department Building at Massachusetts Avenue and North Capitol Street, District of Columbia, \$58,000.

Appropriations hereinafter made for the field service of the Post Office Department, except as otherwise provided, shall not be expended for any of the purposes hereinbefore provided for on account of the Post Office Department in the District of Columbia.

FIELD SERVICE, POST OFFICE DEPARTMENT

OFFICE OF POSTMASTER GENERAL

For gas, electric power and light, and the repair of machinery, United States Post Office Department equipment shops building, \$8,500.

The Postmaster General is hereby authorized to pay a cash reward for any invention, suggestion, or series of suggestions for an improve-

ment or economy in device, design, or process applicable to the Postal Service submitted by one or more employees of the Post Office Department or the Postal Service which shall be adopted for use and will clearly effect a material economy or increase efficiency, and for that purpose the sum of \$3,000 is hereby appropriated: *Provided*, That the sums so paid to employees in accordance with this act shall be in addition to their usual compensation: *Provided further*, That the total amount paid under the provisions of this act shall not exceed \$1,000 in any month or for any one invention or suggestion: *Provided further*, That no employee shall be paid a reward under this act until he has properly executed an agreement to the effect that the use by the United States of the invention, suggestion, or series of suggestions made by him shall not form the basis of a further claim of any nature upon the United States by him, his heirs, or assigns: *Provided further*, That this appropriation shall be available for no other purpose.

For the transportation and delivery of equipment, materials, and supplies for the Post Office Department and Postal Service by freight, express, or motor transportation, and other incidental expenses, \$450,000.

For travel and miscellaneous expenses in the Postal Service, office of the Postmaster General, \$1,000.

To enable the Postmaster General to pay claims for damages to persons or property in accordance with the provisions of the deficiency appropriation act approved June 16, 1921, \$10,000.

Office of chief inspector: For salaries of 15 inspectors in charge of divisions, at \$4,200 each; and 520 inspectors, \$1,712,000; in all, \$1,775,000: *Provided*, That the appointment of additional inspectors shall be made upon certification of the Civil Service Commission, as heretofore practiced.

For traveling expenses of inspectors, inspectors in charge, and the chief post-office inspector, and for the traveling expenses of four clerks performing stenographic and clerical assistance to post-office inspectors in the investigation of important fraud cases, \$445,000.

For necessary miscellaneous expenses at division headquarters, \$13,500.

For compensation of 115 clerks at division headquarters, \$252,000.

For payment of rewards for the detection, arrest, and conviction of post-office burglars, robbers, and highway mail robbers, \$30,000: *Provided*, That rewards may be paid, in the discretion of the Postmaster General, when an offender of the class mentioned was killed in the act of committing the crime or in resisting lawful arrest: *Provided further*, That no part of this sum shall be used to pay any rewards at rates in excess of those specified in Post Office Department Order 7708, dated July 1, 1922: *Provided further*, That of the amount herein appropriated not to exceed \$5,000 may be expended, in the discretion of the Postmaster General, for the purpose of securing information concerning violations of the postal laws and for services and information looking toward the apprehension of criminals.

OFFICE OF THE FIRST ASSISTANT POSTMASTER GENERAL

For compensation to postmasters, \$46,600,000.

For compensation to assistant postmasters at first and second class post offices, \$6,000,000.

For compensation to printers, mechanics, and skilled laborers, \$100,000.

For compensation to clerks and employees at first and second class post offices, including auxiliary clerk hire at summer and winter post offices, \$130,000,000.

For compensation to watchmen, messengers, and laborers, \$6,200,000.

For compensation to clerks in charge of contract stations, \$1,575,000.

For separating mails at third and fourth class post offices, \$750,000.

For unusual conditions at post offices, \$150,000.

For allowances to third-class post offices to cover the cost of clerical services, \$4,650,000.

For rent, light, and fuel for first, second, and third class post offices, \$15,175,000.

For miscellaneous items necessary and incidental to post offices of the first and second classes, \$975,000.

For village delivery service in towns and villages having post offices of the second or third class, and in communities adjacent to cities having city delivery, \$1,700,000.

For Detroit River postal service, \$18,000.

For car fare and bicycle allowance, including special-delivery car fare, \$1,000,000.

For pay of letter carriers, City Delivery Service, \$92,000,000.

For fees to special-delivery messengers, \$7,600,000.

For the transmission of mail by pneumatic tubes or other similar devices in the city of New York, including the Borough of Brooklyn of the city of New York, including power, labor, and all other operating expenses, \$526,373.

For vehicle allowance, the hiring of drivers, the rental of vehicles, and the purchase and exchange and maintenance, including stable and garage facilities, of wagons or automobiles for, and the operation of, screen-wagon and city delivery and collection service, \$15,400,000: *Provided*, That the Postmaster General may, in his disbursement of this

appropriation, apply a part thereof to the leasing of quarters for the housing of Government-owned automobiles at a reasonable annual rental for a term not exceeding 10 years.

For travel and miscellaneous expenses in the Postal Service, office of the First Assistant Postmaster General, \$1,000.

OFFICE OF THE SECOND ASSISTANT POSTMASTER GENERAL

For inland transportation by star routes in Alaska, \$170,000: *Provided*, That out of this appropriation the Postmaster General is authorized to provide difficult or emergency mail service in Alaska, including the establishment and equipment of relay stations, in such manner as he may think advisable, without advertising therefor.

For inland transportation by steamboat or other power-boat routes, including ship, steamboat, and way letters, \$1,550,000.

For inland transportation by railroad routes and for mail messenger service, \$112,250,000: *Provided*, That not to exceed \$1,500,000 of this appropriation may be expended for pay of freight and incidental charges for the transportation of mails conveyed under special arrangement in freight trains or otherwise: *And provided further*, That separate accounts be kept of the amount expended for mail messenger service.

For the operation and maintenance of the Airplane Mail Service between New York, N. Y., and San Francisco, Calif., via Chicago, Ill., and Omaha, Nebr., and for the installation, equipment, and operation of the Airplane Mail Service by night flying, and to enable the department to make the additional charges for both night and day service on first-class mail matter, in accordance with existing law, including necessary incidental expenses and employment of necessary personnel, \$2,600,000.

Railway Mail Service: For 15 division superintendents, 15 assistant division superintendents, 2 assistant superintendents, 1 assistant superintendent in charge of car construction, 121 chief clerks, 121 assistant chief clerks, clerks in charge of sections in the offices of division superintendents, railway postal clerks, substitute railway postal clerks, joint employees, and laborers in the Railway Mail Service, \$49,500,000.

For travel allowance to railway postal clerks and substitute railway postal clerks, \$2,675,000.

For actual and necessary expenses, general superintendent and assistant general superintendent, division superintendents, assistant division superintendents, assistant superintendents, chief clerks, and assistant chief clerks, Railway Mail Service, and railway postal clerks, while actually travelling on business of the Post Office Department and away from their several designated headquarters, \$62,000.

For rent, light, heat, fuel, telegraph, miscellaneous and office expenses, telephone service, and badges for railway postal clerks, and rental of space for terminal railway post offices for the distribution of mails when the furnishing of space for such distribution can not, under the Postal Laws and Regulations, properly be required of railroad companies without additional compensation, and for equipment and miscellaneous items necessary to terminal railway post offices, \$1,222,000.

For electric and cable car service, \$650,000.

For transportation of foreign mails by steamship, aircraft, or otherwise, \$8,500,000: *Provided*, That not to exceed \$150,000 of this sum may be expended for carrying foreign mail by aircraft: *Provided further*, That the Postmaster General shall be authorized to expend such sums as may be necessary, not to exceed \$150,000, to cover the cost to the United States for maintaining sea post service on ocean steamships conveying the mails to and from the United States; and not to exceed \$3,000 for the salary of the assistant superintendent, division of foreign mails, with headquarters at New York City: *Provided further*, That not exceeding \$1,000 of this sum may be immediately available for the representative to the meeting of the research committee of the Universal Postal Congress in Europe to be designated from the Post Office Department by the Postmaster General, and to be expended in the discretion of the Postmaster General and accounted for on his certificate, which certificate shall be conclusive on the accounting offices of the United States.

For balances due foreign countries, \$1,500,000.

For travel and miscellaneous expenses in the Postal Service, office of the Second Assistant Postmaster General, \$1,000.

OFFICE OF THE THIRD ASSISTANT POSTMASTER GENERAL

For manufacture of adhesive postage stamps, special-delivery stamps, books of stamps, stamped envelopes, newspaper wrappers, postal cards, and for colling of stamps, \$8,000,000.

For pay of agent and assistants to examine and distribute stamped envelopes and newspaper wrappers, and expenses of agency, \$21,000.

For payment of limited indemnity for the injury or loss of pieces of domestic registered matter, insured and collect-on-delivery mail, \$4,000,000.

For payment of limited indemnity for the injury or loss of international mail in accordance with convention, treaty, or agreement stipulations, \$100,000.

For travel and miscellaneous expenses in the Postal Service, office of the Third Assistant Postmaster General, \$1,000.

OFFICE OF THE FOURTH ASSISTANT POSTMASTER GENERAL

For stationery for the Postal Service, including the money-order and registry systems; and also for the purchase of supplies for the Postal Savings System, including rubber stamps, canceling devices, certificates, envelopes and stamps for use in evidencing deposits, and free penalty envelopes; and for the reimbursement of the Secretary of the Treasury for expenses incident to the preparation, issue, and registration of the bonds authorized by the act of June 25, 1910, \$925,000.

For miscellaneous equipment and supplies, including the purchase and repair of furniture, package boxes, posts, trucks, baskets, satchels, straps, letter-box paint, baling machines, perforating machines, duplicating machines, printing presses, directories, cleaning supplies, and the manufacture, repair, and exchange of equipment, the erection and painting of letter-box equipment, and for the purchase and repair of presses and dies for use in the manufacture of letter boxes; for post-marking, rating, money-order stamps, and electrotype plates and repairs to same; metal rubber, and combination type, dates and figures, type holders, ink pads for canceling and stamping purposes, and for the purchase, exchange, and repair of typewriting machines, envelope-opening machines, and computing machines, copying presses, numbering machines, time recorders, letter balances, scales, test weights, and miscellaneous articles purchased and furnished directly to the Postal Service; for miscellaneous expenses in the preparation and publication of post-route maps and rural-delivery maps or blue prints, including tracing for photolithographic reproduction; for other expenditures necessary and incidental to post offices of the first, second, and third classes, and offices of the fourth class having or to have Rural Delivery Service, and for letter boxes, \$1,400,000; and the Postmaster General may authorize the sale to the public of post-route maps and rural-delivery maps or blue prints at the cost of printing and 10 per cent thereof added; of this amount \$1,500 may be expended in the purchase of atlases and geographical and technical works: *Provided*, That \$200,000 of this appropriation may be used for the purchase of equipment and furniture for post-office quarters and for no other purposes.

For wrapping twine and tying devices, \$470,000.

For defraying expenses incident to the shipment of supplies, including hardware, boxing, packing, and the pay of employees in connection therewith at the following annual rates: Storekeeper, \$2,650; foreman, \$1,800; 11 requisition fillers, at \$1,600 each; 2 requisition fillers, at \$1,200 each; 10 packers, at \$1,600 each; 2 packers, at \$1,200 each; and 2 chauffeurs, at \$1,400 each; in all, \$69,800.

For rental, purchase, exchange, and repair of canceling machines and motors, mechanical mail-handling apparatus, and other labor-saving devices, including cost of power in rented buildings and miscellaneous expenses of installation and operation of same, including salaries of five traveling mechanics and for per diem allowance of traveling mechanics while actually traveling on official business away from their homes and their official domiciles, at a rate to be fixed by the Postmaster General, not to exceed \$4 per day, \$575,000.

For the purchase, manufacture, and repair of mail bags and other mail containers and attachments, mail locks, keys, chains, tools, machinery, and material necessary for same, and for incidental expenses pertaining thereto; also material, machinery, and tools necessary for the manufacture and repair in the equipment shops at Washington, D. C., of such other equipment for the Postal Service as may be deemed expedient; for compensation to labor employed in the equipment shops at Washington, D. C., \$1,800,000, of which not to exceed \$470,000 may be expended for personal services in the District of Columbia: *Provided*, That out of this appropriation the Postmaster General is authorized to use as much of the sum, not exceeding \$15,000, as may be deemed necessary for the purchase of material and the manufacture in the equipment shops of such small quantities of distinctive equipments as may be required by other executive departments; and for service in Alaska, Porto Rico, Philippine Islands, Hawaii, or other island possessions.

For inland transportation by star routes (excepting service in Alaska), including temporary service to newly established offices, \$12,700,000.

For pay of rural carriers, substitutes for rural carriers on annual and sick leave, clerks in charge of rural stations, and tolls and ferrage, Rural Delivery Service, and for the incidental expenses thereof, \$88,350,000.

For travel and miscellaneous expenses in the Postal Service, office of the Fourth Assistant Postmaster General, \$1,000.

If the revenues of the Post Office Department shall be insufficient to meet the appropriations made under Title II of this act, a sum equal to such deficiency in the revenues of such department is hereby appropriated, to be paid out of any money in the Treasury not otherwise appropriated, to supply such deficiency in the revenues of the Post Office Department for the fiscal year ending June 30, 1923, and the sum needed may be advanced to the Post Office Department upon requisition of the Postmaster General.

Mr. MADDEN took the floor. [Applause.]

Mr. Chairman and gentlemen of the committee, I am very grateful to you for your courteous greeting.

1925 APPROPRIATIONS AND 1926 BUDGET ESTIMATES

Mr. Chairman, the estimates for the fiscal year 1926 as submitted in the Budget for all purposes of the Government aggregate \$3,729,519,846.48.

The total appropriations for the fiscal year 1925, including the amounts in the regular annual appropriation acts, the deficiency appropriation act which failed last session and became a law on December 5, and the field classification salary act, aggregate \$3,771,689,238.87.

The estimates of appropriations as submitted in the Budget are in the net \$42,169,392.39 less than the current appropriations.

Included in the aggregate of the appropriations for the year 1925 and the estimates for 1926 are the amounts for the Postal Service, which are payable from the postal revenues. The appropriations for the Postal Service for 1925 are \$613,645,195.25, and the estimates for 1926 are \$637,376,005, an increase for 1926 over 1925 of \$23,730,809.75. Eliminating the postal from the grand totals of appropriations and estimates, the amount for all other activities of the Government is \$3,092,143,841.48 for 1926, against \$3,158,044,043.62 for 1925, a net reduction of \$65,900,202.14.

This net reduction comes about as the result of a number of large increases and decreases. The principal increases are as follows: \$64,750,000 for Federal road aid to supply money for the payment of maturing obligations previously authorized, \$2,236,865.50 for the Department of Justice (one million more on war frauds, three-fourths million on courts, one-fourth million on penal institutions), \$9,488,307.13 for the Navy, \$12,959,729 automatic increase in the sinking fund by operation of law, and \$1,936,711.79 for the District of Columbia government—principally on schools, parks, and new water supply.

The principal decreases are as follows: \$35,000,000 interest on the public debt, \$6,000,000 under the Shipping Board for losses in operations, \$25,500,000 for pensions for Civil and Spanish War veterans, \$2,732,436 under the Department of Agriculture due to the \$3,500,000 emergency fund in 1925 for foot-and-mouth disease not necessary to be carried for 1926, \$2,916,787.69 under the Interior Department, \$3,106,041 under the Department of Commerce due to the appropriation of \$3,500,000 for 1925 for the census of agriculture, and \$5,715,364.67 under the War Department largely on account of the inclusion for 1925 of the money for administrative expenses under the adjusted compensation act. There is also a net reduction of \$76,258,272 under the Veterans' Bureau. There are increases under that bureau of \$44,000,000 for the payment of military and naval compensation, and \$10,000,000 for the payment of military and naval insurance, and decreases of \$3,778,874.30 in administrative expenses, \$10,850,000 in medical and hospital services, \$51,000,000 in vocational rehabilitation, \$14,629,398 in adjusted service pay, and \$50,000,000 in the amount of the adjusted service certificate fund.

The net result of the increases and decreases between 1925 appropriations and 1926 estimates is a recommended total for 1926, exclusive of the Postal Service, that is \$65,900,202.14 less than the total of the 1925 appropriations.

RECEIPTS AND EXPENDITURES

The actual receipts and expenditures for the fiscal year 1924 are as follows:

Receipts	\$4,012,044,701.65
Expenditures	3,506,677,715.34
Surplus	505,366,986.31

The estimated receipts and expenditures for the fiscal year 1925 are as follows:

Receipts	\$3,601,908,297.00
Expenditures	3,534,083,808.00
Surplus	67,884,489.00

The estimated receipts and expenditures for the fiscal year 1926 are as follows:

Receipts	\$3,641,295,002.00
Expenditures	3,267,551,378.00
Surplus	373,743,714.00

The gross public debt was reduced \$1,098,894,375 during the fiscal year 1924 and at the end of that year stood at \$21,250,000,000. This latter sum is a reduction from the peak point of \$26,594,000,000 in August, 1919, of \$5,343,000,000. The reduction in the public debt of more than \$1,000,000,000 during the last fiscal year was brought about by the application of the sinking fund and other public-debt retirement funds amounting to \$458,000,000, a reduction of \$135,500,000 in the general fund

balance, and the use of the entire surplus of over \$505,000,000. This decrease in the debt also resulted in the reduction in the annual interest charge by approximately \$45,000,000.

Between the fiscal years 1924 and 1925 the revenues show a decrease of approximately \$400,000,000 which is due principally to the reduction in taxes recently effected by Congress. The expenditures, on the other hand, were increased considerably over \$100,000,000 on account of the enactment of the adjusted compensation act. The surplus for the fiscal year 1925, estimated at approximately \$68,000,000, is very creditable, considering the decreased revenue and the increased expenditures.

For the fiscal year 1926 the outlook is much better. It is estimated that the receipts will be approximately \$40,000,000 greater than they are estimated for 1925, and the expenditures will be approximately \$267,000,000 less than they are estimated for 1925, thereby increasing the estimated surplus of approximately \$68,000,000 for 1925 to \$374,000,000 for 1926.

Whether this surplus will be realized depends very greatly upon the action of Congress. If new obligations are not undertaken which will increase the present estimate of expenditures and if the new revenue act produces a satisfactory amount of revenue, there is every prospect that it will materialize. Further tax reduction should not take place until there is absolute certainty that the obligations of the Government can be met over a period of years in the future under the proposed lessened revenue. [Applause.] Nothing would be more foolish than to proceed hastily to tax reduction and then be compelled to restore part or all of that reduction in order to provide for increased cost of government or to make up for a decline in the estimated revenue.

Personally—I do not speak for anyone except myself when I say what I am about to say—I would like to see some permanent law placed on the statute books of the country providing for an automatic return to the taxpayer of a reasonable surplus over the working balance whenever that surplus may accrue. I have an idea which I would like to outline. It is to this effect: That we might properly pass an act which would not interfere with any other tax legislation that might be thought proper, requiring the Secretary of the Treasury at the end of every fiscal year to report to the President of the United States the amount of the surplus, whatever it might be, if any, over and above a safe working balance, and then after the receipt of that report from the Secretary of the Treasury the President should be required to direct the Secretary automatically to return to the taxpayers whatever their proportion of the surplus might be, without any further application of law. That seems to me a sensible business proposition that would be inaugurated in any man's business if he was controlling the business entirely himself. I see no reason why the Government of the United States should not be conducted on as wise principles as that of any business in the land. [Applause.] Whether that would meet with approval of Members of Congress or not will be for them to say. I would like to have them take the thought and see if it has merit.

Mr. LINTHICUM. Will the gentleman yield?

Mr. MADDEN. Yes.

Mr. LINTHICUM. A large part of the revenue comes from customs receipts?

Mr. MADDEN. About 550 millions comes from customs.

Mr. LINTHICUM. Would you distribute the surplus to the income taxpayers or would you take into account payments on account of internal revenue?

Mr. MADDEN. Oh, this would be an income-tax proposition; you could not work it out on anything else.

Whether we have further tax reduction depends in large measure upon what we do here. The running expenses of the Government can not be much further reduced. We have about reached the bottom in many activities. Some will necessarily remain stationary at present amounts for a number of years; others will necessarily go forward. We have depleted many stocks of war supplies that it was proper to consume. Fresh buying in the military services will have to be made soon for current operation. An additional building program has been authorized for the Navy. Unless further curtailment takes place in naval building by concerted international agreement we will be put to added expense annually to keep up our allotted strength. There has been little or no building construction by the civil activities of the Government since the war. Many places in the United States are in need of added public quarters to accommodate post offices and other public activities. While I never want to see a recurrence to the former wasteful and unbusinesslike practices in the authorization and construction of public buildings, I do want to see proper public

quarters provided in those places where we can save rents and give to our Federal activities the facilities which are necessary for the prompt and efficient transaction of their affairs.

Mr. NELSON of Wisconsin. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. Yes.

Mr. NELSON of Wisconsin. Does the gentleman's committee contemplate meeting the need he refers to by an omnibus bill in the near future?

Mr. MADDEN. It would not come from our committee.

Mr. NELSON of Wisconsin. The gentleman's committee would figure on the funds. The funds would warrant it, would they not?

Mr. MADDEN. I think the time is coming soon when something will have to be done.

Mr. NELSON of Wisconsin. It is about 14 years since an appropriation was made for Madison, Wis., and it is still pending.

Mr. MADDEN. A great many of the other communities about the country are in the same condition as the gentleman's city.

We ought not to condemn the erection of a public structure if it will show a profitable return upon the investment. We should not build for the mere sake of building if the investment is not profitable.

There is little prospect for further decrease in the cost of government. With the prospect before us of industrial and commercial prosperity we should have a good realization in revenue from internal and customs taxes. I hope further tax reduction may be possible, but it should not be undertaken until we are certain of our revenue and determined that we will not further increase the cost of our Government. The hope for the future lies in not taking on new Federal activities or enacting legislation which greatly increases the cost of government. Normal growth of the Government as now constituted is natural and must be expected in many lines, but the precipitation of the Government into further lines of new activity and Federal aid to States in various fields will not only increase our expenditures and therefore our taxes, but will be an invitation and inducement to the States to do likewise. The remedy lies with us. If we are to have further tax reduction we must refrain from creating fresh obligations, many of which start in a small way, but take on accretions and a momentum that jolt the Treasury severely.

CLASSIFICATION IN DEPARTMENTAL SALARIES

I want to say a word about the classification of salaries in the District of Columbia under the new law. The committee has recommended in its bills a modification of the limitation which the House, upon its recommendation, adopted in the bills of last session. The modification which we recommend is to correct what we believe have been administrative abuses in several of the departments. The new law gives considerable administrative discretion to officials in the departments. We have protected the integrity of the law as far as we thought it wise and at the same time permit it a fair trial of operation. I want here to sound a note of warning to administrative officers. They must scrupulously follow not only the letter but what they unquestionably know to be the intent and the temper of Congress in the matter of salaries. It has come to my attention that there is a growing tendency, prevalent now in a minor degree, to magnify and exaggerate the importance attached to the duties of some positions in order that they may be changed to a higher grade and in that way obtain greater compensation. It is natural to want more money for the performance of service, but it is the duty of every head of department and bureau to keep a tight control and know that what he approves in the way of recommendations for change in grade is a conservative statement of fact based upon real merit and necessity and not merely a maneuver for more pay.

I am loath to believe that in some few of the cases there has been neither merit nor fact in connection with the promotions that have been made, and I have my everyday troubles with these people trying to hold them down to a decent consideration of the problems.

Mr. SMITH. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. Yes.

Mr. SMITH. Under the old plan the Congress appropriated for specific salaries?

Mr. MADDEN. Yes.

Mr. SMITH. But under this new plan the appointing officer or the head of the bureau has a right to fix the salary, taking into consideration the amount allotted to each particular bureau?

Mr. MADDEN. Yes.

Mr. SMITH. It seems to me that under this new plan there is more danger of great abuses than under the old plan.

Mr. MADDEN. That is what I am trying to call to the attention of the country, and in many cases there is just cause for complaint. Some promotions have been made without justification, and this bill, and all other bills that we are reporting, endeavors to remedy that condition by bringing them back to the average where they belong.

Mr. SMITH. But there is a provision in the appropriation bills which have already passed the House which does a great injustice to certain individuals where there is only one in a class by reducing them to the average salary.

Mr. MADDEN. I do not agree with the gentleman that that will be a great injustice. I think that is where the abuses arise. For example, let us take a case where there is only one in a grade. The law provides definitely, distinctly, and unequivocally that the average of the rates of the grade shall not be exceeded, and where there has been only one in a grade in some cases they have jumped them up from \$6,000 to \$7,500, whereas \$6,500 or \$6,750 would be the average. This is not right to the men who are in the lower grades. What happened is in the testimony taken before our committee. It shows that they appointed, say, the assistant bureau chief and then another assistant bureau chief and then several other subordinates as a board to recommend the salaries of their chiefs. Everyone knows that the assistant bureau chief is going to say that the salary of his chief should be larger, whether it be right or wrong, and in this case it is wrong.

Mr. SMITH. That is what I am arguing, that it is necessary to have a different limitation from that which has been put in the bill, for the reason that if there is but one in a grade and he has been receiving the highest salary in that grade, he has to take a reduction to the average salary.

Mr. MADDEN. Yes; he has to take a reduction.

Mr. SMITH. Of probably three or four hundred dollars, while others have been promoted as high as \$1,500 over the grade previously held.

Mr. MADDEN. I think the case the gentleman has in mind is where a man is promoted from one grade up to another and compelled to take lower pay. He goes into a higher grade where the entrance rate would be lower than the upper rates of the grade from which he went. The provision in this bill remedies that.

Mr. SMITH. It does not remedy it if you make it the average salary, and bring a man down three or four hundred dollars in salary lower than he has been receiving for the last three or four years.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. Yes.

Mr. BLANTON. The gentleman says that with respect to certain departments there is no justification whatever for some of the promotions made, and that they have been made without either justification or fact. When did the gentleman reach that conclusion?

Mr. MADDEN. Just as soon as we discovered it.

Mr. BLANTON. How long ago?

Mr. MADDEN. It was early in this session.

Mr. BLANTON. And yet we have had three big supply measures that have that same vice in them.

Mr. MADDEN. Oh, no. The language in all of these bills from the first to the last guards against a recurrence of that.

Mr. BLANTON. The reason that the gentleman from Illinois has the esteem and confidence of every Member in the House is that he never camouflages. I want the gentleman to show at least one Member of this House who is not satisfied that this bill meets those conditions that he speaks of, that it does. I want the gentleman to show in what way the bill changes the old lump sum that has been in all of these bills and prevents these department heads from sliding these favorites up and down the scale at will.

Mr. MADDEN. There is new language in this bill and in all the bills that have been reported to the House from our committee, which distinctly, clearly, and unequivocally reduces these cases which we believe are abuses in promotions.

Mr. BLANTON. And let them raise them up again immediately?

Mr. MADDEN. No; they can not do that. I believe there is great good in the classification law for the employee and better service in return for the Government. Classification can not be successful if abuse spreads. The law was a radical departure in the policy of Congress in handling salaries. It is on trial.

Mr. SMITH. Will the gentleman yield for another question?

Mr. MADDEN. I will.

Mr. SMITH. Is it true that in some of the bureaus a number of clerks have been dismissed and the others promoted in order to use up the entire appropriation?

Mr. MADDEN. I think I can say this, that where these abuses occurred it was in promoting of men who were in the higher places sometimes at the expense of the men in the lower places. I think that is a fair statement.

Mr. SMITH. I am told that in some of the bureaus a third of the employees were discharged and the others promoted.

Mr. MADDEN. I believe that is not true. There have been some reductions in the force, of course.

Mr. BOYCE. Will the gentleman yield?

Mr. MADDEN. I will.

Mr. BOYCE. Is it not possible for the Congress to be furnished with the several grades in each of the departments, bureaus, and commissions?

Mr. MADDEN. Oh, yes.

Mr. BOYCE. And with the number of persons in each grade and the salaries of each and for Congress to pass a permanent bill, from time to time, covering the salary costs of the several employees of each and every department, bureau, and commission?

Mr. MADDEN. We have a list of every grade and every person in every grade and the salary attached to every job in each grade, and the presumption is that as men go up fewer people will be in one grade perhaps and more in another.

Mr. BOYCE. It may be assumed that employees will be advanced from one grade to another; but what is there to prevent Congress from fixing the salary of each grade by permanent law?

Mr. MADDEN. It is fixed now through the classification act. Congress enacted a law about a year or so ago organizing the Classification Board and giving power to the board to write the classification for jobs for the various positions. The law has fixed the compensation to be attached to the job, and the hope was that we would be able to do away with personal favoritism.

Mr. BOYCE. Do I understand that we had at the last session a report of the Classification Board?

Mr. MADDEN. That was for the country. We had it only for the District of Columbia.

Mr. BOYCE. Before the 1st of July?

Mr. MADDEN. Yes. We have a report under the law for the District of Columbia. That report is on file and the gentleman can see it.

Mr. BOYCE. Did Congress pass on any report at the last session?

Mr. MADDEN. Not the field service.

Mr. BOYCE. Did Congress act on the report made for the District of Columbia?

Mr. MADDEN. Congress did not act on the report.

Mr. BOYCE. Would it not be a great restraint upon the departments of the Government if Congress should pass upon the report of the Classification Board?

Mr. MADDEN. Congress is presumed to do it.

Mr. BOYCE. Yes; but there is a great difference between a presumption and actually doing the thing.

Mr. MADDEN. We have a Comptroller General who passes on the accounts and examines them and ascertains whether or not the money appropriated by Congress is being spent according to law.

Mr. BOYCE. I think there would be considerable less abuse and less of favoritism if approval of the Congress was required as by a permanent law.

Mr. MADDEN. Well, we are having an exhibition of what Congress can do now in the handling of a proposition of this sort. Everyone knows that 531 men in the two Houses of Congress can not act on the details of intricate problems like this. They have not the time. They are busy with the business of the Nation. This is only one piece of business in which the Nation is interested. We are dealing with all the problems of the Nation.

Mr. BOYCE. What I have in mind is if Congress should be supplied with a list—

Mr. MADDEN. Yes; Congress is supplied—

Mr. BOYCE. Of all the grades and the salaries, and then from time to time pass a permanent bill, it would be worth while.

Mr. MADDEN. Well, it would be hard work for you to do it, I am afraid. It would be a hard job. I say that the classification act is on trial, and my judgment is that it will be repealed by Congress one of these days, and ought to be [applause], if it is not scrupulously observed by administrative officers. So far, on the whole, the great majority of departmental officers are making an effort to administer it courageously and carefully. Congress is watching, and it ought to watch, and I am glad that it is watching, for Congress is the direct representative of the American people; and it will continue to watch, as far as it can, the administrative action taken under the law. We want it to have a fair trial, but at the same time Congress wants square dealing. What I am saying is for the information of those who are administering this law in the executive departments. I want them to know what the attitude is up here.

Mr. STENGLE. Mr. Chairman, will the gentleman yield right there?

Mr. MADDEN. Certainly.

Mr. STENGLE. I want to take the opportunity of congratulating the distinguished chairman of the Committee on Appropriations for having taken care of the situation and having wrung blood out of those people who are trying to wring blood out of the classification law. The gentleman is on the right road, and I hope he will stick to it.

Mr. MADDEN. I thank the gentleman.

I want to say a few words about the bill under consideration. I have not said much about it so far.

TREASURY AND POST OFFICE DEPARTMENTS BILL FOR 1925

First, for the year 1925 these two bills carried a direct appropriation of \$751,289,907.75. The Budget estimates for 1926 were \$775,135,921. The amounts recommended by the committee are \$763,180,522, or \$11,890,614.25 more than the corresponding appropriation for 1925, and \$11,955,399 less than the Budget estimates for 1926.

I will insert here a table showing the amounts for each department:

Department	Appropriations for 1925	Budget estimates for 1926	Amounts recommended in the bill for 1924	Increase (+) or decrease (-), bill compared with 1925 appropriations	Increase (+) or decrease (-), bill compared with 1926 Budget estimates
Treasury Department.....	\$137,644,712.60	\$137,759,916.00	\$126,911,107.00	-\$10,733,605.50	-\$10,848,809.00
Post Office Department.....	613,645,195.25	637,376,005.00	636,269,415.00	+22,624,219.75	-1,106,590.00
Total.....	751,289,907.75	775,135,921.00	763,180,522.00	+11,890,614.25	-11,955,399.00

The amount recommended to be appropriated in this bill for the Treasury Department for the fiscal year 1926 is \$126,911,107. This sum compared with the 1925 appropriations and the 1926 Budget estimates shows the following differences:

It is \$10,848,809 less than the 1925 estimates, and it is \$10,733,605 less than the 1926 appropriations.

It is only fair to say here that while this shows an apparent reduction under the Budget, it is not a reduction in reality, for it has been the policy to carry in the bill now before us an item of \$12,000,000 for the refund of erroneously collected taxes. That sum has been eliminated. Our action is prompted by the fact that this amount is for the next fiscal year and is purely a formal amount which has been carried customarily in the past and does not represent in any degree the sum that will be required for all payments of this character. The com-

mittee felt that to carry it would be perhaps confusing and misleading. A supplemental estimate for \$50,000,000 is now before the committee for the payment of refunds. It will not be sufficient for the remainder of this year and a further appropriation in addition to that will be required. The committee prefers to carry all refund items in one bill and to make them as nearly current with the time of allowance as possible in order that better information and data as to the total amounts to be required may be obtained. The expenditures for 1923 for refunds aggregated approximately \$123,000,000 and for 1924 they were \$137,000,000. With expenditures on this basis the carrying of \$12,000,000 in this bill would be somewhat confusing to those who do not understand the situation.

I want to be frank with the House, and not make any claims of reductions that we are not entitled to make; there were

Some items in the estimates, as, for example, prohibition enforcement, where the recommendation was something like \$800,000 less than what we figured it should be and as we authorized it a year ago. We took this \$800,000 from the \$12,000,000 and added it to the enforcement item.

We also added \$155,000 to the amount recommended for repairs and preservation of public buildings. Then all over the country the expansion of the public business is such that more or less need existed for enlarged quarters—slightly enlarged—and we have heretofore annually carried an appropriation of about \$400,000 for this work, out of which could be expended not to exceed \$20,000 on any one building. We found that there was great need over the country for increased quarters that could be created under this limit of expenditure, and we added \$400,000 to that item in order that we might have the needed extensions of quarters which the business demands.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. I yield.

Mr. BLANTON. The gentleman said that the Budget estimate for the expense of prohibition enforcement was \$800,000 less than the amount that the gentleman knew it would cost. What conclusion did the gentleman reach on that fact?

Mr. MADDEN. We reached the conclusion that the amount ought to be supplied, and we supplied it.

Mr. BLANTON. But did the gentleman reach the inevitable conclusion that the Budget Bureau did not seem to be very strong on law enforcement if they would recommend \$800,000 less than what it would actually cost to enforce the law? What other inevitable conclusion could you reach?

Mr. MADDEN. I do not want to get into a controversy over it. I want to supply the need and enforce the law.

Mr. BLANTON. I am glad the chairman of the Committee on Appropriations is more in favor of law enforcement than seemingly the Budget Bureau is.

Mr. MADDEN. In connection with the refund of back taxes, it may be interesting to the House to know the situation relative to the payment of interest on these refunds when they are allowed. The 1924 revenue act allows interest on refunds from the date of the payment of the tax until the allowance of the refunds by the commissioner. That means six years interest at 6 per cent, or 36 per cent in 1917 cases and 30 per cent on 1918 cases. The payment of interest in connection with refunds amounted to \$7,000,000 last year under the old law, while under the new act it is estimated that the interest for the fiscal year 1925 will approximate \$50,000,000 to \$60,000,000.

Mr. WATKINS. The interest alone?

Mr. MADDEN. The interest alone, yes; because the interest under that act is now payable from the date the tax was paid and not from the date of the filing of the claim, as it was under the 1921 act.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. MADDEN. Yes.

Mr. CHINDBLOM. In this connection it might be well to show that the Government is paying back the same interest which the Government charges.

Mr. MADDEN. Well, I just want to call attention to the fact here. I am not criticizing it.

Now, again reverting to the prohibition and narcotic enforcement provisions of the bill.

The Budget proposed a reduction in the appropriation for enforcement of the prohibition and narcotic drugs act from \$11,341,770 for the fiscal year 1925 to \$10,216,880 for the fiscal year 1926. The committee recommends an appropriation of \$11,000,000 for the next fiscal year, which is \$341,770 less than the 1925 appropriations and \$783,120 more than the amount recommended in the Budget. The committee made an extensive examination of the needs of the Prohibition Unit and in the sum of \$11,000,000 has recommended an amount which, in its opinion, will fully and adequately provide for the organization of that service, both in prohibition and narcotic work, on the basis of the present authorized strength as to personnel and requisite traveling and other expenses.

The appropriation allowed will permit of the continuance of the present bureau organization of 749, which includes temporary personnel periodically employed, within the limit set of \$1,300,000. It will permit the continuance of the present field force of 3,137 persons and also provide for the salaries of the 44 additional agents not yet appointed, making a total field personnel of 3,181. In the opinion of the committee the appropriation of a smaller sum than \$11,000,000 will result in a proportionate decrease in the field force. Congress at the last session, through an increase in the appropriation for prohibition and narcotic enforcement, provided for 300 additional prohibition agents, 125 additional narcotic agents and inspectors, and 36 clerks for narcotic work, a total increase of 461 in the

authorized personnel. All of this new personnel, except 41, have been appointed and the remainder are being appointed from time to time.

The recruiting of this new force has taken practically six months. The appropriation of less than the amount recommended would undoubtedly compel the disbanding of a large part of it. From the evidence obtained there is no such decrease in work to be performed in the enforcement of the prohibition and narcotic acts as to justify at the present time a decrease in the organization. The force as at present authorized is as large as it ought to be and the amount in the bill is adequate to carry this organization, provide necessary traveling expenses, and cover the other expenses of operation.

The committee has recommended that not to exceed \$50,000 of the sum allowed be permitted to be expended for the dissemination of information and appeal for law observance and law enforcement through the use of posters and other modes of public appeal.

Mr. LINTHICUM. Will the gentleman yield?

Mr. MADDEN. Yes.

Mr. LINTHICUM. What was the appropriation for prohibition enforcement last year?

Mr. MADDEN. \$11,341,770.

Mr. LINTHICUM. How much is it this year?

Mr. MADDEN. \$11,000,000.

Mr. LINTHICUM. Was not a large part of the money appropriated in the last bill intended for the reconditioning of ships, and so on?

Mr. MADDEN. No; that was under the Coast Guard.

Mr. LINTHICUM. That was not included in the \$11,000,000?

Mr. MADDEN. No.

Mr. LINTHICUM. What was the total cost of the enforcement service last year, including the reconditioning of the ships, and so on?

Mr. MADDEN. Last year we authorized about \$13,000,000, if I recall correctly, for the construction of cabin cruisers, 225 cabin cruisers, about 100 picket boats, and we authorized the reconditioning of 20 destroyers, making a total of 345. They are at work now on the construction and reconditioning of these boats, but they will not have them in service until about the 1st of next July. This bill carries about \$9,000,000 for the pay of the officers and the men and the other equipment that may be required to operate the boats for the fiscal year 1926.

Mr. LINTHICUM. In addition to this \$11,000,000?

Mr. MADDEN. Yes.

Mr. LINTHICUM. Making a total of—

Mr. MADDEN. Over \$20,000,000.

Mr. COLE of Iowa. How much of this money is to be covered back into the Treasury in the form of fines?

Mr. MADDEN. I think the total of the fines collected amounted in the last year to over \$5,000,000.

Mr. WILLIAM E. HULL. That would mean a cost of \$15,000,000?

Mr. MADDEN. The amounts I have given are \$11,000,000 and \$9,000,000.

Mr. WILLIAM E. HULL. And the other appropriation?

Mr. MADDEN. That is another year. We are talking about the fiscal year 1926. There is \$11,000,000 in this bill for the land force and \$9,650,000 in this bill for the sea force, making \$20,650,000.

Mr. WILLIAM E. HULL. And then there must be included the amount for building the boats.

Mr. MADDEN. No; that was in another year.

Mr. LINTHICUM. The amount appropriated for the boats was \$13,000,000?

Mr. MADDEN. Yes.

Mr. WATKINS. In stating the amount of the fines, does the gentleman take into consideration the penalties?

Mr. MADDEN. Yes. Everything that has been collected and turned into the Treasury, I think, amounts to about \$5,000,000.

Mr. LINTHICUM. But that \$5,000,000 would not begin to pay the court expenses, and so on, in apprehending these people, so that you really get nothing back on that?

Mr. MADDEN. I do not apprehend that we are running the Government with the view of paying back into the Treasury exactly what we pay out. I presume the Government, when it enacts a law and undertakes to enforce it, is going to enforce it at any hazard or cost, regardless of whether it gets any revenue or not. [Applause.] I am a law-enforcement man.

Now, in the office of the Commissioner of Internal Revenue two positions of deputy commissioner are omitted on account

of reorganization of the work of the bureau and the salary appropriation is reduced \$10,000.

The general appropriation for salaries and expenses of collector, deputies, gaugers, storekeeper-gaugers, and other office and warehouse expenses is reduced in the sum of \$34,446 and provides for 34 less persons. A gradual reduction has taken place in this item due principally to the concentration of distilled spirits in a smaller number of warehouses and the reduction of the personnel required in connection with them. On July 1, 1922, the beginning of concentration, there were 26 general bonded warehouses, 20 special bonded warehouses, and 251 distillery bonded warehouses, a total of 297. Since that time five additional general bonded warehouses have been approved for use as concentration warehouses. During this process of concentration 15 special bonded warehouses, 15 general bonded warehouses, and 202 distillery bonded warehouses, a total of 232 bonded warehouses, have been discontinued, leaving 70 bonded warehouses, of which 28 are concentration warehouses.

The general appropriation for collecting and assessing internal revenue taxes is reduced from an aggregate of \$33,381,040 to \$31,750,000, a decrease of \$1,631,040. The total reduction in personnel is 480, of which 377 are from the departmental roll and 103 from the field service. The allotment for personal services in the District of Columbia is limited in the appropriation to \$10,750,000, which is approximately \$715,000 less than the allotment for this purpose for the current fiscal year. Of the decrease of \$1,631,040, the sum of \$115,000 is due to the transfer of the allotment for stationery from this appropriation to the general stationery appropriation for the Treasury Department, \$500,000 allotted during this fiscal year by law to the Board of Tax Appeals and estimated separately for 1926 for that organization, and the remainder of the reduction, \$1,016,040, is due to the decreases in force enumerated and reduction in other expenses resulting from better organization and a decrease in the work of the bureau. The Commissioner of Internal Revenue was of the opinion that we ought not now further reduce the force. There is still a vast amount of auditing of back schedules. On page 8 of the report will be found quite a complete statement of the number of cases pending.

For the Coast Guard we recommend \$20,597,835, which is the amount of the estimates. This sum is \$1,753,706 in excess of the appropriations for this service for the fiscal year 1925. Congress, at the last session, granted additional appropriations for the Coast Guard for the acquisition of more vessels for the prevention of smuggling in liquor and for additional officer and enlisted personnel for their operation.

The amounts appropriated in this bill provide for the next fiscal year for the operation of the regular complement of Coast Guard vessels and the additional fleet on the same basis as they have been provided for during the present fiscal year through the regular appropriation act and the deficiency act. The additional vessels for antismuggling work have not all been delivered and put into commission. They will all be delivered and ready for full operation during the next fiscal year. The difference of \$1,753,706 between the appropriations for 1925 and those for 1926 is due solely to the fact that all of the additional vessels will be in full operation for the next fiscal year while only a portion of them are in operation for varying portions of this fiscal year.

The amount for the Coast Guard is divided logically into two classes, as follows: For the regular activities, as contrasted to the antismuggling work, \$10,728,578, and for the antismuggling work, \$9,649,257.

Mr. LINTHICUM. Has the gentleman any idea how much less we are appropriating than what is recommended in the Budget? Last year, the gentleman will remember, we appropriated a great deal less than the Budget recommended.

Mr. MADDEN. This bill carries about \$11,000,000 less than was recommended.

Mr. LINTHICUM. As the gentleman knows, we hear about the Budget Bureau and we do not hear about the reductions that Congress makes in the recommendations of the Budget.

Mr. MADDEN. As I have said, this bill carries about \$11,000,000 less, the Agricultural bill carried about \$3,000,000 less, the Navy bill carried about a million less, the Interior bill about a million and a half less, and I think most of the bills will carry less than what is recommended by the Budget.

I would like to call your attention to some other matters in the bill.

Mr. KING. Would the gentleman yield before going into a discussion of them?

Mr. MADDEN. Yes, indeed. I think I know what the gentleman has in mind.

Mr. KING. I want to make an inquiry as to whether or not the appropriation for the recordation and classification of canceled coupons, which was cut out at the last session, was restored in this bill?

Mr. MADDEN. It was not, and I will tell the gentleman why it was not. First, it was not recommended by the Budget. Next, the committee had gone into the question very thoroughly last year, and with the Chief of the Public Debt Service and others in charge we reached the conclusion that there ought not to be as elaborate detail in connection with that work as there was carried on. Then, in order to be sure that we were not wrong about it, we had a study made of the question by the Bureau of Efficiency, and we were convinced on every phase of the question that we ought not to carry that work on in the way in which it had been carried on in the past. I know the gentleman has another object in mind. He wants to have it carried on because he wants to carry on his investigation, but it was not recommended to us.

Mr. KING. I desire to ask the gentleman a very frank question.

Mr. MADDEN. Yes, indeed.

Mr. KING. Considerable discussion has arisen over that matter in the special committee which the House appointed, and it is presenting to us a very difficult problem in the discovery of duplication of bonds. We now have to simply go to a big pile of bonds and 25,000 men working a year never could pick out those coupons without any recording arrangement, and, of course, the discussion touched upon the point as to who was responsible for cutting that out.

Mr. MADDEN. I am responsible.

Mr. KING. It was stated that the chairman of the Committee on Appropriations is the gentleman who cut it out.

Mr. MADDEN. Yes; I assume the responsibility. [Applause.]

Mr. WATKINS. Will the gentleman yield for another question?

Mr. MADDEN. Yes.

Mr. WATKINS. Did the gentleman exceed the recommendation of the Budget in any particular other than in the prohibition unit?

Mr. MADDEN. Yes. We have exceeded their recommendation whenever, in our judgment, within the range of the bill, we found any item that we did not think was adequately provided for. After a thorough investigation we supplied the amount needed, but we have always tried and have always succeeded in keeping within the recommendation as a whole. For example, in the Agricultural bill, while it was under consideration in our committee we discovered, for example, that they had not recommended for the eradication of tuberculosis in cattle enough money, in our judgment, to meet that situation, and we thought that was vital. That was true in a number of other instances. For example, on the question of white-pine blister rust, out in the gentleman's section of the country, we found they had not recommended appropriations that seemed necessary for that work, and we recommended to the House the amount of money we thought was necessary, and the House approved our action.

The CHAIRMAN. The gentleman from Illinois has consumed one hour.

Mr. MADDEN. Mr. Chairman, I yield myself 10 minutes further.

The CHAIRMAN. Without objection, the gentleman may proceed.

There was no objection.

Mr. SUMNERS of Texas. Will the gentleman yield for a question?

Mr. MADDEN. Yes.

Mr. SUMNERS of Texas. When the Committee on Appropriations comes to regard its duty with regard to the various items, does it make an independent investigation to determine the amount?

Mr. MADDEN. Always; yes.

Mr. SUMNERS of Texas. Then, of what service is the estimate of the Budget Bureau?

Mr. MADDEN. Of course, there is no human agency that is perfect. I think the gentleman will admit that. The gentleman has lived in Texas long enough to know that. [Laughter.] I would hesitate to trust a human agency that would not make a mistake once in a while.

Mr. SUMNERS of Texas. I do not want to press the matter, but does the gentleman investigate each time to see whether or not the Budget Bureau has made a mistake?

Mr. MADDEN. We investigate every item that comes before the committee and we investigate it very thoroughly. If

the gentleman will allow me to illustrate, for example, we have the Bureau of Engraving and Printing. We quite recently had a man who presided over that activity for a while. He was designated from the Army to act as the director. I went down there personally and looked over the activities in that bureau. Of course, that is not possible in connection with all these matters, because they are too far away; but it frequently happens that where they are close by, I go and examine them. I made an examination of the physical conditions in this bureau. I found they had organized a board of management with three assistant directors at \$5,200 a year each, with an application for a salary of \$10,000 for the director. We had always conducted that branch of the service with one director and one assistant. We later took hearings on their estimates. It took us part of two days to hear the witnesses on the matter. Of course, if we took two days on everything of that size in the Government we would never get through. In this bureau they were making claims about savings of over a million dollars that could be made. I was very anxious to have that saved. They testified about it, and in many cases when certain questions were asked, of course, the witness was not able to give a complete reply then to the question, and therefore in every such case I told them that we did not expect them to be able to carry all the details in their heads, and when we sent their evidence back to them for revision we would ask them to supply the missing links.

On the direct testimony they would make a very fine showing of economy that could be effected, but when they supplied the missing links, so to speak, they retracted many of the things they said on the direct testimony and hedged their statements to such an extent that we could not help but reach the conclusion that they could not do the things they said they could do when they testified directly. We expect to make further investigation and recommendation to the Secretary of the Treasury on that activity and perhaps help save some money instead of just talking about it.

Since this bureau has been mentioned, I will tell what we have done.

The amount recommended is \$7,271,530. This sum is \$1,325,855 more than the current appropriations and \$106,900 less than the estimates. The estimates called for 192,742,300 sheets of delivered currency, of which 14,000,000 sheets were for national-bank currency and 178,742,300 sheets for United States currency. The committee recommends a total of 190,242,300 sheets, composed of 14,000,000 for national-bank currency and 176,242,300 for United States currency, a reduction of 2,500,000 in the amount of United States currency. This deduction is due to the elimination of practically that number of sheets on account of the gold reserve and which in the opinion of the Treasury Department was the least important item in the money-printing program.

The appropriations for the bureau for the current fiscal year provide for 150,000,000 delivered sheets of United States and national-bank currency. The demands for new money through money coming in for redemption and increased demands, particularly for \$1 bills, has necessitated the printing by the bureau at a greater rate during the first few months of this fiscal year than the 150,000,000 sheets would provide. It will be necessary, if the present rate of production continues, to authorize for this fiscal year by way of deficiency appropriation additional sheets which will carry the total number of sheets for 1925 to a number at least equal if not in excess of the recommended program for 1926.

The Treasury Department is now operating without any reserve stock of currency, the production of the plant being used from day to day to fill current needs. A program is being prepared in the Treasury Department for building up a reserve stock of paper money which will permit the new notes to become properly aged and seasoned before being issued and provide a safety stock of money which can be issued as the needs arise.

Mr. SUMNERS of Texas. Can the gentleman tell the House what honest-to-goodness service the Budget Bureau renders the Appropriations Committee?

Mr. MADDEN. I will do so. I think the Budget is the greatest achievement accomplished by the Government since its foundation. Before the organization of the Budget system every bureau chief in the Government made his own estimates. Nobody revised them. He submitted those estimates to the head of his department. The department head was presumed to revise them but he usually did not do it. They were assembled for the department, and handed over to the Secretary of the Treasury, who had no power to revise them, but even if he had he was only one Cabinet officer, having equal rank with other Cabinet officers, and he would not dare to exercise supe-

rior authority. A statement of them went to the President of the United States or was supposed to go to him. He had the responsibility of recommending to Congress how they might be revised but had no authority to revise them. He never used this power, and so they came up here in a hodge-podge with innumerable things that ought not to be sent in at all.

When the Budget law was written—and I helped to write it as a member of the select committee—our idea was that we should place the responsibility for the financial activities of the Government somewhere. The question was where to place that responsibility. Should we place it on the Secretary of the Treasury? After serious consideration we decided no, that we must not do that because it would be very embarrassing for the Secretary of the Treasury to be called upon to reject the demands of his colleagues in the Cabinet, and so we placed that responsibility on the President of the United States and made him responsible for enforcement of the Budget act.

Now he is required to assemble all the facts upon which he is required to make an estimate of the activities in which he wants the Government to engage for each year and as nearly as he can estimate the cost of the activities in which he wants the Government to engage.

It is manifest that the President of the United States could not do that personally, and so we gave him an agency, called the Bureau of the Budget. The Bureau of the Budget is not a bureau as such of the Government, for it has no original jurisdiction. It does not speak as a bureau; it speaks as the President of the United States. It represents the President, and as such has the power to go into the bureaus of every department. It has the superior right of way into every department. It can call on anybody in any department for information. It can accept it or reject it, investigate it or not, but the presumption is that they do investigate.

I will tell you what happened as a result of all that: Now, instead of getting the Secretary of the Treasury to send up a conglomerate mass in the form of requests from bureau heads, it is all segregated and analyzed, systematized, and comes up in a systematic form.

Now, I want to say to the gentleman from Texas that these heads of departments who are subjected to the inquests are very much opposed to it. They are restricted in their right to expend public money. They have to think about it before they expend it; they have to squeeze a dollar to see if it is absolutely necessary before they expend it.

Here is what happens now: The chairman of the Appropriations Committee has perhaps a new duty that he never had before. They get turned down by the Budget, or perhaps they want to go to the Budget and they want to find out whether we are going to act on it or not. They come to the chairman of the Appropriations Committee and ask whether there is any possibility of getting favorable consideration for a problem that involves the expenditure of a lot of money if they can get a favorable recommendation from the Budget. Many times we turn them down and it saves millions of dollars to the Treasury. We never accept one of them unless it is an emergency case, such as we had the other day in regard to the poultry pest. We act on such things as that whenever the emergency arises. But if it is merely the desire of some head of a department, or a bureau chief, or a combination of both, to get their hands into the Treasury of the United States and to find out in advance whether they can get a recommendation from the Appropriations Committee in case they get a favorable report from the Budget, they usually find out that they can not do it.

Now, I want to say something about other important items in the bill.

The appropriations for the customs service are reduced from \$16,979,140 to \$16,656,200, a decrease of \$322,940. The amount recommended will provide for the same organization for the next fiscal year as during 1925, the decrease being brought about by a more systematic organization of the service and a more careful control of expenditures.

It is not anticipated that there will be any decrease in the volume of work to be transacted by the customs service during the coming fiscal year. The customs receipts for the first three months of the fiscal year 1925 aggregated approximately \$141,000,000, while receipts for the first three months of the previous fiscal year aggregated \$131,000,000, an increase in the first three months of this fiscal year of \$10,000,000 over the first three months of the previous fiscal year. The customs revenues for the fiscal year 1924 were \$545,000,000. For 1925 they are estimated at \$550,000,000, and for 1926 at \$535,000,000.

Under the Farm Loan Board an increase of \$55,000 is recommended to permit an increase in the number of reviewing appraisers from 4 to 12, at salaries of not to exceed \$5,000 each,

and \$15,000 additional is provided for traveling expenses. The purpose of providing for 12 reviewing appraisers is to have one for each land-bank district who will have supervision of all field appraisers operating in that district. The board is of the opinion that with a competent reviewing appraiser in each district better supervision of the appraisal work will result and will reduce the actual cost to the borrowers and the banks. The salaries of the appraisers as well as all other expenses of the Farm Loan Bureau will be paid from assessments levied upon the system.

Under the Public Health Service I desire particularly to call attention to the committee's action on two items.

The appropriation for the division of venereal diseases has been reduced from \$149,040, for the current year, to a recommended amount of \$50,000, a cut of \$99,040. The sum of \$50,000 is also a reduction below the Budget of \$48,396. The reduction in the amount for the current year is due in part to the elimination of \$25,000 for allotment to the States, and the remainder is a decrease in the amount for the activities of the bureau, both in the department and in the field. In the opinion of the committee the sum of \$50,000 should be adequate for the activities which the division should carry on.

The Budget proposed reductions of \$15,000 and \$10,000, respectively, in the funds for rural sanitation and the regulation of biologic products. These two sums the committee has restored to practically what they are for the current fiscal year, namely, \$75,000 and \$45,000.

Among the items under the jurisdiction of the Supervising Architect's Office the committee has recommended, as it has in previous years, a number of repair and alteration appropriations for specific public buildings for post office, marine hospital, and quarantine station purposes. Some additional amounts are also added to maintenance appropriations on account of the placing in commission during this year of a number of new buildings and the anticipated placing in commission during the next year of approximately 30 more.

One new appropriation item is recommended, and two items are increased above the Budget to which attention should be directed.

A new item of \$100,000 is recommended for the installation of lock-box equipment in public buildings. The amount recommended is based upon needs for such facilities submitted by the Post Office Department. The sum will provide for the purchase and installation of approximately 16,500 boxes of various sizes. Applications are pending for approximately 12,500 boxes, and the appropriation from which this service is supported is not sufficient to handle the demands for it. It was stated to the committee that the receipts from the rental of the boxes would pay for the installation in two years and that thereafter the receipts from rentals would represent a return of 48 per cent on the investment. In addition to the business feature of the proposal, there is the essential of providing adequate postal facilities to the public. It is also estimated by the Post Office Department that the installation of 12,500 boxes would greatly facilitate the delivery of mail which when the boxes are not available must be delivered through the general delivery window or by carrier. It is estimated by the Post Office Department that the saving in this respect would approximate \$90,000 per annum.

The committee recommends an appropriation of \$800,000 for remodeling or extending completed public buildings so as to provide or make available additional space in emergent cases, limiting the expenditure, as the current appropriation does, to not to exceed \$20,000 on any one building. The amount provided for this purpose for 1925 and the estimate for 1926 is \$400,000. The committee has increased this amount to the sum named. The appropriation heretofore granted has been insufficient to handle the number of cases submitted by the Post Office Department as requiring attention. As a general rule the number of approved cases pending has been more than the annual appropriation at the time it became available would care for. The rule of providing additional space has been on the basis of 60 square feet per employee, and the cost of extension has been slightly less than \$6 per square foot of additional space procured.

Applications now on file indicate the amount recommended will be used to exceedingly good advantage for the benefit of the postal facilities.

The amount recommended for repairs and preservation of public buildings is \$930,000. This sum is \$197,000 more than the appropriation for the current year and \$155,000 more than the Budget. The committee believes that this sum can be expended to good advantage in much-needed interior painting

and general repairs to public buildings throughout the country. The number of buildings falling under the distribution of the fund is approximately 1,250, and the condition of many of them can be considerably improved if the additional funds are available.

POST OFFICE DEPARTMENT

The estimates for the Post Office Department for the fiscal year 1926 as submitted in the Budget aggregate \$637,376,065.

The total appropriation for the department for the fiscal year 1925 amounted to \$613,645,195.25.

The amount recommended to be appropriated in the bill is \$636,269,415. This sum, compared with the appropriations for 1925 and the estimates for 1926, is as follows:

It is \$22,624,219.75 more than the 1925 appropriations and it is \$1,106,590 less than the amount requested in the Budget.

In connection with the increase of more than \$22,000,000 over the amount for the current year, it was stated to the committee that additional sums will be required for the fiscal year 1925 approximating \$9,000,000, which, if found necessary and allowed, would bring the total for 1925 to \$622,600,000, and the amount recommended for 1926 would therefore be \$13,600,000 more than the total appropriation needs of 1925 instead of \$22,600,000 as the appropriation situation now stands.

The increase shown for the next fiscal year is almost entirely in the items of clerk hire in first and second class offices, transportation of the mail, City Delivery Service, Railway Mail Service, fees to special-delivery messengers, and transportation of foreign mails. These increases are due largely to two factors—the increased volume of mail to be handled and the automatic promotions provided by law for postal employees.

The increases provide approximately 1,925 additional clerks at first and second class offices, 1,400 additional city letter carriers, and 600 additional clerks for the Railway Mail Service.

The appropriation for transportation of the mail by railroads and for mail messenger service is increased from \$104,450,000 to \$112,250,000, or by \$7,800,000. The current appropriation was based upon an anticipated increase in volume of mail to be transported of 6 per cent. The receipts so far this year show an increase of 7.53 per cent. An additional appropriation of approximately \$4,000,000 will be required for 1925 to care for the additional transportation cost. The increase granted is solely due to the increased volume of mail, and it is interesting to point out in this connection that even though the gross cost of carrying the mail is rapidly increasing, the cost for each million dollars of postage receipts is decreasing. Such cost in 1921 was \$212,555 for each million dollars of postage receipts and in 1924 it had been reduced to \$183,836. The reduction has been brought about by more intensive loading of storage cars, curtailment of railway post-office car space not regarded as necessary to the service, and careful supervision of mails moving on the railroads. On the same basis of cost per million dollars of postage revenue as prevailed in 1921 the cost of transporting the mails for the current fiscal year would be approximately \$15,000,000 more than the amount that will be expended for this purpose.

The committee recommends the sum of \$1,700,000 for the village-delivery service. This amount is \$200,000 in excess of the current appropriation and the Budget estimate. Applications pending for extension of this service are far in excess of the number that could be provided with the amount of the current appropriation. The committee is of the opinion that the additional amount granted will provide service of this character in many places which will be able to come up to the requirements necessary to obtain it.

The appropriation for the rural-delivery service carried in the current act is \$89,250,000, of which \$300,000 was made immediately available for the fiscal year 1924, leaving \$88,950,000 for the fiscal year 1925. The amount recommended by the committee is \$88,350,000. This recommended amount is \$600,000 less than the appropriation for 1925 and \$150,000 more than the estimate. It was stated by the Fourth Assistant Postmaster General that the addition of the \$150,000 which the committee recommends would give an appropriation sufficient to take care of the needs for additional routes for the next fiscal year.

The appropriation recommended for the Air Mail Service is \$2,600,000. The amount recommended for this purpose for the current fiscal year was in two items, \$1,500,000 for the service as theretofore operated and \$1,250,000 for the inauguration of night flying, aggregating \$2,750,000. The amount granted is \$150,000 less than the current appropriation. This reduction does not contemplate any reduction in the character or amount of service to be rendered, but is due to the elimination of sums

necessary for this fiscal year for certain facilities and equipment which will not need to be obtained during 1926.

The audited revenues of the Post Office Department for the fiscal year 1924 amounted to \$572,948,778.41, and the operating expenses were \$597,311,269.75, leaving a postal deficit of \$24,362,491.34.

The estimated revenues for the fiscal year 1925, based on reports from the 50 largest offices, indicate that the revenues for the current fiscal year will be approximately \$610,190,000.

The estimated expenditures for the fiscal year 1925 are \$620,320,931.15, leaving an estimated deficit of \$10,130,931.15.

For the fiscal year 1926 the amount recommended in the accompanying bill is \$636,269,415. The Post Office Department estimates that the revenues for 1926 will be 6.1 per cent greater than the revenues for 1925. If this increase in revenues is realized the revenues for 1926 will be approximately \$647,410,000, and the operation of the service, instead of a deficit, would show a surplus of about \$11,000,000.

Comparative statement showing the appropriations for the fiscal year 1926 (including amounts in regular annual, deficiency, and other acts), with the Budget estimates for the fiscal year 1926

	(1) 1925 appropriations in regular annual field classification, and deficiency acts	(2) 1925 permanent and indefinite appropriations	(3) Total 1925 appropriations	(4) 1926 estimates submitted for regular annual appropriation bills	(5) 1926 estimates of permanent and indefinite appropriations	(6) Total 1926 estimates submitted in the Budget	(7) Increase (+) or decrease (-) 1926 estimates compared with 1925 appropriations (column 6 compared with column 3)

Mr. BYRNS of Tennessee. Mr. Chairman and gentlemen of the committee, the distinguished chairman of the Committee on Appropriations, to whose service as chairman of the committee and also as a Member of this House we are always happy to give great credit, has, with his accustomed force, frankness, and fairness, set forth the details in a general way of these two bills now pending before you. He has also emphasized the fact that we have reached a point where it will be practically impossible to very materially decrease the future expenditures of the Government for its ordinary and peace-time activities unless there is a halt made in the creation of new activities and the imposition of new obligations upon the Government. I know that many propositions are put before Congress and that pressure is exerted from many sections of

the country in favor of increased activities on the part of the Government, and that many of them are most desirable; but we have reached a situation where we must either deny them or put the Government in a position where it can not further reduce its expenditures to any material degree.

I shall discuss that subject in a general way, or in an indirect way, by a reference to figures submitted to the President by way of estimates for the appropriations for 1926.

It has been truly said that tax reduction, which necessarily involves a reduction of expenditures, is the Government's greatest unsolved problem. The President of the United States made economy the keynote of his annual message to Congress. It met a hearty response throughout the country, and the people are confidently looking to the President and to

Congress to bring about the reduction in expenditures and taxes which has been promised them. As the President pointed out, business and agriculture are laboring under the heavy burden of taxation which has been imposed upon them. It is quite true, as the President says, that a very great part of this burden is due to State and local taxation, but that will not absolve the national administration from doing everything it can to reduce the national burden of taxes.

It is quite true that there has been a considerable reduction in appropriations and expenditures during the years immediately following the war. But that was to be expected. When the war closed the Government had contracts and obligations created during and because of the war which it was necessary to carry out; certain war agencies had to be brought to a close and wound up; interest on the public debt was nearly \$200,000,000 per annum more than it is to-day. And as these expenditures were reduced during the years that followed the war appropriations were reduced. It is clear that no political party or administration is entitled to claim any credit for reductions of this kind. The only reductions which will give hope of permanent relief to the people and for which the administration can claim credit are reductions in the ordinary peace-time operations of the Government.

With the purpose only of keeping the record straight I think it well to inquire very briefly as to whether there have been any material reductions of this kind. I do not for one moment question the sincerity of the President in his effort to reduce governmental expenditures, or his very earnest wish for economy. I certainly give every credit to the able and splendid Director of the Budget, who is rendering great service to the people of the United States. I have the greatest admiration for him as a man and as an officer of the Government.

But it is a fact that on account of the reductions which should and would have come in ordinary course, confusion has arisen and the idea exists that there have been greater reductions in the cost of the ordinary business operations of the Government than the facts really show. The President in his very timely message to Congress declared:

Anybody can reduce taxes, but it is not so easy to stand in the gap and resist the passage of increasing appropriation bills which will make tax reduction impossible. It will be very easy to measure the strength of the attachment to reduce taxation by the power with which increased appropriations are resisted. If at the close of the present session the Congress has kept within the Budget which I propose to present, it will then be possible to have a moderate amount of tax reduction and all the tax reforms that the Congress may wish for during the next fiscal year.

I feel very sure that the President will apply this measure to himself as well as to the Members of the Congress who appropriate the money which he, as the head of the Government, expends.

Now, let us examine in what must be a very general way, the figures submitted, in order to see whether or not the administration is entirely justified in all of its claims for pressure exerted and economy effected.

The total amount of the preliminary estimates for the fiscal year 1926, exclusive of the Postal Service, which it is estimated will cost \$637,376,005, is \$3,092,143,841.48.

The original appropriations for 1925 were \$2,973,000,189.94, but later on Congress made supplemental appropriations at the request of the President amounting to \$202,091,393.01, which in all fairness should be added to the original appropriation. The total appropriations for 1925, therefore, up to this time amount to \$3,175,100,582.95, or \$82,956,740.47 more than the original estimates for 1926. But in this connection it must be said that there will be future supplemental estimates and appropriations for 1926. I have in mind now more than \$100,000,000 which, according to estimates, must be appropriated later on for road construction and tax refunds alone. The question of real reduction and economy can only be correctly determined by comparison with appropriations and expenditures of the previous year. An analysis of the figures shows that there has been no material reduction in the ordinary peace-time obligations of the Government. There may have been reductions in some of the expenses but others have been increased and new ones added until the peace-time obligations of the Government have been actually increased.

Why are the estimates for 1926 over \$82,000,000 less than was appropriated for 1925? The answer is that we are constantly paying off the public debt and therefore the amount of interest on the public debt will be \$35,000,000 less in 1926 than in 1925. The Civil War pension roll is constantly decreasing due to the death of the old soldiers and, therefore, \$25,500,000 less will be required for this purpose for 1926 than for 1925. These two items alone aggregate \$60,500,000. But that is not

all. Congress passed the so-called bonus or adjusted compensation act last year. A certificate or sinking fund was provided to which certain payments should be made every year in order that the compensation certificates can be paid at their maturity without unduly increasing the appropriations at that time or disturbing the financial operations of the Government. The first appropriation made for this purpose was for 1925 and amounted to \$135,892,898, which is a part of the supplemental appropriation for 1925. According to the Government actuary the appropriation under this law for 1926 should be \$155,727,372 in order to carry out the intent of Congress when the act was passed and to comply with the representations made at that time. I present the following table submitted by the Government actuary last year showing just what amount should be appropriated during each year of the life of these certificates in order to provide a fund to take care of them at maturity:

Estimate of yearly cost of adjusted compensation, by fiscal years, under provision of H. R. 7959

Year	Admin- stration	Ten quarterly payments (Sec. VI)	Cash payments	Adjusted service certificate	Total
1925	\$1,188,500	\$18,451,274	\$8,178,124	\$119,510,775	\$147,334,673
1926	350,000	36,902,544		118,474,828	155,727,372
1927	175,000	36,902,544		117,428,577	154,506,121
1928				116,378,061	116,378,061
1929				115,320,301	115,320,301
1930				114,255,433	114,255,433
1931				113,180,518	113,180,518
1932				112,095,569	112,095,569
1933				110,997,706	110,997,706
1934				109,886,840	109,886,840
1935				108,760,261	108,760,261
1936				107,616,448	107,616,448
1937				106,451,070	106,451,070
1938				105,262,757	105,262,757
1939				104,045,709	104,045,709
1940				102,797,160	102,797,160
1941				101,511,271	101,511,271
1942				100,180,864	100,180,864
1943				98,800,271	98,800,271
1944				97,363,617	97,363,617
Total	1,713,500	92,256,362	8,178,124	2,180,324,056	2,282,472,042

The estimates for 1926 call for only \$62,000,000, or \$93,727,372 less than the actuary declared should be appropriated and \$73,892,898 less than was appropriated for 1925. It is evident that this sum will have to be appropriated some time during the next 20 years, the life time of the certificates, and the failure to appropriate it at this time constitutes no saving, but only serves to make a showing of a reduction. I know it is said by way of explanation that this reduction was made because only about half of the ex-service men had applied at the time the estimate was submitted for the bonus certificates, and if no more should apply, then the sum should be sufficient. But the ex-service men have three more years to make application, and it is a violent presumption to say that all or nearly all will not actually apply. If not, then the theory and object of those who favored the law was clearly wrong. Certainly good business would have required that the whole amount of the actuary's figures should have been appropriated, and the failure to ask for the amount indicated by the actuary will cost the Treasury more money in the long run. I suspect this would have been asked had it not been for the fact that by so doing the estimates for 1926 would have been over \$10,000,000 more than the appropriations for 1925.

The following table shows the larger items which go to make up the reduction in estimates for 1926:

Interest on public debt	\$35,000,000
Civil War pensions	25,500,000
Bonus or adjusted compensation	73,892,898
Vocational rehabilitation	51,000,000
Medical and hospital treatment	7,000,000
Emergency ship fund	6,000,000
Total	198,392,898

As I have already explained, the reductions in these amounts can not justly be claimed as being due to the exercise of closer economy, and if it had been necessary to appropriate for these purposes the same amount as was required in 1925, then the estimates for 1926 would have been nearly \$200,000,000 more than the 1925 appropriations. And bear in mind that additional or supplemental appropriations will be required for 1926.

Now, let us glance for a moment at the estimated expenditures for 1925 and 1926. The total estimated expenditures, including Postal Service, for 1925, are: \$4,144,273,808, and for 1926, \$3,904,927,383. The total estimated expenditures, exclusive of Postal Service, for 1925 amount to \$3,534,083,808,

and for 1926, \$3,267,551,378. This shows a difference of \$266,532,430.

The larger items which go to make up this reduction are as follows:

Interest on public debt	\$35,000,000
Adjusted compensation	73,892,898
Tax refunds	35,000,000
War Finance	10,000,000
Railroad Administration	12,000,000
Emergency Fleet	15,500,000
Ship-construction loan fund	9,500,000
Pensions	18,000,000
Road construction	6,000,000
Veterans' Bureau	24,500,000
War Department	22,000,000
Navy	8,000,000
Loans to railroads	6,000,000
Total	275,392,898

These reductions amount to more than the reduction in expenditures in 1926 over 1925, and a mere inspection will convince anyone that they afford no just reason for a claim of greater economy. I have already explained how the reduction in the expenditures for adjusted compensation was brought about.

The President in his message comments on the reduction in the estimates of \$29,000,000 for the national defense and claims that there will be a surplus at the close of the present fiscal year of \$67,000,000, but in making this claim of surplus the President must have overlooked for the moment the fact that it will be necessary to appropriate at this session more than \$80,000,000 to carry out the shipbuilding program for the Navy, which has been approved by the President. The gentleman from South Carolina [Mr. BYRNES] in a very excellent speech on the naval appropriation bill while it was under consideration in the House the other day very clearly pointed out this fact. He stated that estimates were now pending before the President and which he will shortly submit to Congress of \$20,000,000 for airplane carriers; \$5,250,000 for airplanes for these carriers; \$46,000,000 to begin the construction of the gunboats and cruisers recently authorized; and \$9,180,000 for the modernization of battleships, or a total of over \$80,000,000 yet to be appropriated for 1925. If these figures of the gentleman are correct—and no one has denied them—and if the President's other figures and estimates are correct, we thus see the claim of a surplus of \$67,000,000 on June 30, 1925, and increased tax reduction to that amount fade into a deficit of \$13,000,000 unless some of these expenditures are carried over into 1926, which the gentleman declares can not and should not be done if the act of Congress which was approved by the President is properly carried out.

It is not my purpose to discuss any of the provisions of the pending bill at this time. The distinguished chairman of the Appropriations Committee, to whose faithful and splendid service in the effort to hold down appropriations and to whose fairness I am always happy to bear testimony, has told you that the amount recommended for the Post Office Department amounts to \$636,269,415, which is \$1,106,590 less than the estimates and \$22,624,219.75 more than the appropriation for 1925, due, it should be stated, to the natural growth and increase of the postal business.

The amount recommended for the Treasury Department, exclusive of permanent appropriations, is \$126,911,107. This is \$10,848,809 less than the estimates and \$10,738,605 less than the appropriations for 1925. It is proper to say that this reduction was made possible solely by the elimination of an item of \$12,000,000 for tax refunds which was estimated for and appropriated for 1925. This particular appropriation has been deferred for a deficiency bill and will be made at a later date, and when made will be chargeable to the 1926 appropriation. I make no particular criticism of this omission, but I think it should be made clear, as the chairman, with his usual fairness, has done in the report, that this amount will have to be appropriated later on and therefore constitutes no real reduction.

Mr. Chairman, the reduction of appropriations and expenditures is not a partisan matter and should not be dealt with from a partisan standpoint. It affects every man, woman, and child in every section of the country, for high taxes are always reflected in the high cost of living. It is easy to juggle figures and make claims of economy, but, after all, real and genuine economy will be finally tested by the extent to which the masses, not the favored few, are relieved of their taxes without impairing the power of the Government to meet its proper and just obligations and to retire its public debt as originally contemplated. I repeat, the immediate test of whether or not there has been economy in public expenditures is a comparison of appropriations and expenditures with those of the previous year. The mere fact that appropriations are reduced does not

of itself indicate that economy is being practiced, for the reduction may come about by the natural result of either the completion or cessation of certain public activities or it may result from deferring obligations to a later date. I submit that a fair, unbiased examination of the figures will show that both of these elements have proved important factors in the reductions which have been made during recent years. New activities and new obligations have been very freely created during the past few years, and until there is a halt in this respect little can be expected in the way of a real reduction in the cost of the everyday business operations of the Government. [Applause.]

Mr. VARE. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. MAGEE].

Mr. MAGEE of New York. Mr. Chairman, I want to say a word in behalf of H. R. 10406, a bill introduced on December 6, 1924, by Mr. ELLIOTT, of Indiana, and providing for a public building program. We have not had a public buildings bill since March 4, 1913. The need of new Federal buildings in many places in the country is extremely urgent. Employees are working under insanitary and intolerable conditions, which are discreditable to the Government.

I call your attention again to a typical illustration in my home city of Syracuse. The first step was taken in June, 1906. In 1910-11 the Government acquired a site, paying \$325,000 therefor. The act of March 4, 1913, authorized an appropriation of \$550,000, which now is utterly insufficient for the construction of a suitable building. In 1916 the Government razed all the buildings on the site, covering a whole block within a stone's throw of the center of the city, except a garage. The buildings torn down were substantial buildings that yielded substantial revenue. Since 1916 there has been no material revenue to city, State, or Government.

This whole block has continued to be a hole in the ground in the heart of the city for some eight years. The situation has been somewhat aggravated during the past year from the fact that owing to abandonment of the Erie Canal, which extended along and adjacent to the southern boundary of the block, the city has removed the bridges connecting North and South Clinton and North and South Salina Streets, filled up the bed of the canal between such streets, and paved with asphalt Clinton Square. This square is just east of the Government's hole in the ground and upon which stands the Soldiers' and Sailors' Monument erected by the county of Onondaga.

An employee to work under sanitary conditions should have 100 square feet of floor space. In the Federal building at Syracuse, in the workroom proper on the first floor, the average for the entire force is 33 square feet per employee. The Government for additional facilities in Syracuse pays in rentals approximately \$45,000 per year. If a private concern ran its business as the Government has been running the public building business, it would soon go into bankruptcy. It does not seem possible that reasonable men would permit such an intolerable condition to exist for any material length of time.

I understand that the Government now pays approximately \$25,000,000 per year in rentals. I further understand that expiring leases can be renewed only at materially enhanced rentals. It is apparent that unless something is done governmental rentals will soon exceed \$35,000,000 annually. The Government needs some new public buildings in the District of Columbia, but this need is no greater than the need for public buildings in many places outside of the District. [Applause.] An argument for public buildings in the District and excluding the rest of the country is, in my judgment, indefensible from any viewpoint. [Applause.] I do not believe that a bill providing for the construction of public buildings solely in the District, or a bill that is ordinarily known as a "pork barrel" bill affecting the whole country, has any chance of passing in the House. My notion is that we can pass only a bill providing for a public building program on a sound business basis. Can anyone say that it is not a good proposition for the Government to expend annually in the construction of necessary public buildings on sites now owned or hereafter acquired an amount not in excess of what the Government pays annually in rentals? Particularly in view of the fact that the rentals are constantly and materially increasing.

I again call to your attention that Secretary Mellon in his report for the fiscal year ended June 30, 1923, made this statement:

The last decade has witnessed a substantial gain in the population of the United States and a remarkable increase in the volume of public business. Prior to 1913 Congress had made provision from time to time for public buildings to meet the growing needs of the public serv-

ice. Since 1913 there has been no legislation to provide increased space in overcrowded public buildings or for additional public buildings in communities where the needs of the service and sound business principles called for housing the governmental activities in Government-owned buildings. A serious condition of congestion exists in the Federal buildings in the more important cities throughout the United States, and the Government is paying for space to accommodate the public business approximately \$20,000,000 annually. This figure is mounting steadily.

The enactment into law of the Elliott bill will relieve the Congress of all responsibility for alleged neglect to construct in the District of Columbia necessary buildings for the preservation of governmental records and for other governmental purposes. It seems to me that the most urgent need in the District is the construction of an additional building for use of the Treasury Department. This bill, if passed, would permit this construction to begin promptly.

Practically the only objection I have heard to this bill is that it might be conducive to "logrolling" and result in some favoritism. I do not share this apprehension. The bill promises a great reform through the elimination of the "pork barrel" and the construction of public buildings within the provisions of the Budget system. The recommendations of the Secretary of the Treasury, as I understand the bill, would be submitted through the Speaker to the Committee on Appropriations of the House. This great committee, comprised of 35 Members, is fairly representative of the whole country. Besides, its recommendations in the premises would be subject to the final action of the House and of the Senate. I feel that the Committees on Appropriations of the House and of the Senate merit the confidence of the Members of the Congress and can be trusted to act fairly and equitably in cleaning up the public-building mess that now faces us.

If the great reform proposed in this bill shall be carried to completion, the result will soon be the saving of millions of dollars annually to the taxpayers of the country. The annual expenditure, instead of being a material burden to the Government, will prove to be a most profitable investment. I think that the public expects the Congress to do business along business lines and to meet pressing and imperative public needs in a reasonable and businesslike way. We can render no more efficient public service than to meet the existing acute and pressing situation by promptly enacting into law the Elliott bill, providing for a public-building program extending over a period of six years within the provisions of the Budget system and not requiring a maximum annual appropriation in excess of the annual rentals now paid by the Government. [Applause.]

Mr. BYRNS of Tennessee. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. STENGLE].

Mr. STENGLE. Mr. Chairman, I realize that in a few short weeks I shall be known as an ex-Member of this House. While I may appear to be somewhat premature in making reference to that fact at this time, I take this occasion to pay my respects to the comrades, my colleagues with whom I have associated during the past two years. My career in life has been of such a character that it has fallen to my lot to associate with many classes of people. Beginning early in life as a clergyman, passing from that calling into that of a newspaper editor and then as civil service director of the greatest city in the country and from there here, it has been my opportunity to rub elbows with all classes and kinds of manhood to be found in this country, and I say here in this presence that in all my travels, in the mixture of social intercourse, business relations, or professional associations, I have yet to find a body of men who are leading cleaner lives, who are more loyal to the Government or truer to their duties than those found among my associates in this body. I want you all to know as I pass out, of my own volition, from among you, that I take with me the very highest regard for my colleagues, and I shall go from this presence a better citizen and a more loyal American because of this association than I would have been had I remained on the outside.

But, Mr. Chairman, I did not seek this opportunity to deliver a eulogy over my colleagues nor to say farewell to my associates, but rather to bring to the attention of this loyal and faithful body of public servants conditions which surround another body of employees of the Government who are just as loyal, just as true, just as faithful as we ever dared to be, and I refer to the members of the Postal Service of the United States. I believe that I am as well qualified to discuss the life and work of the Postal Service employees as the average man in this House. Away back in 1905, as a newspaper editor, I was brought face to face with the deplorable conditions surrounding the lives and activities of our postal employees. It was then that I registered a vow and took upon myself the

opportunity to proceed from city to city, not as a paid propagandist, but as a volunteer, looking to the interest and welfare of the servants of our Government, to the end that there might be some provision made for the care and upkeep of the old and worn-out faithful servants of the Government, and I am proud to say that I have lived long enough to find that Congress has provided in a way a means by which the old letter carrier, the old post-office clerk, and other employees of the Government may retire from their labors before death shall take them hence. While we have opened that avenue of hope, while we have done something to alleviate to a limited extent the sufferings of old age, we have not yet gone far enough in providing for their care and upkeep, and I am hoping that before I step out of this House and into the shades of private life again it may be my opportunity to cast with you a vote which will widen the opportunity for providing for the superannuated in our national service.

Surely there can be none of us to object very seriously to that, because every dollar that is to provide for the increase of hopefulness, the foundation of financial support, is to be drawn from a fund which has been produced by the sweat of their own brows and saved by the Government into a great common fund to provide for pensions for their old age, and that fund now reaches the sum of more than \$40,000,000. Last year, after having before made some provision for the superannuated among us, Congress saw fit in its good judgment and in its wisdom to decide that those who are yet actively engaged in the Postal Service should have a compensation commensurate with the demands that are being daily made upon them.

And I rejoice that I sat with you last year and heard the roll call and found there were very few recorded as in opposition to giving a square deal to these faithful public servants, and if I remember aright when the final vote was taken in this House there were less than half a dozen out of the 435 Members who recorded their vote in opposition, and in the other body at the other end of the Capitol only three recorded themselves as opposed to giving an honest, decent livelihood to faithful public servants who carry the mail and look after that service. I thought then this was the end of an activity, that this was the final step that would bring joy and happiness into more than 300,000 homes. I have no desire to criticize our beloved President. Somehow or other in his wise judgment he found it incumbent upon himself to veto that good measure. I do not know what the final result will be, whether there is going to be much difference between one's feelings in May and in December or not, but I look with anxiety to the west end of this building and hope that there may be some way found, that there may be something done that will help relieve their suffering, that will render it unnecessary in the future for faithful public servants who rise early in the morning and swing the load of mail upon their backs long, long before some of us think of rising from our warm beds, dash out into the winter's blast or through summer's terrific heat, and do that which is the key to the opening hours of the day, either in industry or in society, to again be compelled to appeal for help.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BYRNS of South Carolina. I yield the gentleman five additional minutes.

Mr. STENGLE. I say I hope that there can be some way found to provide a better living for these faithful public servants. I know somebody has said that in some of our smaller hamlets where you will find an occasional letter carrier the present compensation ought to be sufficient.

Mr. HUDSPETH. Will the gentleman yield?

Mr. STENGLE. I will.

Mr. HUDSPETH. Does not the gentleman think that on the 6th of next month some relief may be found in another body if a certain vote is cast in a certain direction?

Mr. STENGLE. I do, and I am hoping it will be cast right.

Mr. HUDSPETH. I am in favor of paying an additional salary.

Mr. STENGLE. I want to go further and say to my colleagues that when the final roll is called I trust that this Congress will see that an act of justice is done at our hands. There are to-day, my colleagues, in the city of New York men who are laboring in behalf of the Government as public servants, and at 5 o'clock in the evening they discard the uniform of public service and don the uniform of private cap service, and are driving taxicabs until the midnight hour in order to accumulate enough food and clothing to feed their families. They should get more pay. I urge justice for them, and I appeal to you in behalf of the wives and children of these faithful servants.

I believe in economy just as much as does the man in the White House, but even so-called economy is sometimes merely

a public waste. If I were to starve my horse in order to save the cost of feed, I might be saving corn or oats but I would be losing a valuable animal and suffer a loss much greater than any gain which might have come to me in grain; if I decided to give but scant feed to the pig in my sty in order to economize on the cost of upkeep, I would be hopelessly short of pork when killing time arrived; if I starved my family in order to pile up a bank account, I would most likely be brought face to face with a great deficit when the undertaker's bill was presented. You and I would doubtless call all of these the results of a "penny-wise and pound-foolish" policy, but not one of these acts on our part would be more foolish than to starve faithful public servants who are giving the very best that is in them for the public good. Surely the Good Book revealed the truth when it announced that "the laborer is worthy of his hire." Knowing my colleagues as well as I do, I have no fear as to what your decision will be when the opportunity is given us to decide whether the President's veto shall stand or not.

Mr. Chairman, lest we forget, I submit herewith as a part of my remarks a number of editorials from leading newspapers, all of which declared last year that we were serving justice best when we served the postal servants best. Surely, if it was right to pay decent wages a year ago, nothing has occurred since which would lead an honest man to change his mind.

[From the Chicago Tribune]

It is a fact generally admitted by the higher authorities in the Postal Service, reiterated by employees in the service, and emphasized in the daily experience of persons using the service, that a lack of sufficient high-grade help in the Post Office Department is a growing handicap. This lack of help is attributable almost entirely to one thing—insufficient pay. Capable men are not being attracted to the service as they were some years ago. Much of the work is being put upon the shoulders of temporary workers, untrained workers, substitutes, and other inefficient men. The necessary result is a deterioration of service.

Such a deterioration is a serious handicap to innumerable lines of business. Delay in delivery of letters, parcels, or other items of mail frequently may mean loss of contracts, business misunderstandings, and other damaging effects. The situation ought to be corrected in the general course of business stimulation and prosperity.

It can be corrected to a large extent by the simple process of passing the Kelly bill (H. R. 4123), which is now before Congress. It is nothing more than justice to the loyal post-office workers who were denied such a raise four years ago on the ground that living expenses were coming down.

[From the Indianapolis News]

The increases are the same as those asked for in 1920. It was believed then that the cost of living would soon decline. For more than three years the employees have been receiving pay that was then admitted to be inadequate. Even now the men do not ask that the increases shall be fixed on the basis of present price levels—and they are the only workers who have not insisted on this—but allowance is made for a reasonable reduction in prices.

In common with postal employees all over the country, Indianapolis postal employees believe that the Government should increase their pay. They have demonstrated to the satisfaction of the public that they are underpaid. This situation is bound to affect their work in spite of their sense of duty. A strong appeal is being made to the present Congress for a pay increase. While it is pledged to economy, it is not pledged to continued underpayment of postal employees.

[From The Springfield News]

It ought not to be necessary for citizens to urge their Representatives in Congress to do their utmost to secure the passage of the so-called Kelly bill, which seeks to bring about a more equitable compensation for postal workers. The situation at present is so manifestly unjust to the postal workers that our Representatives in Congress should be able to see through it at a glance without being prodded.

The Government expects much and gets it from the postal workers. But it is niggardly to the point of absolute stinginess in return. The postal workers are a most conscientious and efficient body of men. They are miserably underpaid. Their salaries have not advanced at all in comparison with the increased costs of living. The Kelly bill is designed to secure nothing more for them than fair and just treatment. The Members of Congress who will take the trouble to merely look over the salary provisions for these men will act promptly if they have any conception of what is required of this branch of the public service.

[From the Springfield Republican]

In the main, the Federal Government has proved needlessly and even stupidly stubborn in adjusting the remuneration of its serv-

ants to advanced living costs. The increases granted by Congress have fallen far short of overtaking the depreciated purchasing power of the dollar. The Federal Government, therefore, which should constantly be attracting into its various branches competent clerical, technical, legal, and administrative talent, has undergone the humiliation of seeing some of its essential services needlessly weakened.

The increase in efficiency, measured not by excellence of result but by the amount of labor performed per man, has probably in the past 15 years exceeded that of any other organization, publicly or privately conducted. The post-office workers realize that the country demands lower taxes, but they believe that an exceedingly small readjustment of parcel-post rates would not only make the department self-sustaining but provide for higher salaries.

[From the Springfield Union]

Is there anywhere in any other branch of the public service or in private employment, where a similar degree of intelligence is required, where the responsibility is as great, the work as important, and the labor as arduous, another example of such inadequate compensation and such failure to recognize and reward faithfulness, efficiency, and devotion to duty as in the Postal Service?

It is a shame and a disgrace upon the Government that these faithful, conscientious, and hard-working public servants, in one of the most important branches of the public service, should receive such shabby treatment. Here is a situation which should command the sympathy of every Congressman and enlist his prompt aid in the correction of a manifest injustice. And it must be done soon if the entire Postal Service is not to be disorganized and disrupted.

[From the Boston Herald]

We hope the Representatives and Senators from New England will exert all possible energy in trying to obtain for railway mail clerks, letter carriers, and most, if not all, other postal employees a substantial increase in compensation. It is now altogether too low. It is out of keeping with other services, both in public and private life. Postal employees are without the weapons, through the strike and other forms of concerted action, for obtaining advantages which other large groups of the world's workers enjoy. On that account it is all the more incumbent upon the public, acting through its Federal Government, to treat these efficient representatives of the public welfare decently and generously. Now it is doing neither.

[From the Providence News]

The callousness of Senators and Representatives is astonishing. They know that the pay of the postal men can not in any way meet the rise in the cost of living. They concede that there ought to be a revision that will take care of the railway postal clerks and all others, but they do nothing. The employees, especially those who are married or have dependents, feel that pinch of this economic problem every day of their lives and they also recognize keenly the injustice of which they are the victims. The people of every State ought to demand that proper compensation be provided, in a special bill if necessary, and in Rhode Island they ought to write to their Members of Congress asking that a direct step be taken to adjust the pay of the employees. Every postponement of action is national dishonor. It means that women and children are deprived of necessities of life and that the men who do the work in the service have to retrench at every point to keep out of debt. The adjustment salary bill for the employees ought to precede any action on the bonus, and, in fact, lead all legislation at the National Capital.

[From the Portland (Me.) Press-Herald]

The claim of the clerks and carriers for more pay is based on justice; and consideration has been earned by good service at prevailing low pay. These people had no share in the higher, even prodigal, compensation that was paid during the war. Their burdens were heavier, their work more exacting; they worked on, serving the public that demanded so much from them, and their pay was not increased. The public demand on their service is growing each year. The public expects its mail to be handled with promptness and free from mistakes. It has been getting a very great deal of good service from its clerks and carriers; and has given them scant consideration and poor pay. The public wants good service and is willing to pay decent salaries for it.

[From the Bridgeport (Conn.) Post]

There is no question that the postal employees are underpaid, and that, in fairness to the Nation as well as to the postal workers, salaries must be raised. The service has been patient too long. It is fully justified in its request for higher pay.

[From the Atlanta Journal]

The demand for legislation on this subject is by no means confined to the postal employees; the press of the country in general seems to have been aroused over postal conditions. Many of the leading journals are moving in support of Congressman Kelly's bill, which goes to the heart of the evils that afflict the service, wrecked by war, and that most incompetent of postal officials, the late Postmaster General Burleson.

The question, "Why don't these people go at something else if they can't live on their salaries?" is often met with. No intelligent man ever asks it. The capital of most postal employees is their specialized education obtained by years of service, and which would be sacrificed by a change of occupation. That the postal employees have been faithful is conclusively shown in the latest published summaries. The revenues of the Post Office Department for the fiscal year ending June 30, 1913, were \$206,619,525.65, while on June 30, 1923, they were \$532,828,000. While the revenues of the department have increased 100 per cent, the volume and bulk of mails have more than doubled during that same period, according to the official reports of the Post Office Department. Yet with this great increase in volume of mails and revenues, the number of railway postal clerks is practically the same to-day as during 1913 and 1914. The total number of railway postal clerks has not increased since 1914, while the number of road clerks has actually been reduced by 2,401 during that period, indicating beyond any doubt that the earning power of railway postal clerks has shown a great increase over 1913.

[From the Greensboro (N. C.) Daily News]

All branches of the service are manned by men who average high in industry, intelligence, and efficiency. They are the employees of a Government notoriously extravagant. Without a sensible burden on the public, postal revenues could be increased at any time sufficiently to provide the most generous scale of pay. The men in every department are compelled to work for a bare living wage; by all standards they are underpaid and have been for a decade.

If Congress elects to be consistent, which it does not always do, the increase will be granted as asked; for when, four years ago, they first asked for this relief they were given a small increase and assured that the cost of living would soon decrease. Statistics of the Federal Bureau of Labor show that the average cost of living during September, 1923, was 72 per cent higher for the country than the average in 1913. Food was 49.3 per cent higher; clothing, 76.5 per cent higher; housing, 64.4 per cent higher; fuel and light (excluding electricity) was 81.3 per cent higher. The average loss to each clerk who has been in the service since 1913 thus figures out about \$5,000.

Considering the history of the past decade of their service, the people of the United States, through their Congress, might well treat the postal employees generously at this time to make amends. They do not, however, ask for generosity; they merely ask for simple justice.

[From the Richmond (Va.) News-Leader]

The Kelly bill for the relief of the men in the Railway Mail Service is an unescapable test of congressional justice. The Railway Mail Service affords, perhaps, the country's most striking example of increased productivity at a time when the ignorant have been giving ear to the ruinous doctrine of restricted output. During the last 10 years the bulk and volume of mail have doubled, as have postal receipts. This has meant increasing demands on the Railway Mail Service. More mail had to be handled. Greater speed was required. Yet, for all the increase in load they have carried, the Railway Mail Service has fewer road clerks by 2,401 than in 1914. While some of the reduction in personnel can be attributed to changes in the operating system, most of it must be credited to the skill of the Railway Mail Service and the willingness of the clerks to do more work in less time. Is Congress to reward this spirit on the part of the employees long renowned for loyalty and efficiency? It is unthinkable that Congress will refuse.

[From the Atlanta (Ga.) Constitution]

The work of railway postal clerks is one requiring exact knowledge of mail routings, a particular precision of hand and eye, an especial application to the job in hand, despite a swaying floor in a speeding tight-closed workroom. Added to these technical requirements, railway mail clerks are continually exposed to the hazards of train wrecks, train robberies, and kindred dangers that lurk along the iron ways of commerce.

They must be trustworthy in the extreme, as huge sums in currency and jewels, in negotiable papers of various kinds, in wealth of all descriptions are under their care as they are being transported. The working hours of railway mail clerks are irregular and require much absence from home. There are few tasks more arduous or more exacting than the work of the railway mail clerks. It is a highly specialized calling, and if ever men deserved good pay they do. Congress, we hope, will find a way to do this much-deserved justice.

[From the Memphis (Tenn.) Commercial Appeal]

The Commercial Appeal year in and year out has lots to do with postal folk. They never fail us. They do their work cheerfully. They do it most efficiently. They are not as well paid as they should be. They do not receive as much pay as men doing less important work. They ought to have enough to live decently, pay for some life insurance, and educate their children. The United States Government should adjust the postal salaries to a higher basis.

[From the Durham (N. C.) Herald]

The Post Office Department is essentially a public-service institution. Its main purpose is to render service, and the public is willing to pay for that service. It was not intended as a money maker. Of course, it is essential that economy be used, but only as a preventive of waste, and never at the expense of the service. Most any administration of recent years will point with pride to its Post Office Department and say, "Look what we have done!" But there is another side of it. Whatever has been done in the way of economy has been at the expense of the welfare of the postal employees.

In view of the high type of men required to handle the mails, and the work that goes with that job, and the constant study that they must keep up if they hold their jobs, their request as embodied in the Kelly bill is indeed reasonable and should be granted by Congress without further delay.

[From the Greenville (S. C.) Daily News]

Nobody wants a Congressman coming home shouting that he saved the Government some money at the expense of underpaid employees when they know that at the same time the Government is wasting millions on useless things. The American people are bigger than that.

[From the Winston-Salem (N. C.) Journal]

It is remarkable that the postal system is able to render the quality of service it does when its employees are paid such small wages. With the rise in the cost of living that came close in the train of the World War the postal employees were hard hit. Prices mounted higher and higher, while for years there was no increase in the salaries of these workers. When at last Congress did grant an increase it was small and wholly inadequate. Many employees quit the service. The others held on, loath to desert their posts, and lured on by the hope that things would get back to normal.

Now the postal employees are asking for another moderate and reasonable increase. It ought to be granted. There are other ways in which money can be saved. The maximum pay in the Postal Service is entirely too low. The Post Office Department is one of the most remarkable institutions in the world.

It is remarkable not only for the volume and importance of the business it does, but also because of the low pay its employees receive. It is high time that this last feature be wiped out. Then the efficiency of the service would be augmented and the conscience of the Nation would enjoy a peace that would come with the consciousness that this group of public servants is paid enough to insure a decent living.

[From the Macon (Ga.) News]

There is a general demand for retrenchment in Government expenditures, but it does seem to be a fact that the railway mail clerk has been the step-child among Federal employees for a great many years. There is more than passing merit, therefore, in the demand for relief which will be made for this class of employees when Congress assembles.

The railway mail clerks, like the rest of us, had pretty hard sledding under the late unlamented Burleson, but it can hardly be claimed that they have had full justice since that time. When they asked for adequate increases in 1920 they were told that the cost of living would probably be down to the pre-war basis in a few years, but this has not been the case, and the railway mail clerk's monthly or yearly salary to-day buys less than it did before the war.

In the meantime the volume of mail has doubled since 1913, due largely to the increased popularity of the Parcel Post Service. The number of railway mail clerks has actually diminished. Fewer men are doing twice as much work as they did before the war with less purchasing power for their day's work.

[From the Charlotte (N. C.) Observer]

A Pennsylvania Congressman is presenting a bill by which increases of from 10 to 20 per cent would be allowed all railway and post-office clerks, letter carriers, and rural route service men. These classes have had their minds hopefully upon something of this sort for a dozen or more years. They are the last men in the lists for the increased salary movement to reach. The country will hope with them that the efforts of their Pennsylvania friend will prove successful.

[From the Florida Fruit Grower]

The postal employees deserve better of their country. They are among the cleanest of citizens and yet their pay is not much better than that of a common laborer. The salaried people surely have been hard hit by the rise in the cost of living. Labor gets its \$6 to \$10 per day but the postal employee, mail clerk or carrier, receives \$6 as a maximum, which comes only after long years of service.

[From the Norfolk (Va.) Pilot]

The importance of the Postal Service and the fact that postal employees have no means of increasing their compensation except by an appeal to Congress bespeak favorable consideration for the Kelly bill, which proposes a general advance in postal salaries. No class of workers occupies a more useful relation to organized society in general and to commerce in particular than the men who handle our mails. Few classes of workers perform their assigned tasks with as little complaint or as little effort to promote their own selfish interest. The appeal in behalf of the Kelly bill makes it incumbent on Congress to review in detail the rates of compensation now in force for all grades of postal employees and to determine their adequacy by reference to ordinary standards of living and by comparison with the salaries paid for other classes of work requiring equal ability and similar qualifications.

[From the Richmond (Va.) Times-Dispatch]

Four years ago the postal clerks asked Congress for a moderate increase in pay because they could not live at all under the existing scale. Congress, spending money for everything else suggested by almost anybody else, granted them only a small increase on the theory that the high cost of living would soon decrease sufficiently to make that increased pay adequate. The cost of living has not decreased to that extent, as everybody knows. Therefore, the postal employees are asking for another moderate and reasonable increase. How it can be refused, if it is refused, is one of the mysteries of the congressional mind.

In 1913, according to estimate, the revenues accruing to the Post Office Department were some \$266,000,000; in 1923, they were some \$330,000,000, which indicates, of course, something like an equal increase in the amount of mail handled. Yet, because of the ridiculous and shameful pay scale, the number of employees classed as postal clerks has been reduced, and those remaining must do twice as much work, with a comparatively small increase of pay.

[From the Lynchburg (Va.) News]

The movement now under way to bring about a reasonable increase in the salaries of railway postal clerks squares with the justly conceived, intelligently predicated public policy. When the present cost and standard of living and the nature and the value of the service rendered by these Government employees are taken into account their case fairly bristles with compelling qualities. For it reveals an altogether inadequately compensated force of Government workers. When measured by the purchasing value of the dollar, the salaries now paid to the several grades of clerks represent in substantial effect a considerably less return than was afforded by the 1913 or pre-war wage.

Aside from these considerations, the rapidly developing efficiency of the Postal Service attests an increased productivity that may be said to have fairly earned a considerable increase in the salary scale. It shows that even if considerations of moral justice are eliminated from the equation, and the matter is regarded exclusively from a cold, practical business viewpoint, the employees of the postal branch of the public service come into court with an impregnable case when asking for the modest increase in their scale of remuneration which is embodied in their legislative program. It should be borne in mind that efficiency and its gratifying fruits such as have been realized in the Postal Service during the past several years can not be maintained if the Government persists in a policy involving insufficiently paid employees.

It is not easy to believe that Congress will prove indifferent to the force of these plain and important considerations, affecting at once the obligations of the Government, justice to its employees, and the interests of the American public—we may say the right of the American public to enjoy a steadily improving administration of the mail service. In this connection practically every man and woman in the United States is naturally and properly concerned.

[From the Chattanooga (Tenn.) Times]

It is argued that the postal employee is a "skilled laborer," which can not be controverted in the vast majority of cases, and it is shown that the salary he receives "would be scorned by skilled workmen in other lines," the charge being made that in many instances "the wife and mother must work to supplement the pay of the postal employee in order to provide properly for the family's needs and the imperative

training of the children." The appeal of the men concludes with the statement: "All that we desire is sufficient salaries to permit a proper standard of living for ourselves and our families, which means provision for the comforts and decencies which go to the promotion of better habits, the development of a higher self-respect, the opportunity for educating our children to the end that all may become more potential in the scheme for making better citizenship."

These are all laudable ambitions and worthy of the highest consideration. If the facts are as related by these employees—and there is no reason to deny them—the Congress will be derelict in its duty to the men composing one of the most important branches of government if it shall reject the appeal these men are making.

[From the Bristol (Va.) Herald]

The postal employees of the country are asking the Government for an increase in salary because the salaries now paid them, which were fixed by Congress nearly four years ago, are not only inadequate for the importance of the duties performed but are not sufficient to properly enable these employees to live in accordance with their proper needs. Possibly some would say that if the postal employee can not get a living wage in his chosen calling he should find some other occupation, but that is not the right view to take of his case. No man desires or should be asked to give up a work for which he has spent years qualifying himself and which he is competent to perform and try his hand at something else. Besides, it is necessary to enroll high-grade men in the Postal Service in order to maintain a proper standard of efficiency; and if the men now in the service should leave it the Government would have to find men to take their places, and in all probability it would have to pay them higher salaries if it could secure them.

Salaries of postal employees are fixed by Congress, and Congress should know that the salaries now paid are not adequate. The postal employees are appealing to the people to help them get a living wage. The people should give due consideration to the appeal.

[From the Atlanta Georgian]

Two bills have recently been introduced in Congress, both of which provide for readjustments in compensation of employees of the Post Office Department. One of the bills was introduced by Representative CLYDE KELLY, of Pennsylvania; the other by Representative CALVIN D. PAIGE, of Massachusetts. While both bills provide for increases in salaries for these faithful and hard-working public servants, the increases, if granted, will hardly measure up to the compensation they in all fairness ought to receive, considering the skilled work they perform and the purchasing power of the dollar in this day and time.

The output in labor upon the part of postal employees is higher to-day than ever before. The volume of work has increased much faster than the number of employees, and for this additional labor postal employees have not received additional compensation. The habits, standard of living, education, and environment of Government employees and their dependents must reflect credit or discredit upon the Government of which they are an intimate and responsible part; and the people, through their Representatives in Congress, should see to it that such employees are fully paid for their faithful service.

The people could not do a greater service to themselves and to their faithful and hard-working public servants than to grant the increase in compensation provided in the measures now before Congress, and the Georgian bespeaks for all postal employees the immediate and favorable consideration of this very meritorious, though belated, recognition of faithful and devoted service.

[From the Columbus (Ohio) State Journal]

In his annual report the Postmaster General recommended a more equitable payment for the postal employees when working overtime, but he was silent on the increased pay for regular service. His suggestion was fine as far as it went but he might have gone further and lost no merit. The claim of the clerks and carriers for more pay is based on justice, and consideration has been earned by good service at prevailing low pay. These people have no share in the higher, even prodigal compensation that was paid during the war. Their burdens were heavier, their work more exacting, they worked on, serving the public that demanded so much from them, and their pay was not increased. The public wants good service and it is willing to pay decent salaries for it.

[From the Cleveland (Ohio) Plain Dealer]

The United States Government can not afford to pay its postal employees less than enough to keep their ranks recruited with capable, self-respecting men. This means a salary level high enough to permit proper living standards for themselves and their families.

Postal workers in Cleveland are starting a movement to persuade Congress to authorize an increase in salaries for men in their branch of Government service. And to meet the criticism that the post office

now loses too much money to justify a larger salary expenditure the Cleveland men suggest that parcel-post rates, now far too low to meet the cost of the service, be advanced.

It was but a small concession the Government made in the postal salary increase in 1920, the expectation being that the cost of living would soon descend. This hope has not been fulfilled, and postal salaries remain wholly inadequate.

This is not a matter between the employees and the Government alone. Business demands efficient postal service. Delay in handling and distribution of mail because of inadequate personnel costs the country each year an amount probably as large, if not larger, than the salary increase sought by the workers.

[From the Cleveland (Ohio) News]

While we pass derisive comment on what Bolshevism, inflation, repudiation, and other consequences of war have done to rubles, marks, francs, lire, and pounds, we shall do well to note the condition of the dollar. The Department of Labor, for example, has just been reminding us that the dollar value has fluctuated a bit in the last 10 years, sometimes getting as low as 40 cents. Even now, according to the Government statisticians, a dollar's purchasing power is only 65 cents as compared to 100 cents in 1913.

The Railway Mail Association decided at its recent convention to ask Congress for more salary—at least \$2,600 a year for distributors and \$2,800 for clerks in charge. We hope they get it and shall do what we can to that end. It is far too little to pay nowadays for skilled labor such as is expected of railway mail handlers. Postal service is not above improvement; fair pay for good men would improve it more than costly airplane routes. Moreover, a government that does not preserve its 100-cent dollar from depreciating to a 65-cent or a 40-cent value should be first to pay its employees enough more dollars to protect them from loss.

[From the Buffalo (N. Y.) Evening News]

Representative KELLY, of Pennsylvania, has introduced a bill in Congress to advance the maximum pay of a carrier from \$1,800 to \$2,400 a year. He would make provision for this increase by reclassifying parcel-post rates. He maintains that this can be done without making the rates burdensome to the public. Whether this is the best way to adjust the matter remains to be determined. If it is, all right. If it isn't, then let some other way be found. These faithful public servants ought to receive a decent living wage.

[From the Buffalo (N. Y.) Evening Times]

Postal employees throughout the country are asking for a raise in pay to enable them to keep step with the cost of living.

They are entitled to it and should get it. Never was an argument more convincing, conclusive, and consonant with the requirements of justice than that upon which these faithful workers for the public base their request.

During 16 years the total advance in salaries of the post-office forces of the Nation has amounted to but 50 per cent over the rate of 1907. That is no more than half the increase in the cost of livelihood, and it is less than half what skilled wage earners in industrial occupations and other private employ have been receiving.

One hundred per cent rise in the cost of living, 115 per cent and upwards for the wages of skilled labor in the mass, 50 per cent for the postal employees—that sums up the arithmetic of the case.

Figure it out for yourself. You won't have to do much figuring. Any way it is looked at it is impossible under existing conditions for the Postal Service man to obtain an adequate subsistence for himself, bring up his family in reasonable comfort, to say nothing of saving something for a rainy day.

It is a state of affairs that should be remedied and that speedily. Congress should lose no time in giving heed to the petition of the postal employees and to the comprehensive and fair-minded public opinion that backs them up in their appeal.

[From the Rochester (N. Y.) Democrat and Chronicle]

We have classical authority for the statement that republics are ungrateful. Our own country is not entirely free from criticism in this respect. Sometimes this apparent lack of appreciation, to use a more euphonious term, is the result of thoughtlessness or carelessness, and sometimes it comes about because of mistaken judgment. It is probably due to one or the other of all of these causes rather than any conscious failure to do justice that the thousands of postal employees have been neglected in the matter of pay. But whatever the cause may be the result has been a grave injustice to the faithful group of Government workers.

This is not fair. It is injustice. Undoubtedly it would require the expenditure of considerable money to equalize the pay of postal employees so that they might be on a par with the other workers of the country. But that would not be as lamentable as a continuation of

this manifest unfairness in their treatment. There are ways in which economy in Government finances may be promoted, but it is not economy but parsimony to withhold from faithful and hard-working men the means of a decent living. When the letter carriers ask for a square deal in the way of wages they are asking that which is their due. It is to be hoped that Congress will see the matter in this light and be quick to put an end to a situation which is no credit to the Government.

[From the New York Telegraph]

A bill will be introduced at this session of Congress providing for an increase in the salary of postal employees. It should pass. Postal employees have the same calls upon them that are made upon other folk. They pay as much on an average for rent; they find it no less expensive to rear their families; they are not favored by butcher, baker, or candlestick maker. We do not intend to go into any extended praise of the service rendered, but it is pertinent to say that the post office is wisely administered and that its army of employees functions every minute of the day. Efficiency is perhaps more highly developed than in any other governmental department. Regularity of delivery is taken for granted. The people have confidence in the service, and they should be willing to pay reasonably for that service. We hope to see the measure for relief pressed to an early passage.

[From the New York World]

This Congress should give some attention to the pay of the Government's post-office clerks and letter carriers. It is demanded by the good of the service as well as by decent dealing.

The present maximum pay of letter carriers is \$1,800 a year. This may be a living compensation in country towns where rents and other necessary costs are relatively low, but it is inadequate in the large cities; and for New York, with its crushing expense of housing, it is almost grotesquely inadequate. How is a postal clerk or letter carrier to maintain a family in decency on such pay?

But humane considerations do not alone govern. Little as the Government can afford to ignore these considerations. The Post Office Department can not do its work efficiently or sufficiently. It can not command good service when other employments are paying more. Its best men are drifting away from it wherever opportunity offers, and when that is lacking they are taking on outside work which overtaxes their strength and diverts their energies. Everybody in this city, at least, knows how that is from the steadily declining quality and promptness of the service.

The Postmaster General recommends a more equitable adjustment of pay for overtime. This is well as far as it goes, but Congress will be asked to raise the pay to \$2,400 a year maximum, which more adequately meets this pressing need and should have active consideration.

[From the Albany (N. Y.) Times-Union]

An imperative duty which Congress should hasten to perform at its current session is the enactment of legislation increasing the salaries of employees of the Post Office Department. The compensation received in all branches of this service is wholly inadequate to meet the requirements of the high cost of living and every principle of fair play and justice demands that this condition be rectified. No employees of Uncle Sam serve with greater fidelity or render more arduous service than the men who handle the mail of the Nation, and they certainly are entitled to remuneration commensurate with the volume and importance of the work which they perform. The movement for this most necessary wage increase is nation-wide, for there is universal recognition on the part of the American people that the letter carriers and mail clerks and post-office clerks and members of the other branches of the mail service should receive salaries higher than those which are now paid them by the Federal Government.

The United States Government has circulated a report drawn by an economic expert which says that \$2,300 are required yearly to properly maintain a family of five persons, yet this same Government is paying the employees of its post-office service several hundred dollars a year less than the figure it tells the American people in this report is the amount of money that should be expended for the support of the family of average size. Just where the consistency resides in this condition it is surely difficult to see. The inadequacy of the increases which the post-office employees have received is perceptible at a glance. The increase of \$200 in wages granted by the Moon-Madden bill in 1918 constituted a raise in the purchasing power of the dollar to 11.6%, or just 16% per cent, whereas in the month in which this bill became a law the dollar declined in value to 51 cents. In fact, the postal employees since July 1, 1913, have been receiving an average pay of \$1,450, an increase over their 1907 salary of just \$250 per year, or 20% per cent. In numerous cities the post offices have lost many of their employees who could not afford to stay in the service at the salaries which the Government is paying.

These conditions should not be permitted to continue. The Federal Government should pay salaries to its post-office employees which will enable them to meet the existing high cost of living and to properly

support and maintain their families. This is simply justice. There is no reason why the Government should shirk its responsibility and its duty in this connection. The Post Office Department employees in every branch of its service are deserving of the utmost consideration. Their duties are exacting, are multitudinous, are most important. And yet these men are woefully underpaid. It is hoped that Congress will take up this matter at once and enact legislation to wipe out this injustice—to adequately compensate these public employees.

[From the Philadelphia Inquirer]

Better pay for post-office employees is so obviously a matter of justice that Colonel Kemp's advice to his staff to press for it is timely. Unless something is done while the appropriations are pending, postponement will be inevitable. The Government is notoriously slow in doing justice to its servants in this respect, though it can be lavish enough in other directions. The time is one for economy, of course, and many things otherwise expedient must be postponed in consequence. But there is no economy in paying less than a living wage. Salaries in the post office have not begun to keep pace with the cost of living.

What gives the clerks and carriers a stronger claim upon consideration is the fact they have not allowed their discontent to demoralize the service. It may be doubted if the increase of labor per man has been as great in any other department or in any private employment. The growth of the business has been so marked that the revenues have practically doubled in 15 years. Yet the working force is hardly 25 per cent larger. This means that the individual members have much more put upon them than they used to have. It is surprising that the morale of the force has not suffered more. But there will be an inevitable loss of efficiency as the older employees retire, since the present salaries can not attract to the service the kind of men it needs.

The primary aim of the Post Office Department is to give service, not to make money. It does not appear, however, that higher pay for employees would mean a serious deficit. The employees themselves believe that a very slight readjustment of the parcel-post rates would make the department self-sustaining, even with higher salaries. If this could be done without imposing upon the business of the country a too heavy burden, there could be no great objection to it. But something must be done in the name of justice for a hard-working and faithful body of Government employees.

[From the Detroit Free Press]

The country expects prompt, efficient, accurate, and honest service from its post-office clerks and carriers and generally it gets what it demands. But in return for their faithful and intelligent work the postal employees as a whole receive salaries so meager that they would scarcely attract an unskilled laborer, and are distinctly below what is considered a fair living wage. In cities such as Detroit, where costs are high, the post-office worker who attempts to support a family on his stipend is close to want most of the time.

Such a situation as this can not continue. Either Congress must come to the rescue with substantial pay increase, or the service is going to suffer serious deterioration. Indeed, it is little short of a marvel that the morale in the Post Office Department has been maintained up to this time as well as it has. The one possible explanation of the success of the department heads in preventing demoralization is the fact that the postal employees for the most part are Americans with high ideals regarding service and faithfulness. They stay on out of pride and from a sense of patriotic duty.

There is, however, an end to all devotion, and signs which indicate that this end is being reached among postal employees are plentiful. Postmaster John W. Smith in discussing the local situation in the columns of *The Detroitian* says:

"Fifteen years ago, men were voluntarily transferring from the police and fire departments into the Postal Service. To-day postal employees are going into other lines of work to the detriment of the Postal Service. Uncle Sam has no chance to retain a good man. He does not pay enough.

"For 14 months the Detroit post office has been unable to hold a single civil service examination for carriers and clerks for no other reason than that the salary inducement is so low in comparison with the starting point in other classes of work that few are willing to undertake the jobs.

"A conservative estimate would place the number of clerks and carriers in this city who are to-day ready to quit their jobs and go into some other business in which they can earn a living salary at 75 per cent. Three-fourths of the employees to-day are simply holding on to the jobs in the hope that Congress will take some sort of measures to relieve the present conditions."

There is no reason to suppose that the situation in Detroit is peculiar to the community. The condition here is substantially the condition in other large centers. The postal employees are at the limit of their patience, as they have a right to be. And unless they get decent pay increases soon, they are going to quit wholesale and let the country whistle for an adequate and dependable postal service.

The postal employees certainly ought not to be forced into any such action. Congress will have to reckon with an indignant people who are about to engage in a general election if it allows the matter to go any further.

The people of the United States want economy in government, but they do not want penuriousness that results in "sweatshop" pay standards and ruins a branch of the public service whose maintenance at a high point of efficiency is absolutely necessary to good commercial and industrial conditions.

This country needs to cut off every legitimately avoidable expenditure, but it can not afford to grind the faces of those who serve it faithfully and well.

[From the Detroit News]

The postal employees have always possessed, and still have, an esprit de corps, a pride in the service, unequaled in any other public department. This is now in danger. A country can not starve its employees and expect them to remain proud of their jobs. It is nothing short of a miracle that a great deal of the old spirit still persists in the Postal Service, that brains distracted by a fierce struggle to make both ends meet devote themselves day after day to improving postal efficiency without any other reward than a consciousness of duty well performed.

To be sure, there is a huge annual deficit in the Post Office Department. But this has nothing to do with the pay of postal employees. If the postal rates were doubled, the deficit might be wiped out. But the people have never held that the Navy should be paid for by our sea-coast communities, or that only those who send mail should bear the entire expense of the post office. The receiving end is just as important as the sending, and the service is not so much individual as it is communal. Efficiency is thus not a local, but a national question; and the entire Nation, as receivers of service as well as originators of it, should foot the bill.

There is no question that the postal employees are underpaid, and that, in fairness to the Nation as well as to the postal workers, salaries must be raised. The service has been patient too long. It is fully justified in its request for higher pay.

[From the Seattle (Wash.) Times]

The reasonable request of the postal employees for an increase in salary should be granted by Congress without delay. Two worthy purposes would be served by hastening this somewhat overdue legislation—recognition would be given a large group of faithful and efficient employees not now adequately paid, and the service itself would be strengthened. In addition there is the sentimental reason that the American people want to see the mail carriers and the clerks well treated.

For many years the low salaries paid postal employees were something of a reproach on this great Nation. It took changed economic conditions incident to the war in Europe to bring the country to a realization that the cheery, plodding, faithful man who brought the letters every day had children at home who must be clothed and sent to school and a wife who struggled bravely to make the meager pay check from Uncle Sam stretch over a month.

When the public began to take an interest in the case of the mail man and of the clerk in the post office, Congress heard from home. That interest and the fact that the Postal Service no longer was able to keep its best men brought about an adjustment of salaries and a reclassification.

While something was done during the war, the sum total was insufficient. Congress moves slowly. Sometimes it appropriates money lavishly and at other times it displays amazing parsimony. In the case of the postal employees Congress exhibited great frugality. Therefore they are compelled to come back for bare justice.

If there were no other considerations, it would be good business to pay the postal employees better salaries. The Postal Service is doubtless the greatest single business in the world. During the last decade the receipts increased 100 per cent and the weight of the mails doubtless was many times greater. In spite of this tremendous expansion the force of letter carriers was increased only 27 per cent. It meant heavier packs and harder work, but the force uncomplainingly assumed the new service obligations.

The post office is indispensable to our social and economic welfare. We require men to be technically trained almost beyond belief. There is increasing pressure for better service, yet with the low wages men are constantly leaving. The net result of the present policy is a breakdown of the service.

Postmaster General New well stated the postal policy of the United States when he said:

"I believe that the primary function of the department is to render service. Service should be efficient and satisfactory. It should meet the reasonable demands of business and social life. Its cost should be regulated by careful administration along lines of business and economy.

"When this is secured the question of a strict balancing of expenditures with receipts becomes of secondary importance."

In the case of the postal employees good service and the requirements of simple justice call for better pay. They should have their increase without quibbling or bickering. Public opinion will support Congress if the bill now pending is passed and will demand an accounting if it is not passed.

[From the Seattle (Wash.) Post Intelligencer]

Postal employees occupy positions of public trust and confidence that should entitle them to better salaries, aside from the fact that their duties often require long hours of fatiguing work. The Government has been fortunate in securing the services of a high type of faithful citizens, who have given of their best, regardless of the fact that they are underpaid. They should encourage these men to remain in the service by giving them adequate pay.

[From the Kansas City (Mo.) Star]

Postal employees are efficient workers, engaged in a service vital to the country. They are chosen by competitive test, not by political preference. Almost without exception they are faithful, loyal, and devoted to the service.

Yet these men are underpaid. They have not received a living wage in more than 10 years. While living costs increased since 1913 to as much as 100 per cent in 1920, and now stand more than 65 per cent above the level of 10 years ago, the wages of postal employees have been advanced only 10 to 20 per cent.

It can not be expected that the more competent men will remain indefinitely in the Postal Service or that efficient men will be attracted to it unless the wage scales are adjusted to a reasonable basis in keeping with present living costs. The interests of the country at large, as well as justice to these workers, demand the change.

[From the Kansas City (Kans.) Kansan]

During the entire period of the war, while skilled and unskilled labor alike was advancing phenomenally in wage scales, the postal employees, or, in other words, the largest group of skilled workmen in the world, received not one penny advance. These men are asking for and have a right to have what appears to be, in view of the increased cost of living and altogether unprecedented conditions brought about by the war and subsequent adjustments, a very modest figure for a "living wage." There can be no question as to the justice of the demands the association is making.

[From the Post Dispatch]

No body of men and women work harder or more faithfully than those in the Postal Service. The demand upon them is constant, and at times very severe. And the comparatively few exceptions prove that, on the whole, the service is efficient, in spite of repeated charges that Government service is less competent than other lines of work. The eye of the public is always upon the postal workers, and we seldom have cause for complaint, either on account of slowness or inefficiency.

The brief submitted to the St. Louis Chamber of Commerce asserts that the local postal employees have not had an adequate increase of pay since 1913. A recent estimate showed that the purchasing power of the dollar to-day is about 60 cents. As the workman is worthy of his hire, the plea of these public servants should be heeded, to the end that they shall receive adequate pay, and that the service shall be maintained on a basis that will not only satisfy the workers but induce competent men and women of character to seek employment in the postal department.

[From the St. Louis Times]

The compelling argument that opportunities in private business are endangering the Postal Service would seem to contain the right appeal to Congress in support of a plan to increase the pay of the men who make up that service. It has long been a matter of common knowledge and general admission that the Postal Service has not been short of wonderful in its efficiency. It has proceeded on its vast way with no heating of the engine, no jolting of the brakes, no slow leaks. It has been and is the right arm of business.

The proposed laws will not only regulate salaries but will make the future of long-service men attractive by the increase of retirement annuities, these payments to be made from a fund that will be created by deductions from the pay of the men in the work. If the pending bills become laws there will be an instant tendency to stay the drift out of the profession, to raise again the standard of admission. In a word, the old-time efficiency of the Postal Service will be insured.

[From the Des Moines (Iowa) News]

Now the postal carrier, along with other postal employees, is petitioning Congress for an increase in salary. He thinks he is entitled

to enough money to keep up with the rising cost of living. He is not asking any reward for his loyalty or his fidelity to duty, although he merits consideration on those points alone. He merely wants enough material returns to maintain a proper standard of living. He does not believe his present salary permits of that.

The postal employee is right. He does deserve more money. Congress ought to give it to him. He has a right not only to enough money to keep body and soul together; he merits enough more to procure those modest comforts which make life worth living and enable him to maintain a certain degree of self-respect.

Postal employees have earned and are earning this reward. If this were not true, the case might be different. But Congress, if it grants this request, will not be making anybody a donation. It will be merely paying a debt long due to a loyal, efficient, and hard-working branch of the Government service.

[From the Providence (R. I.) Journal]

The added cost of the Postal Service annually in increased compensation and allowances is estimated by the author of the measure at \$100,000,000. Chairman MADDEN, of the House Appropriations Committee, has expressed the opinion that it would reach more than twice that sum. Mr. MADDEN, as guardian of the Federal Budget, naturally wants to be shown where the revenue to meet the new expenditure is to come from. Mr. KELLY is prepared to enlighten him—revise the parcel-post rates upward. Regardless of this particular measure, of course, parcel-post charges should be overhauled. The package business ought to be profitable for the Government. It always was for private concerns, and is now despite Government competition. The schedules chiefly benefit mail-order houses.

The Kelly plan of compensation readjustment is mainly grounded in the fact that in 40 years there has been an increase of but \$400 in the maximum salary of postal clerks and carriers. Manifestly, the race with the cost of living has not been on anything like equal terms.

[From the St. Paul Pioneer Press]

Both of these measures should be passed. When the last reclassification was made in 1920 postal employees were denied the full increase to which they were entitled, on the theory that the cost of living would presently decline. There has been no decline to justify the continuance of present wage levels in the service, and in fairness to the employees these increases should be granted. Considering the character of the work which these men do and the remuneration to be had in other forms of employment, these new scales represent no more than bare justice. Certainly the efficiency of the service can not be maintained under the old.

The work of the Postal Service has been multiplied in recent years. Some place the increase so high as 100 per cent in the last decade. Meanwhile there has been only a negligible increase in the number of employees. In some branches, as in the Railway Mail Service, there has been actually a decrease. The increase is therefore not only essential to the men, and therefore essential to the commerce which is affected by the efficiency of its Postal Service, but has in fact been earned. Some very slight readjustments in the parcel-post rates, which the Postmaster General is authorized to make, should easily provide the new revenue without causing injury to any interests.

[From the Detroit News, February 12, 1924]

It is a peculiar characteristic of Congress that caution and parsimony are most in evidence where the public service is most vital. Such necessary activities as the Postal Service and the Patent Office literally have to beg for years on the doorsteps of Congress for the means of scant living, irrespective of how many millions Congress may be passing for diverse activities of less importance to the American people.

The favorite escape Congressmen adopt when a department becomes penniless to the point of collapse is to frame some temporary relief measure, termed a "life-saver," and then forget the matter. In the Postal Service such temporary action has been repeated several times within the past four or five years, and still the very grave impairment of the department's efficiency through neglect of its personnel goes unremedied.

If the postal employees are not worth such a schedule as the one proposed, H. R. 4123, they are worth nothing, and if they are worth anything they are worth that much and should be receiving it. The public will not accuse Congress of imprudence if, in this instance, it abandons its traditional temporizing methods and does its part in restoring a proper living standard to the postal employees and incidentally preserves the self-respect of the American people.

[From the Detroit News, February 15, 1924]

The postal clerks and carriers are now asking Congress for larger pay. But Congress is trying to fit postal expenses to postal receipts, and wipe out the annual deficit of the Post Office Department. This can only be done by perpetrating a terrible injustice, not only on the

postal employees but on all the people of the United States, for low pay means, eventually, poor service, and the money saved in balancing the postal budget will be lost ten times over by the people of the United States in low post-office efficiency. The horse that is flogged and starved dies sooner or later; and unless the postal employees are paid reasonable wages, the post office must one day break under its increasing burden. The collapse of the service is near at hand unless protective measures are taken; and the first of these measures is an increase in wages.

[From the El Paso (Tex.) Times]

The postal clerks' salary schedule ought to be moved up considerably as soon as Congress meets. This is true not only because it is justice but because if the public knew the conditions that is what the public would want.

[From the Seattle (Wash.) Union Record]

Your mailman is asking your assistance in getting a real living wage. Since 1912 his wages have been increased only 59 per cent, while the cost of living has risen nearly 100 per cent, leaving the mailman relatively worse off than 11 years ago, when his conditions were by no means ideal. It may be that in order to grant an increase to the mail-service workers it will be necessary to increase postage. It may be that economies may be worked out in other matters that will permit postage rates to remain as at present. In either case it is neither fair nor honest to expect the mailman to bear the burden of rising costs in this most essential branch of our social life. The request for increased wages should meet with the earnest support of all classes of citizens, and Congress must be made to realize that a great public sentiment stands behind any action it may take looking toward an upward adjustment of postal wages. Write your Congressman and Senators to-day and let them know your sentiments.

[From the Wyoming State Tribune (Cheyenne)]

The urgent need of economy in Government expenditures ought not to stand in the way of an increase in the pay of post-office clerks and carriers. The present maximum pay of carriers is only \$1,800 a year, and the difficulties of living on that, especially in the case of a man with a family, are obvious.

There has been a tendency of late to look upon the Post Office Department as a money-making concern, the accounts of which ought to balance, if not show a profit, at the end of the fiscal year. But while the postal revenues ought not to be wasted by extravagance, appropriations for the department should not be pared down at the expense of faithful employees. The best service possible is what the public has a right to demand. It is too much to expect when these employees are underpaid and dissatisfied.

[From the Bluefield (W. Va.) Daily Telegraph]

The branch of the Government that is underpaid and the most discouraged by the treatment of the Government is that branch that is closer to all the people. It is the Railway Mail Service. Every letter is handled by these men; every citizen receives a direct service at their hands. No other department serves the whole population as these men do.

There is a movement to have the present Congress adopt legislation looking to the betterment of conditions in this branch of service. There is no more meritorious measure before Congress than this. The men are deserving an increase in salary. They give their lives to a service that is exacting and requires many years of preparation. There is continual study to be made, and a vast expenditure of time when not on duty to preserve the efficiency required. Then the hazard is greater than any other Government employees are exposed to. While these men are required to pass educational and mental tests and to keep thoroughly conversant with changes and developments, yet they are in the same danger railroad men are, and yet they do not receive as much in wages.

The postal clerks deserve an increase in salaries and the betterment of conditions. Congress should act favorably.

[From the Minneapolis (Minn.) Daily Star]

The Star believes its readers would be doing a very just thing if they would drop a note to their Congressmen asking them to support the Kelly bill. If efficiency, punctuality, politeness, and faithful service in general have anything to do with the matter of wages, the postman will get what he is entitled to. And whoever heard of a letter carrier lacking in efficiency, punctuality, politeness, or faithfulness? We have searched a memory that goes back more years than we really care to recall, and we never remember one of these servants in gray who did not possess all of these traits.

[From the Colorado Springs (Colo.) Gazette]

The postal department is a case in point. There is no governmental service where efficiency counts for so much. Delay in accuracy, carelessness in handling the mails, can mean the loss of millions of dollars a day to business. No direct money saving that possibly could be effected would even begin to offset this indirect loss. Therefore, there is need for seeing to it that the Postal Service is organized and financed in such manner as to give maximum service.

It is said of postal employees that they are underpaid. That can easily be believed. Request for reasonable compensation will find general sympathy, as a matter of simple justice. But there is another factor that forces added consideration. The Postal Service, particularly in the cities, is losing good men, well trained, capable, trusted men, who find compensation in other endeavors so great, in contrast to their own pay, as to compel them as a matter of self interest to leave the service. For the same reason, it is becoming increasingly difficult to find competent workers to take their places. A condition which finds trusted men leaving the department and few good men taking their places must soon strike hard at departmental efficiency. To perpetuate such a condition is not to further economy. It is, in fact, the reverse. A new postal salary bill has been introduced in Congress. It and the conditions which prompted it ought to be thoughtfully studied, both in justice to the army of postal employees and to the department whose continued efficient functioning is of so vital importance to the Nation's business.

[From the Trinidad (Colo.) Picketwire]

This is particularly true of the postal employees, notoriously the poorest paid and admittedly the most faithful and hardest workers on the Government pay roll.

By no stretch of imagination is the maximum pay of carriers and clerks, \$150 a month, adequate to support a family decently considering the high cost of living.

Railway mail clerks on the road and in terminals receive a maximum of \$2,300 annually, or less than \$200 a month, and in the case of the former they are put to an expense at the end of their runs away from home which makes a serious inroad in their pay checks.

Trinidad is vitally interested in seeing that its 64 postal employees are given justice. Most of them own their own home, pay taxes, and all of them constitute a very desirable class of citizens.

There is plenty of room for economy in the expenditure of Government money without denying the postal workers a reasonable demand now pending for a wage increase of approximately 22 per cent. It was refused them over three years ago on a promise that living costs would go down, but this promise has not been kept.

Living costs have increased 69 per cent since 1913 and in that time the postal workers have received wage raises amounting to 35 per cent.

Let's cut out the "pork barrel." Everyone is in sympathy with such economy. On the other hand, the American people will not oppose paying a decent living wage to the 300,000 persons employed in their Postal Service.

[From the Detroit News]

The intention of the originators of the service, whose logic is clearly sound and effective, has been permitted to lapse, and the Postal Department is no longer assured of integrity by its own command of the continuing service of a high-grade employee, but obtains that integrity only when employees are willing to furnish it out of their own sense of honor and at a sacrifice of their material prosperity.

There is no excuse for such a condition; least of all in the United States. The Postal Service has thousands of very splendid employees, whose integrity and loyalty is beyond question. That is small thanks, however, to the Government which, acting for the people, compensates them with shameful inadequacy. Little wonder that many more thousands of splendid employees go elsewhere; they have to live and society has no right to ask them to sacrifice the welfare of themselves and their families to convenience official penuriousness.

The Postal Service should revert to its original status; it should employ a uniformly high type of individual for the most vital department; and by fully adequate compensation should retain that high type for the public service.

[From the Superior (Wis.) Telegram]

Of course taxes are high and economy is desirable, and the bill is pretty sure to be fought on these grounds by persons who wish to use the public money in a way which will be more to their own personal advantage and political success or that of their party. Economy is the one most desirable thing in the National Government at present, but true economy includes spending wisely as well as refraining from spending unwisely.

It is more than suspected that there are in the Government employ, chiefly in Washington bureaus, a good many persons who do not really perform adequate service for the pay received. Here is an excellent chance for economy. But when it comes to the postal employees everybody knows that they are not loafing on the job. There is a high tradition of public service and hard work among the postal employees, and there are very few who do not live up to it. Men of high character and a good deal of ability are required for postal work, and it is highly unbecoming—more than that, deeply disgraceful—that these faithful, able, unselfish employees of the United States should not be more adequately paid.

[From the New York Evening Journal]

The postal workers are about the only great body of public servants who have been entirely overlooked in this matter of a decent living wage.

While workers, in private as well as public life, have been advanced on every side to meet the mounting cost of living, these men have been forced to struggle along on practically the same pay as that which they received when a dollar bought twice as much as it does to-day.

This manifestly is unjust.

Despite the manner in which they have been neglected they have gone along faithfully performing their work.

The letter carrier sees you every day when he makes his rounds delivering mail.

He always has a smile and a cheery "Good morning." He doesn't grumble and tell you his woes. He often brings you good news.

In the depth of winter he trudges along through snow and sleet—a hero in gray, never slacking an iota because of the condition of weather.

At Christmas time he plays Santa to every kiddie but his own.

Just as uncomplaining as the men you meet outside are the men and women who sort the mail inside the Federal building.

It is time something was done for them.

The wage they are receiving now, although the same in dollars and cents, really is but half in value and purchasing power what they got years ago.

Many organizations all over the country have indorsed their appeal for a decent living wage.

Congress, however, seems to remain deaf to the appeal.

Perhaps it will change now, for the powerful patrolmen and firemen's organizations are on the job.

They are fighters who know how to put a proposition.

They will bring luck and success to the postal workers.

[From the Detroit Free Press]

It will be a great advantage to the whole country if the members of the House of Representatives Committee on Appropriations will read with care and with open minds what Postmaster John W. Smith, of this city, has to say regarding the salaries paid to postal employees in Detroit and in other large centers of population, and regarding the consequent difficulties in the way of keeping up effectiveness and morale.

Under the circumstances it does not in the least seem astonishing that service sometimes is slow and faulty. The wonder is that it continues to be anywhere nearly adequate. Nor would it be tolerable and escape serious breakdowns except for the devotion of some veteran employees who, rather than desert a department for which they cherish a feeling of loyalty, live on semistarvation doles from the Government, eked out by what they can earn from other sources and by what sometimes amounts to charity.

But the present hand-to-mouth situation can not continue indefinitely, and unless Congress does something very soon, unless, indeed, it does something in a remedial way at the present session, there is almost certainly going to be a crash. No new blood of any account is being acquired—the service has become like a sieve as far as that is concerned—and the old blood upon which the department depends is gradually oozing away. The strain is becoming worse all the time and is approaching the breaking point.

This condition does not appear to be the result of any conscious desire in Congress to be niggardly or oppressive with faithful, hard-working employees of the Government. It is largely the result of the failure of Members, particularly of members of the Appropriations Committee, to really understand the situation.

Again, if any "country" Member of Congress thinks he and his constituents are not concerned with the postal troubles of the cities and are inclined to let them look after themselves, he is losing sight of the important fact that the Postal Department serves the whole country and that what hurts one part hurts another. The more fact that his own district is well served will not help much if the large municipalities, to which most of the mail goes and whence most of the mail arrives, become the victims of a partial breakdown. Such a catastrophe will affect the Nation much as heart breakdown affects a man.

[From the Boston Globe]

The Postal Service can not be mechanical. No machine has ever been invented, or ever will be, which will read the addresses on letters and parcels. Human brains and faithfulness are required all through it. Emphatically it is a human service. For that reason the men and women who compose it must be treated with fairness. They can not live on dignity, and to oblige them to seek extra money elsewhere after doing exacting tasks for Uncle Sam for eight hours a day is sheer folly. The quality of the service can only be maintained if the conditions are made sufficiently attractive to draw into it the type of human ability that it must have.

[From the Norfolk (Va.) Ledger-Dispatch]

The public, we feel sure, is quite willing that Government employees, of whom so high a standard of skilled efficiency is exacted, should receive a wage equal to if not a little in excess of the amount usually paid to the employees in private industry.

[From the Christian Science Monitor]

The reasonableness of this movement may be seen in the fact that the present salary raises are the same which were asked for in 1920. At that time it was commonly felt that the cost of living would soon decrease. This, of course, it has not done, at any rate to the extent that was then expected, and thus the employees for the last three years have been receiving a salary which has been recognized as insufficient for their needs. The men do not, however, ask that they shall be fixed on the basis of present price levels, but are willing to make allowances for any ordinary reduction in prices. That some adjustment which would be fair to the employees and satisfactory to all parties involved is needed is certain, and it is reasonable to hope that such a solution to the problem will be worked out.

Mr. BYRNS of Tennessee. Mr. Chairman, I yield to the gentleman from Georgia [Mr. MOORE].

Mr. MOORE of Georgia. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD by inserting a short article on the Atlantic Coast Highway, extending from Maine to Florida. This has reference only to the extension from Georgia. It is descriptive of the highway.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent to extend his remarks in the RECORD in the manner indicated by him. Is there objection?

There was no objection.

Mr. MOORE of Georgia. Mr. Speaker, under the leave granted to extend my remarks in the RECORD, I insert the following article which appeared in the Savannah Morning News December 24, 1924, by Miss Jane Judge, of Savannah, Ga.:

HISTORIC ROUTE IN SOUTH GEORGIA TRAVERSED BY THE ATLANTIC COASTAL HIGHWAY—PURITAN SETTLEMENT AT OLD MIDWAY, SCOTCH SETTLEMENT AT DARIEN, FORT FREDERICA AT BRUNSWICK, DATE TO COLONIAL TIMES—SIX COUNTIES RICH IN COLONIAL TRADITIONS

When the important link of the Atlantic Coastal Highway from Savannah to the Florida line is constructed it will lead through a section of south Georgia which is full of historic interest.

The entire South Atlantic Coastal Highway route has been characterized as the most historic route in the country. In the highway district proposed for south Georgia it will pass through six counties—Chatham, Bryan, Liberty, McIntosh, Glynn, and Camden—all of which are identified with the colonial history of the State.

Savannah, in Chatham County, as the site of the colony of Georgia, presents to the tourist an ideal stopping place, offering the comforts and attractions of a progressive modern city and the interest of ancient traditions and an honorable history. A monument to James Edward Oglethorpe, founder of the colony, is among the most important of the notable monuments on Bull Street, for the bronze figure is by Daniel Chester French, one of the best sculptors in America, and the base and setting were designed by the late Henry Bacon.

The bones of Gen. Nathanael Greene rest beneath the monument to his memory on Bull Street, opposite historic Christ Church, where John Wesley preached. These remains were disinterred and removed some years ago from the Greene burial lot in Colonial Cemetery to their present resting place.

Colonial Cemetery itself is not only a beauty spot, with its many rare flowering shrubs and trees, but as the burying ground of the early settlers possesses unusual historical interest. Here are found the grave of Gen. Lachlan McIntosh, another Revolutionary general; the grave of Edward Mable, of Rhode Island, the famous miniature painter; and many others of unique interest, such as may be seen in few cemeteries of the country. The remains of Gen. Samuel Elbert, Revolutionary general, and later Governor of Georgia, were disinterred some years ago from his family burying ground on a deserted plantation on the Savannah River, and have been reinterred in Colonial Cemetery.

Near the mouth of the Vernon River, a short distance from Savannah, is Wormloe, the oldest plantation in Georgia, formerly the country seat of Noble Jones, the companion of Oglethorpe on his first voyage to America in 1733 and a distinguished officer of the Crown. It is still owned and occupied by his descendants. Here the late Wymberley Jones DeRenne, whose son is now the occupant of Wormloe, built a library dedicated to the founder of the family in America for the collection and preservation of documents and books on Georgia history, the only complete collection extant and containing many papers and books, as well as autograph letters and papers, not found elsewhere.

Bonaventure, the ancient seat of the Tattnalls, now used as a cemetery, is one of the show places of the county. It dates back to 1762, and is famous for its magnificent oaks which, tradition says, were planted in the avenues in the form of a monogram combining the letters M and T, the initials of the Mullrynes and Tattnalls. Mary Mullryne, daughter of the original owner, having married Josiah Tattnall, who came to Savannah from Charleston, S. C., and became owner of Bonaventure.

Nine miles from Savannah is situated Bethesda, the oldest orphanage in America, founded by George Whitefield, associate of John and Charles Wesley, in 1740. The road cut at that time from Savannah to Bethesda is said to be the oldest highway in Georgia, although this is open to doubt. Christ Church, in Savannah, where the Georgia colonists first worshipped, is also associated with John Wesley, who preached there. This is the oldest church in the State and stands in the downtown section on its original site. It was founded in 1743; the original building was destroyed by fire, rebuilt, destroyed by hurricane, rebuilt, and the present building finally erected.

The grave of Tomo-Chi-Chi, friend of Oglethorpe and famous Indian chieftain, is one of the interesting spots on Savannah's main boulevard, Bull Street. It is marked by a rough boulder of Georgia granite.

Not only has Chatham County much of historic value connected with the colonial history of the State but there are in Savannah monuments and other buildings associated with Revolutionary times or commemorating heroes of the Revolution. Besides the graves of Revolutionary generals in Colonial Cemetery, there are other memorials of this period of Georgia history. A monument to the Pole, Count Pulaski, friend of America and of freedom, hero of the Revolution, stands on Bull Street in one of the most beautiful of the city's many little parks or "squares," as they are colloquially called. There is a story, not too well authenticated, that Pulaski is buried beneath this monument, another story that he was buried a few miles from Savannah at Greenwich, but the best opinion seems to be that he died and was buried at sea near Savannah. He was mortally wounded fighting for American liberty at the siege of Savannah, October 9, 1799.

Tondee's Tavern, where the Sons of Liberty met and which was before the Revolution a rallying place for the social life of the town, has long since disappeared, but the site is marked by a bronze tablet, placed by the Colonial Dames on the wall of the present building.

Near the site of the Central Railroad Depot was the famous Spring Hill redoubt, where Count Pulaski and Sergeant Jasper fell mortally wounded during the siege of Savannah. On the Augusta Road, 2 miles above Savannah, occurred one of the boldest captures in the history of the Revolution when Sergeant Jasper with a comrade at arms rescued six American soldiers from the British, who were taking them as prisoners of war from Ebenezer to Savannah. Jasper Spring at this point has been marked by the Daughters of the American Revolution.

Chatham is the only county in the State with a complete system of permanent paved highways. Victory Drive, a memorial to the soldiers and sailors of the World War, leads over 18 miles of highway from Savannah to the Atlantic Ocean. It is a superb engineering feat, crossing marshes and rivers on its way to the sea over a route of rare scenic beauty, and connecting the city with the picturesque town of Tybee, the playground of Georgia.

Within a few weeks the great steel and concrete bridge, with steel swing span, across the Savannah River will be completed, connecting the Georgia and Carolina shores and cementing nearly 200 years of friendship between Savannah and Charleston, between South Carolina and Georgia. This friendship was begun when Colonel Bull arrived in Savannah a few days after the colonists had landed with a message from the South Carolina General Assembly to General Oglethorpe and when other South Carolinians followed with their best servants to assist in the naming of Savannah's principal boulevard, which to this day is called "Bull Street." It is now a beautifully paved street which leads from the river to the corporate limits and there connects with the avenues leading on the one hand to the Tybee Highway and on the other to the South Atlantic Coastal Highway through the historic counties of south Georgia.

Savannah is not only rich in memorials of colonial days and Revolutionary days, but its nineteenth century traditions are carefully preserved. From this port the first steamship to cross the Atlantic sailed in 1819, and the original model of the steamship *Savannah* is to

be seen in the city hall. The visit of President Madison in that year, the visit of Lafayette in 1825, are matters of record and the houses in which they were entertained are still standing. Here, too, ended Sherman's march to the sea, and the house which he used as headquarters, now the home of Judge and Mrs. P. W. Meldrim, is one of the most beautiful architecturally as well as one of the most interesting historically which the city possesses.

The Telfair Academy of Arts and Sciences, left to the city as a bequest from the Telfair sisters, is the finest art gallery south of Washington. Unique as a building, having been the old Telfair residence, it houses a remarkable collection of modern paintings, a collection of sculpture from Greek and Roman models, and the beginnings of a collection of rare old furniture. In Savannah, too, is the home of the Georgia Historical Society, the building in which its collection of books and papers is kept being another Telfair bequest, Hodgson Hall.

Fourteen miles from the sea on the west side of the Ogeechee River are the ruins of an old town, Hardwick, one of the "lost" towns of Georgia. This is in Bryan County, a part of the coastal highway route of great scenic beauty because of its splendid oaks, virgin forests, and lovely river views. Only fragments tell where once stood the town of Hardwick, which was favored by two governors under the Crown for the site of the capital of the State. The dream was never realized. When Bryan County was organized in 1793 Hardwick became temporarily the county seat, but 40 years later it had almost disappeared. Named for an eminent lord chancellor of England, this lost town is situated 2 miles from Genesis Point, a locality made famous by Fort McAllister during the war between the States. James Maxwell, a pioneer settler in Bryan County, with his brother Thomas and other residents of South Carolina, founded in 1747 the town of Belfast, which still bears that name. Blocks of tabby mark the site of the historic Maxwell home, famous for its social life in the colonial period. James Maxwell was one of the trustees to whom was delegated the task of laying out the town of Sunbury, now one of the dead towns of Georgia. He was a member of the first provincial congress of Georgia and is thought by some historians to have been the "Lieutenant Maxwell" who fought with General Oglethorpe at the famous Battle of Bloody Marsh.

On the old military road between Savannah and Darien, which this historic section of the South Atlantic Coastal Highway traverses, stands Midway Church, an ancient landmark situated in Liberty County in the angle which the road makes with the road to Sunbury. It is built of wood, two stories high, and is about 130 years old, the present building having replaced the temporary structure built of logs in 1754, which was the first house of worship of the Puritans in Georgia. From the stock of the founders of this settlement have come two signers of the Declaration of Independence—Lyman Hall and Button Gwinnett—two Revolutionary generals, two commodores, one President of the United States, four governors of Georgia, and many other distinguished publicists and statesmen, scientists, educators, and historians. One of the early pastors of Midway Church was the father of Oliver Wendell Holmes, the Rev. Abel Holmes.

The historic old churchyard at Midway is a shrine of American history. In the center of the churchyard is an obelisk erected by the United States Government in 1913 to two Revolutionary patriots who lived at Midway—Gen. James Screven and Gen. Daniel Stewart. Liberty County was created in 1777 and was named to commemorate the patriotism of the Midway settlers who, after the passage of the stamp act, became champions of liberty. In advance of the rest of the Province of Georgia, they sent Dr. Lyman Hall to the Continental Congress as a Delegate from the Parish of St. John, Hinesville, the county seat. When organized Liberty County embraced McIntosh and part of Bryan. The Liberty Independent Troop survives to the present day, and is the oldest military organization of any kind except the Chatham Artillery of Savannah. It was organized in 1791 or 1792.

The forefathers of Theodore Roosevelt are buried in Midway Churchyard, as are the ancestors of the first Mrs. Woodrow Wilson, and the father of the famous scientists, John and Joseph LeConte, both of whom were products of Midway. Virtues and valor of the settlers of Old Midway are commemorated by a tablet placed on the walls of the churchyard by the Georgia Society, Colonial Dames.

Sunbury is another of the old "lost towns" of Georgia, of which nothing remains but tradition, although in colonial days it was a rival of Savannah. The graveyard, overgrown and neglected, with its headstones crumbling, alone remains. There is nothing now to tell that it was once a thriving seaport and a center of culture. Many of the New England Puritans and other settlers of Old Midway, only 10 miles away, established homes here, and here was developed the once famous Sunbury Academy of the Rev. William McWhir, one of the noted educators of the colonial period in Midway. He is buried in the old Sunbury Cemetery. The first Masonic lodge ever organized in Georgia is traditionally supposed to have been instituted by Oglethorpe himself under an old oak at Sunbury, and the Union Society of Savannah, then the Society of St. George, met under this oak tree

in the person of certain British prisoners of war to preserve its character during the Revolution, from which the tree received the name of "Charter Oak." Boxes made from the wood are still owned in Savannah.

Darien, the county seat of McIntosh County, is one of the oldest towns in Georgia, having been founded by General Oglethorpe himself. McIntosh County was formed in 1793 out of Liberty, and was named after the McIntosh clan, members of which accompanied Oglethorpe to Georgia. Gen. Lachlan McIntosh, whose grave is in Colonial Cemetery, Savannah, is one of the foremost Revolutionary generals of Georgia. This earliest Scotch settlement in Georgia was called New Inverness and was situated on the banks of the Altamaha, 12 miles above St. Simon, as an outpost against the Spaniards. To the military post and the outlying district they gave the name of Darien, a name the town bears to this day. These sturdy Highlanders, headed by John Mabr McIntosh, chief of one of the most powerful clans in Scotland, defended the colony of Georgia against attack. With the assistance of Indian guides furnished by Tomo-Chi-Chi, Capt. Hugh Mackay laid out the road between New Inverness and Savannah, which is now to become part of the coastal highway.

It was at Darien that the large turpentine and lumber trade of southeast Georgia found an outlet to foreign and domestic markets and it became an important port of shipment for these and other products and at one time rivaled the other ports of the State. Twelve miles northwest of Darien on the banks of the Altamaha stood Fort Barrington, named after a friend and kinsman of Oglethorpe. Fort Barrington was renamed Fort Howe and during the Revolution was taken by the British. While the old fort is gone, the military road between Savannah and Fort Barrington is still called the old Barrington Road.

Next to Chatham County itself there is no part of Georgia of greater historical interest than Glynn County, a name which the southern poet, Sidney Lanier, has made known the world over. It is almost as closely associated with Oglethorpe as is Chatham County. Brunswick, the county seat, was named for the royal house of England. The oldest of Georgia's historic ruins, Fort Frederica, built in 1733, two years after the founding of the colony, commands the entrance to the Altamaha River, and some of the guns used against the Spaniards are still on its ramparts. The trip to Frederica may be made by water or by highway. The highway passes the old battle ground of Bloody Marsh, where, in 1742, Oglethorpe in command of 900 men resisted the invasion of the Spaniards and defeated an army of 5,000 with his little handful of soldiers. It was the decisive battle of the colonial period, putting a stop to Spanish depredations and a check upon Spanish ambitions. On the eve of this battle, so far-reaching in its effect on the American colonies, General Oglethorpe wrote to the trustees: "But we are resolved not to suffer defeat. Rather would we die like Leonidas and his Spartans if we can but protect Georgia, Carolina, and the rest of the Americans from desolation." This is another spot which has been marked by the Colonial Dames and the Society of Colonial Wars.

The highway passes, near Frederica, the famous Wesley Oak, under which both John and Charles Wesley preached. It is at the gateway of Christ Church Graveyard, where some of the earliest settlers lie buried. There is a new chapel on the site of the old church, but the ancient parish register of the original church is still preserved.

On the road to Frederica, about a mile distant from the old fort, stood the home of General Oglethorpe, his only home in America. Near here were the homes of many wealthy planters whose names are a part of Georgia's colonial history. Ten miles north of Frederica was one of the most splendid of the early estates, Hampton's Point, the home of Maj. Pierce Butler, where Aaron Burr in later days, when his fortunes had declined, found refuge.

There was another noted country seat at Hampton's Point, the home of John Couper. That Aaron Burr also stayed there was attested for many years by his autograph scratched on a window pane. The estate has a greater claim to glory because it produced Constitution Oak, the splendid old tree which was cut down to make the keel of the frigate *Constitution*, "Old Ironsides." The stump was long the object of historic interest. It no longer remains, but the spot where the tree grew is still remembered.

Brunswick was first declared a port of entry in 1763. It has one of the finest harbors on the South Atlantic coast. The progressive step of connecting the city and its harbor with historic St. Simon Island by a permanent highway across the marshes of Glynn has recently been accomplished. Near the approach to this highway is to be seen the "Lanier Oak," where Georgia's most eminent and most beloved poet, Sidney Lanier, is said to have received his inspiration for his "Marshes of Glynn." The city of Brunswick itself is distinguished by its avenues of oaks, older than the colony of Georgia, as their great trunks and intertwined branches testify. One of the most celebrated is "Lover's Oak," twin trees closely knit together, gnarled and ancient. This tree is only less famous than the Lanier Oak, which stands in solitary grandeur facing the marshes.

General Oglethorpe was a resident of Glynn County from 1733 to 1742, and both John and Charles Wesley lived for some time at Frederica. Thomas Butler King, who first conceived the idea of a transcontinental railway, lies buried in the old churchyard at Frederica, together with other great men of the early nineteenth century.

Camden County was created in 1777 from two old colonial parishes, St. Marys and St. Thomas, and was named after the Earl of Camden, champion of a free press and friend of the American colonies. St. Marys, the county seat, is a beautiful old town with an Old World atmosphere such as not found elsewhere in the country. It was once an important port of entry, but is now a place of quiet Arcadian beauty. Seven miles from St. Marys are the ruins of an old structure built of tabby which is believed to have been a Spanish mission equipped for defense against the Indians. It is thought by some historians to antedate the arrival of Oglethorpe at Savannah.

The grave of Lighthorse Harry Lee is on Cumberland Island. Here, too, is buried the widow of Gen. Nathaniel Greene, who married after her first husband's death one Phineas Miller. Fort St. Andrew, built by Oglethorpe in 1733, stood at the north end of the island, and at the south end Oglethorpe built Fort William, which commanded the entrance to St. Marys. Traditions and stories surround the little Presbyterian Church at St. Marys, which is its most interesting building historically. In the old burial ground there is the grave of John Brown, soldier of the Revolution, marked by a marble slab. Forty-five miles above St. Marys is the famous old town of Coleraine, where a treaty of peace and friendship was signed in 1796 between the President of the United States and the Creek Indians. This is marked by a marble boulder, placed by the Daughters of the American Revolution.

Mr. MADDEN. Mr. Chairman, I yield 10 minutes to the gentleman from Maryland [Mr. HILL].

The CHAIRMAN. The gentleman from Maryland is recognized for 10 minutes.

Mr. HILL of Maryland. Mr. Chairman and gentlemen of the committee, I have listened with a great deal of interest to what was said by Mr. MADDEN, the chairman of the Committee on Appropriations, on the subject of the functioning of the Budget. I think that we who have served in the House before the Budget law was passed and since the Budget has been in effect realize that the Budget is the greatest coordinating unit in the whole Government. At the same time, while the Budget is functioning as it does, I think we should proceed as soon as possible to make the corresponding reorganization of the executive departments in order to eliminate overlapping duties and to carry out that efficient and economical coordination of the executive departments to which we are pledged.

We are considering the Treasury Department appropriation bill for 1926. In the next year the total cost for the Prohibition Unit itself will be \$10,266,380. One-third of the whole expenditure of the Department of Justice is now applicable to the enforcement of the Volstead Act, and in the Department of Justice appropriation bill, which will soon come to you, you will be asked as the portion of the Department of Justice's contribution toward prohibition for appropriations to the extent of \$8,305,940. The additional cost of the Coast Guard this year attributable to the attempt to enforce the Volstead Act is \$9,745,496. And so this one act, the Volstead Act, in the next fiscal year for these three specific items, which are by no means all of the cost, will amount to \$28,319,816.

This over \$28,000,000 contained in these three items is only a part of the cost to the Federal Government of the first experiment it has ever made of taking over local police powers that belong to the individual States.

No one stands more firmly than I do for a strong Federal Government. I stand, however, for a Government strong in the things for which the Federal Government was created and for which it exists. If \$28,000,000 or \$56,000,000 is needed to enforce the laws of the Federal Government, or even if ten times that last sum is needed, I am in favor of making the appropriations; but is it not our duty to consider very seriously the meaning of the amount of demands for money and the character of uses for which this money is demanded? Year by year the amounts of money demanded and appropriated increase, and year by year newer and stranger experiments for enforcing the Volstead Act are offered by the Federal Prohibition Commissioner and his allies, the Anti-Saloon League.

Nothing that I can say will prevent you making the demanded appropriations, but I can invite your attention to certain extraordinary facts that appear in the hearings on this bill—facts that when carefully considered should convince you of the futility of Federal absorption of the local police powers of the States.

Where will you stop in your efforts to enforce a law that is fundamentally wrong? In the past unenforceable laws have been repealed. When will you open your eyes to the real status of the Volstead Act?

I wish to call your attention to four points in reference to the bill now before you. First, to the question of law enforcement by posters and billboards, for there is in the appropriation this year a new theory of law enforcement; second, the Federal subsidy which is paid to eight prohibition States, in which were seized over 70 per cent of all the distilleries and fermenters that were seized in our whole Nation, composed of 48 sovereign States; third, the violation of the Volstead Act by the Federal prohibition agents themselves in the purchase of evidence; and, fourth, the great increase in the number of arrests for violation of the Volstead Act.

Now, first let us look at this extraordinary new theory of government, to wit, government and law enforcement by billboards and posters. In the appropriation act are these words:

Not to exceed \$50,000 for dissemination of information and appeal for law observance and law enforcement, including the necessary printing in connection therewith.

Gentlemen, this shows the utter absurdity to which those favoring this particular law will go. Are we to expect in the future to be greeted by billboards all through our cities and along our highways saying, "Do not murder anyone to-day," "Do not rape any person this afternoon," "Do not commit arson before you sleep." And yet here, for the first time in the history of this Nation we are to have the country plastered—as much as \$50,000 will do it—with posters saying, "Do not buy from a bootlegger to-day."

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. HILL of Maryland. I will yield with pleasure.

Mr. BLANTON. If we could put all these posters in the city of Baltimore, it would be money well spent. The gentleman could hardly object to that? [Laughter.]

Mr. HILL of Maryland. I am glad the gentleman raised that point, because it gives me an opportunity to say to you that over 71 per cent of the distilleries that were seized and 74 per cent of the fermenters that were seized last year were seized in the prohibition States that I shall now name; eight States which now really invite us to look after and to legislate to enforce their own State laws and which in effect are receiving a subsidy for the enforcement of laws which they themselves do not attempt to enforce.

Mr. TINCER. Mr. Chairman, will the gentleman yield?

Mr. HILL of Maryland. Yes.

Mr. TINCER. Does the gentleman say that there is such an enforcement law in his State and that it is not necessary now to enforce the law there?

Mr. HILL of Maryland. The hearings on this bill show that there is very little breach of Federal law in the State of Maryland.

Mr. TINCER. I understand the gentleman had some trouble in getting himself arrested in his State for violating the law.

Mr. HILL of Maryland. I did have more trouble in getting myself indicted by the Federal agents for violating the Volstead law than I had in conducting the office of the United States attorney for Maryland for five years. But finally I was successfully indicted and acquitted. [Laughter.]

Mr. TINCER. But the gentleman was in safe hands. He was in the hands of his friends.

Mr. HILL of Maryland. No; they were not all friends. There were some enemies on that jury.

Now I wish to refer to the remarks of the Federal Prohibition Commissioner, Mr. Haynes, as to what he expects to do with posters and billboards, and then I wish to speak as to the use of a Federal subsidy in the dry States.

Law enforcement by posters and billboards! That is a new theory in jurisprudence that can best be explained by Prohibition Commissioner Haynes. Here is what he said to the committee:

Mr. HAYNES. My idea with reference to the poster feature would be that they could be used in places where many people congregate, such as Federal buildings or on billboards where the greatest number of people would see them. They would simply contain an appeal to loyalty to the Constitution and the support of the Government and law. I think they would make a fine appeal.

The CHAIRMAN. What effect would that have upon the bootlegger?

Mr. HAYNES. I do not know that it would have any helpful effect on the bootlegger. But it would certainly have an effect upon many who have been buying his supply.

Nothing could more explicitly emphasize the fundamental impropriety of the Volstead Act than the alleged need to have

the Federal Government use posters and billboards in order to plead with the public to obey one of the criminal laws of the United States. The advocacy of such a measure is a clear admission that intelligent public opinion is not back of the Volstead Act. The advocacy of such a measure by the head of the Prohibition Unit is one of the best possible arguments for the transfer of attempted enforcement of the Volstead Act from the Treasury Department to the Department of Justice, where it would be treated like any other criminal law and not as a very special and super law which requires exhortation by posters and billboards at post-office curbs and camp meetings.

The demand for exhortation by posters and billboards is perhaps caused by the deplorable conditions in Georgia and several other of the most loudly prohibition States, as exposed by the hearings on this bill.

In view of the large amount of seizures shown by the Federal Government, it can not be conceived that the State authorities, in addition, are attempting to enforce their own dry State laws in these eight dry States. Therefore it seems that they have shunted the costs and difficulties of prohibition on the Federal Government.

The hearings show the following seizures by Federal prohibition directors and by general prohibition agents during the fiscal year ending June 30, 1924 (hearings, p. 483):

States	Distilleries	Fermenters
Alabama.....	437	5,819
Florida.....	303	3,632
Georgia.....	737	16,389
Kentucky.....	551	6,010
North Carolina.....	780	11,731
South Carolina.....	423	3,075
Tennessee.....	1,141	13,674
Virginia.....	1,074	5,810
Total for 8 dry States.....	5,446	68,140
Total for 40 other States.....	2,208	23,856
Total.....	7,654	91,996

¹ 71 per cent.

² 74 per cent.

³ 29 per cent.

⁴ 26 per cent.

⁵ 100 per cent.

By the Constitution there were to be in the United States two distinct and separate types of jurisprudence. The Federal Government was to have its own laws and its own courts to enforce them, while each individual State was to have its own separate laws and courts. Maryland did not want the Volstead Act as a State law nor did New York. Therefore the only Volstead Act in either Maryland or New York is the Federal Volstead Act. Georgia, however, wanted a State Volstead Act as well as a Federal Volstead Act. When, however, the Federal Government stepped in, Georgia stepped out and left the prohibition question to the Federal Government, which thereupon bears the cost of trying to enforce a law that Georgia claims to want enforced. Therefore, here is another subsidy to Georgia.

On the subject of Federal subsidies the following editorial from the Baltimore Sun of December 26, 1924, contains many observations of value and many facts that are worthy of serious consideration:

FEDERAL SUBSIDIES

In the matter of Federal subsidies it takes two to make a bargain. Congress may grant them, but the States need not accept them unless they want to "match dollars" with the Federal Government. A good result of the attention these subsidies are now attracting and the objections they are arousing is that they will be scrutinized more carefully in the future.

In 1924 the National Government appropriated \$145,000,000 to the States under Federal aid acts—about one-twentieth of its total expenditures. There is great inequality between the amounts contributed by the States in Federal taxes and the proportionate returns in these subsidies, but this discrimination, while exciting some protest, has had little to do with the growth of opposition to the principle involved. How wide the discrimination is may be judged by a few figures. New York in 1924 paid in Federal taxes \$690,415,425 and received through State aid acts \$4,020,455; Nevada paid \$761,499 and received \$885,759; Michigan paid \$221,380,005 and received \$2,339,480; Kentucky paid \$28,574,914 and received \$1,592,612; New Mexico paid \$1,131,323 and received \$1,119,187; Maryland paid \$34,340,218 and received \$714,744. Maryland has declined to accept one appropriation for a small amount under the industrial rehabilitation act of 1920. But it has done as much as any other State to oppose the rapid growth of these subsidies and to protest against their invasion of the State's field, as well as against the resultant building up of great bureaucracies in Washington.

Most of the causes for which appropriations from the States are asked are meritorious in themselves. Those backing them are zealous, persuasive, and tireless. Once on the statute books, the States hesitate to refuse the doles; they want their share. The movement being launched, there comes insistent demand for more and more money, more and more employees, until the States awake to the fact that there is another well-intrenched Federal agency in their midst with ever-increasing activities.

Appropriations have grown to the present amount from the insignificant sum of \$6,500,000 in 1914, only 10 years ago. The rapidity of the development in the matter of demands on State and Federal revenues justifies the uneasiness expressed concerning it entirely aside from the objections advanced on the ground that there is in progress an insidious invasion of local autonomy.

According to the hearings, distilleries are places that have some semblance or form of official authority. According to the hearings, stills are places that have never been registered at all, not only in the mountains but now in the cities. Read carefully the tabulation of these seizures in the last fiscal year in the eight States which I have prepared from the tables in the hearings. Eight out of 48 States contributed 71 per cent to the seizure of distilleries. That is over 5,000 out of 7,000. In the seizure of fermenters—I do not know precisely what a fermenter is, but I understand it is a kind of private still in the home—in the seizure of fermenters in these eight prohibition States they received indirect subsidy by having the Federal Government carry on their own work and having \$8,000 out of 91,000 seizures.

Mr. CRAMTON. Mr. Chairman, will the gentleman yield?

Mr. HILL of Maryland. Yes.

Mr. CRAMTON. Does the gentleman intend to intimate that the enforcement of a Federal law in those States should subject those States to censure?

Mr. HILL of Maryland. No.

Mr. CRAMTON. And if it does, and speaking of subsidies, does the gentleman think that the creation of another Federal judgeship in Maryland would be a sort of subsidy for the enforcement of Federal laws?

Mr. HILL of Maryland. I will say to the gentleman that in Maryland we need another Federal judge, not for the enforcement of criminal laws but for the consideration of maritime and other civil cases. I will also say to the gentleman that I cite these figures—which I shall put in the Record—to show that it is not State enforcement laws that bring enforcement of prohibition, because here is the extra-dry State of Georgia appearing as the greatest hotbed of distilleries and fermenters in the whole Nation, whereas the State of Maryland, with the same activity by Federal agents, makes a showing of but 39.

Mr. CRAMTON. Does the gentleman intend to convey the impression that if Congress does provide another Federal judge for Maryland, it is to be with the express understanding that that judge is not to enforce the eighteenth amendment? Is that the understanding?

Mr. HILL of Maryland. No; because any judge who at the present time accepts a position as Federal judge can not do anything except to expect to be a police court judge for at least one-third of his time.

Mr. BROWNING. Will the gentleman yield?

Mr. HILL of Maryland. Yes; with pleasure. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. The gentleman has one minute remaining.

Mr. BROWNING. Does the gentleman think that these figures indicate that these eight States are the only ones which are making a definite effort to enforce the law?

Mr. HILL of Maryland. No; these are Federal figures, and they do not show anything the States are doing.

Mr. BROWNING. But they do show that the States are for law enforcement?

Mr. HILL of Maryland. These figures show that the Federal unit, with about as many agents in Maryland as in the other States, has made 39 seizures of distilleries and fermenters in Maryland as against 17,126 in Georgia.

Mr. BROWNING. Does not the gentleman think there is something in the local attitude of the people as to whether they enforce it or not?

Mr. HILL of Maryland. Undoubtedly; and the local attitude of the people in Georgia and in these other States is that they do not enforce their laws, but they let the Federal authorities do it.

Mr. KNUTSON. Will the gentleman yield?

Mr. HILL of Maryland. Yes.

Mr. KNUTSON. Has the gentleman any definite information as to the number of stills that are in successful operation in the country at the present time?

Mr. HILL of Maryland. No; but the gentleman understands there is one to every three houses, especially in Kansas and certain other States. [Laughter and applause.]

Now, briefly as to the two remaining points to which I desire to invite your attention. The violation of the Volstead Act by Federal agents in order to induce others to violate the Volstead Act and to thus secure convictions is indecent and immoral. Last year I offered an amendment to prevent the sort of thing that helped break down the ancient régime in Russia, but here I only desire to read to you how \$150,000 was spent in 1924. Here is what appears in the hearings at page 528:

PURCHASE EVIDENCE FOR PROHIBITION ENFORCEMENT

The CHAIRMAN. It was stated at the last session that in 1922 about \$150,000 had been spent for the purchase of evidence in connection with prohibition enforcement and approximately \$200,000 had been spent in 1923. How much has been expended in 1924 for this purpose?

Mr. JONES. In 1924 there was either spent or obligated for the purchase of evidence \$155,507.92.

The CHAIRMAN. Why is it necessary to spend this amount of money?

Mr. JONES. That is about the only way, Mr. Chairman, that our agents have of making cases that will stick in court. They can not convict on hearsay, and a person who buys from a bootlegger and is not an agent will not testify in court against the bootlegger, because that would cut off his source of supply. So it is necessary for agents to make the purchase, and they can testify in court that they personally have made the purchase, in that way getting evidence on which a conviction may be had.

The CHAIRMAN. What check do they exercise in the expenditure of the money to see that it is properly safeguarded?

Mr. JONES. The agent puts it on his monthly expense account and swears to it. He must show that he has made a case resulting from a buy.

"Intent" is not an element in the Volstead Act. If I buy bootleg brandy for a sick baby and perhaps save a life thereby, I still violate the Volstead Act, and my good intent is no defense. So if a prohibition agent induces some one to sell him bootleg brandy he breaks the law just the same, even though his intent is to send the vendor to jail as a law violator. It is immoral to break a law and to induce others to break a law in order to make convictions under the law. It is this type of thing that democratic government was founded to fight, yet here, as to one law only, it is tolerated by Congress. A law that requires such methods for its so-called enforcement is not like other laws.

Lastly, here are the statistics that show the present situation as to prosecutions under the Volstead Act to-day, and in 1920, 1921, 1922, and 1923. I take them from page 475 of the hearings:

Prosecutions under the national prohibition act in Federal courts

	Fiscal year—				
	1920	1921	1922	1923	1924
Criminal cases made.....	7,291	29,114	34,984	49,021	¹ 43,428
Convictions.....	4,315	17,962	22,749	34,067	¹ 37,794
Acquittals.....	125	765	1,195	1,770	¹ 2,131
Cases dropped.....	655	2,570	4,790	6,893	¹ 8,592

¹ Figures for the fiscal year 1924 are not complete, as reports of cases made and prosecuted in the latter part of the fiscal year have not yet been received in the prohibition unit.

Seven thousand two hundred and ninety-one cases in 1920; 49,021 cases in 1923. With the returns for 1924 not yet complete, the Prohibition Commissioner admits 43,428 so far for 1924—six times as many prosecutions as there were five years ago. What kind of a law is this? Is it not different from other Federal laws?

Year by year the costs of the Volstead Act mount higher and higher. By and by you will come to a point where even you will not increase the appropriations. Then, and I hope before then, you will realize that the Volstead Act is an impossible and unenforceable law.

As the new year approaches, I again suggest a remedy for the ills with which you are dealing in the appropriations for Volsteadism made in the pending bill. I propose for your consideration the following substitute for the Volstead Act. Repeal the Volstead Act and enact the following:

SECTION 1. Each State shall for itself define the meaning of the words "intoxicating liquors" as used in section 1 of Article XVIII of the amendments to the Constitution of the United States, and each State shall itself enforce within its own limits its own laws on this subject.

SEC. 2. Any person who transports or causes to be transported into any State any beverage prohibited by such State as being an "intoxicating liquor" shall be punished by the United States by imprisonment for not more than 10 years or by a fine of not less than \$10,000 nor more than \$100,000, or by both such fine and imprisonment.

The first section of my proposed enforcement act is based on the theory of local option; the second section is based on the theory of the Webb-Kenyon Act, by which the United States guarantees the States from outside interference. The proposed substitute, taken as a whole, permits concurrent action each in their own sphere by the United States and by the individual States to carry out the provisions of the eighteenth amendment.

The time has come when Maryland and similar law-abiding States should be protected from the illicit distilleries of Georgia and other "fermenter" States. [Applause.]

Mr. BYRNS of Tennessee. Mr. Chairman, I yield 10 minutes to the gentleman from Arkansas [Mr. Wingo].

The CHAIRMAN. The gentleman from Arkansas is recognized for 10 minutes. [Applause.]

Mr. WINGO. Mr. Chairman, I may not have time to read all of the article upon which I am going to comment and, therefore, I ask unanimous consent to extend my remarks in the Record by printing it in extenso.

The CHAIRMAN. The gentleman from Arkansas asks unanimous consent, in the extension of his remarks, to embody an article from a newspaper. Is there objection?

There was no objection.

Mr. WINGO. Mr. Chairman, I am one of those who believes that it is a wise policy for public men to eschew politics in either the discussion or the handling of our foreign affairs. That being the viewpoint I have, I am naturally gratified to be able to say that of which I am firmly convinced and which I think should be stressed at this time, namely, that 99 per cent of the thoughtful American people agree most heartily with President Coolidge in this declaration of the position of our Government in a recent message to Congress. I quote from the President's message:

I am opposed to the cancellation of these debts—

He is discussing the debts of foreign nations to us for war loans—

and believe it for the best welfare of the world that they should be liquidated and paid as fast as possible. I do not favor oppressive measures, but unless money that is borrowed is repaid credit can not be secured in time of necessity, and there exists, besides, a moral obligation which our country can not ignore and no other country can evade. Terms and conditions may have to conform to differences in the financial abilities of the countries concerned, but the principle that each country should meet its obligation admits of no differences and is of universal application.

I repeat, Mr. Chairman, that 99 per cent of the American people are a unit in that conviction, expressed so clearly by the President of the United States in his recent message to Congress. I say that fact can not be stressed too strongly at this time by reason of recent occurrences, which, I think, was very ably and clearly referred to by Col. George Harvey in the leading editorial in the Washington Post of yesterday, which editorial, under the permission granted, I shall extend in full in the Record.

One of the striking things in that editorial which I think should be stressed is this statement, discussing the recent conversations—as I believe they call them—of the ambassador of France with the Secretary of the Treasury:

But the plain truth is that certain diplomatic episodes of the past few weeks have given rise to painful doubts of the sincerity of France in her dealings with the United States; and that, in the present condition of world affairs, is a very serious matter.

I take it, Mr. Chairman—and I am glad to believe it is true—that the tenor of this editorial, so diplomatically drawn and so pointed in its conclusions, can be accepted and should be accepted by France as a very clear statement of the attitude of this administration, and they should realize, as I said in the beginning, that 99 per cent of the thoughtful American people are back of that attitude.

No nation can accuse the United States of being other than liberal and fair in this matter. Some of our citizens think we have been too liberal, but the position that the President

and our Debt Commission take is one that no honest nation can criticize. This fact should be brought home to those people that there is no support, of any considerable quantity in this country, of those gentlemen who are going up and down the land advocating the cancellation of these debts. There is another fact that should be driven home to their minds as practical statesmen, and it is embodied in the quotation from the President's message that I have quoted, and that is: "Nations are just like individuals. They can not treat with indifference their obligations without suffering in prestige and credit."

There are debts that are more binding in the court of honor than in the courts of law, but it is more damaging to the selfish, material welfare of a man and of a nation to resist the one than it is the other. Good faith, honor, and selfish interest require that nations as well as individuals pay their debts and meet their obligations, fairly, honestly, and to the full extent of their ability.

Mr. KINCHELOE. Will the gentleman yield?

Mr. WINGO. I yield to the gentleman.

Mr. KINCHELOE. In a news item in this morning's Post, speaking of this matter it is stated that the hands of the Secretary of State, Mr. Hughes, are tied in the matter. Can the gentleman conceive of what has arisen whereby the Secretary of State, who is the spokesman of this country on international affairs, has his hands tied in matters of this kind?

Mr. WINGO. I did not see the statement. I do not know what it refers to, but I say this, as I have said before. Whatever may be our differences, among the American people I think we are a unit back of the President and the Secretary of State upon the proposition announced very clearly in the President's message as the policy of the administration on this foreign-debt proposition.

Of course, we must recognize that in handling matters of this kind sometimes circumstances make it rather difficult to move with that degree of speed we would like to see, and for that reason I am not critical of the Secretary of State.

My object in discussing the matter to-day was mainly to get this editorial in the Record and to stress the fact that the American people, irrespective of party, are back of this administration on this question, and appreciate to the fullest extent the condition of the peoples of the nations who owe us, having perfect faith that sooner or later they will see that not only honor but that self interest will require them to promptly and in good faith meet their obligations. [Applause.]

Mr. Chairman, under leave granted me to extend my remarks in the Record I insert an editorial from the Washington Post, as follows:

THE FRENCH DEBT—IS REPUDIATION LIKELY TO FOLLOW DEFAULT?—
WAS LOUCHEUR RIGHT?—MISGIVINGS OF THE PEOPLE—A QUESTION OF SINCERITY—WHAT OUR GOVERNMENT MAY HAVE TO DO

(By George Harvey)

It would be a pity, indeed, if the ending of the long and admirable service of M. Jusserand as ambassador of France to the United States should be marred in the slightest degree for whatever cause, but it is none the less a fact, which can not, in consideration of our own self-respect, be longer ignored, that his departure is attended by a sense of deep disappointment on the part of the American people. We would not think for a moment of attributing any part of responsibility for this deplorable circumstance to his excellency; nor would we hold to account the Government, of which he is the honored representative, by contrast with its predecessors; but the plain truth is that certain diplomatic episodes of the past few weeks have given rise to painful doubts of the sincerity of France in her dealings with the United States; and that, in the present condition of world affairs, is a very serious matter.

As long ago as November 25 the press was apprised through official channels that Ambassador Jusserand had sought and obtained interviews with Secretary Mellon, chairman, and Secretary Hughes, a member, of the debt commission, with the avowed purpose of effecting a settlement of the financial obligation of France to the United States. Both of these two high officials took the proposal seriously. Not only they, but the President, according to published reports, "were gratified that the French move appeared probable before February 1, when the life of the commission would expire and necessity would arise for an appeal to Congress for an extension."

Treasury officials informed the correspondents further that the ambassador's approach was not the consequence of a hint from this Government, but was wholly voluntary and was made with full knowledge of "the American attitude that an adjustment should follow the lines of the British settlement."

Thereupon Secretary Mellon called a meeting of the Debt Commission and recounted the conversations, and subsequently, replying to a question as to whether the ambassador was "specially authorized by his

Government" to make the overtures, Representative Crisp, a member of the commission, said, decisively, "Of course, I assume that he was or he would not have conferred with the Secretary of the Treasury."

Apparently the French Government did not coincide in this view. On November 29 the Associated Press telegraphed from Paris that "there appears to be a difference in understanding between departments," and continued:

"Finance Minister Clementel has let it be understood that Ambassador Jusserand has been negotiating with Secretary of the Treasury Mellon concerning funding of the war debt, while the Foreign Office says that if M. Jusserand has been talking on the debt subject to Secretary Mellon, it was only from a natural desire on his part to advance as far as possible all questions pending before he leaves his post. The French ambassador, it was added, received no special instructions with reference to a settlement of the debt, and no negotiations have been undertaken, it was declared."

"The discrepancy," according to the dispatch, was "explained in political circles as probably due to a misconception by the Minister of Finance as to the different sorts of diplomatic talks—that when M. Clementel was informed M. Jusserand had seen Secretary Mellon the minister assumed the talk amounted to negotiations."

M. Clementel confirmed this impression, immediately following a cabinet meeting, by "expressing belief that the American Government would grant a decided reduction in the rate of interest on the debt and a hope that there would be a similar substantial reduction in the principal."

Premier Herriot leaped into the muddled waters on December 4.

"The talks," he said in an official statement, "which have taken place in the last few days between the French Ambassador to Washington and the American Secretary of the Treasury on the subject of a settlement of the French debt to America should, in spite of certain statements to the contrary, be considered only as having the character of simple semiofficial exchanges of views."

Why the Premier should have waited a whole week before clearing up the "discrepancy" between the foreign and the financial departments, amounting to a positive contradiction, was not quite clear until the circumstance was noted that the Right Hon. Austen Chamberlain, Foreign Secretary of the British Empire, was to arrive in Paris on that day and, spurred on by English resentment at France's apparent determination to settle first and exclusively with the United States, might propound embarrassing questions with respect to discrimination against her original ally.

In any case, the Premier's declaration clearly reduced the Jusserand proposal from the gravity which had been attached to it by the President and his two foremost Cabinet officials to the merest gesture.

Even so, the ambassador betrayed no dismay. Speaking in New York three days later, in the notable presence of his country's chief American bond seller and of the president of Princeton, who considered it "not only the duty but the great privilege of the United States" to cancel debts, M. Jusserand said:

"Allusion has been made to our debts to you. The papers are in doubt as to whether my talks on the subject have been conversations or my conversations talks. Whatever they may have been, I hope it will not be impossible to arrive at some agreement."

"I am sure you will recall that while you were making ready we were engaging the enemy. I think you should know that not more than one-sixth of that money went to France. The rest of it was spent in the United States, and I hope that account will be taken of our special position on that use of the money while you were preparing, and also that while we were borrowing we were also lending to our allies, and that not one of them has paid us."

"When we pay we shall pay to the last cent; but I think you will not forget that we spent more blood than any of the Allies, much treasure, and that we were the only country that supplied the battle field."

While we would be of the last to utter obvious reflections upon even the most ex parte statement in the happy yuletide season, it is impossible to ignore the following Christmas-eve message contained in a telegram to the Herald-Tribune:

"PARIS, December 24.—Ambassador Jusserand's speech in Washington Tuesday on the French debt to the United States has drawn a sharp rebuke from the Herriot government. It was learned to-night. The Premier was highly displeased. It is said, and immediately cabled the ambassador demanding that during the 15 days in which he is to remain in Washington he shall maintain silence or expect to be recalled."

"In his speech Ambassador Jusserand declared that after a 'breathing spell' France could and would begin payments, but he indicated that she would expect preferential treatment because the war was fought largely in France."

"The official view on the debt situation in Paris is understood to be that Jusserand's conferences with Secretary Mellon were entirely on his own initiative and were not authorized by the Foreign

Office. The results not only have been negative, in the opinion of Government officials, but have had a bad reaction on congressional circles."

"Finance Minister Clementel, who might have been expected to touch on the question, however lightly, in his Christmas message to the American people prepared to-day for the Herald-Tribune, did not mention war debts."

That is to say, coming down to brass tacks, the French Government resents the making of even a polite and meaningless gesture by their own ambassador to the very people who are now zealously striving in emulation of one another to show their high regard and to prove their deep affection for him upon the eve of his departure and probable retirement from the service.

Meanwhile there comes from Paris, in a telegram from Mr. Edwin L. James to the New York Times, information that "as matters now stand, the French will not in the near future make a definite proposal for debt settlement to the United States but will first try to make terms for adjustment of her debt to England."

That is, again, to say, that France proposes to play England against the United States and to lament to each that she can make no settlement with the one because, alas, she would be called upon to pay the other—a horrifying and impossible proposition. *Le Temps*, semiofficial organ of the Government, is deeply distressed by the circumstance that both Great Britain and the United States think that France should not settle with one without consideration of the other, and magnifies this wholly natural feeling into a truly dreadful "Anglo-American controversy," which has "a tone very disagreeable to us"—as well, we should say, it might.

"What we must remember," sternly declares *Le Temps*, "is that the English, like the Americans, turn to France and demand that she settle her debts, which, for political as well as financial reasons, ought first to be subjected to severe revision."

That is to say, for the third and last time, for the present at least, that M. Loucheur, the ablest and frankest of French Ministers of Finance in recent years, spoke the exact truth when he said to the writer of these lines and subsequently declared for publication that France considered all of her debts "political, not financial," and had not the remotest intention of ever paying any of them.

Now it may be that the exact truth thus plainly enunciated by Mr. Loucheur two years ago is not the exact truth to-day, but the evasive shillyshallying of the past few weeks has done much to convince the American people that it is.

If not, the proof is ready at hand and can be quickly furnished. France will not admit that she is a repudiator, but she can not deny that she is a defaulter. For various obvious reasons, as often happens to debtors, she can not pay. For various other reasons, more hazy, she can not see her way clear to promise ever to pay. What, then, can she do, what should she do, other than any corporation would surely do if confronted by a like condition? Call a meeting of her two creditors, of course, give them full access to all information respecting her assets and liabilities, resources and prospects, and seek the fair, just, and generous settlement which assuredly, though not necessarily upon the same terms, because of diverse circumstances, she would receive. If any other way of liquidating her obligations, to her honor and her credit can be found, very well; but it is not visible, and we do not believe it exists.

President Coolidge set forth plainly the irrevocable position of the United States when he said in his recent message to Congress:

"I am opposed to the cancellation of these debts and believe it for the best welfare of the world that they should be liquidated and paid as fast as possible. I do not favor oppressive measures, but unless money that is borrowed is repaid credit can not be secured in time of necessity, and there exists besides a moral obligation which our country can not ignore and no other country can evade. Terms and conditions may have to conform to differences in the financial abilities of the countries concerned, but the principle that each country should meet its obligation admits of no differences and is of universal application."

England had already borne convincing testimony to her adherence to this principle when, at tremendous sacrifice, she paid on the nail all that in generous consideration of her sturdy and splendid determination to maintain her financial integrity inviolable was asked of her.

France may do likewise. We sincerely hope so, far more for her sake than for ours. But if not, the proverbial "wounds of a friend" would cease to be "faithful" if we should fail to notify her that the events of the past few weeks have, as we said at the outset, given rise to grave misgivings of her good faith in the minds of the American people, who, after all, can not forget that they are taxing themselves \$160,000,000 a year to pay the interest upon the money which they borrowed to loan to France upon her honor as security.

There seems to be no occasion for our own Government, flouted though some consider it to have been, to do anything except perhaps to intimate courteously through our ambassador in Paris that any further communications respecting debt settlements should be plainly labeled "official" or "conversational" and should embody a definite proposal.

Later it may appear desirable to inquire whether bonds offered for sale through private bankers to the American public constitute a lien prior to that of the general loan of the United States and rest upon security which is, in substance if not in form, the property of the American people; but this is a remote contingency which we trust it will not become necessary to contemplate.

Mr. WINGO. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The gentleman yields back two minutes.

Mr. BYRNS of Tennessee. Mr. Chairman, I yield 10 minutes to the gentleman from Texas [Mr. BLANTON].

Mr. BLANTON. Mr. Chairman, each and every Member of the war Congress is responsible to the American people for what we did with their bond money which they contributed by reason of laws then passed.

I want to call attention again to the kind of obligation that our Government, under the authorization of Congress, took from every foreign government when we lent them money. These obligations were taken from time to time, covering various bond issues and made applicable to those issues, but except as that difference of issues may appear the obligations otherwise are all drawn alike, and I am going to read the form of obligation executed after the issuance of and made applicable to the seventh series of Liberty bonds, exemplifying the obligations that were given our country by the Republic of France. And so that it may be better understandable, I am going to put the total principal we loaned France in this one obligation because, substantially, it is in the same form of all of them. If you would add together the amounts of all of these obligations which at various times France executed and gave our Government, made applicable to the ones under the seventh series, you would have this kind of form and this kind of obligation, which, leaving out dates, substantially recites the form of each and all of them, to wit:

CERTIFICATE OF INDEBTEDNESS
(\$3,340,606,376.97)

The Government of the Republic of France, for value received, promises to pay to the United States of America, or assigns, the sum of \$3,340,606,376.97 on demand, with interest from the date hereof, at the rate of 5 per cent per annum. Such principal sum and the interest thereon will be paid at the subtreasury of the United States in New York, or, at the option of the holder, at the Treasury of the United States in Washington, in gold coin of the United States of America of the present standard of weight and fineness, or, at the option of the holder, at the Credit Lyonnais, Paris, France, in pounds sterling at the buying rate for cable sterling on Paris in the New York market at noon on the day of such demand, as determined by the Federal Reserve Bank of New York, and at any such place of payment without deduction for any French taxes, present or future.

This certificate will be converted by the Government of the Republic of France, if requested by the Secretary of the Treasury of the United States of America, at par, with an adjustment of accrued interest, into an equal par amount of 5 per cent convertible gold bonds of the Government of the Republic of France, conforming to the provisions of acts of Congress of the United States known, respectively, as second Liberty bond act, third Liberty bond act, and fourth Liberty bond act. If bonds of the United States issued under authority of said acts shall be converted into other bonds of the United States bearing a higher rate of interest than 4½ per cent per annum, a proportionate part of the obligations of the Government of the Republic of France of this series acquired by the United States under authority of said acts shall, at the request of said Secretary of the Treasury, be converted into obligations of said Government of the Republic of France, bearing interest at a rate exceeding that previously borne by this obligation by the same amount as the interest rate of the bonds of the United States issued upon such conversion exceeds the interest rate of 4½ per cent, but less than the highest rate of interest borne by such bonds of the United States.

(Signed) J. J. JUSSERAND,

For the Government of the Republic of France.

Dated this — day of —, 1919.

It is possible that concerning some of these obligations Mr. Jusserand had some other authorized representative of the Government of the Republic of France to sign same in his stead, but the foregoing substantially is a reproduction of the kind of obligation that was given us by the ambassador of the Government of the Republic of France, Mr. J. J. Jusserand, and they were dated according to the different loans and issues.

Is there a lawyer in this House, or in this Republic, or in any other country, who could draw a more binding legal obligation than that? What is there about that obligation that makes it questionable? It is past due, with the interest provided therein, according to its face, for it specifies that it is payable "on demand," and we have demanded settlement, not

a payment in cash, but a funding, extending over a period of 63 years, and at a much lower rate of interest than France agreed to pay. We are sympathetic and lenient.

Mr. McKEOWN. Will the gentleman yield?

Mr. BLANTON. In just a moment I will gladly; but kindly excuse me for the present.

The indebtedness which France owes our Government now amounts to over \$4,000,000,000. With the interest computed only to November 15, 1923, the debt aggregated the sum of \$3,990,657,605.64. It will add nothing more to the wealth of our Government or of our people for the debt to be funded. It will benefit only France and her people. For we now hold the legal obligation of France aggregating over \$4,000,000,000, now past due and payable, and by our offering to let France fund it we are proposing to let France give us in lieu of our past-due obligation her new obligation extending her payments over 63 years with lower interest. Hence funding is a matter of special concern and interest favorable to the Republic of France and the French people, who alone would benefit thereby, for if this debt were funded to-day the Government of the United States would get no better legal obligation than it already has. The new obligations that Great Britain has given the United States Government in funding its debt are of no greater legal value than this obligation of France which we now hold for over \$4,000,000,000, covering principal and interest, of money lent her.

I can not understand why this is not a question that concerns every Member of Congress equally. And it is time for us to speak up when we hear even rumors of a possible attempted repudiation. Your vote and mine will be necessary to settle what is done about the matter.

If France should adopt such an unwise course as to attempt to repudiate this debt by refusing to refund, she could not repudiate it, for legally she is already bound, and morally she is doubly and trebly bound, and her past-due interest-bearing obligation is in our hands and is stable and legal. I can not understand how anyone with even a sense of gratitude remaining could devise an excuse and say that because the battle field of the World War was laid in France that we who had nothing to do with the placing of the battle field there should be held responsible for the great calamity that befell that country.

I remember very distinctly in May, 1917, within a month after this Congress was forced to declare our Government in a state of war, the High Commission of France appeared here on this floor and was cordially and sympathetically received by the House of Representatives. I remember the suppliant attitude and demeanor of the high commissioner, Monsieur Viviani, when he spoke from that platform, and that of the marshal of France with their retinue who appeared with them. What was their attitude then? Did they hold this Government responsible because the battle fields of the World War were laid in France? Why, the World War had been in progress at that time three long years. No; it was an attitude of benign supplication; it was an attitude of the people of France coming to us for help and assistance, appearing under a representation that England was upon her knees, that France was upon her knees, that Italy was upon her knees, and that Russia had already given up, and it was a question of getting men, money, and help of all kinds to save them; and it, then, was their war which had been in progress for three long years.

Did we hesitate? Not a moment, and there was not a single vote against giving France everything she asked of us. This Republic came to their relief and loaned France over \$3,000,000,000.

When this high commission and the other representatives of France were asking for these loans, did they then say anything about considering them gifts, and not executing legal obligations for them? Oh, no! They were loans, pure and simple, with the same rate of interest that American citizens were paying for their public money.

These obligations, signed and executed by the Republic of France, are not mere scraps of paper. The Republic of France can not afford to treat them as scraps of paper. For France knows the civilization of the world whipped and condemned the Imperial German Empire for treating its obligations as scraps of paper.

Now, because of certain exigencies concerning which we had nothing to do, there is a delay by France in funding this legal and moral debt to our Government. I do not believe the delay will last long. I believe the people of France will wake up to the moral obligations which were mentioned by our friend from Arkansas [Mr. Wingo] a moment ago. I think they will, not in the interest of our Government, because our obligation

given us by France already is good, but in the interest of the French people, they will come in and fund this debt.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BYRNS of Tennessee. I yield to the gentleman three minutes more.

Mr. McKEOWN. Now will the gentleman yield?

Mr. BLANTON. I yield.

Mr. McKEOWN. Does the gentleman from Texas apprehend that the French people will repudiate her debt when, after 83 years, during which time all kinds of governments have been in charge of France, they have paid every one of her debts?

Mr. BLANTON. No; I do not. I believe if the propagandists will let the question alone that within a very short time this debt will be funded amicably, because it is for the interest of the French people to do so. They know that our Government will give them the same terms, 63 years, and a lower rate of interest, like we did England and other governments to fund it, and it is for their benefit, not ours, that they should fund and take advantage of it.

I want you to remember the fact that every contact we had with France during the war we paid for to the highest limit. When we sent soldiers over there to defend and aid France we paid for their carriage—we paid French boats for carrying the men across the water, and paid them the highest limit for every soldier that went to the rescue of France and the civilization of the world. When we got over there we paid dearly for every piece of ground used, for every piece of lumber, for every mite of damage we did to public roads, for every mite of damage we did to any kind or piece of property we paid the limit without a murmur, without a question, and paid in cash or its equivalent. We have paid every claim of theirs made upon us, and they have been numerous and many. They have amounted to way up in the hundreds of thousands.

Now, what else? After the war closed we had some supplies that had cost millions of dollars to the people of this country. France wanted them, said they needed them, for rehabilitation, and we sold the supplies and took their obligations after the war closed for over \$400,000 and sold them for a few cents on the dollar. Many of these supplies so sold over there were shipped back to this country and sold here in competition, by private concerns who got hold of them, in competition with products of our own factories, and that went on to such an extent that it was stopped by act of Congress and by rules and regulations of various departments of the Government. I know one thing. I represent 315,000 people in this Government. I believe that every one of them are willing to-day to do everything they can to help France along and extend the time, let her pay it when she can, but every one of the 315,000 people in my district expects France eventually to pay every dollar that she owes this Government. [Applause.]

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BYRNS of Tennessee. Mr. Chairman, I yield 10 minutes to the gentleman from Mississippi [Mr. BUSBY].

Mr. BUSBY. Mr. Chairman and members of the committee, you will remember that about a year ago we had before the House a bill similar to this one, in that it carried appropriations for the Post Office Department. You remember at that time the House put an additional million dollars into the bill for the purpose of putting into operation rural routes that had been inspected but were hanging over.

I want to call attention for a moment to how that affected the Rural Mail Service of the country. The last report of the Postmaster General says, on page 34—and this was published in November, 1923—that during the last 10 years, up to that time, the number of rural routes had been increased by about 1,600, or nearly 3.8 per cent.

That is about 160 routes per year for the 10-year period. Since the appropriation was increased last year by our putting the additional million dollars into the sum available to be expended by the Fourth Assistant Postmaster General the number of routes has increased in this way:

June 30, 1923, there were 44,312; June 30, 1924, there were 44,624; December 1, 1924, there were 44,969; and from the time that we provided the funds last year up to this time there have been 655 new routes put into operation. What does that mean? It means that the people are getting mail facilities that they never had before; and you, as Congressmen representing some of these people, when you go to the Fourth Assistant Postmaster General to get rural routes established, he does not tell you that Congress has not provided the money and consequently he can not give you the service you ask for.

There were established 655 routes from June 30, 1923, to December 1 of this year. That is nearly half as many as were established in the 10-year period up to the time this last report was written, November, 1923.

I want to show you the situation with which we are now confronted. I shall read a stereotyped paragraph—and I say stereotyped in the sense that all the letters now being received in regard to establishing routes include it. I think this paragraph will throw some light upon the situation. Here is a letter dated November 12, 1924, in reply to a letter asking that a route be established at Lambert, Miss. Here is one dated December 1, 1924, asking that a route be established at Drew, Miss. Here is one dated December 1, 1924, asking that a route be established at Glen Allen, Miss. Each one of these letters contains this paragraph:

I regret to state, however, that the estimates of the department for the maintenance of the Rural Delivery Service for the new fiscal year provides for a material decrease in the amounts available for extensions of this service, which decrease is of such large amount that we will be compelled to restrict expenditures for new rural routes and extensions of routes to cases where an actual emergency exists or where such routes or extensions are absolutely essential to the preservation of existing facilities.

Let us see what they propose to do in the way of giving us this additional service that the people are entitled to. On page 233 of the hearings on this bill, which we are now considering, we find that during the past year, because we gave them the money, they expended \$275,000 for extension of routes. They also put into operation 525 routes during that year, according to this statement, at an average cost per route of \$1,830. This would amount to \$960,750, which they have spent for this service. What did they estimate for 1926? One hundred thousand dollars all told. How many routes will that put into operation? Sixty-eight, and that is all the service that is being provided for in this bill along that line.

Mr. MADDEN. Oh, I beg the gentleman's pardon. We added \$150,000 to what they recommended, and the Fourth Assistant Postmaster General said that that would be all that they could properly use.

Mr. BUSBY. Very well. Let us see just how far that goes. I find that the chairman in his opening statement in the examination of the Fourth Assistant Postmaster General says—and this would be called a leading question in a court of law:

The CHAIRMAN. The next item covers the personnel in the Rural Delivery Service, or the rural carriers. The current appropriation for this service is \$89,250,000 and for 1926 you are asking \$88,200,000. Of course, when you take into consideration that included in that \$89,250,000 there was \$1,000,000 put in by the House that really was not needed, there is not much reduction.

They spent a good part of that additional million dollars. It was needed, and unless you give the Post Office Department a margin to operate on it can not give full service, for they can not go to the limit in making expenditures for service.

I call attention now to a letter received by me from the Fourth Assistant Postmaster General. I asked him a question about how much money would be expended. He did not answer that directly, did not seem to understand what information I desired, and he said:

It would seem appropriate to say that some of these items of cost in connection with the Rural Delivery Service are not fixed in any way and vary widely—

And then goes on—

but that a working balance must always be maintained, even if as a result of such administrative action there may be an unexpended amount to be covered back into the Treasury.

Of course, we know that he is bound to have a margin between his expenditures and the amount available in order to take care of these emergency cases. All I want is for us to get together and provide sufficient funds available for him to expend, if necessary, and if they are not expended any balance will certainly be covered back into the Treasury.

Mr. ALLGOOD. Mr. Chairman, will the gentleman yield?

Mr. BUSBY. Yes.

Mr. ALLGOOD. I notice here that the committee recommends an increase of \$4,000,000 to letter carriers in the city delivery service.

Mr. BUSBY. I noticed that.

Mr. ALLGOOD. And I do not see why they should make a discrepancy, because half of the people live in the country in the United States.

Mr. BUSBY. I really think that with the increased demand for mail facilities and service, we will have to increase the amounts for city carriers, but certainly we ought not to turn around and cut off \$900,000 for service that we are expecting to provide, and ought to provide for the people in the country. I have no feeling on this proposition as between one part of the service and the other. I think it all ought to be provided for, and if the funds are provided and not expended, it is not wasted. Why not provide it? The letter to which I have already referred tells you that we can not have any more rural routes put into operation for the next year, because next year's estimates are too low to carry them if put into operation.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. BUSBY. Yes.

Mr. BLANTON. If the gentleman can just get 36 friends of his amendment here when he offers it, we will then have one majority over the committee, and we can probably pass the amendment.

Mr. BUSBY. I want to get before the House the necessity for this proposition. I went down to the Post Office Department and was told that they had plenty of money to put rural routes into operation and that they could keep them in operation until June 30, 1925, but that after June 30 they would not be able to continue them because the department would have no money with which to carry them on. We have a part of the \$1,000,000 we provided in the last Post Office appropriations bill that can be used to put routes into operation, and can be used to carry them until next June, but after June they must be dropped because the estimates and amounts provided in this bill are so low for maintaining this service.

Before this session of Congress convened we were receiving letters like the one just shown you telling us that the Post Office Department can not establish these routes, although they have been inspected and approved and ought to be put into operation, because we are not giving them money for the fiscal year ending June 30, 1926, with which to carry the service along.

There is another feature I wish to call your attention to in connection with the Fourth Assistant Postmaster General's statement regarding estimates contained in this letter.

For instance, on page 233 of the hearings, he says:

Mr. BILLANY. * * * We have already put in 314 since the 1st of July and now have 523 cases pending establishment.

The CHAIRMAN. You will put in how many more?

Mr. BILLANY. We expect to put in about 100 more during 1925.

The CHAIRMAN. That will leave how many?

Mr. BILLANY. That will leave us 423 to carry over from 1925 to 1926.

The CHAIRMAN. Have they been examined by the inspectors?

Mr. BILLANY. Most of them have, but not all.

The CHAIRMAN. Have they been recommended?

Mr. BILLANY. Most of them have been recommended.

Mr. BYRNS. You will put some of them in this year?

Mr. BILLANY. Yes, sir; about 100.

The CHAIRMAN. He says they have already put in 314, and that they will put in about 214 or 215 more. There would still be a lot left over.

Mr. BILLANY. Yes, sir; besides what will come in during the balance of 1925 and during 1926.

Now, gentlemen, here is the sum and substance of the whole proposition. It is not proposed in this bill to carry sufficient funds, according to the statement of the Fourth Assistant Postmaster General, to give this service what is—

Mr. MADDEN. Will the gentleman read what the Fourth Assistant Postmaster General says? The gentleman did not read it all. He said that with the balance left over he would have all that was needed.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. BUSBY. I am very sorry my time has expired. I would like very much to fully answer that statement. But I hope I have made myself clear. I will get to it again later. [Applause.]

Mr. BYRNS of Tennessee. Mr. Chairman, I yield five minutes to the gentleman from Oklahoma [Mr. McKEOWN].

The CHAIRMAN. The gentleman from Oklahoma is recognized for five minutes.

Mr. McKEOWN. Mr. Chairman and gentlemen of the committee, I agree in part with what the gentleman from New York [Mr. MAGEE] had to say in regard to the public-building program, but I do not agree with him as to the manner in which, under his plan, the money is to be apportioned.

There is no question but that the public buildings are needed by the Government throughout the whole Nation. There is no question but that they need new public buildings in Wash-

ington. But the plan proposed by the gentleman is not the proper way to make the appropriations and at the same time be fair to all the communities of the Nation. He proposes to put it into the hands of the Committee on Appropriations. Why does he not go a little further and try to get the Committee on Rivers and Harbors to put their bill into the hands of the Committee on Appropriations?

The fact is that the Committee on Appropriations ought to consist of one Member from each State of the Union. There ought to be 48 Members on that committee. You may say that that would be too many. But that committee has a great deal to do, and therefore it ought to have on it one man representing every State in the Union, because they dispense the taxes collected from every State of the Union.

I have as much faith and confidence in the present personnel of the Committee on Appropriations as has any man in the House. I think they are discharging their duty just as ably as any committee that could be selected from this House. But I am simply talking about the principle of the proposition, and I say that the proper way, in my humble judgment, to settle the building program is to let the Committee on Public Buildings report its bill in and designate the places where buildings are to be constructed, and then let the committee pass upon the question as to when these buildings will be put up. Fix your program to the extent of \$25,000,000 a year for 10 years, a building program, but fix definitely the places where the structures are to be built; fix it in the bill to be presented by the committee.

Now, you hear a great deal about "pork barrels." Gentlemen, you know what a "pork barrel" is. Appropriations for public objects are called "pork" by those who have already the things the others want. What the other fellow is trying to get is called "pork." The man over here, for example, has his part already, but when another man who has not gotten his wants something done for his district that is what the former man calls "pork." That is all there is to this "pork-barrel" matter. [Laughter.] I want mine, but when I want it it is called "pork." The same is true with respect to other matters.

The only just and fair way is to bring in the bill and put the places in the bill. I will never vote so long as I am in this House to give the right to any man to spend \$25,000,000 a year wherever he wants to in erecting post offices and courthouse buildings throughout the country. Down in my country we never had a public building, although we had appropriations made since 1911. They said such buildings cost too much. But we got them to go to work and cut out the frills and this fol-de-rol of decoration and give us regular useful buildings, and we have now buildings down there within the limit fixed in the appropriation. It is just as nice and sanitary as could be wished, and these are buildings that will fulfill every want of the public for years to come. Cut out the style and cut out the fancy work in marble and in decoration and give the people nice, comfortable buildings that will serve the purpose. So long as you are going to adhere to the policy of furnishing excessive trimmings and magnificent piles of stone according to certain ideas and schools of architecture, you can not get the buildings, because you will not spend the money necessary to get them.

I do not propose to vote for a bill that is going to let some department say when you will build a public building in my district. There will be complaints coming here from all sides from Members saying that they were discriminated against. They will say they did not get fair treatment. But if you will designate in the bill the places where the buildings are to be constructed I am willing to have the Appropriation Committee of this House say when those buildings shall be built. [Applause.]

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. BYRNS of Tennessee. Mr. Chairman, I yield five minutes to the gentleman from Missouri [Mr. LOZIER].

The CHAIRMAN. The gentleman from Missouri is recognized for five minutes.

Mr. LOZIER. Mr. Chairman and gentlemen, I very much regret that every thoughtful person in America will not have an opportunity to read the illuminating, persuasive, and instructive addresses delivered on the floor of this House this afternoon by the distinguished chairman of the Committee on Appropriations [Mr. MADDEN] and the able ranking Democratic member of that committee [Mr. BYRNS of Tennessee]. This bill carries an appropriation of \$763,180,522 for the maintenance of the Treasury and Post Office Departments for the fiscal year of 1926. The granting of this large sum, more than three-quarters of a billion dollars, is a matter of great public

concern and far-reaching importance, because every dollar this bill appropriates must be collected from the American people by some system or form of taxation.

The expenditures of the United States Government approximate \$4,000,000,000 annually. When these appropriations are made there are no funds in the Treasury of the United States to meet this vast expenditure. Before the amount carried by the several appropriation bills can be paid the Government must reach out, lay its hand upon the citizen, and by the exercise of its taxing power collect from the American people a sum sufficient to cover these appropriations. Excessive appropriations mean excessive tax burdens. When we increase appropriations we make inevitable ever-increasing tax schedules. We can not hope for a substantial reduction in taxes unless we substantially reduce appropriations.

These appropriation bills deal with the business or fiscal affairs of the Nation. Therefore, a careful consideration of every appropriation bill is necessary if we are to grant the American people any relief from the ever-increasing cost of Government and the rapidly increasing burden of taxation.

I assert that the appropriation bills constitute the most important work of the Congress. They are more important than revenue bills, because the amount of money carried in our appropriation bills determines the amount of money that we must raise by taxation. And yet the American people have not a proper conception of the work of the Congress in framing and enacting the great appropriation bills which cover all the activities of our Government. This is largely the result of the attitude of the great metropolitan newspapers. They give no space to the debates on appropriation bills. Seldom do they inform their readers that Congress is at work on appropriation bills. The weeks and months of patient labor and painstaking and intelligent attention given by the Committee on Appropriations and by Congress to the great supply bills are not mentioned in the press dispatches.

During the last session of Congress, when the appropriation bills were being considered, the press gallery was practically deserted, and for weeks and months the great newspapers of the Nation carried to their readers no information that this Congress was busily engaged in the enactment of appropriation bills for the maintenance of our institutions.

When a revenue bill is pending, propaganda burdens the mails, loads every desk, and fills every newspaper. Every detail of the proposed legislation is given publicity, and what is said in debate is printed from coast to coast. But when it comes to the consideration of appropriation bills, the newspapers are not interested and the public is not concerned.

Is it not strange that the American people will work themselves into a frenzy over revenue bills that will tax them to the extent of \$4,000,000,000, and be absolutely unconcerned and indifferent in reference to appropriation bills that expend the \$4,000,000,000 taken from them in the form of taxation? The newspapers are supposed to disseminate public information and mold public opinion, but seldom do they mention in their columns the most important work that this Congress performs, namely, the enactment of the several appropriation bills by which are expended the revenues collected from the people by the several forms or systems of taxation. Congress gets no credit for what it is doing in the way of administering the fiscal affairs of the Nation.

In my campaigns, in discussing the manner in which the American Congress functions and in defending the law-making department of our Government, I stated that there was no more important legislative act than a proper consideration of our appropriation bills.

I told my audiences that when I came to Congress I entertained some prejudice against the gentleman from Illinois [Mr. MADDEN], who is the able chairman of the Appropriations Committee, because for years I had read the newspapers and remembered that he had a sharp tongue and that sometimes he had said some bitter things against the Democratic Party. [Laughter.] But after seeing him in action during the last session of Congress and after having observed the manner in which he guarded the Treasury of the United States, his fidelity to the public service, his aggressive opposition to profligacy and extravagance and his devotion to the principle and policy of economy in the expenditure of public funds, I said then, and I now repeat, there is no measure and no standard by which the value of his services to the people of America can be computed. [Applause.] I also made the same statement about the ranking Democratic member of that committee [Mr. BYRNS of Tennessee]. These two members and their associates on the great Committee on Appropriations have rendered the American people a service of such magnitude that it would be exceedingly difficult to overestimate its

value. It has been their hard duty and difficult task to hold the purse strings of the Nation, prevent extravagant appropriations, and direct public expenditures along proper and wholesome lines. The only fault I find with the great Appropriations Committee is that, in my opinion, the sums granted for the War and Navy Departments and for the maintenance of our Military and Naval Establishments are in excess of the real needs of these departments, and I am hoping that this great committee may at all times hereafter "pare to the bone" these appropriations for our naval and military activities.

This Congress can render no greater service to the Nation than by scrutinizing carefully every appropriation bill and eliminating every appropriation that is not necessary to enable our Government to function efficiently.

When Congress recessed on December 20 the newspapers carried the announcement that Congress had been in session three weeks and accomplished nothing, when in truth and fact both the House and the Senate had made rapid progress in legislative matters. The House during that short time had considered, whipped into shape, and passed three great appropriation bills carrying the expenditure of nearly three-quarters of a billion dollars. These great appropriation bills were not passed in a perfunctory manner, but the various items were discussed on the floor of the House, every proposed expenditure carefully considered, and numerous amendments proposed and adopted. And yet, notwithstanding the House had considered and passed three great appropriation bills covering the Departments of Agriculture, Interior, and Navy, and calling for the expenditure of about \$700,000,000, the newspapers recklessly announced to their readers that Congress had been in session three weeks and done nothing. [Applause.]

However, we should not be disturbed by the failure of the newspapers to give Congress due credit, because, after all, duty requires that we give these appropriation bills thorough consideration, and we are answerable to our conscience and to our constituents for the manner in which we handle the finances of the Nation. By watching these great supply bills and withholding appropriations where they are not needed we can render a real and worth-while service to the people who contribute in the form of taxes the funds necessary to carry on our governmental activities. [Applause.]

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. BYRNS of Tennessee. Mr. Chairman, I yield the remainder of my time to the gentleman from Illinois [Mr. MADDEN].

Mr. MADDEN. I thank the gentleman from Missouri and the gentleman from Tennessee very much, first, for the statements made by the gentleman from Missouri, and, second, for the time yielded to me by the gentleman from Tennessee.

The CHAIRMAN. The gentleman has 12 minutes remaining.

Mr. MADDEN. Mr. Chairman, I yield seven minutes of that time to the gentleman from New York [Mr. LaGUARDIA].

Mr. LaGUARDIA. Mr. Chairman, following the remarks made by the gentleman from Maryland [Mr. HULL] in reference to the amount appropriated in the bill now under consideration for the enforcement of the prohibition law, I want to say that while I am in full accord with the gentleman's attitude in seeking a modification of the law, I do not share his views in the method by which he approaches the desired end. The gentleman complains that the amount appropriated is too great and that the law has been enforced in certain parts of the country too vigorously. Well now, gentlemen, if you are serious about this prohibition law you will have to appropriate about three or four times as much as you are appropriating in this bill to even commence to enforce the law. I believe in law enforcement as long as the law is on the statute books.

I estimate, conservatively, that there is at least \$1,000,000 worth of liquor imported into this country a day, with an equal amount of profit to the wholesalers. No such traffic could possibly be carried on without the knowledge of the officials responsible for the enforcement of the law. What is being done to stop this wholesale importation?

The President of the United States has twice recommended in his messages to Congress that the enforcement division of the Treasury Department be placed under civil service. There is a definite, concrete suggestion. Why not follow it? If this amount is to be judiciously expended Congress should immediately provide legislation by which some of the riffraff now in the prohibition department could be kicked out and civil-service requirements established, and an army of enforcement agents provided that have the moral, the intellectual, and the physical requirements to enforce that law. You are simply playing with it. The total of \$23,000,000, as provided here, might do something, if you seek to stop the wholesale

traffic. But the trouble is that your reports now show thousands and thousands of arrests of the little fellows. All of this force is devoting its time and energy to the little retail bootlegger. Why, on page 18 of the bill you provide this:

That for the purpose of concentration, upon the initiation of the Commissioner of Internal Revenue and under regulations prescribed by him, distilled spirits may be removed from any internal revenue bonded warehouse to any other such warehouse.

What do you suppose that is for?

Mr. HUDSON. Will the gentleman yield?

Mr. LA GUARDIA. Yes.

Mr. HUDSON. Would the gentleman consider a gentleman from Ohio by the name of Remus a petty bootlegger?

Mr. LA GUARDIA. I understand he is conducting business in Atlanta. Why, gentlemen, Mr. Remus only recently was instrumental in the reorganization of two distilleries. No; I do not consider him a retailer; I consider him a wholesaler. But to get back to page 18 of the bill, there you provide for the removal of liquor from one warehouse to another warehouse. What do you suppose that removal of liquor from one warehouse to another is for? It is liquor when it leaves warehouse B and water when it gets to warehouse C.

Mr. WINGO. Will the gentleman yield?

Mr. LA GUARDIA. Yes.

Mr. WINGO. Not for the purpose of controversy but so I can follow the gentleman, this question occurred to my mind while the gentleman from Maryland [Mr. HILL] was talking. The gentleman in the opening of his statement said he agreed with the gentleman from Baltimore as to the desired end but disagreed as to the method. What I would like to know is: What is the desired end from the viewpoint of the gentleman from New York?

Mr. LA GUARDIA. As long as you have the law on the statute books, enforce it and stop bootlegging; stop corruption, stop disregard for the law and the corruption and graft in public office. That is what I mean. Enforce the law impartially. Do not go after the little fellow and let the big fellow go. Do not permit some to drink choice vintages and others to be poisoned.

Do not enforce the law against the little fellow and let your wholesalers go scot free because they have the proper connection. That is what I mean.

Mr. WINGO. Does the gentleman think that is the desired end that "the gentleman from Baltimore" had in mind?

Mr. LA GUARDIA. The gentleman knows what "the gentleman from Baltimore" had in mind, and I do not.

Mr. WINGO. The gentleman said he agreed with him in trying to arrive at the desired end but disagreed as to the method, and I was trying to find out, in my humble way, just what was the desired end that the gentleman from Baltimore and the gentleman from New York had in mind.

Mr. LA GUARDIA. The gentleman from New York had in mind having law enforcement and not have us make believe we are enforcing the law in this country. I want to know whether or not the people of this country want prohibition. We can not tell until we have prohibition.

The gentleman from Arkansas only a few moments ago stood on the floor of this House and supported the President in one of his recommendations, and now I will support the President of the United States when he says to kick out the riffraff and kick out the bums and put this department under the civil service, and get real men to enforce the law, and then we will ascertain whether this law can be enforced or not. That is what I mean by it.

Mr. WINGO. If the gentleman will permit me, I think I might agree with him in the desired end he states; but does the gentleman think the only way you can reach that end is to put it under civil service? The gentleman recognizes that under the present method of Republican politics it is impossible to do that as long as you have political appointments.

Mr. LA GUARDIA. The gentleman tried to reform the Republican Party once, but he did not make much of a success of it, and I do not think they are going to take my advice now.

Mr. WINGO. Oh, no; I never tried to reform the Republican Party.

Mr. LA GUARDIA. I am talking about myself. I do not think they are going to follow my advice now.

Mr. WINGO. The gentleman is wiser now.

Mr. LA GUARDIA. I hope so.

Mr. BLANTON. Will the gentleman yield?

Mr. LA GUARDIA. Yes.

Mr. BLANTON. How are you going to enforce the law when 17 hours of persuasive argument will induce the foreman of a jury in Baltimore to let a distinguished gentleman make cider?

Mr. LA GUARDIA. It seems to me that if the distinguished gentleman whom my friend from Texas refers to wanted to really test the law, he should have put in no defense, and after the State had put in its case he should have rested; then the jury could come in with a verdict of guilty; then he could have appealed. Then we would have the law established on appeal, because law is made by the decisions of appellate courts and not by the verdict of a jury in a particular case.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. MADDEN. Mr. Chairman, I yield the remainder of my time to the gentleman from Illinois [Mr. BRITTEN].

Mr. BRITTEN. Mr. Chairman, I have been joshed a good deal around the House to-day about an editorial, a copy of which I hold in my hand and which appeared on yesterday in the Washington Post, and just why so distinguished a paper, so influential and responsible a paper, should waste a full column on a cynical, critical, half-witty, satirical editorial I can not quite understand. I read it four or five times and can not understand the density of the gentleman who wrote it—and by the way, I suppose it is a gentleman, who calls himself "The Bystander." Just what The Bystander means or stands for, of course, is subject to many opinions. A bystander might be a single onlooker or he might be a bum around a fish market who has nothing else to do. However, The Bystander wrote this, and in a number of places he says that the same beneficent Providence that makes guinea pigs also made FRED BRITTEN. Well, I take it that the same Divine Providence also made The Bystander. The same Divine Providence made Volstead and JOHN PHILIP HILL. He also made beautiful peacocks, and is directly responsible for the legs of the high-minded and talented editor in chief of the Washington Post. You probably have seen them in short silk breeches in the Court of St. James. That same Providence also made the naval expert whose desire to improve the American Navy gave him columns, aye, pages, in the Washington Post recently.

The entire editorial shows a desire for supreme sarcasm, and yet The Bystander's desire to be funny overshot his mark.

I want you to understand, gentlemen, I am not attributing this editorial to Col. George Harvey. He is much too smart and too refined a man to pull such a boner.

For the benefit of some of you who have not read it, the editorial refers to the caustic ink and pleasant sarcasm of the great Macaulay, and then the writer recognizes his own feebleness of power to do me, as he says, full and signal justice because of my statement on the floor of the House—a statement so clear that any child could understand it.

There is an attempt at ugly sarcasm. He says that the reason for his editorial is to reprimand Mr. BRITTEN; reprimand me because of his failure to understand English. He says, in part:

We do not object to Mr. BRITTEN amusing himself with saber rattling—if he must have his toys let him play with them—but we shall have to reprimand him, for his own good, of course, for trying to mislead the House of Representatives.

I want you gentlemen who are accustomed to the language of the House to see if I really attempted to mislead you. He says further:

We quote from our invaluable contemporary, the CONGRESSIONAL RECORD of December 18:

"Mr. BRITTEN. The Secretary of the Navy and the highest ranking naval officers in our service say that Japan is making great military preparations."

That is what they have said in congressional hearings. Then, going further—

"and I assume that any warlike activity of Japan may be ultimately directed against us."

Now, that is very plain. That is my assumption. There is no question about that. The language is very clear, and is not attributed to anyone else.

A little later Mr. FRENCH asked Mr. BRITTEN if he wanted it understood that the Secretary of the Navy and the high officers of the Navy had said that Japan was making military preparations that might be directed against the United States, or was that only Mr. BRITTEN's own observation.

Well, when I said I assumed that a certain condition presented itself, of course it was my personal opinion.

To which Mr. BRITTEN, unabashed, made this reply:

"I want it clearly understood that no Secretary of the Navy and no high ranking officer of the Navy indicated Japan was making mili-

tary preparations with the view of directing those preparations against the United States. That latter expression was my personal opinion."

Anyone with an ounce of brains in his head would have understood my plain language, but The Bystander writes:

So, Mr. BRITTEN having made the House believe he was reflecting the Secretary of the Navy, driven into a corner by Mr. FRENCH, confesses he was drawing upon his own imagination.

What a silly attitude for a great newspaper to take. Then it says:

This may be the ethics of the ninth district, whose representative Mr. BRITTEN is. Meanwhile Mr. BRITTEN's conscience and likewise his digestion, we presume, do not trouble him.

I repeat that in my first statement I plainly assumed that some day those military preparations might be directed against us. I was not aiming to mislead the House. That was my personal observation. I hope that while we may have differed on the Navy or on the wet and dry issue or on many other issues, just as big city districts will differ from country districts, I hope I have never attempted deliberately, directly, or indirectly to mislead the House. That is never my intention, gentlemen, and I want you to realize that. I repeat, it is hard to understand the logic or the intent of The Bystander.

I introduced a resolution the other day, which had been introduced after very serious deliberation, calling for a conference on the Pacific coast. The Post this morning quoted an editorial about that resolution, which said it should be voted down.

Now I am going to ask the Clerk to read, in my time, a real editorial, appearing on Christmas Day in the Chicago Tribune.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. BRITTEN. Mr. Chairman, I ask to proceed for five minutes.

The CHAIRMAN. The time has been limited by the House, and all time has expired. The Clerk will read.

The Clerk, reading the bill, read as follows:

Be it enacted, etc.,

TITLE I—TREASURY DEPARTMENT

The following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the Treasury Department for the fiscal year ending June 30, 1926, namely:

Mr. BRITTEN. Mr. Chairman, I move to strike out the last word and ask unanimous consent that I may proceed out of order.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to proceed out of order. Is there objection?

There was no objection.

Mr. BRITTEN. Mr. Chairman, this Chicago Tribune editorial is very short and I will ask the Clerk to read it in my time. First, let me say that the Chicago Tribune has a circulation of a million copies. It is often referred to as the world's greatest newspaper. Its editorials are quoted and reprinted in all of the principalities of the world and in every language on earth because of their classic character and honesty of purpose. The Tribune, I am glad to say, prints an editorial which treats favorably the resolution that I offered the other day.

With no desire to promote jingoism I want you gentlemen to understand that I think our Government and every Member of Congress who attempts to pussyfoot and gum shoe about Japan, simply because the Japanese are sensitive and take offense easily, is pursuing the wrong attitude; we should look the cards squarely in the face. If Japan is making preparations we should recognize the fact and talk about it and act accordingly. No one wants war with Japan, and I can not see a threatening speck on our peaceful horizon, and yet if other nations are making preparations for war we must assume that they are doing so with a purpose and to do otherwise will surely cost us dearly in the end. Now I will ask the Clerk to read the Tribune editorial.

The Clerk read as follows:

THE PACIFIC CONFERENCE

Sooner or later there will be a conference between Canada, the United States, Australia, and New Zealand on their Pacific problems. The Tribune thinks it should be sooner. Congressman FRED BRITTEN, who proposed it to the House not long ago, thinks it should be soon. In Australia and in Canada some leaders say it should be soon. Others say no. But in any case it will come. The communion of interest is there. The pressure for solution is there. Some time the English-speaking peoples on the Pacific will talk it over.

Congressman BRITTEN's proposal for a Pacific conference is therefore apropos. It has advertised the idea, and though his proposition may not be realized at once it will come about the sooner and the easier for his pioneering. It has called attention to the basic need for unity of front on the Pacific Ocean. It has emphasized the community of our problems. It is a directive gesture of importance.

Nor is his proposal warlike. It does accent the common-sense demand for naval efficiency; it does direct our eyes to the demands that may be put upon our Navy; but it is a step, nevertheless, toward a peaceful solution of Pacific difficulties. Perhaps it is the only peaceful solution, for white unity of policy in the western ocean will be a conservative policy. The consolidation of our problem there will be based solely on a defensive interest in mutual security and peace by reasonable preparedness.

Mr. BRITTEN's proposal will help to raise the western problem into the spotlight of national interest. It will turn the eyes not only of our Eastern States but of Great Britain to that new and most important field. The Pacific basin is the cradle of a huge future.

Mr. BRITTEN. Mr. Chairman, I included in my resolution the word "white"—white nations on the Pacific. I did it purposely and deliberately, but after thinking it over and reading various editorials for and against the resolution it might be well to modify that and say "all peoples of the Pacific" and take Japan and China in for a solution of the difficult problems of the Pacific.

I am just as sure, gentlemen, as I stand here this minute that some day in your lifetime and mine—and that is not going to be very far off—there will be a conference of the people living on the Pacific to settle, as the Chicago Tribune rightfully says, their many difficulties. It will be a peaceful conference, it will not be a jingo conference, it will not be one to determine navies and armies and armaments, but in the interest of peace, justice, friendship, and the very life of the countries themselves, I offer apology to no one for having introduced that resolution. Mr. Chairman, I withdraw the pro forma amendment.

The Clerk read as follows:

OFFICE OF THE SECRETARY

Salaries: Secretary of the Treasury, \$12,000; Undersecretary of the Treasury, \$10,000; three Assistant Secretaries of the Treasury, and other personal services in the District of Columbia in accordance with the classification act of 1923, \$158,180; in all, \$180,180: *Provided*, That in expending appropriations or portions of appropriations contained in this act for the payment for personal services in the District of Columbia in accordance with the classification act of 1923, the average of the salaries of the total number of persons under any grade in any bureau, office, or other appropriation unit shall not at any time exceed the average of the compensation rates specified for the grade by such act, and in grades in which only one position is allocated the salary of such position shall not exceed the average of the compensation rates for the grade: *Provided*, That this restriction shall not apply (1) to grades 1, 2, 3, and 4 of the clerical-mechanical service, or (2) to require the reduction in salary of any person whose compensation was fixed, as of July 1, 1924, in accordance with the rules of section 6 of such act, (3) to require the reduction in salary of any person who is transferred from one position to another position in the same or different grade in the same or a different bureau, office, or other appropriation unit, or (4) to prevent the payment of a salary under any grade at a rate higher than the maximum rate of the grade when such higher rate is permitted by "the classification act of 1923," and is specifically authorized by other law.

Mr. BLANTON. Mr. Chairman, I move to strike out the last word. In December, 1923, when the first appropriation bill embracing this new lump-sum system was before the House, I then called the attention of my colleagues to the fact that it was going to result in abuses which the Congress could not control; that where the head of a department was given the arbitrary authority under such a lump-sum provision to slide favorites up to higher positions and higher salaries, and then slide those not so favored down to lower positions and lower salaries, just so certain averages were maintained, there was inevitably going to be abuses.

I called attention to that fact in the consideration of almost every one of the supply bills we had that year. Our distinguished chairman said he thought that they had safeguarded the lump-sum provision by the limitation they put in the bill, and he thought it would protect the people of the Government and the employees. I then dissented from that view, and to-day the chairman of this great committee [Mr. MADDEN] has admitted on the floor that this kind of a provision had been a failure. He said that there had been numerous promotions in several departments that were wholly without justification. He went further than that, he said there had been many promotions, many salaries raised for employees in several depart-

ments that were wholly without merit and without facts warranting same.

So he has been mistaken. And this committee of 35, whom I frequently support in holding appropriations within Budget estimates—this special committee of 35—has been mistaken, and Congress in approving their action has been mistaken, and we have all permitted these abuses to go on under the lump-sum plan.

In spite of all these admitted abuses we have still this kind of a lump-sum policy continued, with the verbiage in the bill changed a little here and there, but the lump-sum plan is the policy continued in every supply bill offered to Congress by the Appropriations Committee. The three supply measures that we have already passed before Christmas and sent over to the other end of the Capitol will permit of these same abuses, and I predict that the chairman will come in later and say that the abuses still continue. This bill will permit them, and these abuses are going to continue just as long as the other 400 Members of the House will sit by and permit these lump sums to be put in appropriation bills.

The time is coming when you will have to return to and follow the advice given from the floor by many distinguished chairmen of this committee, including the present one, before he became chairman. I have listened to him many times discourse against lump-sum appropriations in years gone by. I heard the former distinguished chairman of the Committee on Appropriations, Mr. Goode, say that it had to stop, that he was going to stop having lump-sum appropriations; and yet they are continued on. How much longer are we going to stand for it?

Mr. MADDEN. It is impossible to make other than lump-sum appropriations under the classification law. There is but one remedy, and that is to repeal that law.

Mr. BLANTON. The only proper remedy was suggested by the gentleman from Delaware [Mr. Boyce] this morning when he said that every single position of the Government ought to be stipulated by law and the salary for it should be stipulated by law. This classification act provides what salary a certain position shall carry, and each department should be made to tell us just how many employees they need in each grade and class; and then the Congress ought to exercise its function and give so many employees in the various classes with stipulated salaries to each bureau of the department and not let them go beyond that amount a single dollar. When we do that we will stop these abuses, and we will not do it until we get rid of these lump-sum appropriations; and I am going to keep working at it and fighting against it until some of these days I believe it will be stopped.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BYRNS of Tennessee. Mr. Chairman, it is rather easy to criticize lump-sum appropriations, but let me suggest to my good friend from Texas [Mr. Blanton] that if he were to undertake under the law as now written to do otherwise than make lump-sum appropriations, in the manner recommended by the Committee on Appropriations, he would find himself in a very difficult situation.

Mr. DOWELL. Mr. Chairman, will the gentleman yield?

Mr. BYRNS of Tennessee. Yes.

Mr. DOWELL. Is it not possible for the department to make these allotments of positions annually in such a way that the Appropriation Committee can have the information as to exactly how much each person is to receive in the department under the law that we have passed?

Mr. BYRNS of Tennessee. The departments furnish directly to the Budget, and the President supplies the information to Congress, as to the number of positions it is expected will be needed during the fiscal year, and also as to the grade. I call the gentleman's attention to the fact that Congress passed the classification act a year or two ago. I was one of those who voted against it at the time because I felt that there was a possibility of some abuse, and I may say that fear has been justified by later developments in a number of specific instances. Under that law it was provided that the clerks and employees in the District should be rated twice a year, in November and in May, and their salaries increased when their rating justified it. If Congress now undertakes to make an appropriation of a fixed sum for an employee to begin on July 1, it would in effect be nullifying the law which provides that the clerk shall be rated twice a year and promoted whenever the circumstances justify it. In other words, it would cut off from the clerks just what Congress tried to give them, viz., the right to expect promotions whenever their services justified a raise in salary.

Mr. DOWELL. But my inquiry suggested that if this were an annual rating the Committee on Appropriations would have that rating for the year and that they would then know exactly the amount which each one would draw.

Mr. BYRNS of Tennessee. Undoubtedly.

Mr. DOWELL. Then can not such a change be made without in any way affecting the general principle of the law which we enacted and at the same time have the specific appropriation for each individual in the department?

Mr. BYRNS of Tennessee. The idea of the gentleman could be carried out, but we would first have to amend the law, and the Committee on Appropriations has no authority to report legislation. The law now provides, if I remember correctly, for two ratings in each year, in November and May.

Mr. DOWELL. The only change that would be necessary in order to make specific appropriations would be to make this annual instead of semiannual.

Mr. BYRNS of Tennessee. I can see where that might possibly serve the purpose, but, as I say, we would first have to amend the law. Of course the Committee on Appropriations can not by recommendation on an appropriation bill bring in any such proposition. We are compelled to follow the law. The gentleman from Texas [Mr. Blanton] criticizes the committee for appropriating lump-sum appropriations. The Committee on Appropriations, I was about to say, is compelled to recommend these lump-sum appropriations, just as it has done. A year ago, I confess to the gentleman, I entertained a different opinion.

Mr. MADDEN. And, by the way, we discussed that a great deal in the committee.

Mr. BYRNS of Tennessee. It was the very earnest wish of the chairman and all members of the committee to make specific appropriations if possible, but after thoroughly discussing it we came to the unanimous conclusion that it is impossible under the law to do anything more than to submit a lump sum and hedge it about as carefully as we can and, as we attempted to do a year ago, with limitations and restrictions.

Mr. DOWELL. Having found a defect in the situation, finding that there is a possibility of amending the law in some respects that would permit the specific appropriation, and to get the appropriation, would it not be a wise thing to make these ratings annually instead of twice a year?

Mr. MADDEN. If the gentleman from Tennessee will permit, I would say that when the bill to classify was in conference—and there were two bills—it was found that one of the bills carried a provision for annual classifications and the conference after very careful consideration—and, of course, I was not one of them—decided that to make the classification so that promotions could be made only once a year was too rigid, and they took that out and brought back to the House and the Senate a bill which eliminated it, and we are now acting under the new provision as agreed to by both houses after the bill went through the conference.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield?

Mr. BYRNS of Tennessee. Yes.

Mr. LAGUARDIA. Why would it not be possible to have a line of positions such as we have in the New York City budget, which is over \$380,000,000 a year, and then if a vacancy occurs in any of the lines an employee can be promoted to another line, and each position is specified and limited in the law itself?

Mr. BYRNS of Tennessee. If you did that you would be doing just what the House and the Senate evidently intended should not be done. You would make this law too rigid and prevent these clerks and employees from getting their promotions at various times.

Mr. LAGUARDIA. It does not work out that way in New York City.

Mr. BYRNS of Tennessee. We make our appropriations here for the fiscal year, and when we appropriate so much money for a clerk for the fiscal year 1926, necessarily that clerk is denied promotion during the year, for the head of the service has no right to give him a promotion where his salary has been actually and definitely fixed for the year by the Congress.

Mr. LAGUARDIA. Under our system, as long as there is a vacancy in another line he is promoted to the other line.

Mr. BYRNS of Tennessee. There is no reason why they can not be promoted or advanced to a vacancy; but where there are no vacancies, the gentleman can see that it takes from the head of the service any power to give the employee or clerk that increase which the law says he shall have.

Mr. LAGUARDIA. But as long as you have such a system it piles up, and in time you have the whole department top-heavy.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. BEGG. Mr. Chairman, I ask unanimous consent that the gentleman from Tennessee may have five minutes more. I want to ask him a question.

The CHAIRMAN. The gentleman from Ohio asks unanimous consent that the gentleman from Tennessee may have five minutes more. Is there objection?

There was no objection.

Mr. BEGG. Mr. Chairman, will the gentleman yield?

Mr. BYRNS of Tennessee. Certainly.

Mr. BEGG. The gentleman from Tennessee made the statement a moment ago that the committee is unanimous against the lump-sum appropriation method.

Mr. BYRNS of Tennessee. No; the gentleman misunderstood what I said. I said it was the desire of every member of the committee a year ago, when the first appropriations were recommended under the reclassification law, to do otherwise than make lump sums possible, but after mature consideration we considered that was not possible.

Mr. BEGG. I so understood the gentleman. Does the law compel him, under the assay offices and mints, for example, to make a lump sum? A year ago you made specific appropriations. I appreciate the fact that that is further on in the bill, but it is so closely in touch with this situation that I thought the gentleman could answer that now. That is on pages 32, 33, 34, and 35. Our assay offices and mints have a lump sum, and last year they were specific salaries. Now, do you lump it so that you gentleman have to call attention to it, or does the law compel you to do it?

Mr. BYRNS of Tennessee. The gentleman will remember that a year ago, at the time these bills were reported, the Personnel Classification Board had made a report only with reference to the District of Columbia.

Mr. BEGG. I understand that, and I appreciate that. But the thing I wanted answered was this question: Was it because the report was made since that compels you to do the same thing outside the District as you are compelled to do in the District?

Mr. BYRNS of Tennessee. We can not do otherwise than make the lump-sum appropriation where the classification applies, and the same reason applies with reference to these positions as with reference to positions in the District of Columbia.

Mr. BOYCE. Mr. Chairman, will the gentleman yield?

Mr. BYRNS of Tennessee. Yes.

Mr. BOYCE. Are not the grades determined from the character of the services performed?

Mr. BYRNS of Tennessee. Yes.

Mr. BOYCE. Does or does not the Classification Board fix the number of grades in each department?

Mr. BYRNS of Tennessee. The law fixes the number of classes in each grade, seven in each grade.

Mr. BOYCE. Does or does not the Classification Board determine how many persons are required in each of the grades?

Mr. BYRNS of Tennessee. No; the Classification Board does not do that.

Mr. BOYCE. Who does?

Mr. BYRNS of Tennessee. The estimating body is supposed to do that.

Mr. BOYCE. Does not the Committee on Appropriations have information as to the number of persons required for each grade?

Mr. BYRNS of Tennessee. Precisely. The list is furnished to the committee through the Budget and the amount of money that will be needed.

Mr. BOYCE. And the committee is informed as to the salary of each person in the several grades?

Mr. BYRNS of Tennessee. What would the gentleman do? Suppose they report that they will need three in a certain class and four in another class and five in another. Suppose one of the five under this law is entitled to an increase during the fiscal year. Are you going to deny him this right for a whole year?

Mr. BOYCE. Are promotions made from a lower position to a higher position when that grade is filled?

Mr. BYRNS of Tennessee. They would not promote in that sense, but they would give such salary as the rate of efficiency justified under the law.

Mr. BOYCE. Is not that based on the character of the work performed?

Mr. BYRNS of Tennessee. That is based on the character of the work performed; yes.

Mr. BOYCE. And the character of the work performed in one grade is different from that performed in another grade?

Mr. BYRNS of Tennessee. I suppose it is. Theoretically it is.

Mr. BOYCE. In other words, the law does not contemplate an increase in salary while in a particular grade based on mere favor?

Mr. BYRNS of Tennessee. That is not the theory of the law.

Mr. BOYCE. These grades are like a flight of steps—from the lower grade up?

Mr. BYRNS of Tennessee. Yes.

The CHAIRMAN. The time of the gentleman from Tennessee has again expired.

Mr. BYRNS of Tennessee. Mr. Chairman, may I have two minutes more? There was a statement I desired to make.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. BYRNS of Tennessee. As I understand it, the abuses to which the gentleman from Texas referred have occurred more particularly in the grades where there was only one employee. As explained by the gentleman from Illinois [Mr. MADDEN] this morning, in such cases, although the Congress had endeavored and thought it had succeeded in providing that only the average should be paid, the Comptroller General rendered an opinion to the effect that that provision did not apply to grades where there was only one employee. Therein the departments abused, as I construe it and believe, the intent and confidence of the Congress, and immediately shot those particular employees up to the maximum of the grades in which they were allocated, raising some from \$5,000 and even less to \$7,500, others from \$6,000 to \$7,500, some from \$3,000 to \$5,600. There are a number of instances of that sort which the committee thought, and the Congress thought, had been guarded against. The committee has recommended additional language here so as to specifically provide that the provision as to the average shall apply to all grades, regardless of whether there are more than one in that grade or not, so as to get around the opinion of the Comptroller General, who, while he is the supreme court in matters of that kind, I do not hesitate to say I believe was clearly wrong, and I know that his opinion violated the spirit and intent of the act of Congress.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. STENGLE. Mr. Chairman, I rise to speak.

The CHAIRMAN. The gentleman from New York is recognized.

Mr. STENGLE. I rise, Mr. Chairman, to ask another question or two of the distinguished gentleman from Tennessee, who has so ably explained the lump-sum provision. I notice that on page 2, line 3—if the gentleman does not mind taking his book—it is provided as follows:

Three Assistant Secretaries of the Treasury and other personal services in the District of Columbia.

So much. Will the gentleman kindly tell me, if it is within his knowledge, how he arrived at that total?

Mr. BYRNS of Tennessee. The gentleman means the \$158,180?

Mr. STENGLE. Yes.

Mr. BYRNS of Tennessee. Well, from the estimate submitted by the Budget; and, of course, that estimate contained a statement as to the number of employees who would be needed.

Mr. STENGLE. And did not mention the name of the incumbent of any one of those positions?

Mr. BYRNS of Tennessee. No.

Mr. STENGLE. On the contrary, it specified in that report so many stenographers at so much, so many clerks at so much, and so on down?

Mr. BYRNS of Tennessee. Yes.

Mr. STENGLE. Now, I want to ask the gentleman if they get a report in detail like that, why can they not submit to this House that detailed request and allow us to pass upon that rather than upon a lump sum that tells us nothing?

Mr. BYRNS of Tennessee. There would be no trouble about submitting that to the House, but I submit to the gentleman that writing it in an appropriation bill would be an entirely different matter.

Mr. STENGLE. I suggested to the gentleman last year and submitted to him a copy of a budget similar to this one of the great city of New York, in which that very thing was done,

and each and every line, as the gentleman will recall, had a code number, and there was no way possible for a violation of even the spirit of the reclassification, because that code acted as a check upon the department head. Why can not that be done here?

Mr. BYRNS of Tennessee. Do I understand the gentleman to contend or to insist that the appropriation bill should carry each individual clerk, not necessarily by name but specifying each individual clerk in this bill and the amount of the salary?

Mr. STENGLE. It is my opinion, if the gentleman pleases, that we ought to write in detail when we come to spend such vast sums of money. The public at large has no way, in reading this bill, of determining where that money goes. But we have submitted to us in detail, in accordance with the gentleman's own suggestion, so many clerks and so many stenographers at so much; we then read that and cast it into the wastebasket, and we then come here and consider a lump sum. I believe it is a protection to the Treasury of the United States to make every safeguard and every check that is possible, even if it requires ten times as much paper as this bill includes.

Mr. BYRNS of Tennessee. I agree with the gentleman as to the necessity of checks and safeguards.

Mr. STENGLE. I want to submit to the gentleman this further suggestion: If that had been done last year, it is my humble opinion that the distinguished chairman would have been able to discover much sooner what he did discover in the last few weeks, because you would have had a check on these fellows.

Mr. BYRNS of Tennessee. Of course that is true, if it is possible to do that; but as I understand the situation I do not see how you can carry out the spirit of the reclassification act and give to these clerks the promotions and the increases in salaries to which they are entitled under the act in the manner set forth by the gentleman unless you were to have a system of annual ratings instead of semiannual ratings.

Mr. STENGLE. Let us accept that. Does the gentleman contend that every time some one does something in the public service that requires a little reward we must create a new line or a higher place for him?

Mr. BYRNS of Tennessee. No.

Mr. STENGLE. You can only promote when there is a vacancy above.

Mr. BYRNS of Tennessee. Of course, the gentleman does not make any such contention as that, but the gentleman does contend that where clerks of similar salaries and in similar grades show a proper efficiency and rating to entitle them to receive an increase they ought to have it rather than have it go to some one higher up, which did happen under the law as passed last year in many instances.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. BLANTON. Mr. Chairman, I ask to withdraw my pro forma amendment.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn.

There was no objection.

Mr. BLANTON. Mr. Chairman, I offer an amendment: On page 3, line 3, strike out the following words:

The classification act of 1923.

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BLANTON: Page 3, line 3, strike out the words "the classification act of 1923."

Mr. BLANTON. Mr. Chairman, I want to take just a moment to answer the gentleman from Tennessee. When I was guilty of lese majesty in making a slight criticism of the committee—

Mr. MADDEN. The gentleman never is.

Mr. BLANTON. I knew it would be the distinguished gentleman from Tennessee [Mr. BYRNS] who would get up and verbally chastise me for it. Had the one criticizing been from this other side of the aisle it would have been the gentleman from Illinois [Mr. MADDEN] who would have done the chastising. That is a part of the modus operandi of the committee. When a Democrat criticizes the committee the ranking Democrat on the committee gets up and spans him and when a Republican is so bold as to criticize the committee the spanking comes from the ranking member of the committee on his side.

Mr. BYRNS of Tennessee. I did not know the gentleman had ever been spanked in his life.

Mr. BLANTON. Yes; I have, verbally.

Mr. MADDEN. I hope the gentleman does not think we are in a conspiracy.

Mr. BLANTON. But I never get sore over it. Here is the dilemma in which the committee finds itself. It says there are great abuses under the present system and that the only thing which stands in the way of correcting these abuses is the fact that there are semiannual ratings instead of annual ratings and that this great and all-powerful Committee on Appropriations has no authority to stop the semiannual ratings.

Mr. MADDEN. They are not confined to semiannual ratings. They can do it every morning.

Mr. BLANTON. Well, every morning. If there were annual ratings, I take it, the committee could change this lump-sum plan. Both the chairman of the committee [Mr. MADDEN], and also the ranking Democratic member of the committee [Mr. BYRNS of Tennessee], each admit that if we would repeal the one provision and require the ratings to be made annually, then we could specify in each supply bill just how many employees in each grade at specified salaries we would give to each department of Government, which would stop these lump-sum appropriations and would stop these admitted serious abuses.

It is the rating merely that takes place more frequently than annually that keeps them from stopping these abuses. Yet from the speech of the gentleman from New York [Mr. MAGEE] we assume that the Committee on Appropriations is now seeking to take over the functions of the Committee on Public Buildings and Grounds; that it is soon going to take over the functions of the Rivers and Harbors Committee; and possibly it is soon going to take over the functions of the Shipping Board and the Emergency Fleet Corporation. With all that power, why is it they can not force a repeal of this one little provision on ratings and make them annually?

Here is the situation in a nutshell. My friend, the gentleman from Tennessee, and he is my friend—he just spanked me on paper—knows this to be a fact, and he can not deny it: That unless the Committee on Appropriations ordains it no employee can be raised unless there is a vacancy. The gentleman from New York [Mr. STENGLE] was correct about that, but when he tried to pin down the gentleman from Tennessee on it, the gentleman would not answer him. Unless so willed by the Committee on Appropriations a department can not make a promotion unless there is a vacancy, even under this classification act, but with these lump sums they make vacancies.

Mr. MADDEN. Yes; they can do it if there is the money available.

Mr. BLANTON. Oh, yes; if there is the money, and your Committee on Appropriations usually gives them the money. They get all the money they want under lump sums, and then slide the unfavored employees down out of a higher grade to a lower grade, which makes a vacancy, and then they slide their favorites up from a lower to the higher grade with big salaries. Here is what you ought to do. You ought to change that rating to an annual rating.

Surely this committee has influence enough to repeal this one little provision. No man in this House, with one exception, even has a chance at promotion oftener than just once every two years. Of course, the gentleman from Pennsylvania [Mr. VARE] has more frequent opportunities. The gentleman sometimes holds three very important positions at one time.

Mr. VARE. Is it merited?

Mr. BLANTON. Yes. You are not going to get this gentleman to say it was not merited.

Mr. VARE. Thank you.

Mr. BLANTON. Here is what we ought to do: We should repeal this provision and make these ratings annual ratings and then we ought to give every department just so many employees in each class with ratings and salaries specified. In the professional positions there are seven classes, and we should provide so many in class 7, which is the highest; so many in class 6, class 5, class 4, class 3, class 2, and class 1. Then in the clerical positions, where there are 14 different ratings—14 different ways we now give these bureau chiefs the right to pull up the favorites and pull down the non-favorites—we ought to give each department just so many employees in each class, with ratings and salaries of each class specified in each supply bill.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BLANTON. When you do that, then you will get away from this vicious lump-sum appropriation business, and you can then correct these abuses.

Mr. BOYCE. Mr. Chairman, I rise in opposition to the amendment.

My thought about the situation is this: The Congress is invested with the taxing power. It puts its hands into the pockets of the taxpayers.

Mr. MADDEN. That is what we tell them every day when we refuse their requests for appropriations.

Mr. BOYCE. That being so, and charged with the power and duty of taxation to meet the needs of the Government, the Congress should ever keep in mind the reasonable disbursement of the money which it levies upon the taxpayers.

It does seem to me from what I have been able to observe since I have been here, the Congress has often surrendered the matter of distribution of the public moneys too much to departmental heads. I can not see any great difficulty in the way of Congress keeping a closer grip upon the expenditures of the public moneys. I appreciate the situation of the Committee on Appropriations under the law. But if extravagance is indulged in and abuses become apparent, Congress should amend the law. I regard the classification act as supplemental to the act creating the Budget Bureau. I think the latter act having been passed, somebody conceived the idea of the classification act in order to checkmate the intention of the Budget act.

Mr. MADDEN. Will the gentleman allow me to interrupt?

Mr. BOYCE. Yes.

Mr. MADDEN. The classification act was originated by the employees of the Government.

Mr. BOYCE. I can not help who conceived it.

Mr. MADDEN. And, of course, their hope was that it would write specifications for the various jobs in the Government service.

Mr. BOYCE. The purpose of the Budget act was in the right direction. I approve of the act. It was not intended to give encouragement to favoritism. The character of the services to be performed, and the value of the service to be rendered were clearly intended to be recognized.

Mr. MADDEN. And that employees, regardless of who they were, would go in the places the specifications called for.

Mr. BOYCE. And be transferred from place to place when additional services should be required, or where vacancies should occur. Merit of the employee, and nothing else was to be the controlling influence in awarding increase of pay and advancement in classification was to follow the needs of the service and merit of the person advanced.

Mr. MADDEN. And get the pay of that rating.

Mr. BOYCE. Yes.

Mr. MADDEN. What they did and the thing about which I was complaining in what I said this morning was that many of the bureau chiefs—and I presume it was with the sanction of the chief of the department—apparently banded themselves together and organized a committee to raise the pay of their own chiefs and themselves at the expense of those down the line who had nobody to plead for them, and we are trying to stop that. That is all we are trying to do. Of course, while the classification act lasts our committee has not the power to do more.

Mr. BOYCE. I appreciate the position of the committee fully.

Mr. MADDEN. That is where our trouble lies.

Mr. BOYCE. But should Congress, should the House, permit things to go on which you as chairman of the Appropriation Committee have confessed?

Mr. MADDEN. No; I think we ought to regulate it, and that is why I called it to the attention of the House, so that the House might have notice of it.

Mr. BOYCE. Can we expect relief from the departments? The pressure brought against the heads of the departments is too great. You can not bring the same effective pressure against 435 Members of this House or against 96 Members at the other end of the Capitol such as can be brought against a single head of a department.

Mr. MADDEN. It is hard to tell just what to do, because every time you do it in one way you find it circumvented by some ingenious fellow along another line.

Mr. BOYCE. I take it that the Budget which is submitted to the President is largely based upon the classification act. Am I right in that?

Mr. MADDEN. Yes; that is the object.

Mr. BOYCE. I see no reason when the Budget is submitted to the President and he submits it to the Congress why Congress can not—at least, from time to time—pass permanent acts based upon the Budget, whether it be approved in whole or in part by Congress.

Mr. MADDEN. The classification act is a permanent act, and that is what we are acting under.

Mr. BOYCE. But it is at least a partial failure.

The CHAIRMAN. The time of the gentleman from Delaware has expired.

Mr. BLANTON. Mr. Chairman, I withdraw the pro forma amendment.

The Clerk read as follows:

INTERNAL REVENUE SERVICE

Office of the commissioner: Commissioner of Internal Revenue, \$10,000; for the assistant to the commissioner, three deputy commissioners, and other personal services in the District of Columbia, in accordance with in the District of Columbia, in accordance with the classification act of 1923, \$810,000; in all, \$820,000.

Mr. MADDEN. Mr. Chairman, I move to strike out the unnecessary words on page 17, line 15.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Mr. MADDEN moves to strike out, on page 17, line 15, the words "services in the District of Columbia, in accordance with."

The amendment was agreed to.

Mr. MADDEN. And I also ask unanimous consent that the spelling of the word "classification" be corrected.

There was no objection.

The Clerk proceeded with the reading of the bill and read to the end of line 5 on page 32.

Mr. MADDEN. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. TILSON, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 10982) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1926, and for other purposes, and had come to no resolution thereon.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. DENISON (at the request of Mr. WILLIAMS of Illinois), indefinitely, on account of illness.

To Mr. OLIVER of Alabama, for two days, on account of important business.

To Mr. BRAND of Georgia, until January 6, on account of important business.

To Mr. JOHNSON of Texas, for three days, on account of death of father.

To Mr. RICHARDS, for an indefinite period, on account of treatment for defective hearing.

ADJOURNMENT

Mr. MADDEN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 59 minutes p. m.) the House adjourned until to-morrow, Tuesday, December 30, 1924, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

754. A letter from the Secretary of War, transmitting a draft of proposed legislation "to authorize the payment of taxes on United States properties in Canada, to relieve disbursing officers, and dispose of certain munitions plants in Canada"; to the Committee on Military Affairs.

755. A letter from the Secretary of War, transmitting a draft of proposed legislation "authorizing an appropriation to continue construction of additional facilities at Walter Reed General Hospital"; to the Committee on Military Affairs.

756. A letter from the Secretary of the Navy, transmitting a list of disbursing officers of the Navy who have been relieved of losses from November 10, 1923, to and including December 12, 1924; to the Committee on Expenditures in the Navy Department.

757. A letter from the chairman of the national legislative committee of the American Legion, transmitting Sixth Annual Report of the American Legion at St. Paul, Minn., September 15 to 19, 1924 (H. Doc. No. 517); to the Committee on World War Veterans' Legislation and ordered to be printed, with illustrations.

758. A communication from the President of the United States, transmitting, with a letter from the Director of the Bureau of the Budget, a supplemental estimate of appropriation for the Navy Department for the fiscal year ending June 30, 1925, to provide for increasing the fire protection at the

Naval Observatory, Washington, D. C. (H. Doc. No. 518); to the Committee on Appropriations and ordered to be printed.

759. A communication from the President of the United States, transmitting, with a letter from the Director of the Bureau of the Budget, a supplemental estimate of appropriation for the legislative establishment of the United States, for conveying votes of electors for President and Vice President of the United States (H. Doc. No. 519); to the Committee on Appropriations and ordered to be printed.

760. A communication from the President of the United States, transmitting, with a letter from the Bureau of the Budget, a supplemental estimate of appropriation for the Department of the Interior, Bureau of Reclamation, for the fiscal year ending June 30, 1925, for the economic surveys of reclamation projects (H. Doc. No. 520); to the Committee on Appropriations and ordered to be printed.

761. A communication from the President of the United States, transmitting, with a letter from the Bureau of the Budget, a supplemental estimate of appropriation for the War Department for the fiscal year ending June 30, 1924, for the purchase of capital stock of the Inland Waterways Corporation (H. Doc. No. 521); to the Committee on Appropriations and ordered to be printed.

762. A letter from the Secretary of the Navy, transmitting a proposed draft of a bill "To authorize the Secretary of the Navy to extend the nurses' quarters at the naval hospital, Washington, D. C., and to construct necessary additional buildings at certain naval hospitals"; to the Committee on Naval Affairs.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. WINTER: Committee on War Claims. S. 1180. An act for the relief of J. B. Platt; without amendment (Rept. No. 1066). Referred to the Committee of the Whole House.

Mr. WINTER: Committee on War Claims. S. 1370. An act authorizing the granting of war-risk insurance to Capt. Earl L. Naiden, Air Service, United States Army; with an amendment (Rept. No. 1067). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 10401) granting a pension to Mary A. E. Howard; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 10476) granting a pension to Susan F. Rutherford; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 10793) granting a pension to Laura V. Adams; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 10819) granting an increase of pension to Clara Harlan; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 10464) granting an increase of pension to Ella M. Shaffer; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 10961) granting an increase of pension to Mary A. Baldrige; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. SMITH: A bill (H. R. 11063) to pension soldiers who were in the military service of the United States during the period of Indian wars, campaigns, and disturbances, and widows, minors, and helpless children of such soldiers, and to increase the pensions of Indian war survivors and widows; to the Committee on Pensions.

By Mr. THOMAS of Oklahoma: A bill (H. R. 11064) creating a national board of public works, defining the duties thereof, and for other purposes; to the committee on Public Buildings and Grounds.

By Mr. RAKER: A bill (H. R. 11065) to provide for the protection of certain navigable waters in the State of California; to the Committee on Rivers and Harbors.

By Mr. FRENCH: A bill (H. R. 11066) to authorize the construction of a bridge across the Pend d'Oreille River, Bonner

County, Idaho, at the Newport-Priest River Road crossing, Idaho; to the Committee on Interstate and Foreign Commerce.

Also, a bill (H. R. 11067) to provide for the relinquishment by the United States of certain lands to the county of Kootenai, in the State of Idaho; to the Committee on the Public Lands.

By Mr. MAJOR of Illinois: A bill (H. R. 11068) to appropriate \$15,000 for the purpose of purchasing a site for a Federal building and \$100,000 for the purpose of erecting a Federal building thereon, in the city of Hillsboro, Ill., and for other purposes; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 11069) to appropriate \$100,000 for the purpose of erecting a Federal building in the city of Carlinville, Ill., and for other purposes; to the Committee on Public Buildings and Grounds.

By Mr. THOMAS of Oklahoma: A bill (H. R. 11070) to amend an act entitled "An act to provide adjusted compensation for veterans of the World War, and for other purposes," and providing that any veteran of the World War holding an adjusted-service certificate may, at his option, secure a Government loan on such certificate, or surrender such adjusted certificate for cash; to the Committee on Ways and Means.

By Mr. MONTAGUE: A bill (H. R. 11071) to give the Supreme Court of the United States authority to make and publish rules in common-law actions; to the Committee on the Judiciary.

By Mr. BOX: A bill (H. R. 11072) to amend the immigration act of 1924 by making the quota provisions thereof applicable to Mexico, Cuba, Canada, and the countries of continental America and adjacent islands; to the Committee on Immigration and Naturalization.

By Mr. MOONEY: A bill (H. R. 11073) to authorize the demolition of the present river customs office building at Cleveland, Ohio, and for the reconstruction of a new building on its present site at a cost not exceeding \$15,000; to the Committee on Public Buildings and Grounds.

By Mr. MADDEN: A bill (H. R. 11074) to authorize the reduction of, and to fix, the rate of interest to be paid by carriers upon notes or other evidences of indebtedness heretofore issued under the provisions of section 207 of the transportation act, 1920, or section 210 of said act, as amended by an act approved June 5, 1920; to the Committee on Interstate and Foreign Commerce.

By Mr. DYER: A bill (H. R. 11075) to extend the limitations of time upon the issuance of medals of honor, distinguished-service crosses, and distinguished-service medals to persons who served in the Army, Navy, or Marine Corps of the United States during the World War; to the Committee on Military Affairs.

By Mr. KNUTSON: A bill (H. R. 11076) to amend an act entitled "An act to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes," approved September 21, 1922; to the Committee on Ways and Means.

By Mr. WILLIAMSON: A bill (H. R. 11077) authorizing the issuance of patents to the State of South Dakota for park purposes of certain lands within the Custer State Park, now claimed under the United States general mining laws, and for other purposes; to the Committee on the Public Lands.

By Mr. REED of West Virginia: A bill (H. R. 11078) to create and establish a commission, as an independent establishment of the Federal Government, to regulate rents in the District of Columbia; to the Committee on the District of Columbia.

Also, a bill (H. R. 11079) to authorize a five-year building program for the public-school system of the District of Columbia which shall provide school buildings adequate in size and facilities to make possible an efficient system of public education in the District of Columbia; to the Committee on the District of Columbia.

By Mr. RANKIN: A bill (H. R. 11080) for the restoration of the post-office building at Corinth, Miss.; to the Committee on Public Buildings and Grounds.

By Mr. HADLEY: A bill (H. R. 11081) to authorize an appropriation for the construction of a road on the Lummi Indian Reservation, Wash.; to the Committee on Indian Affairs.

By Mr. WILSON of Louisiana: A bill (H. R. 11082) authorizing an investigation, examination, and survey, for the control of excess flood waters of the Mississippi River below Red River Landing in Louisiana and on the Atchafalaya Outlet, by the construction and maintenance of controlled and regulated spillway or spillways, and for other purposes; to the Committee on Flood Control.

By Mr. CHINDBLOM: A bill (H. R. 11083) to amend section 1003 of the revenue act of 1924; to the Committee on Ways and Means.

Also, a bill (H. R. 11084) to amend paragraph (a) of section 1014 of the revenue act of 1924; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. AYRES: A bill (H. R. 11085) granting a pension to Eva A. Porter; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11086) granting an increase of pension to Rachel Dennis; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11087) granting an increase of pension to William A. Bettis; to the Committee on Pensions.

By Mr. BARBOUR: A bill (H. R. 11088) granting an increase of pension to Walter S. Reynolds; to the Committee on Pensions.

By Mr. BEERS: A bill (H. R. 11089) granting an increase of pension to Mary J. Miller; to the Committee on Invalid Pensions.

By Mr. BEGG: A bill (H. R. 11090) granting an increase of pension to Mary A. Schwab; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11091) granting an increase of pension to Sarah C. Dennis; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11092) granting an increase of pension to Mary E. Wentz; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11093) granting an increase of pension to Lavinia R. Porter; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11094) granting an increase of pension to Prudence E. Bair; to the Committee on Invalid Pensions.

By Mr. CANFIELD: A bill (H. R. 11095) granting a pension to Mathilda Hoff; to the Committee on Pensions.

By Mr. CANNON: A bill (H. R. 11096) granting a pension to Oliver Ellis; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11097) granting a pension to Jennie Wagner; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11098) granting an increase of pension to Eliza Price; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11099) granting a pension to Joseph Burnett; to the Committee on Invalid Pensions.

By Mr. CHINDELOM: A bill (H. R. 11100) granting an increase of pension to Sarah J. Mersereau; to the Committee on Invalid Pensions.

By Mr. ELLIOTT: A bill (H. R. 11101) granting an increase of pension to Mary Smith; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11102) granting an increase of pension to Amanda Tyner; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11103) granting a pension to John C. Gray; to the Committee on Invalid Pensions.

By Mr. FLEETWOOD: A bill (H. R. 11104) granting a pension to Alice J. Selby; to the Committee on Invalid Pensions.

By Mr. FOSTER: A bill (H. R. 11105) granting an increase of pension to Maria Bliss; to the Committee on Invalid Pensions.

By Mr. FREE: A bill (H. R. 11106) granting an increase of pension to Antonio Alberto Madero; to the Committee on Pensions.

By Mr. FREDERICKS: A bill (H. R. 11107) granting a pension to Adelaide E. Frieseke; to the Committee on Invalid Pensions.

By Mr. FRENCH: A bill (H. R. 11108) granting a pension to Joseph W. Campbell; to the Committee on Pensions.

By Mr. GREENWOOD: A bill (H. R. 11109) granting an increase of pension to Lewis C. Jones; to the Committee on Invalid Pensions.

By Mr. GARDNER of Indiana: A bill (H. R. 11110) granting a pension to Mary E. Bowman; to the Committee on Pensions.

By Mr. HADLEY: A bill (H. R. 11111) granting an increase of pension to Alice Luth; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11112) granting a pension to Edith Heude-Bronck; to the Committee on Invalid Pensions.

By Mr. HAUGEN: A bill (H. R. 11113) granting an increase of pension to Mary A. Burrell; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11114) granting an increase of pension to Ayner Browne; to the Committee on Pensions.

Also, a bill (H. R. 11115) granting a pension to Katherine S. Halfhill; to the Committee on Invalid Pensions.

By Mr. HAWLEY: A bill (H. R. 11116) granting an increase of pension to Elizabeth A. Lane; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11117) granting an increase of pension to Benjamin F. McKee; to the Committee on Invalid Pensions.

By Mr. WILLIAM E. HULL: A bill (H. R. 11118) granting an increase of pension to Ann Boggs; to the Committee on Invalid Pensions.

By Mr. JAMES: A bill (H. R. 11119) granting an increase of pension to Salome Trotochand; to the Committee on Pensions.

Also, a bill (H. R. 11120) granting an increase of pension to John G. MacFarlane; to the Committee on Pensions.

By Mr. KNUTSON: A bill (H. R. 11121) granting an increase of pension to David Ebner; to the Committee on Pensions.

By Mr. LINEBERGER: A bill (H. R. 11122) for the relief of C. P. Dryden; to the Committee on Claims.

By Mr. LONGWORTH: A bill (H. R. 11123) granting a pension to Joseph Rombach; to the Committee on Invalid Pensions.

By Mr. LOZIER: A bill (H. R. 11124) granting a pension to Noah S. Warner; to the Committee on Pensions.

Also, a bill (H. R. 11125) granting an increase of pension to Eliza Johnson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11126) granting an increase of pension to Henrietta M. Spears; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11127) granting a pension to Elizabeth Keller; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11128) granting an increase of pension to Polly Roundtree; to the Committee on Invalid Pensions.

By Mr. MADDEN: A bill (H. R. 11129) for the relief of the heirs of Frank Kleiminger; to the Committee on Claims.

By Mr. MANLOVE: A bill (H. R. 11130) granting a pension to Sarah A. Neece; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11131) granting a pension to Emma S. Jones; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11132) granting a pension to Bertha C. Hammer Rentfrow; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11133) granting a pension to Ella Coffman; to the Committee on Pensions.

Also, a bill (H. R. 11134) granting an increase of pension to Mary E. Fountain; to the Committee on Pensions.

Also, a bill (H. R. 11135) granting a pension to Mary E. Hood; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11136) granting an increase of pension to Jemima A. Grafton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11137) granting an increase of pension to Matilda J. Eubanks; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11138) granting an increase of pension to Ella Moore; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11139) granting an increase of pension to Nancy A. Murray; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11140) granting an increase of pension to Lucretia Sandlin; to the Committee on Invalid Pensions.

By Mr. MILLIGAN: A bill (H. R. 11141) granting a pension to Benjamin F. Ewing; to the Committee on Invalid Pensions.

By Mr. MURPHY: A bill (H. R. 11142) for the relief of William D. McKeefrey; to the Committee on Claims.

By Mr. ROBSON of Kentucky: A bill (H. R. 11143) granting a pension to John M. Day; to the Committee on Pensions.

Also, a bill (H. R. 11144) granting an increase of pension to Lindy Slusher; to the Committee on Invalid Pensions.

By Mr. RUBEY: A bill (H. R. 11145) granting an increase of pension to Mary A. Watkins; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11146) for the relief of Dennis W. Scott; to the Committee on Military Affairs.

By Mr. SANDERS of Indiana: A bill (H. R. 11147) granting an increase of pension to Benton Curtis; to the Committee on Pensions.

Also, a bill (H. R. 11148) granting an increase of pension to Mary R. Hamilton; to the Committee on Invalid Pensions.

By Mr. SMITH: A bill (H. R. 11149) granting a pension to John G. Williams; to the Committee on Pensions.

Also, a bill (H. R. 11150) granting a pension to Sarah J. Garthwait; to the Committee on Invalid Pensions.

By Mr. STALKER: A bill (H. R. 11151) granting a pension to Fannie M. Yarrington; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11152) granting a pension to Margaret C. Westbrook; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11153) granting a pension to Hattie E. Harvey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11154) granting a pension to Sate L. Retan; to the Committee on Invalid Pensions.

By Mr. SWANK: A bill (H. R. 11155) for the relief of John O'Brien; to the Committee on Military Affairs.

Also, a bill (H. R. 11156) granting an increase of pension to Catherine F. Edsall; to the Committee on Invalid Pensions.

By Mr. THOMAS of Oklahoma: A bill (H. R. 11157) for the relief of Annabel Young; to the Committee on Claims.

Also, a bill (H. R. 11158) for the relief of Lee N. Wallis; to the Committee on Claims.

By Mr. THOMPSON: A bill (H. R. 11159) granting an increase of pension to Lucy Lamb; to the Committee on Invalid Pensions.

By Mr. TINCER: A bill (H. R. 11160) granting a pension to Richard H. Williams, alias Humphrey Price; to the Committee on Invalid Pensions.

By Mr. TINKHAM: A bill (H. R. 11161) granting an increase of pension to Daniel W. Savage; to the Committee on Pensions.

Also, a bill (H. R. 11162) granting an increase of pension to Thomas E. Whalen; to the Committee on Pensions.

Also, a bill (H. R. 11163) for the relief of Capt. Asa G. Ayer; to the Committee on Claims.

By Mr. TREADWAY: A bill (H. R. 11164) granting an increase of pension to Alice L. Pond; to the Committee on Invalid Pensions.

By Mr. WILLIAMS of Texas: A bill (H. R. 11165) granting an increase of pension to Mary C. Marvin; to the Committee on Invalid Pensions.

By Mr. WURZBACH: A bill (H. R. 11166) for the relief of Joseph R. Gallagher; to the Committee on Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

3278. By the SPEAKER (by request): Petition of Nemiso Y. D. Roca, San Fernando, Pampanga, P. I., urging the independence of the Philippine Islands; to the Committee on Insular Affairs.

3279. Also (by request), petition of Grand Army of the Republic, opposing the coinage of the 50-cent Stone Mountain coin; to the Committee on Coinage, Weights, and Measures.

3280. Also (by request), petition of convention of the Seventh Day Baptist Church, Walworth, Wis., favoring the distribution of literature to schools and homes and the incorporation of regular instruction on the effects of narcotics in the curriculums of public schools and colleges; to the Committee on Printing.

3281. By Mr. BARBOUR: Resolution adopted by the Sacramento (Calif.) Bar Association, urging the enactment of legislation increasing the salaries of Federal judges; to the Committee on the Judiciary.

3282. By Mr. FULLER: Petition of the Reno (Nev.) Chamber of Commerce, favoring the enactment of the Gooding bill (S. 2327) to amend section 4 of the Interstate commerce act; to the Committee on Interstate and Foreign Commerce.

3283. Also, petition of the Western Glass Co., of Sreator, Ill., favoring increase of postal rates on all classes of mail except the first class; to the Committee on the Post Office and Post Roads.

3284. Also, petition of the Allied Postal Employees' Legislative Committee, of St. Louis, Mo., favoring speedy enactment of the bill (S. 1898) increasing pay of postal employees; to the Committee on the Post Office and Post Roads.

3285. Also, petition of the National Industrial Traffic League, opposing any general revision of freight rates, but that the entire question of freight-rate revision be left solely in the hands of the Interstate Commerce Commission; to the Committee on Interstate and Foreign Commerce.

3286. Also, petition of the Chicago Post Office Clerks' Union, No. 1, favoring enactment of the bill (S. 1898) for the readjustment of the salaries of postal employees; to the Committee on the Post Office and Post Roads.

3287. Also, petition of the Union Furniture Co., of Rockford, Ill., opposing the Howell-Barkley bill (H. R. 7358); to the Committee on Interstate and Foreign Commerce.

3288. Also, petition of the Merchants & Farmers Trust & Savings Bank, of Ottawa, Ill., and the Rockford National Bank, of Rockford, Ill., favoring the McFadden bill (H. R. 8887); to the Committee on Banking and Currency.

3289. Also, petition of the Emerson-Brantingham Co., of Rockford, Ill., opposing the Howell-Barkley bill (H. R. 7358) and the Gooding bill (S. 2327); to the Committee on Interstate and Foreign Commerce.

3290. By Mr. HAWLEY: Petition of 246 citizens of the State of Oregon, protesting against the passage of the Sunday observance bill (S. 3218); to the Committee on the District of Columbia.

3291. By Mr. MOONEY: Letter from S. Ulmer, indorsing bill to relieve stranded refugees in certain European cities; to the Committee on Immigration and Naturalization.

3292. By Mr. O'CONNELL of New York: Petition of Parent-Teachers' Association of Public School No. 99, Queens, Kew Gardens, Long Island, N. Y., favoring the postal salary increase bill (S. 1898); to the Committee on the Post Office and Post Roads.

3293. Also, petition of the Hollis Civic Association, of Hollis, Queensboro, N. Y., favoring the postal salary increase bill (S. 1898); to the Committee on the Post Office and Post Roads.

3294. Also, petition of the Ivy Club, of New York City, favoring the Perlman bill amending the immigration law; to the Committee on Immigration and Naturalization.

3295. By Mr. RAKER: Petition of Charles G. Bond, New York, N. Y., urging passage of the McFadden bill; to the Committee on Banking and Currency.

3296. Also, petition of Dried Fruit Association of California, San Francisco, Calif., resolution opposed to Senate Joint Resolution 107; to the Committee on Interstate and Foreign Commerce.

3297. Also, petition of G. F. McNoble, president California State Bar Association, Stockton, Calif., urging passage of the Reed bill for increase of Federal judicial salaries; to the Committee on the Judiciary.

3298. Also, petition of the National Council of Jewish Women, New York, N. Y., urging upon Congress the passage of a joint resolution admitting to the country such refugees who have visés and are physically, mentally, and morally acceptable under the immigration laws of the United States; to the Committee on Immigration and Naturalization.

3299. Also, petition of W. P. Wing, secretary California Wool Growers' Association, San Francisco, Calif., urging that additional appropriations be secured for the further development of the livestock market news service; to the Committee on Appropriations.

3300. Also, petition of W. P. Wing, secretary California Wool Growers' Association, San Francisco, Calif., urging the adoption of a national range policy applying to all public lands regardless of present status; to the Committee on the Public Lands.

3301. Also, petition of W. P. Wing, secretary California Wool Growers' Association, San Francisco, Calif., urging Congress to pass enabling legislation making it mandatory on all manufacturers to supply information regarding consumption of wool by the woolen and worsted spinners of the United States; also, urging that all animals, animal products, and other carriers originating in countries where infectious diseases are known to exist will be admitted only after strict inspection under Federal supervision; to the Committee on Agriculture.

3302. Also, petition of Chamber of Commerce of the State of New York, protesting against the child-labor amendment to Federal Constitution; to the Committee on the Judiciary.

3303. Also, petition of Mrs. Charles E. Gamble, California State Grange, Santa Rosa, Calif., protesting against the passage of the Howell-Barkley bill; to the Committee on Interstate and Foreign Commerce.

3304. Also, petition of A. W. McKenzie, secretary Bleber Farm Center, Bleber, Calif.; Milford Farm Bureau, Milford, Calif., and C. F. Lore, Madeline, Calif., protesting against the discontinuance of the land office at Susanville, Calif.; to the Committee on the Public Lands.

3305. Also, petition of N. H. Sloane, general manager California Development Association, San Francisco, Calif.; R. M. Hagen, general manager California Cattleman's Association, San Francisco, Calif., and Charles E. Virden, San Francisco, Calif., urging that \$65,000 be included in agricultural appropriation bill for forest experiment station, and urging \$1,000,000 instead of \$66,000 for cooperative fire-protection work under Clarke-McNary Act; to the Committee on Appropriations.

3306. Also, petition of Frank Winch, Wilmington, Del., protesting against the passage of the Brookhart game refuge bill; J. P. Cuenin, San Francisco, Calif., urging support of the game refuge bill; to the Committee on Interstate and Foreign Commerce.

3307. Also, petition of Jesse L. Taylor, Hayfork, Calif.; Theodore Orcutt, Tecnor, Calif.; Charles E. Colby, Oak Run, Calif.; Helen A. Cunningham, Chinese Camp, Calif.; Elmer H. Gum, Auburn, Calif., and 8 other signers, all indorsing and urging immediate passage of Senate bill 1898 for the increase of salaries to postal employees; to the Committee on the Post Office and Post Roads.

3308. Also, petition of D. W. Boylan, Johns-Manville Co. of California, San Francisco, Calif.; W. E. Johnson, secretary Aberdeen Chamber of Commerce, Aberdeen, Wash.; Pioneer Association of the State of Washington, protesting against changing the name of Mount Rainier; also W. J. Milroy, president

Thurston County Pioneer and Historical Society, Olympia, Wash., protesting against changing the name of Mount Rainier; to the Committee on the Public Lands.

3309. Also, petition of Abe Darlington, Placerville, Calif., and 37 other signers of a petition, protesting against the passage of the compulsory Sunday observance bill (S. 3218) or the passage of any other religious legislation; also, George H. Palmer, Anderson, Calif., and 89 other signers, protesting against the passage of this bill; to the Committee on the District of Columbia.

3310. By Mr. SMITH: Petition of Chamber of Commerce, American Falls, Idaho, urging the enactment of a universal draft law applicable to the resources of the country as well as to men, which it is believed will serve as a deterrent against possible unjust wars in the future; to the Committee on Military Affairs.

3311. By Mr. SINNOTT: Petition of sundry citizens of the State of Oregon, protesting against the passage of the Sunday observance law (S. 3218); to the Committee on the District of Columbia.

3312. By Mr. TINKHAM: Petition of the Army and Navy Union of the United States of America, Boston, Mass., favoring increase of pension to Civil and Spanish-American War veterans; to the Committee on Pensions.

3313. By Mr. WURZBACH: Petition of sundry citizens of San Antonio, in the State of Texas., protesting against the passage of Senate bill 3218, the Sunday observance bill; to the Committee on the District of Columbia.

SENATE

TUESDAY, December 30, 1924

The Chaplain, Rev. J. J. Muir, D. D., offered the following prayer:

O Lord, our God, we approach Thee this morning with thanksgiving, for Thou hast been very gracious unto us. Thou hast caused the days as they multiply to bring us fresh mercies and to qualify us for duties agreeable to Thy holy will. Grant that the admonitions of Thy providence and the directions of Thy spirit may enable us to understand more and more clearly the high obligations of service to Thee, our God, and to the country in which we live. The Lord glorify Himself in this hour. We ask in Jesus' name. Amen.

The reading clerk proceeded to read the Journal of yesterday's proceedings when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

PETITIONS AND MEMORIALS

Mr. BROOKHART presented the memorial of L. Haskell and sundry other citizens of Garwin, Iowa, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. McLEAN presented the petition of the Woman's Christian Temperance Union, of Danielson, Conn., praying for the passage of House bill 6645, the so-called Cramton bill, proposing to amend the national prohibition act; to establish a bureau of prohibition in the Treasury Department and to place its personnel under the civil service, etc., which was referred to the Committee on the Judiciary.

He also presented the petition of members of the congregation of St. Paul's Church, of New Haven, Conn., praying for the adoption of such measures as will aid in the establishment of world peace, which was referred to the Committee on Foreign Relations.

He also presented petitions of the United Spanish War Veterans of Hartford and Philip H. Sheridan Council No. 1467, Royal Arcanum of New Haven, both in the State of Connecticut, praying for the passage of legislation granting increased compensation to postal employees, which were referred to the Committee on Post Offices and Post Roads.

He also presented the petition of the Congregation B'Nai Jacob, of New Haven, Conn., praying for the admission into this country of certain aliens now stranded at various European ports, which was referred to the Committee on Immigration.

SETTLEMENT ON FEDERAL IRRIGATION PROJECTS

On motion of Mr. KENDRICK, the Committee on Irrigation and Reclamation was discharged from the further consideration of the bill (S. 3005) to provide for aided and directed set-

tlement on Government land in Federal irrigation projects, introduced by him December 8, 1924, and it was indefinitely postponed.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JONES of Washington (for Mr. McCORMICK):

A bill (S. 3777) to permit the United States of America to be made defendant, and to be bound by decrees and final judgments entered, in land-title registration proceedings in the circuit court of Cook County, Ill., and courts of appeal therefrom, under the provisions of an act concerning land titles, in force in the State of Illinois May 1, 1897; to the Committee on the Judiciary.

By Mr. CAPPER:

A bill (S. 3778) to establish standard weights for loaves of bread, to prevent deception in respect thereto, to prevent contamination thereof, and for other purposes; to the Committee on Agriculture and Forestry.

By Mr. KENDRICK:

A bill (S. 3779) to provide for aided and directed settlement on Government land in irrigation projects; to the Committee on Irrigation and Reclamation.

By Mr. McLEAN:

A bill (S. 3780) granting an increase of pension to Mary Duffy (with accompanying papers); to the Committee on Pensions.

By Mr. SWANSON:

A bill (S. 3781) granting an increase of pension to Marvel J. Nash; to the Committee on Pensions.

By Mr. HARRISON:

A bill (S. 3782) granting the consent of Congress to the Great Southern Lumber Co., a corporation of the State of Pennsylvania, doing business in the State of Mississippi, to construct a railroad bridge across Pearl River at approximately 1½ miles north of Georgetown, in the State of Mississippi; to the Committee on Commerce.

By Mr. RANSDALL:

A bill (S. 3783) to amend the United States cotton futures act and the United States cotton standards act; to the Committee on Agriculture and Forestry.

By Mr. CAMERON:

A bill (S. 3784) to provide for the acquisition of a site and the erection thereon of a Federal building at Yuma, Ariz.; to the Committee on Public Buildings and Grounds.

PROPOSED COMMITTEE ON WORLD WAR VETERANS' LEGISLATION

Mr. SHEPPARD. Mr. President, pursuant to the notice I gave on yesterday, I offer the following Senate resolution and ask its reference to the Committee on Rules.

The resolution (S. Res. 287) was read and referred to the Committee on Rules, as follows:

Resolved, That part 1, Rule XXV, Standing Rules of the Senate, be, and the same is hereby, amended by adding a new paragraph to read as follows:

Committee on World War Veterans' Legislation, to consist of 10 Senators.

CATHERINE V. COSTELLO

Mr. CURTIS submitted the following resolution (S. Res. 288), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay from the contingent fund of the Senate to Catherine V. Costello, widow of William J. Costello, late a private of the Capitol police, a sum equal to six months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered as including funeral expenses and all other allowances.

PRESIDENTIAL APPROVAL

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that on December 24, 1924, the President approved and signed the joint resolution (S. J. Res. 159) providing for the control and eradication of the European fowl pest and similar diseases in poultry.

THE INTERNATIONAL MAP OF THE WORLD (S. DOC. NO. 177)

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying papers, referred to the Committee on Foreign Relations and ordered to be printed:

To the Congress of the United States:

I transmit herewith a report by the Secretary of State recommending a request to Congress to enact legislation pro-

viding for an appropriation of \$30 for the payment for the calendar year 1925 of a contribution by the United States toward the secretarial expenses of the Bureau for the International Map of the World.

The matter is fully explained in the report of the Secretary of State. In view of the importance which the Secretary of the Interior attaches to this bureau and its work, I trust that the small appropriation recommended will be granted.

CALVIN COOLIDGE.

THE WHITE HOUSE,
Washington, December 30, 1924.

FEDERAL TRADE COMMISSION INVESTIGATION

The PRESIDENT pro tempore. Morning business is closed.

Mr. NORRIS. Mr. President, before routine morning business is closed I wish to remind the Chair that I introduced a resolution (S. Res. 286) on yesterday which went over under the rule. I would like to have the Chair lay the resolution before the Senate.

The PRESIDENT pro tempore. The Chair is very uncertain with regard to the matter. The Chair has held heretofore that only routine morning business can be considered save by unanimous consent pending what is known as the Muscle Shoals bill and the unanimous-consent agreement under which we are operating. The Chair is of the opinion that the resolution offered by the Senator from Nebraska is not included in routine morning business, and, while somewhat uncertain with regard to its decision, yet that has been the ruling of the Chair and will be adhered to unless the Senate decides otherwise.

Mr. NORRIS. I was laboring under the impression that a part of the routine morning business was a resolution coming over from the previous day, and that morning business was not finished until resolutions going over under the rule were taken up. It is so given in the rules, as I remember. Let me say to the Chair, however, that it was not my intention to press the resolution this morning if there was any Senator who objected to it, because I understand that the gentlemen's agreement, or whatever it may be called, under which we are working to-day is that no business shall be transacted except by unanimous consent, and I, of course, have no desire to violate that agreement. However, I do not want to be put in a position where I shall not be able to take up the resolution on Friday when we convene and the present agreement or understanding is no longer in force.

The PRESIDENT pro tempore. May the Chair state to the Senator from Nebraska that it is the opinion of the Chair that the resolution would come up automatically, as soon as the pending unfinished business is disposed of, at the close of the first routine morning business after that time?

Mr. NORRIS. I shall ask on Friday, after the Senate convenes and when the routine morning business has been disposed of, to have the resolution taken up. If the Chair is right in his construction, of course any objection would put it over to-day. I doubt that, but I will have to submit to the ruling. However, I do not want to be put in a position to-day where the resolution will automatically go over beyond Friday, because on Friday I want to have it considered. It ought to be considered before we dispose of the Muscle Shoals measure because it bears directly on the questions involved in that bill.

Mr. ROBINSON. May I make a suggestion to the Senator from Nebraska and the Chair in this connection? Perhaps the point of order might be laid over until Friday and determined then. If the resolution were brought up now I should be compelled under the agreement that was entered into before the holidays to object to its disposition until some Senators return who I think would be interested in being present.

Mr. NORRIS. I have no objection to that course. I have no desire to take any advantage of their absence.

Mr. ROBINSON. I suggest to the Senator that he withdraw for the present his request to take it up, so that the Senate may proceed to business by unanimous consent, and that he raise the question again on Friday.

Mr. NORRIS. In order that I may then raise the question and not block myself by anything that happens to-day, and still reserving the right to contend on Friday that it is a part of the routine morning business if I so desire, I ask unanimous consent that the resolution which I introduced and which went over under the rule be laid over until Friday without prejudice.

Mr. ROBINSON. That is satisfactory.

Mr. DIAL. I do not want it to be conceded that that is the correct legislative procedure, and therefore I shall have to object.

Mr. ROBINSON. I do not understand, if the Senator from South Carolina will permit me—

The PRESIDENT pro tempore. The Chair repeats that it is the opinion of the Chair that the resolution will come up, being laid before the Senate, at the close of morning business immediately after the disposition of the so-called Muscle Shoals bill.

Mr. ROBINSON. The Senator from Nebraska desires to avoid a ruling on that point at this time and others desire to do so, in order that business may be considered under the unanimous-consent agreement.

The PRESIDENT pro tempore. The Chair understood the Senator from South Carolina to object to the unanimous-consent request, and unless the Chair is overruled the resolution will come up automatically at the time I have indicated.

Mr. ROBINSON. The Chair understands that the Senator from South Carolina does not object to deferring the determination of the point of order until Friday. What he objects to is making the resolution a special order for Friday.

Mr. DIAL. I do not want to concede that we can make it a special order.

Mr. NORRIS. I have not asked that that be done.

Mr. DIAL. I do not want to waive any rights.

Mr. NORRIS. The Senator does not lose any rights.

Mr. DIAL. I do not see where the Senator would get by making that request.

Mr. NORRIS. I will say to the Senator very frankly—

The PRESIDENT pro tempore. The Chair will state the unanimous-consent request again. The Senator from Nebraska asks that the resolution introduced by him on yesterday shall lie over without prejudice.

Mr. DIAL. I do not object to that. There is nothing to that, because I do not concede that it can be taken up.

The PRESIDENT pro tempore. The Chair hears no objection, and it is so ordered.

ADJOURNMENT TO FRIDAY

Mr. CURTIS. I ask unanimous consent that when the Senate concludes its business to-day it shall adjourn to meet on Friday next at 12 o'clock.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Kansas? The Chair hears none, and it is so ordered.

THE CALENDAR

Mr. CURTIS. I ask unanimous consent that the Senate now proceed to the consideration of unobjected bills on the calendar under Rule VIII.

Mr. ROBINSON. Under Rule VIII?

Mr. CURTIS. Yes. That limits debate to five minutes.

Mr. ROBINSON. Under Rule VIII it is in order for any Senator to move to proceed to the consideration of a bill if objection be made. I suggest to the Senator from Kansas that he modify his request so that only unobjected bills shall be considered, and that all debate be limited to five minutes.

Mr. CURTIS. I intended to include that when I said unobjected bills. I ask unanimous consent that the Senate now proceed to the consideration of unobjected bills on the calendar, and that debate be limited on each bill to five minutes.

The PRESIDENT pro tempore. The Chair understands the request to be that the Senate now proceed to the consideration of unobjected bills on the calendar under Rule VIII—

Mr. CURTIS. No; that debate be limited to five minutes.

The PRESIDENT pro tempore. Debate is limited to five minutes under Rule VIII.

Mr. ROBINSON. But any Senator under Rule VIII may move to proceed to the consideration of a bill that is objected to, and if his motion prevails the limit is relaxed and debate is unlimited. The arrangement suggested by the Senator from Kansas, to which I consent, is that we proceed to the consideration of unobjected bills on the calendar, that it be not in order to move to proceed to the consideration of any bill that is objected to, and that all debate be limited to five minutes.

The PRESIDENT pro tempore. The Chair understands the modification proposed by the Senator from Arkansas to be accepted by the Senator from Kansas.

Mr. CURTIS. That is correct.

Mr. SMOOT. Just a word, Mr. President. If this request is agreed to, then any bill that may be objected to will not be considered to-day.

Mr. CURTIS. Certainly not.

Mr. ROBINSON. No; certainly not.

Mr. SMOOT. I do not want to have it understood that a bill may be brought up and five minutes' debate had on it even if there is objection to its consideration.

The PRESIDENT pro tempore. The Chair wants to have a clear understanding. The Chair understands that in the event any bill on the calendar is objected to a motion to proceed to the consideration of that bill shall not be in order.

Mr. ROBINSON. That is right.

The PRESIDENT pro tempore. Is there objection to the unanimous-consent agreement as requested? The Chair hears none, and it is so ordered. The Clerk will report the first bill on the calendar.

BILLS PASSED OVER

The bill (S. 56) for the allowance of certain claims for indemnity for spoillations by the French prior to July 31, 1801, as reported by the Court of Claims was announced as first in order on the calendar.

Mr. SMOOT. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 55) making an appropriation to pay the State of Massachusetts for expenses incurred and paid, at the request of the President, in protecting the harbors and fortifying the coast during the Civil War, in accordance with the findings of the Court of Claims and Senate Report No. 764, Sixty-sixth Congress, third session, was announced as next in order.

Mr. DIAL. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1181) naming the seat of Government of the United States was announced as next in order.

Mr. WILLIS. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 33) making eligible for retirement under certain conditions officers of the Army of the United States, other than officers of the Regular Army, who incurred physical disability in line of duty while in the service of the United States during the World War, was announced as next in order.

Mr. SMOOT. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

CAPT. RAMON B. HARRISON

A joint resolution (S. J. Res. 46) for the relief of Capt. Ramon B. Harrison was considered as in Committee of the Whole and was read, as follows:

Resolved, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged officers, Ramon B. Harrison, who was a captain of Infantry, United States Army, shall hereafter be held and considered to have been discharged honorably from the military service of the United States on the 23d day of December, 1920.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS AND RESOLUTIONS PASSED OVER

The joint resolution (S. J. Res. 60) to stimulate crop production in the United States was announced as next in order.

Mr. JONES of Washington. Let the joint resolution go over.

The PRESIDENT pro tempore. The joint resolution will be passed over.

The resolution (S. Res. 124) directing the Interstate Commerce Commission to secure information relative to amount of money expended for the purpose of creating public interest favorable to railroad sentiment was announced as next in order.

Mr. REED of Pennsylvania and Mr. BRUCE. Over.

The PRESIDENT pro tempore. The resolution will be passed over.

The bill (S. 185) to promote agriculture by stabilizing the price of wheat was announced as next in order.

Mr. SMOOT. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2401) providing for the compensation of retired warrant officers and enlisted men of the Army, Navy, and Marine Corps, or any other service or department created by or under the jurisdiction of the United States Government, and warrant officers and enlisted men of the Reserve Corps of the Army and Navy, was announced as next in order.

Mr. SMOOT. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

AMENDMENT OF THE PENAL CODE

The bill (S. 2691) to amend the Penal Code was announced as next in order.

Mr. JONES of Washington. I rather think the bill is of such importance that it ought to go over. I do not know that I have any objection to it, however.

Mr. WALSH of Montana. Perhaps if I state briefly what is contemplated by the bill the Senator will have no objection

to its consideration. It changes the law so that a conviction of a misdemeanor does not carry a forfeiture of civil rights unless the judgment of the court so provides.

Mr. JONES of Washington. That is the only change?

Mr. WALSH of Montana. That is all.

Mr. JONES of Washington. The committee were unanimous in reporting the bill?

Mr. WALSH of Montana. They were.

Mr. JONES of Washington. I withdraw my objection.

Mr. SMOOT. There is no report on the bill from the committee.

The Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on the Judiciary with an amendment, on page 2, line 1, after the word "follow," to strike out the remainder of the bill in the following words: "Or unless the defendant shall or did receive a sentence of imprisonment for more than one year. All laws or provisions of law conflicting herewith are hereby repealed," so as to make the bill read:

Be it enacted, etc., That section 335 of the Penal Code be amended to read as follows:

"Sec. 335. All offenses which may be punished by death, or imprisonment for a term exceeding one year shall be deemed felonies. All other offenses shall be deemed misdemeanors.

"No trial, plea, conviction, or sentence for any crime shall be deemed to have involved or shall involve and carry with it loss of citizenship or of civil rights, or make the accused a felon or infamous, unless the verdict of the jury or the sentence imposed upon the defendant shall or did expressly specify that the loss of civil rights is to follow."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (S. 2299) to validate the payment of commutation of quarters, heat, and light under the act of April 16, 1918, and of rental and subsistence allowances under the act of June 10, 1922, was announced as next in order.

Mr. SMOOT. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2149) to facilitate and simplify the work of the Forest Service, United States Department of Agriculture, and to promote reforestation, was announced as next in order.

Mr. SMOOT. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2150) to authorize arrests by officers and employees of the Department of Agriculture in certain cases and to amend section 62 of the act of March 4, 1909, entitled "An act to codify, revise, and amend the penal laws of the United States," was announced as next in order.

Mr. SMOOT. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2151) to increase the subsistence and per diem allowances of certain officers and employees of the Department of Agriculture was announced as next in order.

Mr. SMOOT. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1800) for the relief of Emelus S. Tozier was announced as next in order.

Mr. DIAL. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1639) to provide for the appointment of a court reporter by each judge of the United States district court, fixing their salaries and fees, defining their duties, and repealing all laws and parts of laws inconsistent herewith was announced as next in order.

Mr. JONES of Washington. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1387) to provide for payment of the amount of a war-risk insurance policy to a beneficiary designated by Capt. John W. Loveland, Jr., deceased, was announced as next in order.

Mr. SMOOT. Let the bill be read, Mr. President.

The PRESIDENT pro tempore. The bill will be read.

The reading clerk read the bill.

Mr. SMOOT. Mr. President, that whole subject matter is being considered now by a subcommittee, and they want to

arrive at some definite conclusion to recommend to the Senate for the handling of all of these cases. I think they all ought to be settled in the same way and at the same time, and for that reason I shall ask that this bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2685) for the relief of the Davis Construction Co. was announced as next in order.

Mr. WILLIS. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

AMENDMENT OF JUDICIAL CODE

The bill (S. 2060) to amend the Judicial Code, further to define the jurisdiction of the circuit courts of appeals and of the Supreme Court, and for other purposes, was announced as next in order.

Mr. JONES of Washington. Mr. President, I rather think that bill ought to go over.

Mr. ROBINSON. Mr. President, may we not have some statement concerning the bill? It has gone over a number of times, I think, and yet no Senator has ever stated any objection to it. I should like to have some Senator who is familiar with the bill take five minutes to state its nature and purpose.

Mr. JONES of Washington. Yes; I think the bill ought to be explained.

The PRESIDENT pro tempore. If the Chair may be indulged, the present occupant of the chair is the author of the bill, and it is perfectly obvious that it is a bill of such importance that it ought to be fully explained to the Senate. The present occupant of the chair has no objection to its being passed over.

Mr. ROBINSON. Very well; let it go over then.

Mr. FLETCHER. Mr. President, I understand that the bill has the approval of the full committee and is recommended by the Justices of the Supreme Court and is a very desirable piece of legislation. That is my understanding of the character of the bill.

Mr. ROBINSON. The report of the Judiciary Committee appears to be unanimous. I see no reason why we should not consider it at this time, unless some Senator objects to it.

Mr. WATSON. Mr. President, if the bill is one of importance and consequence why does not the present occupant of the chair take the floor and explain it to us, and then he can resume the chair afterwards? If it is a matter of immediate consequence and ought to be taken up, it seems to me that is the logical way to proceed.

The PRESIDENT pro tempore. The Chair is somewhat embarrassed, because he is the author of the bill; but he thinks it is due to the Senate that the bill should be explained, and he intends, when not in the chair, at some convenient time to ask that it be considered. The Chair does not think such a bill should be passed without any consideration by the Senate.

Mr. WALSH of Montana. Mr. President, I am very sure that the discussion of the subject could not be completed under the five-minute rule. The bill makes very important changes in the jurisdiction of the courts, particularly of the Supreme Court of the United States, that require, I think, very serious consideration by the Senate.

Mr. ROBINSON. Let it go over, then.

The PRESIDENT pro tempore. The bill will be passed over.

AKTIESELSKABET MARIE DI GIORGIO

The bill (H. R. 8235) for the relief of Aktieselskabet Marie di Giorgio, a Norwegian corporation of Christiania, Norway, was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. CAPPER subsequently said: Mr. President, I ask unanimous consent to return to Order of Business 401, House bill 8235, which we passed about an hour ago. It is a bill which authorizes a Norwegian corporation to bring suit in the court of admiralty to recover damages sustained by reason of a collision. Since we passed the bill I have received a letter from the Department of State requesting a change in the bill as passed by the House, and I therefore ask unanimous consent to return to it.

The PRESIDING OFFICER (Mr. WILLIS in the chair). Without objection, the action of the Senate in passing House bill 8235 is reconsidered. The bill is before the Senate and open to amendment.

Mr. CAPPER. The Department of State says:

The last proviso of the act as passed by the House of Representatives reads as follows: "and also that the said claimants agree to pay such costs and judgments as may be decreed against them."

The department says:

The Shipping Board is of the opinion that, as the Norwegian corporation has no property in this country, it may be impossible to enforce payment of any judgments or costs decreed against it and suggests that the proviso in question be eliminated and that there be substituted in place thereof a proviso that the corporation shall file a surety bond to secure the payment of any costs or judgments that may be decreed against it. It is accordingly suggested that the following proviso be substituted in place of the proviso quoted above:

"And also that the said Aktieselskabet Marie di Giorgio, within 30 days after the institution of any suit by it against the United States or against it by the United States, shall file a surety bond signed by such American surety company and in such amount as shall be agreed upon by the proctors for the respective parties or as shall be fixed by the court to secure payment of any costs or judgments which may be decreed against it."

That will come in at the end of the bill, on page 2, line 25.

Mr. FLETCHER. Mr. President, it seems to me that this is a rather important matter and that we ought not to be disposing of it in this kind of a way. Had it not better go over?

Mr. CAPPER. It is a mere formality. It is simply to protect the interests of the Government.

Mr. FLETCHER. I know it is, but it is a very important matter. What I was thinking was that we had better take a little time to get it in proper shape.

Mr. ROBINSON. Mr. President, I think the amendment is a proper one, and I see no objection to disposing of it now. The State Department has suggested the form which the amendment should take. It simply provides, as I understand, that these parties shall give security for the payment of costs which may be adjudged against them, they having no property within the jurisdiction of the court.

Mr. CAPPER. That is all there is to it. There is no possible objection to the amendment.

Mr. FLETCHER. I do not object to it. I merely made the suggestion.

The PRESIDING OFFICER. The Secretary will state the amendment offered by the Senator from Kansas.

The READING CLERK. In lieu of the last proviso in the bill it is proposed to insert the following:

And also that the said Aktieselskabet Marie di Giorgio, within 30 days after the institution of any suit by it against the United States or against it by the United States, shall file a surety bond signed by such American surety company and in such amount as shall be agreed upon by the proctors for the respective parties or as shall be fixed by the court to secure payment of any costs or judgments which may be decreed against it.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Kansas.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

MILITARY TARGET RANGE RESERVATION, UTAH

The bill (S. 1733) to authorize the Secretary of War to secure for the United States title to certain private lands contiguous to and within the Militia Target Range Reservation, State of Utah, was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That for the purpose of eliminating certain private holdings within the Militia Target Range Reservation, the Secretary of War is authorized to acquire by purchase the fee simple and absolute title to certain private lands located within the boundary lines of the Militia Target Range Reservation located in Utah and Salt Lake Counties, Utah, withdrawn and reserved by Executive order of the President dated April 24, 1914, and amended by Executive order of April 13, 1915.

Sec. 2. The Secretary of War is also hereby authorized to acquire by purchase for military purposes the complete title to certain other lands held under private ownership and situated contiguous to said Militia Target Range Reservation.

Sec. 3. The lands to be acquired under this act are to be used as a training camp for the National Guard, for other troops of the Army of the United States, and for other military purposes, and contain a total area of 7,221.21 acres, more or less. That for the purpose of acquiring titles to these lands and improvements thereon the sum of \$54,160 is hereby appropriated, out of any money in the Treasury not otherwise appropriated, which amount shall become immediately available upon the approval of this act.

Mr. ROBINSON. Mr. President, I think the Senator who introduced this bill should make a brief statement in connection with it.

Mr. SMOOT. Yes; I will.

Mr. President, the Government has established, about 18 miles from Salt Lake City, a target range, and it is not sufficient in area for the purpose. The authorities wanted to purchase enough land there to make it a permanent target range hereafter. It will cost the amount of \$57,000. The Senator will notice this settlement in the report:

During the past year it was impossible to lease the land in question, and it became necessary to send the Field Artillery units of the National Guard of Utah to California for field training.

I was told by the officer at Fort Douglas that the sending of the Field Artillery to California cost three times the amount of the purchase price of the land. It is within 18 miles of the city. It will be impossible to hold that as a target-practice range hereafter unless this additional land is purchased, and the department wants it.

Mr. ROBINSON. The appropriation carried by the bill appears to be \$54,160.

Mr. SMOOT. Yes.

Mr. ROBINSON. Does that include all of the expenditures which will be authorized by the bill?

Mr. SMOOT. All the expenditures; and not only that but it will pay for all that is on the land in the way of improvements.

Mr. ROBINSON. I see no objection to the consideration of the bill.

The PRESIDENT pro tempore. If there be no amendment to be proposed, the bill will be reported to the Senate.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (S. 246) for the relief of Margaret I. Varnum was announced as next in order.

Mr. DIAL. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 3091) declaring an emergency in respect of certain agricultural commodities, to promote equality between agricultural commodities and other commodities, and for other purposes, was announced as next in order.

Mr. McNARY. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

FRENCH SPOILIATION CLAIMS

Mr. BRUCE. Mr. President, may I ask—I happened to be entering the Chamber at the time—how Order of Business 422, Senate bill 56, relating to the claims for indemnity for French spoliation, came to be taken up at the time that it was?

Mr. FLETCHER. It was not taken up.

Mr. BRUCE. Just as I came in through the door I heard some Senator suggest that it go over, and I was curious to know how that bill came to be taken up at that time.

Mr. ROBINSON. Mr. President, if I may do so, I will state to the Senator that under the order under which the Senate is proceeding only unobjected bills may be considered, and an objection was made by some Senator to the consideration of that bill.

Mr. BRUCE. Yes; I understand it; but it was taken up as No. 1, and its calendar number seems to be 422. What I did not understand was why it should be taken up as No. 1.

Mr. ROBINSON. I did not understand that myself; but objection was made, and under the order under which we are proceeding it can not be considered at this time.

Mr. BRUCE. Very well, then.

BILLS PASSED OVER

The bill (H. R. 7111) to promote American agriculture by making more extensively available and by expanding the service now rendered by the Department of Agriculture in gathering and disseminating information regarding agricultural production, competition, and demand in foreign countries in promoting the sale of farm products abroad, and in other ways, was announced as next in order.

Mr. SMOOT. Let that go over, Mr. President.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1638) authorizing the Court of Claims to adjudicate the claim of Capt. David McD. Shearer for compensation for the adoption and use and acquisition by the United States Government of his patented inventions, was announced as next in order.

Mr. SMOOT. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 3011) to amend the act entitled "An act for the retirement of employees in the classified civil service, and

for other purposes," approved May 22, 1920, and acts in amendment thereof, was announced as next in order.

Mr. SMOOT. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 626) to prevent the sale of cotton and grain in future markets, was announced as next in order.

Mr. RANDELL. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1230) to amend section 11 of the act entitled "An act for the retirement of public-school teachers in the District of Columbia," approved January 15, 1920, was announced as next in order.

Mr. SMOOT. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1642) to provide for the purchase and sale of farm products was announced as next in order.

Mr. ERNST. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2570) to provide for the establishment, operation, and maintenance of foreign trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes, was announced as next in order.

Mr. JONES of Washington. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over. The joint resolution (S. J. Res. 47) establishing a congressional committee to consider ways and means through legislation to lighten the responsibilities of the President was announced as next in order.

Mr. FLETCHER. Let that go over.

The PRESIDENT pro tempore. The joint resolution will be passed over.

AMENDMENT OF WAR RISK INSURANCE ACT

The bill (S. 2155) to amend and modify the war risk insurance act was announced as next in order.

Mr. SMOOT. Mr. President, I think I shall have to ask that that bill go over now; but I will say to the junior Senator from Indiana [Mr. RALSTON] that that bill is being considered by the Finance Committee in connection with a complete revision of certain laws affecting the war risk insurance act. I shall ask that the bill go over, unless the Senator wants it indefinitely postponed.

Mr. RALSTON. No; I do not. The Senator is speaking of Senate bill 2155?

Mr. SMOOT. Senate bill 2155.

The PRESIDENT pro tempore. The Chair suggests that the committee has been discharged from the further consideration of this bill, and it is on the calendar, in view of the discharge of the committee.

Mr. SMOOT. The committee was discharged?

The PRESIDENT pro tempore. It so appears. The committee was discharged, the Chair is informed by the clerk, on the 24th of April.

Mr. RALSTON. That is correct. I asked that it be discharged.

Mr. SMOOT. Then, I will ask that it go over.

Mr. RALSTON. If the Senator please, I will take it up with him later. It may go over for the time being.

The PRESIDENT pro tempore. The bill will be passed over.

JOINT RESOLUTION AND BILL PASSED OVER

The joint resolution (S. J. Res. 87) authorizing the erection of a flagstaff at Fort Sumter, and for other purposes, was announced as next in order.

Mr. DIAL. Let that go over.

The PRESIDENT pro tempore. The joint resolution will be passed over.

The bill (S. 2284) to provide for the construction of certain public buildings in the District of Columbia was announced as next in order.

Mr. SMOOT. Mr. President, the Senator from Florida [Mr. FLETCHER] offered an amendment to that bill, and I suppose he will want a vote upon it. There is not a quorum here, and therefore I shall have to ask that the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

CONSTRUCTION OF VESSEL FOR COAST GUARD

The bill (H. R. 6817) to provide for the construction of a vessel for the Coast Guard was considered as in Committee of the Whole.

Mr. ROBINSON. Mr. President, I understand that this is a House bill and that its passage is recommended by the Secretary of the Treasury, and that there is real need for the vessel.

Mr. JONES of Washington. There is real need for it.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

OGDEN CHAMBER OF COMMERCE

The bill (S. 660) for the relief of the Ogden Chamber of Commerce was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with an amendment, on page 1, line 6, after the words "sum of," to strike out "\$603.03" and insert "\$651.68," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay to the Ogden Chamber of Commerce, Ogden, Utah, out of any money in the Treasury not otherwise appropriated, the sum of \$651.68, as reimbursement for expenses incurred by such chamber of commerce in connection with the purchase of land and water rights for the United States Government for the use of the Ogden Arsenal.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

Mr. ROBINSON. Mr. President, I think we ought to have an explanation of this bill.

Mr. SMOOT. I can give it to the Senator in a very few words.

At the time the arsenal was built at Ogden—I forget the amount of money that was spent there for that purpose, but there were certain lands that had to be purchased by the Government before the recommendation was made for an appropriation for the building of the arsenal. Those lands were purchased by the Chamber of Commerce of Ogden for the Government, and they borrowed the money at the bank for the purpose of paying for the lands. The Government paid the principal only, claiming that they had no right to pay the interest that the chamber of commerce paid. They paid \$600 interest, as provided for in the bill.

Mr. ROBINSON. Part of it is interest. Part of it is fees for abstracts and stamp tax on a deed.

Mr. SMOOT. Yes.

Mr. ROBINSON. It frequently happens that a community, out of its desire to get a public building erected, pays such expenses as these without requiring the Government to reimburse the community for them. Frequently arrangements are made that the Government shall buy the land, and the local commercial organizations arrange about the title.

Mr. SMOOT. Not in the case of an arsenal. I never understood why the people wanted it anywhere near the city, but it is there, and the explosives are stored there for the Government. I do not know what would happen if there should be an explosion at any time.

Mr. ROBINSON. Is the bill favorably recommended by the War Department?

Mr. SMOOT. It is. It is a department bill, drawn not by me but by the department.

Mr. ROBINSON. I shall not object to its consideration.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (S. 2586) for the relief of Robert June was announced as next in order.

Mr. DIAL. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1548) to amend section 9 of an act entitled "An act to define, regulate, and punish trading with the enemy, and for other purposes," approved March 4, 1923, as amended, was announced as next in order.

Mr. ROBINSON. Mr. President, this appears to be a very important bill. I remember that it was discussed in the Senate for quite a length of time and a great diversity of opinion arose concerning it. In that view of the matter, I shall have to ask that it go over.

The PRESIDENT pro tempore. The bill will be passed over. The bill (S. 3010) to amend the classification act of 1923, approved March 4, 1923, was announced as next in order.

Mr. SMOOT. Let that go over, Mr. President.

The PRESIDENT pro tempore. The bill will be passed over.

ALIEN PROPERTY TRADE INVESTMENT CORPORATION

The joint resolution (S. J. Res. 121) to create a body corporate by the name of the "Alien Property Trade Investment Corporation" was announced as next in order.

Mr. SMOOT. Mr. President, can the Senator from South Carolina [Mr. DIAL] explain briefly what the joint resolution means? It is a long measure, and I have not had time to read it, or the report, either.

Mr. DIAL. I shall be glad to explain it.

Mr. SMOOT. It seems to me that it is a very important measure to pass without some understanding or discussion of it.

Mr. DIAL. Mr. President, I was exceedingly anxious to get this joint resolution passed at the last session. It would have aided the country greatly then, particularly the farming element of the country. I still think it might be well to pass it.

The object of the joint resolution is to encourage trade with the people of Germany, Austria, and Hungary. The Alien Property Custodian has in his possession a large sum of money belonging to the individuals of those countries, which fund was impounded some time ago to be held until the claims of our people against those Governments shall be settled. This joint resolution provides a commission, composed of the Secretary of the Treasury, the Alien Property Custodian, and three others, I believe, to be appointed by the President, to lend that fund on proper security to the inhabitants of those three countries. The fund is to be used merely as a revolving fund with which to export our surplus agricultural products. Security is to be deposited with that commission here.

Mr. ROBINSON. Mr. President, will the Senator yield to a question?

Mr. DIAL. Certainly.

Mr. ROBINSON. The proposal is to take something like \$150,000,000 of the Alien Property Custodian fund, which belongs to private individual aliens, and loan it out and do business on it?

Mr. SMOOT. Without security?

Mr. DIAL. Oh, no.

Mr. ROBINSON. Well, whether with or without security?

Mr. SMOOT. It says without security.

Mr. ROBINSON. It seems to me that when the United States Government creates a corporation to engage in business it ought to take its own money or the money of its own citizens rather than the money of aliens. I believe that the time is coming when this Government ought to pay to the owners of that property the sums due them. This is private property; and the honor of this Government, the traditions of the Government, and the precedents require that we shall regard it as sacred.

Mr. DIAL. The Senator from South Carolina is just as much opposed to the Government going into business as any other Senator, and this could be justified only on the ground that that fund is already impounded and that the owners of it are getting no benefit from it. It would give the people in those countries something with which to go to work. I do not believe in donations. I believe in helping people help themselves, and I believe that this fund should be held by the United States Government until claims of our individual citizens against those countries are settled.

Mr. ROBINSON. Will the Senator yield for a question?

Mr. DIAL. Certainly.

Mr. ROBINSON. This Government made a separate treaty of peace with Germany, and entered into an agreement with that Government by which this fund should be held as in the nature of collateral security to secure the payment by Germany of the private claims of American citizens against the German Government. Under those circumstances, and under the further consideration that this is private property, does the Senator feel that this Government ought to loan the money out for the purpose of enabling people to carry on commercial business?

Mr. DIAL. I would not favor such action as a rule. I favor it only as an emergency measure. The fund would not be placed beyond that agreement. It would be held intact, and, to be frank, my object was to help the cotton mills of Germany, Austria, and Hungary to get the raw material with which to operate. We would thereby give the people of those countries employment, and we would also thereby aid, in a measure, in getting rid of the surplus in this country. The same would apply to wheat and other agricultural products; but, to be perfectly frank, I was particularly anxious about cotton, because we have a surplus in this country, and I want that gotten rid of. At the same time this bill would help the people of this country get rid of their surplus and would give the people of other countries an opportunity to go to work and to make their own living. It would also help us to get a good interest on this fund. It would keep the fund sacred, it being used merely to aid people to go to work, instead of lying idle here in our Treasury Department.

Mr. SWANSON. Does not the Senator think that part of that fund would get into Germany. It seems to me this measure's very purpose would destroy the purpose of the trust. This fund is impounded with two trusts attached to it—one for the individuals who own it; secondly, as collateral security,

as suggested by the Senator from Arkansas [Mr. ROBINSON], to pay American people who were injured by Germany. If the fund were transferred to Germany and loaned there, how could we have control of it?

Mr. DIAL. They would have to deposit security for it with the commission. Otherwise they would not get the fund. I believe in the sacredness of obligations just as much as does the Senator from Virginia, and I do not at all advocate allowing the fund to get beyond our reach.

The PRESIDENT pro tempore. The time of the Senator has expired. Is there objection?

Mr. FESS. Let it go over.

The PRESIDING OFFICER. The joint resolution will go over.

BILLS PASSED OVER

The bill (S. 1232) for the relief of Stephen A. Winchell was announced as next in order.

Mr. DIAL. I ask that that bill be passed over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 6896) to amend an act entitled "The classification act of 1923," approved March 4, 1923, was announced as next in order.

Mr. SMOOT. Let the bill be passed over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2525) for the relief of Henry Martin was announced as next in order.

Mr. SMOOT. I notice that the bill has an adverse report.

Mr. DIAL. Let it go over.

The PRESIDENT pro tempore. The bill was reported adversely.

Mr. ROBINSON. Under the usual practice of the Senate, when a bill is reported adversely it is indefinitely postponed, and I suggest that we take that action in this case.

The PRESIDENT pro tempore. If there is no objection, the bill will be indefinitely postponed.

PALESTINE TROUP

The bill (S. 3090) for the relief of Palestine Troup was announced as next in order.

Mr. DIAL. I ask that the bill may go over.

Mr. WARREN. I hope the Senator will not object to the consideration of this bill. It is for the relief of an old Civil War veteran who has but a few years to live, and it only provides for a correction of his record. He wants to have it passed more in the interest of his children than to provide him with a pension.

Mr. DIAL. I will ask that it go over until I have had an opportunity to examine it. The Senator may call it up later.

The PRESIDENT pro tempore. Objection being made, the bill will be passed over.

MEMORIAL BRIDGE ACROSS THE POTOMAC RIVER

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 3173) to provide for the construction of a memorial bridge across the Potomac River from a point near the Lincoln Memorial, in the city of Washington, to an appropriate point in the State of Virginia, and for other purposes, which was read, as follows:

Be it enacted, etc., That the commission created by section 23 of the act approved March 4, 1913 (37 Stat. p. 885), is hereby authorized and directed to proceed at once with the construction of a memorial bridge across the Potomac River from the vicinity of the Lincoln Memorial, in the city of Washington, to an appropriate point in the State of Virginia, including appropriate approaches, roads, streets, boulevards, avenues, and walks leading thereto on both sides of said river, together with the landscape features appertaining thereto, all in accordance with the design, surveys, and estimates of cost transmitted by said commission to Congress under date of April 22, 1924: *Provided*, That said commission may make such changes in design and location of said bridge, without increasing the total cost of the project, as in its discretion may be found to be necessary or advisable.

SEC. 2. That the execution of the project herein and hereby authorized shall be carried out under the general supervision of the Arlington Memorial Bridge Commission in the immediate charge of the executive officer of the said commission, and that said construction shall be entered upon as speedily as practicable in accordance with the plans submitted by the said commission and shall be prosecuted to completion by contracts or otherwise, as may be most economical and advantageous to the Government and approved and ordered by the said commission in a total sum not to exceed \$14,750,000, which sum is authorized to be appropriated from any moneys available or that may become available in the Treasury of the United States.

SEC. 3. That the said executive officer of the said Arlington Memorial Bridge Commission is hereby authorized, with the approval of the said commission, to employ the services of such engineers, architects, sculptors, artists, and other personnel as shall be determined to be necessary without reference to civil-service requirements and at rates of pay authorized by said commission: *Provided*, That such officers of the United States Corps of Engineers as may be considered necessary by said commission may be detailed by the President on this work for such periods as the commission may require.

SEC. 4. That the said Arlington Memorial Bridge Commission is hereby authorized to occupy such Government-owned lands as may be necessary for the bridge project authorized herein, and on completion of the project to transfer to the park system under the Chief of Engineers, United States Army, all or such portions of such lands as the said commission may, in its discretion, decide to be necessary.

SEC. 5. That the said Arlington Memorial Bridge Commission is hereby authorized to procure, by purchase in the open market, or otherwise, as may be most advisable, or by condemnation, such privately owned lands as may be necessary for approaches on the Virginia shore and to allow B Street NW., Washington, D. C., to be opened up from the Capitol to the Potomac River in accordance with the said plans of the said commission: *Provided*, That any condemnation carried out under this act shall be in accordance with the provisions of the act of Congress approved August 30, 1890, providing for a site for the enlargement of the Government Printing Office.

SEC. 6. That the project herein authorized may be prosecuted by direct appropriations or by continuing contracts, or by both direct appropriations and continuing contracts: *Provided*, That the expenditures in any year shall not exceed the amounts for the corresponding year as shown in the 10-year program of expenditures and construction contained in the report of the said commission.

SEC. 7. That said commission shall annually submit to Congress, through the Bureau of the Budget, a statement of sums of money previously expended and an estimate of the total sum of money necessary to be expended in the next succeeding year to carry on the work authorized by this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

HARRIMAN GEOGRAPHIC CODE SYSTEM

The joint resolution (S. J. Res. 41) authorizing a joint committee of both Houses to investigate the Harriman Geographic Code System, now in use by the War Department, with a view to ascertaining the adaptability and application of said system in the several executive departments and administrative branches of the Government and to rendering a just compensation to the owner thereof, was announced as next in order.

Mr. SMOOT. Let the joint resolution go over.

The PRESIDENT pro tempore. The joint resolution will be passed over.

BENNING NATIONAL FOREST, GA.

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 1033) to establish the Benning National Forest in the State of Georgia, which was read, as follows:

Be it enacted, etc., That the military reservation at Camp Benning, Ga., described in General Orders, No. 54, War Department, Washington, November 14, 1921, is hereby established as the Benning National Forest, to be administered by the Secretary of Agriculture under such rules and regulations and in accordance with such general plan as may be jointly approved by the Secretary of Agriculture and the Secretary of War, to provide for the use and occupation of such lands and for the sale of products from such lands.

SEC. 2. That such national forest shall remain subject to the unhampered use of the War Department for military purposes, shall not be subject to appropriation or disposal under any public land law of the United States, and nothing in this act shall be construed to relinquish the authority over such lands as a military reservation now vested in the War Department.

SEC. 3. That any moneys available for the use, maintenance, improvement, protection, and general administration of the national forests may be available for use in the Benning National Forest. All receipts from the sale of products from or for the use of lands in such forest shall be covered into the Treasury as miscellaneous receipts, forest reserve fund, but 35 per cent of such receipts shall be available to the Secretary of Agriculture for the construction of roads and trails within such forest.

SEC. 4. That any person who shall violate any provision of this act or any rule or regulation promulgated thereunder shall be guilty of a misdemeanor and upon conviction thereof shall be fined not more than \$500 or imprisoned for not more than one year, or both.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ARBITRATION OF DISPUTES ARISING OUT OF CONTRACTS, ETC.

The bill (S. 1005) to make valid and enforceable written provisions or agreements for arbitration of disputes arising out of contracts, maritime transactions, or commerce among the States or Territories or with foreign nations was announced as next in order.

Mr. ROBINSON. This appears to be a very important bill. I do not want to object to its consideration, but the Senate should be advised as to what its purposes are and what its effects would be.

Mr. WALSH of Montana. Mr. President, I can state, for the information of the Senator, what the bill is intended to accomplish. I feel like saying in this connection, however, that the Senator's colleague, the junior Senator from Arkansas [Mr. CARAWAY] has some objections to the bill, and I do not feel like urging its consideration in his absence.

In short, the bill provides for the abolition of the rule that agreements for arbitration will not be specifically enforced. That is a rule which has obtained in the English and American systems of jurisprudence. The business interests of the country find so much delay attending the trial of lawsuits in courts that there is a very general demand for a revision of the law in this regard. So the bill provides that whenever parties agree in their contracts to submit controversies arising under the contracts to arbitration, and then either one refuses to carry out that agreement by appointing an arbitrator, as is provided in the provision for arbitration, the other party may institute his suit in court, and recite the facts in relation to the agreement and the refusal upon the part of the other party to appoint an arbitrator as is provided in the contract, whereupon the court will appoint an arbitrator, and the arbitration will proceed.

Mr. ROBINSON. Because of the absence of the Senator who is opposed to this bill, or who desires to submit amendments to it, I shall object to its present consideration.

Mr. DIAL. Mr. President, I hope we can get the bill passed very soon after the junior Senator from Arkansas returns. There is a great demand for its passage.

Mr. ROBINSON. I myself have no objection to the consideration of the bill, but I feel constrained to make the objection because I am informed that a Senator who can not be here to-day does object.

Mr. DIAL. I am not asking that the bill be now considered. The PRESIDENT pro tempore. The bill will be passed over.

FISH-CULTURAL STATION AT ORANGEBURG, S. C.

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 3084) to enlarge the fish-cultural station at Orangeburg, S. C. The bill had been reported from the Committee on Commerce with an amendment in line 3, after the words "sum of," to strike out "\$50,000" and to insert in lieu thereof "\$25,000," so as to make the bill read:

Be it enacted, etc., That the sum of \$25,000, or so much thereof as may be necessary, be, and the same is hereby, authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, for the enlargement of the Orangeburg fish-cultural station in the State of South Carolina, including the purchase of additional land, the construction of buildings, ponds, improvements to water supply, and for the purchase of equipment.

The amendment was agreed to.

The bill was reported to the Senate as amended and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

JOHN W. DILKS

The bill (H. R. 7296) for the relief of John W. Dilks was announced as next in order.

Mr. DIAL. Let the bill go over.

Mr. BRUCE. Mr. President, I hope the Senator will withdraw his objection. This bill has been most thoroughly and most exhaustively considered, and the Committee on Military Affairs came to the conclusion that it was eminently a meritorious bill; so I hope the Senator from South Carolina will withdraw his objection.

Mr. DIAL. Mr. President, I have not had an opportunity to read the bill and the report. I merely see that it is a bill providing relief in the case of one of the deserters in the war of 1861.

Mr. BRUCE. It is, but the circumstances were such as to satisfy us absolutely that this man did not desert. He was captured and subsequently paroled, but before he was paroled he disappeared from sight completely, and it was supposed he

had deserted; but, in point of fact he did not desert, if the evidence is to be believed, and we thought it was to be believed. He was simply captured on the field of battle and spirited away, was lost sight of in Washington, and was entered as a deserter; but afterwards, as soon as his parole ran out, he reenlisted in the West and served faithfully until the end of the war. The Committee on Military Affairs very frequently turns down such applications.

Mr. DIAL. Did the Senator say this man reenlisted?

Mr. BRUCE. He did; and I will say another thing. This man did not want any pension. What he wanted to do was to vindicate his honor, and when he made his application he was particular to request that no pension should be granted to him; but we thought as we were satisfied that he had never deserted it was only right that he should receive his pension. The fact that the bill accords him a pension is not in the least due to his solicitation, but only through our voluntary action. So I trust the Senator from South Carolina will make at least one exception.

Mr. DIAL. I do not want to make any exceptions, but I do not desire to do anybody an injustice, and I had not read the report. But I see that the Senator is correct. The report states that—

The records of the War Department show him as a deserter as of August 29, 1862, which was about the time he was captured and paroled.

Mr. BRUCE. On the field of the second battle of Bull Run.

Mr. DIAL. The report continues:

Not hearing from his command, he went West and enlisted in the One hundred and forty-sixth Illinois Infantry and served faithfully until the close of the war, thereby indicating he was not a willful deserter.

Therefore it indicates he was not a deserter, and if he was not a deserter I am willing that the bill shall go through.

Mr. BRUCE. It is an absolutely clear case, in our judgment. We considered it most carefully, as the House committee has done.

Mr. DIAL. I had not read the report.

Mr. BRUCE. I understand, and I hope the Senator will withdraw his objection.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which proposes that in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, John W. Dilks, who was a private of Company E, Seventy-second Regiment New York Volunteer Infantry, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a member of that organization on or about the 29th day of August, 1862; but provides that no pension, pay, or allowance shall be held to have accrued prior to the passage of the act.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

NURSE CORPS OF THE ARMY AND NAVY

The bill (S. 3285) to provide retirement for the Nurse Corps of the Army and Navy was announced as next in order.

Mr. SMOOT. I ask that the bill may go over.

The PRESIDENT pro tempore. The bill will be passed over.

SWEDISH FISHING BOAT "LILLY"

The bill (S. 2458) to authorize the payment of an indemnity to the Swedish Government for the losses sustained by its nationals in the sinking of the Swedish fishing boat *Lilly* was considered as in Committee of the Whole.

The bill had been reported from the Committee on Foreign Relations with an amendment, on page 1, line 8, after the name "*Lilly*," to insert "or any other parties pecuniarily interested," so as to make the bill read:

Be it enacted, etc., That there is hereby authorized to be paid to the Government of Sweden, out of any money in the Treasury not otherwise appropriated, as a matter of grace and without reference to the question of liability therefor, as full indemnity for the losses sustained by the owners and crew of the Swedish fishing boat *Lilly*, or any other parties pecuniarily interested, through the sinking of that vessel by the United States Army transport *Antigone* on March 23, 1920, an amount equivalent to 26,381 kroner on the date of the approval of this act, as recommended by the President in his message of January 3, 1924.

Mr. McNARY. Mr. President, I do not see the sponsor of the bill in the Senate. This is a most important measure, and I would like to have some statement of the facts appertaining to the relief that is sought. Otherwise, I shall object to its consideration.

Mr. WILLIS. Mr. President, possibly I will not be able to give the details which the Senator from Oregon might very properly desire, but I have a distinct recollection that this bill was considered in the Committee on Foreign Relations. Perhaps the Senator from Arkansas will recall the measure. I do recall that it was very thoroughly considered.

Mr. ROBINSON. What is the bill to which the Senator refers?

Mr. WILLIS. It is Senate bill 2458. It was given to the Senator from New Hampshire [Mr. MOSES] to report. My recollection is that the committee was convinced that the bill is a just and equitable measure. What is the recollection of the Senator from Arkansas?

Mr. ROBINSON. My recollection is that this vessel, the *Lilly*, a Swedish vessel, was destroyed by a United States Army transport, and that as an act of grace it was deemed wise and proper for the United States Government to reimburse the owners of the vessel, through the Swedish Government, for the loss of the vessel. I think there is no question about the merit of the claim, and the opinion of the Foreign Relations Committee was unanimous with respect to it.

Mr. WILLIS. It is my recollection that the committee was unanimously of the opinion that the bill should be passed.

Mr. FLETCHER. Its passage was recommended by the President and also by the State Department.

Mr. McNARY. I withdraw my objection.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Committee on Foreign Relations.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

NORWEGIAN STEAMSHIP "HASSEL"

The bill (S. 2718) to authorize the payment of an indemnity to the Government of Norway on account of losses sustained by the owners of the Norwegian steamship *Hassel* as the result of a collision between that steamship and the American steamship *Ausable*, was announced as next in order.

Mr. SHIPSTEAD. Mr. President, the Senator from New Hampshire [Mr. MOSES] has sent word to me asking that this bill be laid over for the present, and, to comply with the request of the Senator, I ask that that be done.

The PRESIDENT pro tempore. The bill will be passed over.

CLOSING CERTAIN STREETS IN THE DISTRICT OF COLUMBIA

The bill (S. 1179) to authorize the Commissioners of the District of Columbia to close certain streets, roads, or highways in the District of Columbia rendered useless or unnecessary by reason of the opening, extension, widening, or straightening, in accordance with the highway plan of other streets, roads, or highways in the District of Columbia, and for other purposes, was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Commissioners of the District of Columbia be, and they are hereby, authorized to close Broad Branch Road between Jocelyn and Thirty-first Streets, Piney Branch Road between Spring Road and Blair Road, Pierce Mill Road between Tilden Street and Wisconsin Avenue, Belt Road between Wisconsin Avenue and Chevy Chase Circle, Colfax Street through square 712, Queens Chapel Road between Bladensburg Road and Irving Street, Grant Road between Wisconsin Avenue and Connecticut Avenue, and such other streets, roads, or highways, or parts of streets, roads, or highways, as may, in the judgment of the Commissioners of the District of Columbia, become useless or unnecessary by reason of the opening, extension, widening, or straightening, in accordance with the highway plan of a street, road, or highway in the District of Columbia by dedication, purchase, or condemnation; the title to the part or parts of the streets, roads, or highways so closed to revert to the abutting property owners: *Provided*, That the consent of the owners of all the property abutting on the street, road, or highway, or a part of street, road, or highway, proposed to be closed be obtained.

SEC. 2. That whenever a street, road, or highway, or any part of a street, road, or highway, is sought to be closed in accordance with the provisions of this act, a plat showing the street, road, or highway, or part of the street, road, or highway, to be closed by the said commissioners, as provided herein, shall be prepared by the surveyor of the District of Columbia and approved by the Commissioners of the District of Columbia and ordered by the said commissioners to be recorded in the

office of the surveyor of the District of Columbia, and the area to be apportioned to each property owner abutting on the street, road, or highway, or part of street, road, or highway, closed by the said commissioners, as provided herein, shall be determined by the said commissioners and shall be shown by plats and computations prepared by the surveyor of the District of Columbia, and said apportioned areas shall be assessed on the books of the assessor of the District of Columbia the same in all respects as other private property in the District of Columbia.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CIVIL WAR FORTS PARKWAY IN DISTRICT OF COLUMBIA

The bill (S. 1340) to make the necessary survey and to prepare a plan of a proposed parkway to connect the old Civil War forts in the District of Columbia, was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That for the purpose of preserving the sites of the old Civil War forts which formed a part of the defenses of Washington and to make them accessible to the public, the Commissioners of the District of Columbia are hereby authorized and directed to make a survey and plan and to submit same to Congress at the earliest practicable date, with recommendation as to what lands should be acquired to provide a continuous parkway of suitable width connecting the sites of the following old forts: Fort Greble, Fort Lincoln, Fort Carroll, Battery Ricketts, Fort Stanton, Fort Wagner, Fort Baker, Fort Davis (United States owned), Fort Dupont (United States owned), Fort Shaplin, A Battery, Fort Mahan, Fort Bunker Hill, Fort Totten, Fort Slocum, Fort Stevens, Fort Detrussey, Fort Bayard, Battery Kemble, Battery Vermont (United States owned), and Battery Parrott, together with an estimate of the cost of such acquirement, including the cost of such of said old forts as are not now owned by the United States. In the preparation of the survey and plan herein directed the commissioners shall confer with the Federal Highway Commission in order that upon completion of said plan the necessary steps may be taken to incorporate it into the highway system of the District of Columbia, under the authority granted by the act of March 4, 1915 (U. S. Stat. L. vol. 37, chap. 150, p. 949), and shall also obtain the advice of the National Commission of Fine Arts.

For the employment of such expert assistance and other services as may be necessary, and for other necessary expenses in connection with the work of the commissioners, the sum of \$5,000 is hereby authorized.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (S. 1934) to amend, revise, and reenact section 549 of subchapter 4 of the Code of the District of Columbia, relating to the appointment of deputy recorder of deeds and fixing the compensation therefor, was announced as next in order.

Mr. SMOOT. There is no report accompanying the bill, and I ask that it may go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1935) to amend, revise, and reenact subchapter 3, sections 546 and 547 of the Code of Law of the District of Columbia, relating to the recording of deeds of chattels, was announced as next in order, and the reading clerk proceeded to read the bill.

Mr. ROBINSON. Before a further reading of the bill, it would be well for some Senator familiar with it to state in what respect it changes the existing law.

Mr. SMOOT. The Senator from Delaware [Mr. BALL] is not here. He introduced the bill and reported it from the committee.

Mr. ROBINSON. I think the bill had better go over, in the absence of the Senator reporting it.

The PRESIDENT pro tempore. The bill will be passed over.

COMPULSORY SCHOOL ATTENDANCE, DISTRICT OF COLUMBIA

The bill (S. 2842) to provide for compulsory school attendance, for the taking of a school census in the District of Columbia, and for other purposes, was announced as next in order.

Mr. ROBINSON. This is a very important bill. It provides for compulsory education in the District of Columbia. While I do not wish to imply opposition to the measure, I think it ought to be considered a little more fully than can be done to-day, and I suggest that it go over.

Mr. CAPPER. Mr. President, will the Senator withhold his objection just a moment?

Mr. ROBINSON. Certainly.

Mr. CAPPER. A similar bill passed the Senate in the last Congress unanimously. It has been very carefully considered by the committee and is greatly desired by the Board of Education, by the superintendent of education, and by the Commissioners of the District of Columbia. However, in the last Congress it failed of passage in the House.

Mr. WALSH of Montana. I wish to ask the Senator from Kansas how this bill differs, if at all, from the ordinary State compulsory education act?

Mr. CAPPER. It is in line with the laws of 38 States. The compulsory attendance law we have in the District of Columbia at this time is almost a dead letter. It provides for compulsory school attendance between the ages of 6 and 14. There are only five States in the Union at this time that have as lax a law as that provision. The bill provides for compulsory attendance between the ages of 6 and 18.

Mr. WALSH of Montana. When was the existing law passed?

Mr. CAPPER. Sixteen years ago. It is really out of date and is certainly wrong in its provisions.

Mr. SMOOT. Can the Senator state how many employees it is going to take to administer the change in the law?

Mr. CAPPER. Not to exceed two more than are now employed.

Mr. SMOOT. The bill does not so indicate. First there is a director to be appointed—

whose rank shall correspond to that of other directors who serve as officers of the Board of Education and who shall be paid the same salary as said directors, and who shall be known as the director of the department of school attendance and work permits, and also to appoint such a number of attendance officers, inspectors, clerks, and other assistants as shall be necessary to carry out the provisions of this act.

Then it proceeds:

Such appointments, other than that of the director of said department and clerks, shall be made from a list of applicants obtained from open competitive examinations.

Evidently the bill is broad enough to provide for another bureau in some department of the Government.

Mr. CAPPER. A great deal of this work the board is attempting to do now, but not effectively. The bill simply coordinates the duties that have been handled in a very unsatisfactory way by a number of other employees. There are a number of clerks connected now with the Board of Education who are engaged in this work. The estimate is that it would not cost to exceed \$10,000 a year more than the department is costing at this time.

Mr. ROBINSON. Does the Senator state that the bill was considered at length by the committee and unanimously reported?

Mr. CAPPER. It was.

Mr. ROBINSON. I shall make no objection to its consideration.

Mr. SMOOT. I shall not object to it either, but I am a little doubtful about the wisdom of its passage.

There being no objection, the bill was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc.—

ARTICLE I.—COMPULSORY SCHOOL ATTENDANCE

SECTION 1. Every parent, guardian, or other person residing permanently or temporarily in the District of Columbia who has custody or control of a child between the ages of 7 and 16 years shall cause said child to be regularly instructed in a public school or in a private or parochial school or instructed privately during the period of each year in which the public schools of the District of Columbia are in session: *Provided*, That instruction given in such private or parochial school, or privately, is deemed equivalent by the Board of Education to the instruction given in the public schools.

SEC. 2. Any child between the ages of 14 and 16 years who has completed satisfactorily the eighth-grade course of study prescribed for the public elementary schools of the District of Columbia, or a course of study deemed by the Board of Education equivalent thereto, may be excused by the superintendent of schools from further attendance at school under the provisions of this act, provided he is actually, lawfully, and regularly employed.

SEC. 3. The Board of Education of the District of Columbia may issue a certificate excusing from attendance at school a child who, upon examination ordered by such board, is found to be unable mentally or physically to profit from attendance at school: *Provided*, *however*, That if such examination shows that such child may benefit from specialized instruction adapted to his needs, he shall attend upon such instruction.

SEC. 4. The Board of Education shall define in its rules and regulations valid excuses for absence from school, and the absence of a child between the ages of 7 and 16 years for any reason other than so defined as valid shall be unlawful.

SEC. 5. An accurate daily record of the attendance of all children between the ages of 7 and 16 years shall be kept by the teachers of every public, private, or parochial school and by every teacher giving instruction privately. Such record shall at all times be open to the school-attendance officers or other persons authorized to enforce this act, who may inspect and copy the same.

SEC. 6. It shall be the duty of every principal or head teacher of every public, private, or parochial school, or private teacher to report to the department of school attendance and work permits the name and address of any child between the ages of 7 and 16 years enrolled in his school whenever such child has been absent from school two day sessions or four one-half day sessions or more in any school month, together with the reason for such absence as far as known.

SEC. 7. The parent, guardian, or other person residing permanently or temporarily in the District of Columbia and having charge or control of any child between the ages of 7 and 16 years who is unlawfully absent from public or private school or private instruction shall be guilty of a misdemeanor, and upon conviction of failure to keep such child regularly in public or private school or to cause it to be regularly instructed in private, shall be punished by a fine of \$10 or by commitment to jail for five days, or by both, at the discretion of the court: *Provided*, That each two days such child remains away from school unlawfully shall constitute a separate offense: *Provided further*, That upon conviction of the first offense sentence may, upon payment of costs, be suspended and the defendant placed on probation.

ARTICLE II.—SCHOOL CENSUS

SECTION 1. That it shall be the duty of the director of school attendance and work permits, under instruction of the superintendent of schools, approved by the Board of Education, to cause to be made a complete census of all children between the ages of 3 and 18 years permanently or temporarily residing in the District of Columbia, and annually thereafter or as frequently as may be found necessary or desirable. Such census shall be amended from day to day as changes of residence occur among children within the ages prescribed in this act, and as other persons come within the ages prescribed, and as other persons within such ages shall become residents of the District. The record of such enumeration of children shall give the full name, address, race, sex, and date and place of birth of every such child, the school attended by him, and if the child is not at school the name and address of his employer, and the name, address, and occupation of the parents or guardian.

SEC. 2. It shall be the duty of the principal or head teacher of every public, private, or parochial school or private teacher, in accordance with the rules adopted by the Board of Education, to report to the director of the department of school attendance and work permits the name, address, sex, age, and race of every child under 18 years of age residing permanently or temporarily in the District of Columbia who enrolls in or withdraws from his school.

SEC. 3. Any parent, guardian, custodian, principal, or teacher of a child between the ages of 3 and 18 who willfully neglects or refuses to provide the information required by this act, or who knowingly makes any false or untrue statement, shall be guilty of a misdemeanor and on conviction shall be punished by a fine of \$10 or by commitment to jail for five days, or by both, at the discretion of the court.

ARTICLE III.—ADMINISTRATION

SECTION 1. The Board of Education is hereby authorized to consolidate the administrative duties incident to the enforcement of the provisions of this act and of the act to regulate child labor under a single division, to be known as the department of school attendance and work permits.

SEC. 2. The Board of Education is hereby authorized, empowered, and directed to appoint a director of said department whose rank shall correspond to that of other directors who serve as officers of the Board of Education, and who shall be paid the same salary as said directors, and who shall be known as the director of the department of school attendance and work permits, and also to appoint such a number of attendance officers, inspectors, clerks, and other assistants as shall be necessary to carry out the provisions of this act.

Such appointments, other than that of the director of said department and clerks, shall be made from a list of applicants obtained from open competitive examinations conducted by the respective boards of examiners of the Board of Education, and designed to test the fitness of the applicants for the duties to be performed.

SEC. 3. That the juvenile court of the District of Columbia is hereby given jurisdiction in all cases arising from this act.

SEC. 4. The act of Congress approved June 8, 1906, entitled "An act providing for compulsory education in the District of Columbia," and all other acts or parts of acts inconsistent herewith are hereby repealed.

SEC. 5. That this act shall take effect from the date of its enactment.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

REGULATION OF MILK CONTAINERS

The bill (S. 3280) to regulate in the District of Columbia the traffic in sale and use of milk bottles, cans, crates, and other containers of milk and cream to prevent fraud, deception, and for other purposes, was announced as next in order.

Mr. DIAL. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

TITLE TO LAND IN THE CITY OF WASHINGTON

The bill (S. 3053) to quiet title to original lot 4, square 116, in the city of Washington, D. C., was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of War is hereby authorized and directed to correct the records of the War Department in respect of original lot 4, in square 116, in the city of Washington, D. C., the title to which the records of his office show to be in the United States, upon the filing by the present owners of the lot of sufficient proof that the said owners or the party under whom they claim have been in actual possession of the said lot for an uninterrupted period of not less than 20 years, so that the said records shall show the title to said lot to be in the said owners.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MISSISSIPPI RIVER BRIDGE

The bill (S. 3292) granting the consent of Congress to the city of Hannibal, Mo., to construct a bridge across the Mississippi River at or near the city of Hannibal, Marion County, Mo., was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the city of Hannibal, Mo., to construct, maintain, and operate a bridge and approaches thereto across the Mississippi River at a point suitable to the interests of navigation at or near the city of Hannibal, Marion County, Mo., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MILITARY TELEGRAPH CORPS OF THE ARMY

The bill (S. 1535) granting relief to persons who served in the Military Telegraph Corps of the Army during the Civil War was announced as next in order.

Mr. DIAL. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

ORVILLE PAUL

The bill (H. R. 4432) for the relief of Orville Paul was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury of the United States not otherwise appropriated, to Jennie Kingston, the legal guardian of Orville Paul, the sum of \$2,500, in full settlement for personal injuries sustained by Orville Paul by reason of the explosion of a bomb under the direction of the war-loan organization of the eighth Federal reserve district in connection with the Victory loan drive at De Sota, Mo.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ESTATE OF BENJAMIN BRAZNELL

The bill (S. 1202) for the relief of the estate of Benjamin Braznell was announced as next in order.

Mr. DIAL. Let the bill go over.

The PRESIDING OFFICER (Mr. WATSON in the chair). The bill will be passed over.

ALBERT E. MAGOFFIN

The bill (S. 3066) for the relief of Albert E. Magoffin was announced as next in order.

Mr. DIAL. Let the bill go over.

Mr. WILLIS. Mr. President, will the Senator withhold the objection for a moment? I think if he were acquainted with the facts he would not object to the bill. It does not propose to grant a pension; neither does it propose to change the records. If the Senator has the report before him, he will discover there some very interesting information. First, I

invite his attention to a statement made by a former distinguished Member of this body—indeed, it was that affidavit which drew my attention to the bill—a statement by Hon. J. B. Foraker, who was a comrade of this man and who knew personally of the circumstances.

Here are the facts. The man received an honorable discharge, but it chanced that in the hurry of making out the discharge papers the particular injury referred to was not included. There were other reasons for his discharge, but this one was not mentioned. Senator Foraker states clearly that he distinctly remembers about the injury and that it ought to have been included. That is on page 2 of the report the Senator has before him. Further, General Charlton, then in command of the regiment, stated that he very distinctly remembered the injury to Mr. Magoffin's ankle. There is an affidavit signed by some four or five comrades and there does not seem to be any question about the facts.

What is here proposed? It is rather a matter of honor than of financial relief. It is not proposed to change the pension which he now gets, nor is it proposed to change the record, but it is proposed simply to pay to him the residue of the bounty which is due him. At the time he enlisted he was promised a bounty of \$100. Twenty-five dollars was paid, and it is proposed in the bill to pay this old ex-soldier the balance of \$75.

Mr. DIAL. It is true the amount is small, but I see from the report, on page 3, that the man is already getting a pension of \$72 a month. If we are going to come back here and settle little promises made from 1862 to 1865, it would seem to me the Senate would be submerged in the details of minor matters. If the man is getting \$72 a month, and no doubt he has been getting it for a long time, that is a sufficient pension. I ask that the bill go over.

The PRESIDING OFFICER. Does the Senator object?

Mr. DIAL. I object.

The PRESIDING OFFICER. The bill will be passed over.

GREENPORT BASIN & CONSTRUCTION CO.

The bill (H. R. 3348) authorizing the Secretary of the Treasury to pay a certain claim as the result of damage sustained to the marine railway of the Greenport Basin & Construction Co. was announced as next in order.

Mr. ROBINSON. Let the bill go over.

The PRESIDING OFFICER. The bill will be passed over.

ESTATE OF ROBERT M. BRYSON

The bill (S. 2223) for the relief of the estate of Robert M. Bryson, deceased, was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to William J. Fredericks, executor of the estate of Robert M. Bryson, deceased, the sum of \$12,299.41 in full satisfaction of all claims of the estate arising out of the use of the steamer *Rosedale* by the Navy Department of the United States.

Mr. DIAL. I would like to have an explanation of the bill. I have not had time to study the report.

Mr. PEPPER. This is a case in which the claimant represents the estate of one who was the owner of a vessel which was used by the Government in time of war. When the time came to adjust the compensation for the use of the vessel, the Navy Department made a proposition or finding respecting the amount payable for compensation. It was regarded by the claimant as inadequate, and while the parties were debating the question of adjustment the appropriation under which the claim could have been paid was exhausted. The claimant subsequently accepted the figures of the Navy Department.

The bill, which is unanimously reported by the Committee on Claims, is a bill for payment to the estate of the deceased owner of the vessel of the precise sum which the Navy Department has found to be justly due for the use of the vessel in war time. I very much hope that no objection will be pressed. It was a World War claim and not an old Civil War claim.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

RINALD BROS.

The bill (S. 2833) for the relief of Rinald Bros., of Philadelphia, Pa., was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized to pay to Rinald Bros., of Philadelphia, Pa., out of any money in the Treasury not otherwise appropriated, the sum of \$645, as an additional price for paint in excess of the amount named

in the contract between Rinald Bros. and the Quartermaster's Department, at Philadelphia, for the year ending June 30, 1917.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CHRISTINA CONNIFF

The bill (S. 3235) for the relief of Christina Conniff was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Director of the United States Veterans' Bureau be, and he is hereby, authorized and directed to resume and complete the remainder of the payments due to Christina Conniff, widow and beneficiary of Robert E. Conniff, deceased, according to the terms of his Government life insurance policy No. K-181801.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

FANNIE M. HIGGINS

The bill (H. R. 1860) for the relief of Fannie M. Higgins was announced as next in order.

Mr. DIAL. I would like to have the bill explained.

Mr. ROBINSON. Let the bill go over.

The PRESIDING OFFICER. The bill will be passed over.

RHODE ISLAND STATE CLAIM

The bill (S. 3252) referring the claim of the State of Rhode Island for expenses during the war with Spain to the Court of Claims for adjudication was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the items of the claim of the State of Rhode Island against the United States for expenses incurred and paid in aiding the United States to raise its Volunteer Army in the war with Spain, which items, either in whole or in part, were rejected by the accounting officers of the Treasury Department, be, and the same are hereby, referred to the Court of Claims for adjudication and report to Congress.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

GRACE BUXTON

The bill (H. R. 5967) for the relief of Grace Buxton was announced as next in order.

Mr. ROBINSON. Let the bill go over.

The PRESIDING OFFICER. The bill will be passed over.

FIRST INTERNATIONAL BANK OF SWEETGRASS, MONT.

The bill (S. 2680) for the relief of the First International Bank of Sweetgrass, Mont., was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Interior is hereby authorized, in his discretion, to issue patent to the First International Bank of Sweetgrass, Mont., for the south half of section 25, township 37 north, range 5 west, Montana principal meridian, upon payment by said bank of the value of said land, to be fixed by the Secretary of the Interior, less any amounts loaned by said bank to Stephen Horgasz and remaining unpaid: *Provided*, That in no event shall patent be issued to said bank for said land except upon payment therefor by said bank at the rate of not less than \$1.25 per acre.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

RELIEF OF CERTAIN ENTRYMEN IN MONTANA

The bill (H. R. 3511) to extend relief to the claimants in township 16 north of ranges 32 and 33 east, Montana meridian, Montana, was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That if by reason of the adjustment to the plat of resurvey of entries in township 16 north of ranges 32 and 33 east of the Montana principal meridian, Montana, entrymen or their assigns have heretofore acquired or may hereafter acquire patents to a less area than such entries when made were believed to contain, the Secretary of the Interior may, under such rules and regulations as he may prescribe, cause patents to issue to such entrymen or their assigns for such area of surveyed, unreserved, unappropriated, nonmineral public land in the State of Montana, not containing merchantable timber, as when added to the area to which the entries were adjusted will equal the area the entries were supposed to contain when made: *Provided*, That applications for such additional area shall be filed within six months from the date of the issuance of patent or within six months from the passage hereof if patent

has already issued: *Provided further*, That patents for such additional area shall issue without further final proof and without payment of fees or commissions.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

PERMANENT COURT OF INTERNATIONAL JUSTICE

The resolution (S. Res. 234) advising the adherence of the United States to the existing Permanent Court of International Justice, with certain amendments, was announced as next in order.

Mr. SMOOT. Let the resolution go over.

The PRESIDING OFFICER. The resolution will be passed over.

MIGRATORY BIRD REFUGES

The bill (S. 2913) for the establishment of migratory-bird refuges to furnish in perpetuity homes for migratory birds, the establishment of public shooting grounds to preserve the American system of free shooting, the provision of funds for establishing such areas, and the furnishing of adequate protection for migratory birds, and for other purposes, was announced as next in order.

Mr. SMOOT. Let the bill go over.

Mr. ROBINSON. I ask the Senator to withhold his objection for a moment for the purpose of enabling me to offer an amendment. I shall not ask further consideration of the bill than to present the amendment, which I understand is acceptable to the proponents of the bill.

The PRESIDING OFFICER. Is there objection?

Mr. SMOOT. I object to the consideration of the bill itself, I object to passing it at all.

Mr. ROBINSON. I am not proposing to have the bill passed. I want to have an amendment agreed to.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Arkansas? The Chair hears none, and the bill is before the Senate as in Committee of the Whole for the purpose of amendment.

Mr. ROBINSON. I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The Senator from Arkansas offers an amendment, which will be read.

The READING CLERK. At the end of the bill, page 9, after line 24, insert:

Lands acquired, held, or used by the United States for military purposes shall not be subjected to any of the provisions of this act.

Mr. ROBINSON. This amendment was agreed to before in the Senate when a similar bill was passed on a previous occasion. As already stated, it is acceptable to the proponents of the bill and has the approval of the War Department. I understand the author of the bill has no objection to it.

Mr. BROOKHART. I have no objection to the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Arkansas.

The amendment was agreed to.

The PRESIDING OFFICER. On objection of the Senator from Utah, the bill goes over.

R. E. SWARTZ AND OTHERS

The bill (S. 2778) for the relief of R. E. Swartz, W. J. Collier, and others was announced as next in order.

Mr. SMOOT. Let the bill go over.

Mr. SHEPPARD. May I submit an explanation to the Senator from Utah?

Mr. SMOOT. Certainly.

Mr. SHEPPARD. The bill proposes to pay the farmers in certain so-called noncotton zones in Texas who were prevented by an order of the State government, issued at the instance of the Federal Government, from growing cotton in those zones during the year 1918 in order to stop the pest known as the pluk boll worm. The State government has already paid two-thirds of the loss, over \$400,000. The bill proposes to pay the share of the Federal Government, which is something like \$250,000, going to some 1,400 farmers, the average payment to each being about \$143. Since 1920 the agricultural appropriation bill has carried an amount to take care of the Federal Government's share of such losses in ensuing years. The pest made its appearance first in 1917 and 1918, and no provision was made for reimbursement for that year. The bill is on the same basis as payment by the Federal Government of its share of losses occasioned to owners of cattle by Government destruction to prevent the spread of the foot-and-mouth disease. This is simply the Federal Government's one-third of the losses sustained by cotton growers in 1918 in carrying out official orders to refrain from cotton growing in that year.

Mr. SMOOT. I will ask the Senator to let the bill go over to enable me to examine the report.

Mr. SHEPPARD. Very well.

The PRESIDING OFFICER. The bill will be passed over.

BILL PASSED OVER

The bill (S. 443) for the relief of the William J. Oliver Manufacturing Co. and William J. Oliver, of Knoxville, Tenn., was announced as next in order.

Mr. WALSH of Montana. Mr. President, I should like to inquire why a claim of this kind does not take the usual course of adjudication before the War Department or the Court of Claims, and why we should be called upon to pass a special act with reference to it? It seems to me a rather extraordinary thing that we should be called upon to pass upon the justice of the amount of claims of this character.

Mr. SMOOT. That is true. It ought to be done in that way. Let it go over, Mr. President.

Mr. WALSH of Montana. I ask that the bill go over.

The PRESIDING OFFICER. The bill will be passed over.

NASH MOTORS CO.

The bill (S. 1893) to refund certain duties paid by the Nash Motors Co. was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the Nash Motors Co., a corporation organized under the laws of the State of Maryland, the sum of \$1,223.30, as full payment to the said Nash Motors Co. of all duties levied upon an automobile chassis, the property of said company, of American manufacture and entitled to free entry under the provisions of paragraph 404 of the tariff act, and paid by the said Nash Motors Co. upon the importation of the said automobile chassis into this country.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

FOREST FIRES IN MONTANA

The bill (S. 308) to reimburse the State of Montana for expenses incurred by it in suppressing forest fires on Government land during the year 1919, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with an amendment to strike out all after the enacting clause and to insert:

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to the State of Montana, out of any money in the Treasury not otherwise appropriated, the sum of \$26,746.17, on account of money expended by the State in the suppression of forest fires on Government lands during the year 1919.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (S. 3050) for the relief of the Turner Construction Co., of New York City, was announced as next in order.

Mr. DIAL. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 2731) for the relief of the chamber of commerce of the city of Northampton, Mass., was announced as next in order.

Mr. FLETCHER. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

KATE REANEY ZEISS, ADMINISTRATRIX

The bill (S. 2478) to carry out the findings of the Court of Claims in the case of Kate Reaney Zeiss, administratrix of William B. Reaney, survivor of Thomas Reaney and Samuel Archbold, against the United States, was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Kate Reaney Zeiss, administratrix of William B. Reaney, survivor of Thomas Reaney and Samuel Archbold, the sum of \$34,161.63, being the amount found due by the Court of Claims, as reported to Congress in S. Doc. No. 146, Fifty-ninth Congress, second session.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

JAMES E. JENKINS

The bill (S. 2879) for the relief of James E. Jenkins was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to James E. Jenkins, Reno, Nev., out of any money in the Treasury not otherwise appropriated, the sum of \$75.55, to reimburse him for money expended for excise tax on automobile purchased by authority of the Bureau of Indian Affairs, and tax on freight upon automobile, and for money expended for necessary clerical assistance.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (H. R. 5762) for the relief of Julius Jonas was announced as next in order.

Mr. ROBINSON. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 1648) for the relief of José Louzau was announced as next in order.

Mr. DIAL. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (H. R. 2806) for the relief of Emil L. Flaten was announced as next in order.

Mr. FLETCHER. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

SALE OF CERTAIN PUBLICATIONS

The bill (S. 685) to authorize the Secretary of Commerce to sell certain department publications and to provide for crediting the department's printing allotment with the proceeds, was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the Secretary of Commerce be, and he is hereby, authorized to sell, at a price to be fixed by him based on the cost of paper and presswork, such technical, scientific, statistical, and other publications issued by the Department of Commerce or any bureau, office, or service therein as he may deem best for the public interest: *Provided,* That the receipts from such sales shall be deposited in the Treasury and credited to, and to that extent increase, the department's allotment of the appropriation for printing and binding for any fiscal year within which such deposits may be made: *Provided further,* That nothing herein contained shall be construed to prevent the usual free distribution of any publications to officials of the Government or to foreign governments, libraries, and scientific associations and institutions of learning as provided by law.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBINSON. Mr. President, the bill that has just been disposed of is Order of Business 669. May I inquire what disposition was made of Order of Business 668?

The PRESIDING OFFICER. There is no bill of that number on the calendar.

Mr. SMOOT. That was passed before.

Mr. ROBINSON. I find it in my record.

Mr. WALSH of Montana. Order of Business 668 was recommended to the Committee on the Judiciary, and is now before that body.

Mr. ROBINSON. Very well.

PUBLICATION OF OFFICIAL PAPERS OF UNITED STATES TERRITORIES

The bill (S. 2935) for the publication of official papers of the Territories of the United States now in the national archives was announced as next in order.

Mr. RALSTON. Mr. President, the committee has reported this bill with an amendment, on page 3, line 1, to insert the words "authorized to be." I move that the amendment be adopted.

Mr. SMOOT. Mr. President, there is no report from the committee on this bill. Can the Senator tell the Senate what the cost of this publication will be?

Mr. RALSTON. It is proposed to appropriate \$25,000 a year.

Mr. SMOOT. A year?

Mr. RALSTON. Yes.

Mr. SMOOT. How long will it take to get this information together?

Mr. RALSTON. The estimate has been given me that perhaps it will take two years to do the work. It is a very important work. Many educational institutions in the country

are heartily in favor of it, as are the historical commissions of the country. The bill is very warmly indorsed.

Mr. SMOOT. Was this bill referred to the department for a report?

Mr. RALSTON. I do not know to what extent the committee investigated it.

Mr. SMOOT. The reason why I ask the Senator the question is that we have had two or three bills along similar lines that would have cost the Government hundreds of thousands of dollars. I should like to have some kind of a report from the department as to what this would cost. I see that the initial appropriation is but \$25,000, but that is no indication of what the ultimate cost of the collection of this information will be.

Mr. RALSTON. Would the Senator have any objection to the adoption of this amendment?

Mr. SMOOT. I will ask that the bill go over to-day, and in the meantime I will write to the department and ask them if they have any real information as to what it will cost.

The PRESIDING OFFICER. Objection is made, and the bill will be passed over.

ESTATE OF JOHN FRAZER, DECEASED

The bill (S. 2520) to give the Court of Claims jurisdiction to hear and adjudge the claims of the estate of John Frazer, deceased, and others, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with an amendment, on page 1, line 7, after the word "deceased," to strike out "John" and insert "Jehu," so as to make the bill read:

Be it enacted, etc., That jurisdiction be, and is hereby, given to the Court of Claims (notwithstanding any statutory bar of limitations or otherwise) of the claims of the estate of John Frazer, deceased; Zephaniah Kingsley, deceased; John Bunch, deceased; Jehu Underwood, deceased; and Stephen Vanzandt, deceased, known as east Florida claims, and which were the subject of and provided for in the treaty of 1819 between the United States and Spain, to provide for the complete execution of the ninth article of the said treaty, with power to find the facts therein and to render judgment against the United States in accordance with the law of nations for the unpaid portion or residue of the awards as made for said claimants by the judges of the superior court of St. Augustine, in the Territory of Florida, and by the judge of the District Court of the United States for the Northern District of Florida, under and by virtue of the acts of Congress passed to carry into effect the ninth article of said treaty: *Provided*, That no recovery shall be had on said claims or any one of them for interest or damages accruing subsequent to the awards made thereon by the superior court of St. Augustine, in the Territory of Florida, and by the judges of the District Court of the United States for the Northern District of Florida.

SEC. 2. That in considering the said claims the Court of Claims is directed to consider the findings of the fact and all evidence submitted to and now on file within the United States or of record with and on which said awards were in whole or in part based.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

MARGARET B. KNAPP

The bill (S. 2794) for the relief of Margaret B. Knapp was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Margaret B. Knapp, out of any money in the Treasury not otherwise appropriated, the sum of \$2,000 for injuries sustained by her while in the performance of her duties as a clerk in the Quartermaster Corps.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

AUGUSTA REITER

The bill (S. 1016) for the relief of Augusta Reiter was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with amendments, on page 1, line 4, after the word "pay," to insert "out of any money in the Treasury not otherwise appropriated"; and in line 10, after the words "sum of," to strike out "\$3,788.75" and insert "\$3,288.75," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he hereby is, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Augusta Reiter, who was se-

riously injured by being run over in the city of San Francisco, Calif., on the 6th day of December, 1913, by a postal automobile truck while in charge of an employee of the United States Post Office Department in the discharge of his duties, the sum of \$3,288.75 in full compensation and satisfaction for said injuries.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

FEES OF CLERKS OF DISTRICT COURTS

The bill (S. 2173) to provide fees to be charged by clerks of the district courts of the United States was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the fees hereinafter provided for, and no others, shall be charged and collected by clerks of the district courts of the United States for services performed by them or their assistants: *Provided*, That all laws or parts of laws inconsistent or repugnant to the provisions of this act are hereby repealed; but nothing in this act shall repeal or in any way enlarge or modify the provisions of the act of July 20, 1892 (27 U. S. Stat. L. p. 252), as amended by the act of June 25, 1910 (36 U. S. Stat. L. p. 806), and the act of June 27, 1922 (42 U. S. Stat. L. p. 606): *Provided further*, That the United States shall not be required to pay any sum or fee herein provided for.

SEC. 2. Upon the institution of any suit or proceeding, whether by original process, removal, indictment, information, or otherwise, there shall be paid by the party or parties so instituting such suit or proceeding, as fees of the clerk for all services to be performed by him in such case or proceeding, except as hereinafter provided, the sum of \$5.

SEC. 3. Upon the filing of any answer or paper joining issue, or the entering of an order for trial, there shall be charged and collected by the clerk from the party or parties filing any such answer or paper, for services performed and to be performed by said clerk in said case or proceeding the further sum of \$5: *Provided*, That after one fee, as hereinbefore provided in this section, has been paid by any defendant, cross petitioner, intervenor, or party, other defendants, cross petitioners, intervenors, or parties, separately appearing or filing any answer or paper in said suit or proceeding, shall pay a further fee of \$2 for each answer or paper so filed: *Provided further*, That in any criminal case, upon the entering of a plea of not guilty by any defendant, there shall be charged and taxed in the costs of said case a fee of \$5 for each defendant entering such plea, but the clerk shall not be required to account for any such fee not collected by him.

SEC. 4. Upon the entry of any judgment, decree, or final order of the court in any suit or proceeding there shall be charged and collected by the clerk from the prevailing party or parties as an additional fee for services performed and to be performed in said suit or proceeding the further sum of \$5: *Provided, however*, That in any criminal case the clerk shall not be required to account for any such fee not collected by him.

SEC. 5. Upon the filing of any petition for appeal or writ of error to any circuit court of appeals or the Supreme Court of the United States there shall be charged and collected by the clerk from the party or parties prosecuting such appeal or writ of error an additional fee in said suit or proceeding of \$5.

SEC. 6. Upon the filing of any petition or application for a writ of habeas corpus, or appeal from a deportation order of a United States commissioner, there shall be charged and collected by the clerk from the petitioner or applicant as full payment for all services performed or to be performed by him in said proceeding the sum of \$5: *Provided*, That if an appeal is prosecuted from the order of the district court in said proceedings, then and in that event the additional sum of \$5, as provided in section 4 of this act, shall be charged and collected by the clerk.

SEC. 7. For each additional trial or final hearing, upon a reversal by any circuit court of appeals or the Supreme Court of the United States, or following a disagreement by a jury or the granting of a new trial or rehearing by the court, there shall be charged and collected by the clerk from the party or parties securing such reversal, new trial, or rehearing, or from the plaintiff or plaintiffs in the event of a disagreement, the further sum of \$5: *Provided, however*, That the clerk shall not be required to account for any such fee not collected by him in any criminal case: *Provided further*, That nothing herein contained shall prohibit the court from directing by rule or standing order the collection at the time the services are rendered of the fees herein enumerated from either party, but all such fees shall be taxed as costs in the respective cases.

SEC. 8. That in addition to the fees for services rendered in cases hereinbefore enumerated, the clerk shall charge and collect for miscellaneous services performed by him and his assistants, except when on behalf of the United States, the following fees:

1. For issuing any writ or a subpoena for a witness, not in a case instituted or pending in the court from which it is issued, and filing and entering the return of the marshal thereon, 50 cents.

2. For filing and indexing any paper, not in a case or proceeding, 25 cents.
 3. For administering an oath or affirmation, not in a case or proceeding pending in the court where the oath is administered, 10 cents.
 4. For an acknowledgment, certificate, affidavit, or countersignature, with seal, 50 cents.
 5. For taking and certifying depositions to file, 20 cents for each folio of 100 words, and if taken stenographically, 15 cents per folio additional for the stenographer.
 6. For a copy of any record, entry, or other paper, and the comparison thereof, 15 cents for each folio of 100 words.
 7. For filing precept or requisition and searching the records of the court for judgments, decrees, or other instruments or suits pending, or bankruptcy proceedings, including the certifying of the results of such search, 60 cents for the first name and 25 cents for each additional name embraced in the certificate.
 8. For receiving, keeping, and paying out money in pursuance of any statute or order of court, including cash bail or bonds or securities authorized by law to be deposited in lieu of other security, 1 per cent of the amount so received, kept, and paid out, or of the face value of such bonds or securities.
 9. For keeping a record of surety companies and bonds thereof, 15 cents for each folio of 100 words.
 10. For preparation and mailing notices in bankruptcy, 10 cents each for the first 20 notices and 5 cents for each additional notice: *Provided*, That this fee shall cover and include all services and expenses in connection therewith: *Provided further*, That such fee shall not be deemed to be included in any other fee for services in bankruptcy proceedings.
 11. For making and comparing a transcript of record on appeal or writ of error when required or requested, 15 cents for each folio of 100 words.
 12. For comparing any transcript, copy of record, or other paper not made by the clerk with the original thereof, 5 cents for each folio of 100 words.
 13. For making a final record in any case at the request of either party or upon order of court in a particular case, 15 cents for each folio of 100 words: *Provided, however*, That when any such final record is made upon order of court the fees therefor shall be taxed in the costs of the case.
 14. For admission of attorneys to practice, \$1 each; for certificate of admission to be furnished upon request, \$2 additional.
 15. For making any record not in a case and not provided for in this act, 15 cents for each folio of 100 words.
- Sec. 9. That this act shall become and be in force and effect on and after July 1, 1924.

Mr. ROBINSON. Mr. President, I think the author of this bill—who, I see, is present—should explain the changes that are made in the fees now authorized by law.

Mr. PEPPER. Mr. President, I shall be very glad to do that.

The change contemplated by this bill is not a change in the amount of the fees, but merely in the method of handling the fees in the offices of clerks of the courts of the United States. At present a certain small fee is charged at the impetration of a writ or the origin of a suit, and another small fee at each one of the successive stages of the suit; and in a typical case it will appear that about 75 or 100 entries are necessary to be made in the clerk's book of accounts showing the receipt of each one of the small charges which are on the schedule. This measure proposes to consolidate the items into four charges each of \$5, the first one payable when the suit is begun, the second payable when the case is at issue, the third payable at the stage of judgment, and the fourth payable if and when an appeal is taken or a writ of error is sued out. It is recommended, as are the bills following it on the calendar, by a responsible organization known as the Federal Clerks' Association, composed of the clerks of the Federal courts throughout the country; and this, with the following measures, is recommended by the Department of Justice as tending to simplicity of accounting and the convenience of practitioners. It makes no substantial change in the amount of the fees; it merely simplifies the method of paying them.

Mr. WALSH of Montana. Mr. President, as I understand the Senator, in every case the fees amount to \$20, and the fees on an appeal to \$25?

Mr. PEPPER. Not quite so. In every case the first fee charged will be \$5 when the suit is begun. If it is not pressed to issue, nothing further is payable. In that event no further fee would be charged. If it is at issue, a further fee of \$5 is payable when the case is ripe for trial. If it is tried and proceeded with to judgment, a third fee of \$5 is payable; and the fourth fee is payable if and when an appeal is taken.

Mr. WALSH of Montana. That would be \$15 in the case of a case at issue, and \$20 in the case of an appeal?

Mr. PEPPER. Yes, sir.

Mr. WALSH of Montana. What would the fees be in case of a default—the case not being brought to issue, but a default taken?

Mr. PEPPER. The initial fee in every case would be \$5, and if the case went by default that would be the only fee chargeable.

Mr. WALSH of Montana. Would there be no charge for entering the judgment?

Mr. PEPPER. I have forgotten, sir, whether there is a special provision in that case or not. I think there would be an additional fee of \$5 for judgment in cases of default.

Mr. ROBINSON. Yes; section 4 provides:

Upon the entry of any judgment, decree, or final order of the court in any suit or proceeding there shall be charged and collected by the clerk, from the prevailing party or parties, as an additional fee for services performed and to be performed in said suit or proceeding, the further sum of \$5: *Provided, however*, That in any criminal case the clerk shall not be required to account for any such fee not collected by him.

Mr. PEPPER. That is correct.

Mr. ROBINSON. Why is the clerk authorized to collect a fee of \$5 from a defendant filing an answer, and from each defendant, in addition to the first \$2? It would seem that such a fee is excessive.

Mr. PEPPER. I can not make any statement of fact of my own knowledge respecting the amount of fees that would be charged under the present schedule; but I am assured by the responsible officers of the Court Clerks' Association that this makes no appreciable or substantial difference in the way of increasing amounts over the amounts as at present charged. It is merely a question of simplifying the method of payment.

Mr. ROBINSON. Section 3 provides that—

Upon the filing of any answer or paper joining issue, or the entering of an order for trial, there shall be charged and collected by the clerk from the party or parties filing any such answer or paper for services performed and to be performed by said clerk in said case or proceeding the further sum of \$5: *Provided*, That after one fee, as hereinbefore provided in this section, has been paid by any defendant, cross petitioner, intervener, or party, other defendants, cross petitioners, interveners, or parties, separately appearing or filing any answer or paper in said suit or proceeding, shall pay a further fee of \$2 for each answer or paper so filed: *Provided further*, That in any criminal case, upon the entering of a plea of not guilty by any defendant, there shall be charged and taxed in the costs of said case a fee of \$5 for each defendant entering such plea, but the clerk shall not be required to account for any such fee not collected by him.

Mr. PEPPER. That is correct, Mr. President; but I take it that that \$5 fee payable in the criminal case is not by way of addition but by way of substitution. In other words, the first provision is for a fee on the filing of a pleading in a civil proceeding.

Mr. ROBINSON. Oh, clearly; and the latter relates to a plea by the defendant in a criminal case.

Mr. PEPPER. That is correct.

The PRESIDING OFFICER (Mr. WILLIS in the chair). The time of the Senator from Pennsylvania has expired. The bill is before the Senate as in Committee of the Whole and open to amendment. If there be no amendment to be proposed, the bill will be reported to the Senate.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

FEES OF CLERKS OF DISTRICT COURTS IN NATURALIZATION PROCEEDINGS

The bill (S. 2174) to provide for accounting by clerks of United States district courts of fees received by them in naturalization proceedings was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That section 13 of the act of June 20, 1906 (34 Stat. L. p. 600), be, and the same is hereby, amended to the extent that hereafter clerks of United States district courts shall account for and report to the Attorney General all fees and emoluments earned and received by them in naturalization proceedings under the provisions of the above-mentioned section instead of to the Bureau of Immigration and Naturalization, and such fees shall be paid over and deposited as are all other fees and emoluments earned, collected, and received by said clerks.

Mr. ROBINSON. Mr. President, let us understand what change this bill effectuates in the present method of accounting for fees.

Mr. PEPPER. Mr. President, this bill merely reduces the amount of bookkeeping to be done in the offices of the clerks

of the Federal courts. It is recommended by the department in the following terms:

That the present practice of depositing fines, penalties, costs, and other public money with the Treasurer of the United States, to the account of the Post Office, Internal Revenue, or other departments of the Government be discontinued, and that the clerks be directed to remit such money to the Treasurer of the United States.

Mr. ROBINSON. From what is the Senator reading?

Mr. PEPPER. I am reading from the committee's report accompanying the bill.

Mr. ROBINSON. Which bill?

Mr. PEPPER. The bill which is under consideration, Senate bill 2175.

Mr. ROBINSON. That is the very point. The bill under consideration is Senate bill 2174.

Mr. PEPPER. I beg the Senator's pardon. I misread the number.

Mr. ROBINSON. What the Senator has read really has no reference to the bill that is actually under consideration?

Mr. PEPPER. I mistook the number. Will the Senator indulge me and permit me to deal with the bill which I am explaining and then go back to the other bill?

Mr. ROBINSON. May I ask the Senator a question? I think it will assist in clearing up the matter. The law now requires these clerks to pay over their fees collected for naturalization services to the Bureau of Immigration. Is that right? And this bill permits them to pay directly to the Department of Justice?

Mr. PEPPER. Yes. The present method is to pay over the fees in part to the Department of Labor and in part to the Department of Justice. This was a system which originated at a time when the clerks were permitted to retain for their own use certain moneys in naturalization cases. That practice having been done away with, there is now no reason why the whole amount should not be covered into the Treasury directly. The bill therefore merely simplifies the accounting to that extent.

Mr. ROBINSON. But it does not provide for its payment into the Treasury. The bill provides that it shall be paid over to the Attorney General.

Mr. PEPPER. I should have said to the Department of Justice.

Mr. ROBINSON. Very well. I have no objection.

The PRESIDING OFFICER. The bill is before the Senate as in Committee of the Whole and open to amendment. If there be no amendment to be proposed, the bill will be reported to the Senate.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ACCOUNTING OF RECEIPTS BY CLERKS OF UNITED STATES COURTS

The bill (S. 2175) to provide for reporting and accounting of fines, fees, forfeitures, and penalties, and all moneys paid to or received by clerks of the United States courts, was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That hereafter the clerks of United States courts shall pay or deposit to the credit of the Treasurer of the United States all judgments, fines, fees, forfeitures, penalties, and other moneys due the United States paid to or received by them, and shall report to the Attorney General, in such form as he may prescribe, the respective amounts included in any such deposit pertaining to post office, internal revenue, or customs cases or matters, respectively, and shall transmit to the Treasurer of the United States with each such payment or deposit a copy of his report to the Attorney General, and hereafter no such money shall be paid by such clerks or deposited to the credit of any collector of internal revenue, any collector or surveyor of customs, the Solicitor of the Treasury, or the Post Office Department.

Sec. 2. All provisions of law in conflict with this act are hereby repealed.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

AMENDMENT OF ACT OF AUGUST 1, 1888

The bill (S. 2176) to amend section 2 of the act of August 1, 1888 (25 Stat. L. p. 357), was considered as in Committee of the Whole and was read as follows:

Be it enacted, etc., That section 2 of the act of August 1, 1888 (25 Stat. L. p. 357), be, and the same hereby is, amended to read as follows:

"The clerks of the several courts of the United States shall prepare and keep in their respective offices complete and convenient indices of

all judgment debtors under decrees, judgments, or orders of said courts, and such indices and judgments shall at all times be open to the inspection and examination of the public."

Mr. ROBINSON. Will not the Senator from Pennsylvania explain what change this would make in the law?

Mr. PEPPER. Under the present system, Mr. President, the clerk is required by law to keep a cross index of the names of all judgment creditors, as well as a special cross index of the names of all judgment debtors. It is found in practice that there is no use for a cross index of judgment creditors. A person searching the record, in ninety-nine cases out of a hundred is searching for the judgment debtor. If the judgment creditor's name is desired it can be found in the general index, which is also cross indexed. This bill, if it shall become a law, will relieve the clerks of the very serious burden of maintaining a cross-reference index which nobody uses.

Mr. ROBINSON. Very well.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

DISPOSITION OF BRIBE MONEY

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 2177) to provide for the disposition of moneys paid to or received by any official as a bribe, which may be used as evidence in any case growing out of any such transaction, which was read, as follows:

Be it enacted, etc., That hereafter all moneys received or tendered in evidence in any case, proceeding, or investigation in any United States court, or before any officer thereof, which have been paid to or received by any official as a bribe, shall, after the conclusion and final disposition of the particular case, proceeding, or investigation in which it was received as evidence, be deposited in the registry of the court, to be disposed of under and in accordance with the order, judgment, or decree of the said court, to be subject, however, to the provisions of section 996, Revised Statutes, as amended.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. PEPPER. Mr. President, I will ask the Chair to indulge me for one moment. I observe that this measure is identical with the measure which appears as Order of Business 863, House bill 5425, which in identical terms passed the House at the last session of this Congress. I ask unanimous consent to reconsider the action just taken, and then to substitute the House bill for the Senate committee bill, so that the action now taken will be final action.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Pennsylvania?

Mr. WALSH of Montana. I suggest to the Senator that the better procedure would be to proceed to the consideration of the House bill.

Mr. PEPPER. Mr. President, I ask unanimous consent for reconsideration of the action taken, which was the passage of the Senate committee bill.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. PEPPER. I now request that we proceed to the consideration of House bill 5425, Order of Business 863 upon the calendar.

The PRESIDING OFFICER. Does the Senator desire that Senate bill 2177 be indefinitely postponed?

Mr. PEPPER. I do, Mr. President.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered. The Senator now asks that the Senate proceed to the consideration of House bill 5425, to provide for the disposition of moneys paid to or received by any official as a bribe, which may be used as evidence in any case growing out of any such transaction, which the Secretary will report.

The bill was read as follows:

Be it enacted, etc., That hereafter all moneys received or tendered in evidence in any case, proceeding, or investigation in any United States court, or before any officer thereof, which have been paid to or received by any official as a bribe, shall after the conclusion and final disposition of the particular case, proceeding, or investigation in which it was received as evidence, be deposited in the registry of the court to be disposed of under and in accordance with the order, judgment, or decree of the said court, to be subject, however, to the provisions of section 996, Revised Statutes, as amended.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ACCOUNTS OF UNITED STATES ATTORNEYS, MARSHALS, ETC.

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 2179) to provide for the rendition of accounts by United States attorneys, United States marshals, clerks of United States courts, and United States commissioners, which was read, as follows:

Be it enacted, etc., That so much of the act of February 18, 1875 (18 Stats. p. 318), section 1 of the act of February 22, 1875 (18 Stats. p. 333), section 13 of the act of May 28, 1896 (29 Stats. p. 183), and the act of May 27, 1908 (35 Stats. p. 375), as provides, directs, and requires that the accounts of United States attorneys, United States marshals, clerks of United States courts, and United States commissioners be certified and approved by said courts or the judges thereof be, and the same are hereby, repealed, and hereafter each of the above-mentioned officials, respectively, shall make oath to his said accounts, and the accounts of United States commissioners shall be certified and approved by the United States attorney for the respective district, and all of said accounts, when made out, verified under oath, and approved and certified as herein directed, shall be transmitted to the Attorney General for examination and transmission to the General Accounting Office.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (S. 300) to provide for election contests in the Senate of the United States was announced as next in order. Mr. SMOOT. Let that bill go over.

The PRESIDING OFFICER. Objection being made, the bill goes over.

The bill (S. 3300) to fix the salaries of officers and employees of the Court of Appeals of the District of Columbia, the Supreme Court of the District of Columbia, the United States Court of Claims, and the United States Court of Customs Appeals was announced as next in order.

Mr. BRUCE. Let that bill go over.

The PRESIDING OFFICER. Objection being made, the bill will go over.

TERM OF COURT AT PAULS VALLEY, OKLA.

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 162) to amend the act establishing the eastern judicial district of Oklahoma, to establish a term of the United States District Court for the Eastern Judicial District of Oklahoma at Pauls Valley, Okla., which was read, as follows:

Be it enacted, etc., That a term of the United States District Court for the Eastern Judicial District of the State of Oklahoma shall be held annually at Pauls Valley, Okla., for the trial of civil and criminal cases, at such times as may be fixed by the judges of the eastern judicial district of Oklahoma: *Provided,* That suitable rooms and accommodations for holding court at Pauls Valley are furnished free of expense to the United States.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

TERMS OF COURTS AT POTEAU, OKLA.

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 644) providing for the holding of the United States district and circuit courts at Poteau, Okla. The bill provides:

Be it enacted, etc., That a term of the District Court of the United States for the Eastern District of Oklahoma shall be held in each and every year in the town of Poteau, Okla., beginning on the first Monday in October and continuing till the business is disposed of: *Provided,* That suitable rooms and accommodations for holding court at Poteau are furnished free of expense to the United States.

Sec. 2. That the clerk of the United States district and circuit courts at Muskogee, Okla., shall be the clerk of the United States district and circuit courts at Poteau, Okla., until provision be made by law for the appointment of deputy clerks at the several places of holding United States district and circuit courts in the State of Oklahoma.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

SITTINGS OF COURT AT SAN JUAN, PORTO RICO

The bill (H. R. 704) to authorize the Court of Appeals for the First Circuit to hold sittings at San Juan, P. R., was con-

sidered as in Committee of the Whole. It proposes that the Court of Appeals for the First Circuit shall, when in its judgment the public interests require, hold a sitting of such court at San Juan, P. R.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

NATIONAL SOCIETY OF THE SONS OF THE AMERICAN REVOLUTION

The bill (H. R. 7399) to amend section 4 of the act entitled "An act to incorporate the National Society of the Sons of the American Revolution," approved June 9, 1906, was announced as next in order.

Mr. ROBINSON. Let that bill go over.

The PRESIDING OFFICER. Objection being made, the bill goes over.

ADMINISTRATION OF CUSTOMS LAWS

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 3357) to amend sections 2 and 5 of the act entitled "An act to provide the necessary organization of the customs service for an adequate administration and enforcement of the tariff act of 1922 and all other customs revenue laws," approved March 4, 1923, which had been reported from the Committee on Finance with an amendment.

Mr. SMOOT. Mr. President, I want to make an explanation of this bill, so that the Senate will know how important it is.

There are two provisions in the first section of the bill which would change existing law. One is to correct an error in section 2 of the act approved March 4, 1923, which was made at some stage of the printing, probably in the preparation of the engrossed copy.

The second provision is to give the customs representatives abroad, who are designated for foreign service, special agents, and customs agents in the service of the United States a privileged official status. That means that they can enter an establishment with an official status and can collect information which otherwise it would be impossible for them to get.

Again, it places them in a position whereby they will not be taxed by foreign governments. Some of those governments tax them and take most of the property away from them; but under this bill, if it shall pass, and as it is recommended by the Treasury Department, they will be taxed only as official representatives of foreign governments in this country are taxed and as such officials are taxed in every other country; in other words, our officials will be taxed only in America.

The amendment of the Committee on Finance was, on page 3, after line 11, to strike out section 2 of the bill, as follows:

Sec. 2. That section 5 of such act of March 4, 1923, is amended to read as follows:

"SEC. 5. That all customs officers and employees, including customs officers and employees in foreign countries, and all other Government officers and employees while traveling on official customs business, in addition to their compensation shall receive their necessary traveling expenses and actual expenses incurred for subsistence within the limitations to be imposed by the Secretary of the Treasury while traveling on duty and away from their designated station, and when transferred from one official station to another for duty may be allowed, within the discretion and under written orders of the Secretary of the Treasury, the expenses incurred for packing, crating, freight, and drayage in the transfer of their household effects and other personal property, not exceeding in all 5,000 pounds.

"The limitation of section 1 of the act entitled 'An act making appropriations to supply urgent deficiencies in appropriations for the fiscal year 1914 and for prior years, and for other purposes,' approved April 6, 1914, and section 13 of the act entitled 'An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1915, and for other purposes,' approved August 1, 1914, shall not apply to this section, and credit for all payments for subsistence expenses actually incurred by Government officers and employees in excess of \$5 per diem since March 4, 1923, while traveling on official customs business, but not exceeding the maximum allowed by the Secretary of the Treasury, shall be allowed in the accounts of such officers and employees."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ESTATE OF CHARLES L. FREER, DECEASED

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 8100) for the relief of the estate of Charles L. Freer, deceased. It proposes that additional taxes amounting to \$74,889.56, together with all penalties and charges

thereon assessed by the Treasury Department under date of February 1, 1923, and March 6, 1923, against the estate of Charles L. Freer, deceased, late of Detroit, Mich., which estate has been closed, the executors discharged, and the residue paid over to the Smithsonian Institution as an endowment for the Freer Gallery of Art, presented to the Nation by the said Charles L. Freer, be canceled and that the Treasury Department be authorized and directed to remit any further taxes, penalties, or charges which may thereafter be found due from the said residue of the said estate.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

TRAFFIC IN CLINICAL THERMOMETERS

The bill (S. 1671) to provide for regulating traffic in certain clinical thermometers, and for other purposes, was announced as next in order.

Mr. BRUCE. Let that bill go over.

The PRESIDING OFFICER. Objection being made to the bill, it will go over.

OHIO RIVER BRIDGE BETWEEN INDIANA AND KENTUCKY

The Senate, as in Committee on the Whole, proceeded to consider the bill (S. 3350) granting the consent of Congress for the construction of a bridge across the Ohio River between Vanderburg County, Ind., and Henderson County, Ky.

The bill had been reported from the Committee on Commerce with an amendment on page 1, line 8, after the word "navigation," to strike out the words "which may be selected by the respective States as connecting up suitable highways between the said States in" and to insert in lieu thereof the word "between," so as to make the bill read:

Be it enacted, etc., That the consent of Congress is hereby granted to the Commonwealth of Kentucky and the State of Indiana by and through their respective highway commissions or such other agencies as may be selected, to construct, maintain, and operate a bridge and approaches thereto across the Ohio River at a point suitable to the interests of navigation between the county of Henderson, Ky., and the county of Vanderburg, Ind., in accordance with the provisions of an act entitled, "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The amendment was agreed to.

The bill was reported to the Senate as amended and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

EXPORT OIL CORPORATION

The bill (S. 1599) for the relief of the Export Oil Corporation was announced as next in order.

Mr. DIAL. Mr. President, I would like to have some explanation of that bill.

Mr. SMOOT. Let it go over.

Mr. HARRELD. That bill—

The PRESIDING OFFICER. Objection has been made. Does the Senator from Utah withhold his objection?

Mr. HARRELD. I can make the explanation in a minute.

Mr. SMOOT. I withhold the objection.

Mr. HARRELD. This is a war-claim case where the War Department made a contract for the delivery of a certain amount of gasoline. Afterwards it arbitrarily canceled the order, and the Export Oil Co. is asking only for permission to go to the Court of Claims, that they may establish there the amount of damages they sustained by the canceling of the order by the War Department. The War Department recommends the passage of the bill and says the claimants are entitled to the relief. I hope no Senator will object.

Mr. DIAL. The bill provides that they shall go to the Court of Claims?

Mr. HARRELD. Yes; that they shall go to the Court of Claims.

Mr. DIAL. I have no objection to that. I think that is the place for them to go.

Mr. HARRELD. I think so.

Mr. WALSH of Montana. The only provision of the bill which seems important is the provision which is to the effect that when it is considered by the Court of Claims the court shall not reject the claim because the contract is not in writing and executed with the formalities that are required. We passed a general act which authorized the War Department to adjust and settle claims arising out of war contracts not executed with the formalities required by law. What I want to know is why this claim was not thus adjusted, and why we have to pass a special act excusing these people from

the proof of their written contract when we passed a general act excusing everybody from the necessity of establishing a contract executed with the formalities theretofore required by law.

Mr. HARRELD. The Senator will notice that this is not my bill, but is a bill introduced by my colleague [Mr. OWEN]; but I understand that for some reason the claimants did not file their claim in time. The act to which the Senator has reference is the Dent Act, which required that claims be filed within a certain time; and my information is that for some reason or other this claim was not filed within that time.

Mr. WALSH of Montana. What was the reason it was not filed?

Mr. HARRELD. I am really not able to give the reasons. Mr. WALSH of Montana. Then I ask that the bill go over.

Mr. HARRELD. Very well.

The PRESIDING OFFICER. Objection has been made, and the bill will go over.

AMENDMENT OF BANKING LAWS

The bill (S. 3316) to amend an act entitled "An act to provide for the consolidation of national banking associations," approved November 7, 1918; to amend section 5136 as amended, section 5137, section 5138 as amended, section 5142, section 5150, section 5155, section 5190, section 5200 as amended, section 5202 as amended, section 5208 as amended, section 5211 as amended, of the Revised Statutes of the United States; and to amend section 9, section 13, section 22, and section 24 of the Federal reserve act, and for other purposes, was announced as next in order.

Mr. FLETCHER. That is a very important, far-reaching measure. I think we can not possibly consider it under the limitations of the rule, and it had better go over.

The PRESIDING OFFICER. The bill will be passed over.

AMENDMENT OF THE DISTRICT CODE

The bill (S. 3392) to amend section 558 of the Code of Law for the District of Columbia was announced as next in order.

Mr. ROBINSON. What change would this bill make in existing law were it enacted?

Mr. ERNST. Mr. President, I have been requested to state that the only change this would make if it were enacted would be that the President could, under it, not only appoint residents of the District as notaries public, but might appoint those whose sole place of business or employment is located within the District of Columbia. That is the only change that would be made.

Mr. ROBINSON. A great many of these officials live in Virginia and Maryland, but do business in the District of Columbia. I do not see any objection to the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes that section 558 of the Code of Law for the District of Columbia be amended, so that it shall read as follows:

SEC. 558. Notaries: The President shall also have power to appoint such number of notaries public, residents of said District, or whose sole place of business or employment is located within said District, as, in his discretion, the business of the District may require: *Provided*, That the appointment of any person as such notary public, or the acceptance of his commission as such, or the performance of the duties thereunder, shall not disqualify or prevent such person from representing clients before any of the departments of the United States Government in the District of Columbia or elsewhere: *Provided*, That such person so appointed as a notary public who appears to practice or represent clients before any such department is not otherwise engaged in Government employ, and shall be admitted by the heads of such departments to practice therein in accordance with the rules and regulations prescribed for other persons or attorneys who are admitted to practice therein: *And provided further*, That no notary public shall be authorized to take acknowledgments, administer oaths, certify papers, or perform any official acts in connection with matters in which he is employed as counsel, attorney, or agent or in which he may be in any way interested before any of the departments aforesaid.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

A. V. YEARSLEY

The bill (S. 1056) for the relief of A. V. Yearsley was announced as next in order.

Mr. DIAL. I observe that there is no report accompanying that bill, and I therefore ask that it go over.

The PRESIDING OFFICER. Being objected to, the bill will go over.

CLAIMS OF COWLITZ TRIBE OF INDIANS

The bill (S. 2557) conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Cowlitz Tribe of Indians may have against the United States, and for other purposes, was announced as next in order.

Mr. DIAL. Let that bill be passed over.

Mr. JONES of Washington. I hope the Senator will withdraw his objection a moment. This is the usual form of a bill referring these claims of Indians to the Court of Claims, to have them ascertained and determined. I hope the Senator will not object. The bill has been amended to conform with the recommendations of the department.

Mr. DIAL. I am not certain whether this is a bill we had up last session or not.

Mr. JONES of Washington. It is not.

Mr. DIAL. I got it a little confused with another bill. My recollection is that the bill I had in mind waived the statute of limitations, waived rights the Government had. If this bill protects the Government, I have no objection to its passage.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill had been reported from the Committee on Indian Affairs with an amendment, on page 5, section 6, line 9, after the word "Provided," to strike out the following language: "That in no case shall the aggregate amounts decreed by said Court of Claims for fees be in excess of the amount or amounts stipulated in the contract of employment, or in excess of a sum equal to 10 per cent of the amount of recovery against the United States" and in lieu thereof to insert: "That in no case shall such fee exceed 10 per cent of the amount of any judgment recovered and shall not in the aggregate amount to more than \$25,000, and shall be paid out of the judgment recovered," so as to make the bill read:

Be it enacted, etc., That jurisdiction be, and is hereby, conferred upon the Court of Claims, notwithstanding the lapse of time or statutes of limitation, to hear, examine, and adjudicate and render judgment in any and all legal and equitable claims which the Cowlitz Tribe of Indians may have against the United States, and which claims have not heretofore been determined and adjudicated on their merits by the Court of Claims or the Supreme Court of the United States.

SEC. 2. Any and all claims against the United States within the purview of this act shall be forever barred unless suit be instituted or petition filed as herein provided in the Court of Claims within five years from the date of approval of this act, and such suit shall make the Cowlitz Tribe of Indians party plaintiff and the United States party defendant. The petition shall be verified by the attorney or attorneys employed to prosecute such claim or claims under contract with the Cowlitz Tribe approved by the Commissioner of Indian Affairs and the Secretary of the Interior. Official letters, papers, documents, and records, or certified copies thereof, may be used in evidence, and the departments of the Government shall give access to the attorney or attorneys of said Indian nation to such treaties, papers, correspondence, or records as may be needed by the attorney or attorneys of said Indian nation.

SEC. 3. In said suit the court shall also hear, examine, consider, and adjudicate any claims which the United States may have against said Indian tribe, but any payment which may have been made by the United States upon any claim against the United States shall not operate as an estoppel, but may be pleaded as an offset in such suit.

SEC. 4. That from the decision of the Court of Claims in any suit prosecuted under the authority of this act an appeal may be taken by either party as in other cases to the Supreme Court of the United States.

SEC. 5. That upon the final determination of any suit instituted under this act the Court of Claims shall decree such amount or amounts as it may find reasonable to be paid the attorney or attorneys so employed by said Indian tribe for the services and expenses of said attorneys rendered or incurred prior or subsequent to the date of approval of this act: *Provided*, That in no case shall such fee exceed 10 per cent of the amount of any judgment recovered and shall not in the aggregate amount to more than \$25,000, and shall be paid out of the judgment recovered.

SEC. 6. The Court of Claims shall have full authority by proper orders and process to bring in and make parties to such suit any or all persons deemed by it necessary or proper to the final determination of the matters in controversy.

SEC. 7. A copy of the petition shall in such case be served upon the Attorney General of the United States, and he, or some attorney from the Department of Justice to be designated by him, is hereby directed to appear and defend the interests of the United States in such case.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILLS, ETC., PASSED OVER

The bill (S. 292) to incorporate the American Bar Association was announced as next in order.

Mr. ROBINSON. Mr. President, what are the advantages to be derived from incorporating the American Bar Association?

I ask that the bill go over.

The PRESIDING OFFICER. Objection being made, the bill will go over.

The bill (S. 3213) to incorporate the American War Mothers was announced as next in order.

Mr. SMOOT. Let that bill go over for the same reason that the bill immediately preceding it went over.

The PRESIDING OFFICER. Objection being made, the bill goes over under the rule.

The joint resolution (S. J. Res. 109) proposing an amendment to the Constitution of the United States relative to the adoption of amendments thereto was announced as next in order.

Mr. STERLING. Let the joint resolution go over, Mr. President.

The PRESIDING OFFICER. Objection being made, the joint resolution will go over.

The bill (S. 3034) for the relief of Ida Smith was announced as next in order.

Mr. DIAL. I should like to be informed by the author of the bill what the department recommends with regard to the bill. However, I ask that the bill go over, Mr. President.

The PRESIDING OFFICER. The bill will be passed over.

FRANCIS NICHOLSON

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 1022) for the relief of Francis Nicholson.

The bill had been reported from the Committee on Claims with an amendment in line 6, after the words "sum of," to strike out "\$20,000" and in lieu thereof to insert "\$10,000," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any moneys in the Treasury of the United States not otherwise appropriated, the sum of \$10,000 as full compensation to Francis Nicholson for injuries sustained by him upon the discharge of the evening gun at the Presidio of San Francisco October 4, 1916.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

STAPLES TRANSPORTATION CO., OF FALL RIVER, MASS.

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 1937) for the relief of the Staples Transportation Co., of Fall River, Mass., which was read, as follows:

Be it enacted, etc., That the claim of the Staples Transportation Co., of Fall River, Mass., owner of the steam tug *Eureka*, against the United States for damages alleged to have been caused by collision between the said steam tug and the U. S. pilot guard auxiliary boat No. 1229, approaching Broad Sound Channel, Boston Harbor, on or about December 24, 1917, may be sued for by the said Staples Transportation Co. in the District Court of the United States for the District of Massachusetts, under and in compliance with the rules of said court sitting as a court of admiralty; and that the said court shall have jurisdiction to hear and determine the whole controversy and to enter a judgment or decree for the amount of the legal damages sustained by reason of said collision, if any shall be found to be due, either for or against the United States of America, upon the same principle and measure of liability and costs as in like cases in admiralty between private parties, with the same rights of appeal: *Provided*, That such notice of the suit shall be given to the Attorney General of the United States as may be provided by order of the said court, and it shall be the duty of the Attorney General to cause the United States attorney in such district to appear and defend for the United States: *Provided further*, That said suit shall be brought and commenced within four months of the date of the passage of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

OWNER OF AMERICAN STEAM TUG "O'BRIEN BROTHERS"

The bill (S. 2079) for the relief of the owner of the American steam tug *O'Brien Brothers*, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with an amendment, on page 2, line 3, after the word "damages," to strike out the words "including interest," so as to make the bill read:

Be it enacted, etc., That the claim of O'Brien Bros. (Inc.), owner of the American steam tug *O'Brien Brothers*, against the United States for damages alleged to have been caused by collision between said vessel and the U. S. destroyer *Henley*, on the 4th day of January, 1919, off Pier 3, Hoboken, N. J., may be sued for by the said O'Brien Bros. (Inc.) in the District Court of the United States for the Eastern District of New York, sitting as a court of admiralty and acting under the rules governing such court, and said court shall have jurisdiction to hear and determine such suit and to enter a judgment or decree for the amount of such damages and costs, if any, as shall be found to be due against the United States, in favor of the owner of the said American steam tug *O'Brien Brothers*, or against the owner of said American steam tug *O'Brien Brothers* in favor of the United States, upon the same principles and measures of liability as in like cases in admiralty between private parties, and with the same rights of appeal: *Provided*, That such notice of the suit shall be given to the Attorney General of the United States as may be provided by order of the said court, and it shall be the duty of the Attorney General to cause the United States attorney in such district to appear and defend for the United States: *Provided further*, That said suit shall be brought and commenced within four months of the date of the passage of this act.

Mr. WALSH of Montana. These two bills, the one under consideration and the one just passed, provide for the trial of these specific actions in the United States district courts. Apparently they are collision claims. I wonder why we should pass a special act authorizing the trial of a particular case under particular circumstances? I think I will object to this bill.

Mr. BRUCE. They cover collisions between Government vessels and privately owned vessels.

Mr. SMOOT. I will say to the Senator that we have passed hundreds of this kind of bills. We have to pass such bills in order to give the claimant a chance to recover.

Mr. BRUCE. Yes; we have to.

Mr. WALSH of Montana. Oh, yes; I had overlooked that fact. I withdraw my objection.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

OWNER OF FERRYBOAT "NEW YORK"

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 2130) for the relief of the owner of the ferryboat *New York*.

The bill had been reported from the Committee on Claims with an amendment, on page 2, line 2, after the word "damages," to strike out the words "including interest," so as to make the bill read:

Be it enacted, etc., That the claim of the United States Housing Corporation, owner of the ferryboat *New York*, against the United States of America for damages alleged to have been caused by collision between said vessel and the U. S. S. *Wasp*, on the 19th day of August, 1919, in the Elizabeth River, Portsmouth, Va., may be sued for by the said United States Housing Corporation in the District Court of the United States for the District of Virginia, sitting as a court of admiralty, and acting under the rules governing such court; and said court shall have jurisdiction to hear and determine such suit and to enter a judgment or decree for the amount of such damages and costs, if any, as shall be found to be due against the United States in favor of the owner of the said ferryboat *New York*, or against the owner of the said ferryboat *New York* in favor of the United States, upon the same principles and measures of liability as in like cases in admiralty between private parties, and with the same rights of appeal: *Provided*, That such notice of the suit shall be given to the Attorney General of the United States as may be provided by order of the said court, and it shall be the duty of the Attorney General to cause the United States attorney in such district to appear and defend for the United States: *Provided further*, That said suit shall be brought and commenced within four months of the date of the passage of this act.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BEAUFORT COUNTY LUMBER CO. OF NORTH CAROLINA

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 2254) for the relief of the Beaufort County Lumber Co., of North Carolina, which was read, as follows:

Be it enacted, etc., That the claim of Beaufort County Lumber Co. of North Carolina, a North Carolina corporation, owner of the tugboat *Atlanto City* and the barge *Flora*, against the United States for damages alleged to have been caused by collision between the said tugboat and barge and the United States Coast and Geodetic Survey steamer *Lydonia* in the harbor of Wilmington, N. C., may be sued for by the said Beaufort County Lumber Co. of North Carolina in the District Court of the United States for the Eastern District of Virginia, sitting as a court of admiralty and acting under the rules governing such court, and said court shall have jurisdiction to hear and determine such suit and to enter a judgment or decree for the amount of such damages and costs, if any, as shall be found to be due against the United States in favor of the said Beaufort County Lumber Co. of North Carolina, or against the said Beaufort County Lumber Co. of North Carolina in favor of the United States upon the same principles and measures of liability as in like cases between private parties and with the same rights of appeal: *Provided*, That such notice of the suit shall be given to the Attorney General of the United States as may be provided by order of the said court, and it shall be the duty of the Attorney General to cause the United States attorney in such district to appear and defend for the United States: *Provided further*, That said suit shall be brought and commenced within four months of the date of the passage of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

OWNERS OF STEAM TUG "JOSHUA LOVETT"

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 2568) for the relief of the owners of the steam tug *Joshua Lovett*; which was read as follows:

Be it enacted, etc., That the claim of the Taylor Dredging Co., owners of the steam tug *Joshua Lovett*, against the United States of America, for damages alleged to have been caused by collision between the said steam tug *Joshua Lovett* and car float in tow of steam tug *Ashley*, operated by the Director General of Railroads as a part of the equipment of the Central Railroad of New Jersey, on July 11, 1919, in the vicinity of Pier 7 of the Central Railroad of New Jersey, Communipaw, N. J., may be sued for by the said Taylor Dredging Co. in the District Court of the United States for the Eastern District of New York, sitting as a court of admiralty and acting under the rules governing such court, and said court shall have jurisdiction to hear and determine such suit and to enter a judgment or decree for the amount of such damages and costs, if any, as shall be found to be due against the United States in favor of the owners of the said steam tug *Joshua Lovett*, or against the owners of the said steam tug *Joshua Lovett* in favor of the United States, upon the same principles and measures of liability as in like cases in admiralty between private parties, and with the same rights of appeal: *Provided*, That such notice of the suit shall be given to the Attorney General of the United States as may be provided by order of the said court, and it shall be the duty of the Attorney General to cause the United States attorney in such district to appear and defend for the United States: *Provided further*, That said suit shall be brought and commenced within four months of the date of passage of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

G. FERLITA

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 2774) for the relief of G. Ferlita. It proposes that the claim of G. Ferlita, owner of the schooner *Rosa Ferlita*, against the United States for damages alleged to have been caused by collision between the said schooner while lying at anchor off Cape Henry, Va., and the U. S. S. *Toucey* on the 12th day of November, 1923, may be sued for by the said G. Ferlita in the District Court of the United States for the Eastern District of Virginia, sitting as a court of admiralty and acting under the rules governing such court, and the said damages and costs, if any, as shall be found to be due against the United States in favor of said G. Ferlita, or against the said G. Ferlita in favor of the United States, upon the same principles and measures of liability as in like cases in admiralty between private parties and with the same rights of appeal: *Provided*, That such notice of the suit shall be given to the Attorney General of the United States as may be provided by order of the said court, and it shall be the duty of the Attorney General to cause the United States attorney in such district to appear and defend the

United States: *Provided further*, That said suit shall be brought and commenced within four months of the date of the passage of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CANADA STEAMSHIP LINES (LTD.)

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 2860) for the relief of the Canada Steamship Lines (Ltd.).

The bill had been reported from the Committee on Claims with an amendment, on page 2, line 4, after the word "damages," to strike out the words "including interest," so as to make the bill read:

Be it enacted, etc., That the claim of the Canada Steamship Lines (Ltd.), owner of the British steamship *Rosedale*, against the United States of America for damages arising from the alleged loss of said vessel and her cargo, claimed to have been caused by collision on April 18, 1919, in Bristol Channel, England, between said vessel and the American steamship *Lucila*, then in the transport service of the United States War Department, may be sued for by the said Canada Steamship Lines (Ltd.) in the District Court of the United States for the Southern District of New York, sitting as a court of admiralty and acting under the rules governing such court, and said court shall have jurisdiction to hear and determine such suit and to enter judgment or decree for the amount of such damages and costs, if any, as shall be found to be due against the United States in favor of the said Canada Steamship Lines (Ltd.), or against said Canada Steamship Lines (Ltd.) in favor of the United States, upon the same principles and measures of liability as in like cases in admiralty between private parties and with the same rights of appeal: *Provided*, That such notice of the suit shall be given to the Attorney General of the United States as may be provided by order of the said court, and it shall be the duty of the Attorney General to cause the United States attorney in such district to appear and defend for the United States: *Provided further*, That said suit shall be brought and commenced within four months of the date of the passage of this act.

Mr. FLETCHER. The Senator from New York [Mr. WADSWORTH] is not present. I presume this is in the regular form of a bill, but I was going to ask how much is likely to be involved in it.

Mr. SMOOT. The court will determine that.

Mr. BRUCE. If judgment is to be found in favor of the plaintiff, the court will determine the amount.

Mr. FLETCHER. I have no objection.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

MUSCLE SHOALS

The PRESIDING OFFICER. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which is House bill 518, authorizing the disposal of Muscle Shoals by the Secretary of War.

Mr. CURTIS. I ask unanimous consent that the unfinished business be temporarily laid aside.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered. The Clerk will state the next order of business on the calendar.

BERWIND-WHITE COAL MINING CO.

The bill (S. 2902) for the relief of the Berwind-White Coal Mining Co. was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the claim of the Berwind-White Coal Mining Co., a corporation organized under the laws of the State of Pennsylvania, with its principal place of business located in the city of New York, owner of the barge *Eureka* No. 82, against the United States for damages alleged to have been caused by the sinking of said barge in the North River, N. Y., on or about December 14, 1917, while said barge was in possession and under the control of the Department of the Navy of the United States, may be sued for by the said Berwind-White Coal Mining Co. in the United States District Court for the Southern District of New York sitting as a court of admiralty and acting under the rules governing such court, and said court shall have jurisdiction to hear and determine such suit and to enter a judgment or decree for the amount of such damages and cost, if any, as shall be found to be due against the United States in favor of the Berwind-White Coal Mining Co., or against the Berwind-White Coal Mining Co. in favor of the United States as in like cases in

admiralty between private parties and with the same rights of appeal: *Provided*, That such notice of the suit shall be given to the Attorney General of the United States as may be provided by the order of the said court, and it shall be the duty of the Attorney General to cause the United States attorney in such district to appear and defend for the United States: *Provided further*, That said suit shall be brought and commenced within four months of the date of the passage of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MARYLAND CASUALTY CO. AND OTHERS

The bill (H. R. 6383) for the relief of the Maryland Casualty Co., the United States Fidelity & Guaranty Co. of Baltimore, Md., and the National Surety Co. was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to redeem one United States Treasury certificate of indebtedness, No. 8240, in the denomination of \$10,000, series TD-1921, dated December 15, 1920, and maturing December 15, 1921, with interest at the rate of 6 per cent per annum from December 15, 1920, to December 15, 1921, in favor of the Maryland Casualty Co., the United States Fidelity & Guaranty Co. of Baltimore, Md., and the National Surety Co., without presentation of the said certificate or the coupons therefrom, which have been lost, stolen, or destroyed: *Provided*, That the said certificate of indebtedness shall not have been previously presented for payment and that no payment shall be made hereunder for any coupons which shall have been previously presented and paid: *And provided further*, That the said Maryland Casualty Co., the United States Fidelity & Guaranty Co. of Baltimore, Md., and the National Surety Co. shall first file in the Treasury Department a bond in the penal sum of double the amount of the principal and interest of said Treasury certificate of indebtedness, and the interest payable thereon, in such form and with such surety or sureties as may be acceptable to the Secretary of the Treasury to indemnify and save harmless the United States from any loss on account of the lost, stolen, or destroyed certificate of indebtedness herein described.

Mr. SMOOT. Mr. President, I would like to have an explanation of the bill.

Mr. BRUCE. The object of the bill is to authorize the Secretary of the Treasury to redeem certain certificates of indebtedness held by these companies and which have been lost, upon their giving the proper bond of indemnity to the Government.

Mr. SMOOT. In twice the amount of the loss?

Mr. BRUCE. Yes. The amount is \$10,000.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

RELIEF OF MARYLAND CASUALTY CO. AND OTHERS

The bill (H. R. 6384) for the relief of the Maryland Casualty Co., the Fidelity & Deposit Co. of Maryland, and the United States Fidelity & Guaranty Co. of Baltimore, Md., was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to redeem 4½ per cent United States Treasury certificates of indebtedness Nos. 29806, 29807, 29808, and 29809, in the denomination of \$1,000 each, series TD-1920 (issued January 2, 1920), and matured December 15, 1920, without interest, in favor of the Maryland Casualty Co., the Fidelity & Deposit Co. of Maryland, and the United States Fidelity & Guaranty Co. of Baltimore, Md., without presentation of said certificates of indebtedness, which have been lost, stolen, or destroyed: *Provided*, That the said certificates of indebtedness shall not have been previously presented for payment: *And provided further*, That the said Maryland Casualty Co., the Fidelity & Deposit Co. of Maryland, and the United States Fidelity & Guaranty Co. of Baltimore, Md., shall first file in the Treasury Department a bond in the penal sum of double the amount of the principal of said certificates of indebtedness, in such form and with such surety or sureties as may be acceptable to the Secretary of the Treasury, to indemnify and save harmless the United States from any loss on account of the lost, stolen, or destroyed certificates of indebtedness herein described.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

GEORGE A. BERRY

The bill (S. 3073) for the relief of George A. Berry was announced as next in order.

Mr. DIAL. Let the bill go over.

The PRESIDING OFFICER. Objection is made and the bill will go over.

Mr. SHORTRIDGE. Mr. President, may I request of the Senator who asked that the bill go over to hear but a few words of explanation of the bill?

Mr. DIAL. I withdraw my objection for that purpose.

Mr. SHORTRIDGE. The bill has been pending a long time. It has met with the approval of the committee who examined it very thoroughly. It is approved by the Secretary of the Navy. Some phases of the facts involved were before the court, and everyone who has looked into the merits of the case has favored the passage of the measure.

It is merely to permit Lieut. Commander George A. Berry to appear before a naval retiring board for the purpose of determining whether or not the disability complained of in his case originated in the line of duty in time of war, as required by the provisions of the act of July 12, 1921. It does not bind the Government to any future action, but merely permits this very valiant officer to appear before the board for the purposes indicated in the bill. I very earnestly ask that the bill be considered on its merits.

There being no objection, the bill was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the President be, and he hereby is, authorized to order George A. Berry, ex-Lieutenant commander, United States Naval Reserve Force, to appear before a naval retiring board for the purpose of determining whether or not the disability complained of in his case originated in the line of duty in time of war, as required by the provisions of the act of July 12, 1921, volume 42, Statutes at Large, page 140: *Provided*, That if said naval retiring board finds that Mr. Berry is now suffering from a disability incurred in the line of duty in time of war which renders him unfit to perform all the duties of the grade of lieutenant commander, United States Naval Reserve Force, in time of war, the President be, and he is hereby, authorized to nominate and, by and with the advice and consent of the Senate, appoint George A. Berry a lieutenant commander, United States Naval Reserve Force, and to place him upon the retired list with three-fourths of the pay of his grade: *Provided further*, That he shall not be entitled to any back pay or allowances by the passage of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CHARLES O. MAAS

The bill (S. 1828) to supplement the military record of Lieut. Commander Charles O. Maas was considered as in Committee of the Whole.

The bill had been reported from the Committee on Naval Affairs with an amendment to strike out all after the enacting clause and insert:

Be it enacted, etc., That the Secretary of the Navy be authorized to supplement the military record of the late Lieut. Commander Charles O. Maas, Naval Reserve Force, to show the voluntary service performed by said Lieutenant Commander Maas, and accepted by the Navy Department subsequent to the date upon which he was placed on inactive duty, and that such acceptance may be treated as a recall to active service as of June 1, 1919: *Provided*, That no back pay or allowances of any kind shall accrue as a result of the passage of this section.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

MISSOURI RIVER DAM

The bill (S. 2085) to authorize the Broadwater Irrigation District, a Montana organization, to construct a dam across the Missouri River was considered as in Committee of the Whole.

The bill was reported from the Committee on Commerce with amendments.

The first amendment was, on page 1, line 3, to strike out "the Government" and insert "Congress"; in line 4, to strike out "given" and insert "granted"; in line 6, after the word "construct," to insert "maintain, and operate a dam"; in line 7, before the word "point," to strike out "some" and insert "a," and after the word "point" to insert "suitable to the interests of navigation"; and in line 10, after the word "meridian," to strike out the comma and the words "a dam for irrigation purposes, in accordance with the provisions of the act entitled 'An act to regulate the construction of dams across navigable waters,' approved June 21, 1906, as amended by act approved June 23, 1910," so as to read:

Be it enacted, etc., That the consent of Congress is hereby granted to the Broadwater Irrigation District, a Montana organization, its successors or assigns, to construct, maintain, and operate a dam across the Missouri River at a point suitable to the interests of navigation in section 6, township 4 north, range 3 east, Montana meridian, or in section 1, township 4 north, range 2 east, Montana meridian.

The amendment was agreed to.

Mr. WALSH of Montana. I will now ask that the bill go over.

The PRESIDING OFFICER. Objection is made, and the bill will be passed over.

BILL PASSED OVER

The bill (S. 1187) to commission Capt. William Rees Rush as a rear admiral on the retired list of the Navy was announced as next in order.

Mr. ROBINSON. Let the bill go over.

The PRESIDING OFFICER. Objection is made, and the bill will go over.

RELIEF OF CERTAIN INDIANS

The bill (S. 369) to amend an act entitled "An act for the relief of Indians occupying railroad lands in Arizona, New Mexico, or California," approved March 4, 1913, was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That all of the provisions of an act entitled "An act for the relief of Indians occupying railroad lands in Arizona, New Mexico, or California," approved March 4, 1913, and amended by the act of April 11, 1916, and the act of June 30, 1919, be, and the same are hereby, extended to March 4, 1925: *Provided*, That the provisions of this act shall apply only in cases where it is shown that the lands were actually occupied in good faith by Indians prior to March 4, 1913, and the applicants are otherwise entitled to receive such tracts in allotment under existing law but for the grant to the railroad company.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (S. 876) to provide for the disposition of bonuses, rentals, and royalties received under the provisions of the act of Congress entitled "An act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain," approved February 25, 1920, from unallotted lands in Executive order Indian reservations, and for other purposes, was announced as next in order.

Mr. SMOOT. A Senator interested in the bill is not here, and I ask that it may go over.

The PRESIDING OFFICER. Objection is heard, and the bill will go over.

The bill (S. 877) to provide for exchanges of Government and privately owned lands in the Walapai Indian Reservation, Ariz., was announced as next in order.

Mr. WALSH of Montana. I ask that the bill may go over.

The PRESIDING OFFICER. Objection is heard, and the bill will go over.

MINERALS ON INDIAN LANDS

Mr. HARRELD. Mr. President, may I inquire what became of Calendar No. 725, Senate bill 876?

The PRESIDING OFFICER. It went over under objection.

Mr. HARRELD. I wish that it might be taken up. It is a departmental bill and very important.

The PRESIDING OFFICER. Does the Senator ask unanimous consent to return to Order of Business 725?

Mr. HARRELD. Yes; I make that request. There is a special reason for it.

Mr. SMOOT. I will withdraw my objection, but I want to know what the special reason is.

Mr. HARRELD. Secretary Fall made a ruling which embarrasses the present Secretary very much. He made a ruling that royalties or bonuses obtained from Executive order Indian lands should be deposited to the credit of the United States. That ruling has not been followed in other cases. There are acts in such cases which require royalties and bonuses so received to be deposited to the credit of the tribe. This bill would give to the Secretary of the Interior power to deposit bonuses and royalties arising from Indian lands which have been set apart by Executive order as public domain to the credit of the respective tribes as they accrue and accumulate. It is quite important to them to have that direction from Congress, and if it may be I would like to have the bill passed at this time.

Mr. SMOOT. I will withdraw my objection.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (S. 876) to provide for the disposition of bonuses, rentals, and royalties received under the provisions of the act of Congress entitled "An act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain," approved February 25, 1920, from unallotted lands in Executive order Indian reservations, and for other purposes, which was read, as follows:

Be it enacted, etc., That all moneys received under the provisions of the act of Congress approved February 25, 1920 (41 Stat. L. p. 437), entitled "An act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain," from bonuses, rentals, and royalties in connection with unallotted lands in Indian reservations not affected by the proviso to section 3 of the act of Congress approved February 23, 1891 (26 Stat. L. p. 795), shall be deposited in the Treasury of the United States to the credit of the particular tribe of Indians for whose benefit the reservation was created and shall draw interest at the rate 4 per cent per annum. Such moneys shall be available for appropriation by Congress for the expense of administration and for the use and benefit of such Indians.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

GEORGE E. HARPAM

The bill (S. 1543) for the relief of George E. Harpham was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, George E. Harpham, who was a sergeant of Company D, One hundred and thirty-fourth Infantry, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a sergeant of said company and regiment on the 13th day of May, 1918: *Provided*, That no back pay, pension, or other emolument shall accrue prior to the passage of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

JOSEPH F. BECKER

The bill (S. 747) for the relief of Joseph F. Becker was considered as in Committee of the Whole.

The bill had been reported from the Committee on Naval Affairs with an amendment to strike out all after the enacting clause and insert:

That the President of the United States is hereby authorized to appoint Joseph F. Becker, who, while serving as a Lieutenant commander, United States Naval Reserve Force, was found by a naval retiring board to be permanently incapacitated for active service by reason of physical disability incurred in the line of duty as the result of an incident of the service, a chief boatswain on the retired list of the Navy with such retired pay as is now, or may hereafter be, allowed a commissioned warrant officer whose record has been certified as creditable after completion of 12 years' commissioned service: *Provided*, That the said Joseph F. Becker shall not be entitled to such retired pay prior to the date of this act.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

JOHN McNICKLE

The bill (S. 2950) to define and determine the character of the service represented by the honorable discharge issued to John McNickle, of Company L, Seventh Regiment New York Volunteer Heavy Artillery, under date of September 27, 1865, was considered as in Committee of the Whole, and was read as follows:

Be it enacted, etc., That the service of John McNickle, to whom an honorable discharge was issued at Albany, N. Y., on the 27th day of September, 1865, shall be regarded for all purposes honest and faithful: *Provided*, That no pension, bounty, pay, allowances, or other emolument shall accrue under or be predicated on this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (S. 3408) to amend an act entitled "An act to give indemnity for damages caused by American forces abroad," approved April 18, 1918, and for other purposes, was announced as next in order.

Mr. JONES of Washington. Let the bill go over.

The PRESIDING OFFICER. Objection is made and the bill goes over.

The bill (H. R. 7269) to authorize and direct the Secretary of War to transfer certain materials, machinery, and equipment to the Department of Agriculture was announced as next in order.

Mr. JONES of Washington. Let the bill go over.

The PRESIDING OFFICER. The bill goes over on objection.

The bill (H. R. 2811) to amend section 7 of the act of February 6, 1909, entitled "An act authorizing the sale of lands at the head of Cordova Bay, in the Territory of Alaska, and for other purposes," was announced as next in order.

Mr. ROBINSON. This bill ought to be explained to the Senate. There appears to be no report accompanying the bill.

Mr. SMOOT. Let the bill go over.

The PRESIDING OFFICER. Objection is heard and the bill goes over.

RELIEF OF HEIRS OF KO-MO-DAL-KIAH

The bill (S. 1705) for the relief of the heirs of Ko-mo-dal-kiah, Moses agreement allottee No. 33, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Indian Affairs with an amendment in line 9, to strike out "Carrier," and insert "Carrie," so as to read:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized to make an allotment of not more than 50 acres of land within the diminished Colville Reservation, in the State of Washington, to Ko-mo-dal-kiah in lieu of portions of Moses agreement allotment No. 33 embraced within the patented entries of Francis M. Fulton and Carrie French.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

INDIANS ON UMATILLA RESERVATION, OREG.

The bill (S. 994) to amend the act of March 3, 1885, entitled "An act providing for allotment of lands in severalty to the Indians residing upon the Umatilla Reservation, in the State of Oregon, and granting patents therefor, and for other purposes," was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That section 2 of the act of March 3, 1885 (23d Stat. L. p. 142), be, and the same hereby is, amended so as to authorize the Secretary of the Interior to withhold from sale or disposition, for use as tribal grazing grounds, all unentered and undisposed of lands in township 2 south, ranges 34 and 35 east of the Willamette meridian, Oregon, formerly a part of the Umatilla Reservation: *Provided*, That any settler on these lands prior to April 21, 1921, shall be permitted to acquire title to the lands covered by his settlement, not exceeding 160 acres of non timbered lands and 40 acres of timbered lands, at not less than the appraised value thereof by making entry of the lands at the proper district land office within six months from the date of the passage of this act and by complying with the provisions of law governing other entries of Umatilla lands.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

OIL AND GAS LEASES, NAVAJO INDIAN RESERVATION

The bill (S. 1653) authorizing the expenditure for certain purposes of receipts from oil and gas on the Navajo Indian Reservation in Arizona and New Mexico was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That any moneys derived from bonuses on oil and gas leases, and from oil and gas royalties, on the Navajo Indian Reservation be, and they are hereby, made available for expenditure, in the discretion of the Secretary of the Interior, for necessary expenses in connection with the supervision of the development and operation of the oil and gas industry on said reservation and for the support, civilization, and education of the Navajo Indians in Arizona and New Mexico.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

SAN JUAN RIVER BRIDGE, NEW MEXICO

The bill (S. 1665) to provide for the payment of one-half the cost of the construction of a bridge across the San Juan

River, N. Mex., was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of \$6,020, or so much thereof as may be necessary, to defray one-half the cost of a bridge across the San Juan River near Bloomfield, N. Mex., under rules and regulations to be prescribed by the Secretary of the Interior, who shall also approve the plans and specifications for said bridge: *Provided*, That the State of New Mexico or the county of San Juan shall contribute the remainder of the cost of said bridge, the obligation of the Government hereunder to be limited to the above sum, but in no event to exceed one-half the cost of the bridge.

Mr. DIAL. I would like to ask, if the bridge crosses a public highway why it is necessary to have a special act for the purpose?

Mr. BURSUM. A bill identical with the bill now being considered passed the Senate in the last Congress, but it was not passed through the House because they were unable to reach it there. The bill is to carry out a mutual arrangement between the Indian Service and the county government in the construction of a bridge which is of mutual benefit. The Indian Service stands one-half of the expense and the county government the other half. It is recommended by the department.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MRS. BENJAMIN GAUTHIER

The bill (S. 1897) for the relief of Mrs. Benjamin Gauthier was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized to sell and convey to Mrs. Benjamin Gauthier, of Lac du Flambeau, with the consent of the Lac du Flambeau Indians, to be evidenced in such manner as he may require, a tract of land not exceeding 10 acres in lot 3, section 8, township 40 north of range 5 east, on the Lac du Flambeau Indian Reservation, in Wisconsin, said tract to be selected by the said Secretary and to include the land occupied by said Mrs. Benjamin Gauthier with hotel, store, warehouse, residence, summer cottages, barn, and social hall; said conveyance shall be made upon payment to the Secretary of the Interior of such sum as he shall determine to be the reasonable value of the land conveyed, exclusive of the improvements thereon. All expenses of survey and conveyance to be paid by Mrs. Gauthier.

The receipts of such sale shall be paid into the Treasury and placed to the credit of the Lac du Flambeau Band of Chippewa Indians.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

EXPENDITURE OF TRIBAL FUNDS OF INDIANS

The bill (S. 2838) to provide for expenditure of tribal funds of Indians for construction, repair, and rental of agency buildings and related purposes was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That any tribal funds or Indian moneys, which are now or may hereafter be authorized by law for expenditure for support and civilization of Indians, shall, in the discretion of the Secretary of the Interior, be available also for construction, repair, and rental of agency buildings, including heating, lighting, power, water, and sewer systems in connection therewith.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

TIMBER ON THE MENOMINEE RESERVATION, WIS.

The bill (S. 3036) to amend the law relating to timber operations on the Menominee Reservation in Wisconsin was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That section 2 of the act approved March 28, 1908 (35 Stat. L. p. 51), entitled "An act to authorize the cutting of timber, the manufacture and sale of lumber, and the preservation of the forests on the Menominee Indian Reservation in the State of Wisconsin," be, and is hereby, amended to authorize the making of contracts with white men for any work connected with the logging and milling operations on the said reservation, to authorize the employment of white men by Indian contractors, and to exempt from the requirements of sections 3709 and 3744 of the Revised Statutes all contracts for labor or supplies necessary for the carrying on of such operations.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (H. R. 2977) for the relief of H. E. Kuca and V. J. Koupal was announced as next in order.

Mr. FLETCHER. Let the bill go over.

The PRESIDING OFFICER. Under objection, the bill will go over.

The bill (H. R. 4461) to provide for the payment of certain claims against the Chippewa Indians of Minnesota was announced as next in order.

Mr. FLETCHER. Let the bill go over.

The PRESIDING OFFICER. The bill goes over, under objection.

The bill (H. R. 7249) for the relief of Forrest J. Kramer was announced as next in order.

Mr. FLETCHER. Let the bill go over.

The PRESIDING OFFICER. Under objection, the bill will be passed over.

REFUND OF TAXES ON DISTILLED SPIRITS

The bill (S. 3072) to refund taxes paid on distilled spirits in certain cases was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the Commissioner of Internal Revenue may, pursuant to the provisions of section 3220, Revised Statutes, as amended, allow the claim of any distiller for the refund of taxes paid in excess of \$2.20 per proof gallon on any distilled spirits produced and now owned by him and stored on the premises of the distillery where produced, but no refund shall be allowed unless such spirits are contained in the distiller's original packages in which they were tax paid, or in regularly stamped bottles and cases in which they were placed when bottled in bond, or in stamped or unstamped bottles into which they have been placed while on and without removal from the distillery premises.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PAYMENT TO WISCONSIN-POTTAWATOMI INDIANS

The bill (H. R. 7239) authorizing the Secretary of the Interior to pay certain funds to various Wisconsin-Pottawatomie Indians was announced as next in order.

Mr. FLETCHER. Let the bill go over.

The PRESIDING OFFICER. The bill goes over under objection.

JURISDICTION OF COURT OF CLAIMS IN INDIAN CASES

The bill (S. 3346) to provide that jurisdiction shall be conferred upon the Court of Claims, notwithstanding the lapse of time or statutes of limitation, to hear, examine, and adjudicate and render judgment in any and all legal and equitable claims arising under or growing out of any treaty or agreement between the United States and certain bands of Indians, and for other purposes, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Indian Affairs with amendments, on page 3, line 5, after the word "Interior," to insert the words "as required by existing law"; and on line 25 strike out the words "so employed by said Indian nation" and insert in lieu thereof the words "employed by the Indians as herein provided"; and on page 4, line 13, to strike out "or all persons" and insert "other tribes or bands of Indians," so as to make the bill read:

Be it enacted, etc., That jurisdiction be, and is hereby, conferred upon the Court of Claims, notwithstanding the lapse of time or statutes of limitation, to hear, examine, and adjudicate and render judgment in any and all legal and equitable claims arising under or growing out of any treaty or agreement between the United States and the Sisseton and Wahpeton Bands of Sioux Indians, or arising under or growing out of any act of Congress in relation to Indian affairs, which said Sisseton and Wahpeton Bands of Sioux Indians may have against the United States, which claims have not heretofore been determined and adjudicated on their merits by the Court of Claims or the Supreme Court of the United States: *Provided, however*, That claims which were the subject of a certain suit numbered 33731 in the Court of Claims of the United States, wherein the Sisseton and Wahpeton Bands of Sioux Indians are petitioners and the United States is defendant, may be the subject of a suit de novo and shall be heard and considered de novo by the Court of Claims in the same manner and in effect the same as if said suit had never been filed or prosecuted in said court.

SEC. 2. Any and all claims against the United States within the purview of this act shall be forever barred unless suit be instituted or petition filed as herein provided in the Court of Claims within five years from the date of approval of this act, and such suit shall make the Sisseton and Wahpeton Bands of the Sioux Indians party plaintiff and the United States party defendant. The petition shall be verified

by the agent or attorney or attorneys employed to prosecute such claim or claims under contract with the Sisseton and Wahpeton Bands of Sioux Indians approved by the Commissioner of Indian Affairs and the Secretary of the Interior; and said contract shall be executed in their behalf by an agent chosen by them under the direction and approval of the Commissioner of Indian Affairs and the Secretary of the Interior as required by existing law. Official letters, papers, documents, and records, or certified copies thereof, may be used in evidence, and the departments of the Government shall give access to the attorney or attorneys of said Indian nation to such treaties, papers, correspondence, or records as may be needed by the attorney or attorneys of said Indian nation.

SEC. 3. In said suit the court shall also hear, examine, consider, and adjudicate any claims which the United States may have against said Indian nation, but any payment which may have been made by the United States upon any claim against the United States shall not operate as an estoppel, but may be pleaded as an offset in such suit.

SEC. 4. That from the decision of the Court of Claims in any suit prosecuted under the authority of this act an appeal may be taken by either party, as in other cases, to the Supreme Court of the United States.

SEC. 5. That upon the final determination of any suit instituted under this act, the Court of Claims shall decree such amount or amounts as it may find reasonable to be paid the attorney or attorneys employed by the Indians as herein provided for the services and expenses of said attorneys rendered or incurred prior or subsequent to the date of approval of this act: *Provided*, That in no case shall the aggregate amounts decreed by said Court of Claims for fees be in excess of the amount or amounts stipulated in the contract of employment, or in excess of a sum equal to 10 per cent of the amount of recovery against the United States, and in no event shall such amount exceed the sum of \$25,000.

SEC. 6. The Court of Claims shall have full authority by proper orders and process to bring in and make parties to such suit any other tribes or bands of Indians deemed by it necessary or proper to the final determination of the matters in controversy.

SEC. 7. A copy of the petition shall, in such case, be served upon the Attorney General of the United States, and he, or some attorney from the Department of Justice to be designated by him, is hereby directed to appear and defend the interests of the United States in such case.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

W. H. KING

The bill (S. 2503) for the relief of W. H. King was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with an amendment in line 7 to strike out "\$425" and insert in lieu thereof "\$421.33," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to W. H. King, former United States marshal for the district of South Dakota, the sum of \$421.33 for reimbursement on account of the payment of a judgment rendered against him for an act done under color of his office.

The amendment was agreed to.

The bill was reported to the Senate as amended and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

CORNELIA M. A. TOWER

The bill (H. R. 3504) for the relief of Cornelia M. A. Tower was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Cornelia M. A. Tower, widow of Morton L. Tower, late an assistant engineer in the engineer department at large, the sum of \$3,000 out of any money in the Treasury not otherwise appropriated, as full compensation for the death of her husband, which occurred as the result of an accident and without negligence on his part while he was engaged in the performance of his duties as such assistant engineer.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (H. R. 3595) for the relief of Daniel F. Healy was announced as next in order.

Mr. FLETCHER. Let the bill go over.

The PRESIDING OFFICER. The bill will go over under objection.

The bill (H. R. 4374) for the relief of the American Surety Co. of New York was announced as next in order.

Mr. FLETCHER. Let the bill go over.

The PRESIDING OFFICER. Objection is heard and the bill will go over.

The bill (S. 3372) to provide safeguards for future Federal irrigation development, and an equitable adjustment of existing accounts on Federal irrigation projects, and for other purposes, was announced as next in order.

Mr. WALSH of Montana. Let the bill go over.

The PRESIDING OFFICER. Objection is heard and the bill will be passed over.

OLD OREGON TRAIL

The bill (S. 2053) to provide for designating the route of the Old Oregon Trail was considered as in Committee of the Whole.

The bill had been reported from the Committee on Agriculture and Forestry, with amendments, on page 2, line 12, after the word "Boise," to strike out "and"; in line 13, after the word "Nampa," to insert "Parma, Payette, and Weiser"; in line 15, after the word "River," to strike out "Highway"; in line 16, after the word "River," to strike out "and"; in the same line, after the word "Portland," to insert "Astoria, and Seaside"; and in line 18, after the word "Vancouver," to insert "and Olympia," so as to make the bill read:

Be it enacted, etc., That the highways extending from Kansas City, Kans., to Vancouver, Wash., through the States of Kansas, Nebraska, Wyoming, Idaho, Oregon, and Washington, and variously known as the Overland Trail, the Mormon Road, the Emigrant Road, and the Oregon Trail, and coinciding as near as may be with the system of Federal-aid highways through said States, shall hereafter be known as the Old Oregon Trail.

SEC. 2. That the road herein designated as the Old Oregon Trail shall follow, as closely as economic and topographic conditions will permit, the route traveled by the pioneers in their journeys westward to Oregon over said trail, and shall extend through Kansas City, Lawrence, Topeka, Rossville, Louisville, and Frankfort, in the State of Kansas; thence through Fairbury, Hebron, Kearney, North Platte, Ogallala, Lewellen, Bayard, and Scotts Bluff, in the State of Nebraska; thence through Torrington, Laramie, Douglas, Casper, Alcova, Muddy Gap, Eden, Rock Springs, Green River, Granger, Kemmerer, and Cokeville, in the State of Wyoming; thence through Montpelier, Soda Springs, Lava Hot Springs, Pocatello, American Falls, Marshfield, Twin Falls, Glenns Ferry, Boise, Nampa, Parma, Payette, and Weiser, in the State of Idaho; thence through Ontario, Baker, La Grande, Pendleton, and Umatilla, thence along the Columbia River through The Dalles, Hood River, Portland, Astoria, and Seaside, in the State of Oregon; and thence to Vancouver and Olympia, in the State of Washington.

The amendments were agreed to.

Mr. JONES of Washington. Mr. President, I want to ask the Senator from Oregon whether or not he has heard from Uncle Ezra Meeker with reference to this bill, and if the route laid out is satisfactory to him?

Mr. McNARY. Mr. President, I will say to the Senator from Washington that I have not heard directly from Uncle Ezra, but I am sure the route is acceptable to him, as it is to all the people of the State of Washington.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (S. 4) to confer jurisdiction on the Court of Claims to certify certain findings of fact, and for other purposes, was announced as next in order.

Mr. SMOOT. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 99) authorizing the President to appoint two additional circuit judges for the eighth circuit was announced as next in order.

Mr. DIAL. Let that go over.

Mr. HARRELD. Mr. President, will not the Senator withdraw his objection? This bill has been recommended by the council of judges, the Department of Justice, and everybody else. It has been delayed about a year. May I ask unanimous consent to consider it at this time?

The PRESIDING OFFICER. The Chair understands that objection was made to the consideration of the bill.

Mr. FLETCHER. Mr. President, I understand the situation to be that there are other instances where there will be judges asked for and there will be a sort of a conclusion reached as to the number of judges to be provided in various

States. I think it might be advisable to have all of them provided in one bill. I do not see why we should select this particular condition.

Mr. HARRIS. More than a year ago, when the council of judges had their annual meeting, they recommended that these judges be appointed. Recently they had another annual meeting and repeated their recommendation, saying that there was an exceedingly urgent need for these two additional judges of that court. They have recommended it twice.

Mr. FLETCHER. I shall not raise any objection.

Mr. DIAL. I think the bill had better go over.

The PRESIDING OFFICER. Objection is heard, and the bill will be passed over.

The bill (S. 2835) to amend an act entitled "An act authorizing insurance companies or associations and fraternal beneficiary societies to file bills of interpleader," approved February 22, 1917, was announced as next in order.

Mr. WALSH of Montana. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

PATIENTS OF GENERAL HOSPITAL 55, FORT BAYARD, N. MEX.

The joint resolution (S. J. Res. 131) authorizing the Director of the United States Veterans' Bureau to take assignments of certain claims of officers, employees, and patients of General Hospital No. 55, Fort Bayard, N. Mex., was considered as in Committee of the Whole.

The joint resolution had been reported from the Committee on Finance with amendments.

Mr. ROBINSON. Mr. President, what is the object of this joint resolution?

Mr. BURSUM. Mr. President, there are some amendments which were reported by the Finance Committee. The amendments limit the joint resolution to the patients only. At Fort Bayard there are a number of patients, veterans. These patients were possessed of certain moneys. Their moneys were deposited by the management in certain banks. Those banks are now closed. The patients had no control or say as to where their money should be deposited or the handling of it. This joint resolution seeks to provide that the Veterans' Bureau shall take charge of their affairs, take over the deposits, and collect the money. That is the object of the joint resolution. It relates only to the patients who are interned in the hospitals.

Mr. SMOOT. Mr. President, I simply want to say to the Senator that, as chairman of the Finance Committee, I have made the statement that neither the Veterans' Bureau nor any other branch of our Government should take the responsibility of saying where money belonging to any employee or any veteran shall be deposited. That ought to be left entirely in their own hands, and let them designate the bank in which they want their money to be deposited. If that were done, no such bill as this would be before us at this time.

Mr. ROBINSON. The Senator's committee reported this bill, did it not?

Mr. SMOOT. I say we did, because of the fact that they admit that the director ordered that the money should be deposited in certain banks.

Mr. ROBINSON. I know; but I can not understand the consistency of the Senator's course in advising the Senate now that the bill is a bad one and that the policy underlying it is to be condemned, and yet his committee reported it favorably.

Mr. SMOOT. I say "hereafter."

Mr. ROBINSON. In view of the precedent that the Senate is establishing by passing the bill, the Veterans' Bureau may not respect the judgment of particular Senators.

Mr. SMOOT. That may be true. I want to say, however, that after this notice has been given—

Mr. ROBINSON. Oh, Mr. President, the Senator's statement on the floor of the Senate does not constitute notice to a department. The Senator should report a bill to the Senate. I suggest that the bill go over for the present and that the Senator or some other member of his committee propose a proviso to the bill that hereafter the bureau shall not have authority to determine matters of this sort.

Mr. SMOOT. I was only going to give my view, I will say to the Senator, not because it would stand as against any of the departments, but because I wished to announce that hereafter I shall not support any such bill as this and will not agree to it.

Mr. ROBINSON. Why should not the bill carry an amendment?

Mr. SMOOT. I am perfectly willing that it shall go over and carry that amendment. I do not say this simply with regard to the Veterans' Bureau; I say it with regard to all departments of our Government.

The PRESIDING OFFICER. The Chair understands the Senator from Arkansas to object.

Mr. ROBINSON. I do not.

The PRESIDING OFFICER. Then the Secretary will state the amendments proposed by the committee.

The amendments were, on page 1, line 5, after the word "from," to strike out "officers, employees, and"; in line 7, after the word "such," to strike out "officers, employees, and"; and in line 10, after the word "such," to strike out "officers, employees, and," so as to make the joint resolution read:

Resolved, etc., That the Director of the United States Veterans' Bureau is authorized (1) to take assignments, on behalf of the United States, from patients of General Hospital No. 55, Fort Bayard, N. Mex., of any and all claims on account of deposits of moneys of such patients, with the Silver City National Bank and the American National Bank, of Silver City, N. Mex., and (2) to pay to such patients the full amounts of such claims. There is hereby authorized to be appropriated such sums as may be necessary to enable the director to pay the amount of any claims assigned to him under the provisions of this resolution.

Sec. 2. That the director is authorized to enforce on behalf of the United States any claim assigned to him under the provisions of this resolution. All moneys received by the director on account of any such claims shall be covered into the Treasury of the United States as miscellaneous receipts.

The amendments were agreed to.

The joint resolution was reported to the Senate as amended, and the amendments were concurred in.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "Joint resolution authorizing the Director of the United States Veterans' Bureau to take assignments of certain claims of patients of General Hospital No. 55, Fort Bayard, N. Mex."

RESOLUTION PASSED OVER

The resolution (S. Res. 223) authorizing the appointment of a special committee to investigate the Federal farm loan system and the Federal Farm Loan Board was announced as next in order.

Mr. DIAL. Let that go over.

The PRESIDING OFFICER. The resolution will be passed over.

ELLA H. SMITH

The bill (S. 1885) for the relief of Ella H. Smith was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with an amendment, on page 1, line 4, after the word "pay," to insert "out of any money in the Treasury not otherwise appropriated," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Ella H. Smith, postmistress at Wynne, Ark., an office of the second class, the sum of \$3,700, which amount was lost by burglary without fault of hers, and which she repaid to the Government.

The amendment was agreed to.

Mr. BRUCE. Let the bill go over.

The PRESIDING OFFICER. Objection is heard, and the bill will be passed over.

J. E. SAUCIER

The bill (S. 2534) for the relief of J. E. Saucier was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay to J. E. Saucier, out of any money in the Treasury not otherwise appropriated, the sum of \$288, in full satisfaction of all claims against the United States on account of expenditures made by him for services and materials during the period from July 1, 1918, to July 1, 1921, in connection with the discharge of his duties as postmaster at Bay St. Louis, Miss.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

LESLIE WARNICK BRENNAN

The bill (S. 2552) for the relief of Leslie Warnick Brennan was announced as next in order.

Mr. DIAL. Let that go over.

The PRESIDING OFFICER. Objection is made, and the bill will be passed over.

Mr. BRUCE. Mr. President, I hope—though I suspect it is a vain hope—that the Senator will withdraw his objection.

Mr. DIAL. I withdraw it for the present. The bill seems to involve a pretty large amount.

Mr. BRUCE. But the amount, after all, is only an amount that was actually expended for the purpose mentioned in the bill.

This bill appropriates the sum of \$16,419.97 for the reimbursement of Leslie W. Brennan, of Utica, N. Y., for that amount expended by him in taking and distributing motion pictures used by the War Department in instructing troops during the World War. He was the originator of this idea, it seems to be conceded.

The papers in the case show that Major General Bell and General Kennon actually used the pictures and in an official report, made at the request of the War College to The Adjutant General of the United States, reported that they were a great help to them; that Assistant Secretary F. P. Keppel, who is familiar with Brennan's work, wrote the Judge Advocate General that in his opinion a quasi-contract relationship existed between Brennan and the United States Government, and that the Government would properly repay Brennan for his work; that after examining the documents, and so forth, in 1920, Assistant Secretary Crowell wrote to Senator JAMES W. WADSWORTH, of New York, a letter in which he recognizes that the Army had received a benefit from the pictures; and after the acknowledgment of the results accomplished by the pictures, and after the examination of the documents, and so forth, the acting adjutant general of New York State wrote to Senator JAMES WADSWORTH on November 1, 1923, that his department had put the stamp of approval on Brennan's work and expressed an earnest desire that the matter receive the consideration of the Senator.

There was no positive contract in this case between the Government and Brennan; but the Government received the full benefit of his idea and the full benefit of this amount of money, \$16,419.97, which was actually expended by him in taking and in distributing these pictures. The closest kind of consideration was given to this matter by the Committee on Military Affairs. I regret that the Senator from New York [Mr. WADSWORTH] is not here, because he is even more familiar than I am with all the circumstances of this case and fully approves the object of this bill. It seemed to us that the claim was an entirely meritorious one; and the Senate will observe, as I have already said, that the man asks only to be reimbursed for actual outlays made by him which he brought specifically to the attention of the committee. In my judgment the bill ought to receive the approval of the Senate.

Mr. DIAL. I shall have to ask that it go over.

The PRESIDING OFFICER. Objection is heard, and the bill will be passed over.

BILLS PASSED OVER

The bill (H. R. 3411) for the relief of Mrs. John P. Hopkins was announced as next in order.

Mr. DIAL. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (H. R. 4290) for the relief of W. F. Payne was announced as next in order.

Mr. FLETCHER. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

EDWARD S. SCHEIBE

The bill (H. R. 4318) for the relief of Edward S. Scheibe was announced as next in order.

Mr. DIAL. Let that go over.

Mr. SHIPSTEAD. Mr. President, I hope the Senator will withdraw his objection. I should like to explain this bill. It will not require any appropriation from the Treasury. It is a bill that was recommended to Congress by the department in 1920. The Post Office Department charged up a debit against a man who was postmaster at Cloquet, Minn., in 1918, when the forest fires in that section of the State burned the entire town of Cloquet and also the post office and destroyed all of the stamps and other property in the post office.

Mr. ROBINSON. Mr. President, as I understand, the evidence shows that the stamps were destroyed by the fire. The postmaster was in no way morally responsible for the loss. It was an incident in the nature of a disaster that caused the loss. I think the bill ought to pass.

Mr. FLETCHER. It grows out of a forest fire in that region which destroyed the whole town of Cloquet and the timber for miles around.

Mr. ROBINSON. Yes.

The PRESIDING OFFICER. Is there objection to the consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (H. R. 8893) for the relief of Juana F. Gamboa was announced as next in order.

Mr. DIAL. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 386) to amend section 5 of the United States cotton futures act, approved August 11, 1916, as amended, was announced as next in order.

Mr. DIAL. Mr. President—

Mr. RANSDELL. Let that bill go over.

Mr. DIAL. I did not see the Senator from Louisiana here. He asked me to let it go over if he was not here, and I promised to do so.

Mr. RANSDELL. I thank the Senator very much.

Mr. DIAL. I want to state that those two bills have been pending here for some time. The first bill, Order of Business 771, Senate bill 386, was referred to the Agricultural Committee some time ago. We had hearings on it for a long time, and we could not agree about it. At the last session of the Senate I moved to discharge that committee and put it on the calendar, and this whole question was referred to the Federal Trade Commission for investigation. That commission, after working on it for two years, unanimously reported in favor of the principle of the bill. The principle of this bill was sustained by the Manufacturers' Record, of Baltimore, and by a number of the most important papers of the South, such as the Atlanta Constitution, the Birmingham Age-Herald, the Columbia State, and other papers. I hope to call up this bill at an early date and endeavor to get a vote on it. I promised, however, to let it go over to-day.

Mr. RANSDELL. Mr. President, I do not want to make a speech. My friend the Senator from South Carolina has made a little speech in favor of his bill, and I simply want to state to the Senate that I can not agree to the correctness of any of the statements that he has made about these different parties, and at the proper time we will discuss it fully; but I object now to any consideration of the bill.

The PRESIDING OFFICER. The Senator from Louisiana objects, and the bill will be passed over.

The bill (S. 3197) to amend section 5 of the United States cotton futures act to enable the buyer of a cotton-futures contract to demand actual delivery in fulfillment thereof prior to the close of the delivery month was announced as next in order.

Mr. RANSDELL. Let the bill go over.

The PRESIDING OFFICER. The bill will be passed over.

JUDICIAL DISTRICT OF INDIANA

The bill (H. R. 62) to create two judicial districts within the State of Indiana, the establishment of judicial divisions therein, and for other purposes, was announced as next in order.

Mr. DIAL. Let the bill go over.

Mr. WATSON. Mr. President, I wonder if the Senator has studied the situation?

Mr. DIAL. No, I have not; but I thought the bill should go over so that it would come up later, and we could amend it so as to take in some situations in our State.

Mr. WATSON. I do not understand that an omnibus bill which would cover such a situation is pending. The situation in my State is such that there is almost a denial of justice to many litigants, not that the present judge is not eminently efficient, but that with a population of over 3,000,000, and with a vast industrial development, Indiana has never had more than one judicial district and one judge.

I see my friend the Senator from Florida [Mr. FLETCHER] smiling at me, and I was afraid he was about to object, so I looked up the figures; and I found that Florida, with a population of 968,000, has two districts and three judges. My friend the Senator from Arkansas [Mr. ROBINSON], who very kindly refrained from objecting, has two districts and two judges in his State. My friend just across the aisle the Senator from Montana [Mr. WALSH] has one district and two judges in his State, and so on down the line.

Mr. DIAL. I think you ought to have another one.

Mr. WATSON. I thank the Senator. This bill is somewhat long, Mr. President, and as I know there are many Senators who want to reach their bills on the calendar, if it be at all within the proprieties, I ask that the bill be considered as having been read, unless Senators want to hear it read.

Mr. FLETCHER. I call the Senator's attention to the fact that the bill as reported would strike out the language of the bill which passed the House, and insert new language, providing that the State of Indiana should constitute one judicial district.

Mr. WATSON. The bill as it passed the House provided that two districts should be established in Indiana instead of one. After a full hearing, and with the consent of the junior Senator from Indiana and myself, the Senate committee changed it so as to provide for one district with two judges. That met with our approval. This bill largely allocates or distributes the counties of the State into two divisions, and that is the reason why I thought it was not necessary to read it.

Mr. DIAL. I think the Senator has made out his case, and I think we ought to let the bill pass.

The Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on the Judiciary with an amendment to strike out all after the enacting clause and to insert:

That the State of Indiana shall constitute one judicial district to be known as the district of Indiana. For the purpose of holding terms of court the district shall be divided into seven divisions constituted as follows: The Indianapolis division, which shall include the territory embraced within the counties of Boone, Clinton, Delaware, Fayette, Franklin, Hamilton, Hancock, Hendricks, Henry, Johnson, Madison, Marion, Monroe, Morgan, Putnam, Randolph, Rush, Shelby, Tipton, Union, Tippecanoe, Warren, and Wayne; the Fort Wayne division, which shall include the territory embraced within the counties of Adams, Allen, Blackford, De Kalb, Grant, Huntington, Jay, Lagrange, Noble, Steuben, Wells, and Whitley; the South Bend division, which shall include the territory embraced within the counties of Cass, Elkhart, Fulton, Howard, Kosciusko, Laporte, Marshall, Miami, Pulaski, St. Joseph, Starke, and Wabash; the Hammond division, which shall include the territory embraced within the counties of Benton, Carroll, Jasper, Lake, Porter, Newton, and White; the Terre Haute division, which shall include the territory embraced within the counties of Clay, Fountain, Greene, Knox, Montgomery, Owen, Parke, Sullivan, Vermillion, and Vigo; the Evansville division, which shall include the territory embraced within the counties of Crawford, Daviess, Dubois, Gibson, Lawrence, Martin, Orange, Perry, Pike, Posey, Spencer, Vanderburg, and Warrick; the New Albany division, which shall include the territory embraced within the counties of Bartholomew, Brown, Clark, Dearborn, Decatur, Floyd, Harrison, Jackson, Jefferson, Jennings, Ohio, Ripley, Scott, Switzerland, and Washington.

Sec. 2. Terms of the district court for the Indianapolis division shall be held at Indianapolis on the first Mondays of May and November of each year; for the Fort Wayne division, at Fort Wayne on the first Mondays of June and December of each year; for the South Bend division, at South Bend on the second Mondays of June and December of each year; for the Hammond division, at Hammond on the first Mondays of January and July of each year; for the Terre Haute division, at Terre Haute on the first Mondays of April and October of each year; for the Evansville division, at Evansville on the second Mondays in April and October of each year; for the New Albany division, at New Albany on the third Mondays of April and October of each year. When the time fixed as above for the sitting of the court shall fall on a legal holiday, the term shall begin as of the following day. Terms of the district court shall not be limited to any particular number of days, nor shall it be necessary for any term to adjourn by reason of the intervention of a term of court elsewhere; but the term about to commence in another division may be postponed or adjourned over until the business of the court in session is concluded.

Sec. 3. That the President of the United States be, and is hereby, authorized and directed by and with the advice and consent of the Senate to appoint an additional district judge for the district of Indiana, who shall reside in said district, and whose term of office, compensation, duties, and powers shall be the same as now provided by law for the judge of said district.

Sec. 4. The clerk of the court for the district shall maintain an office in charge of himself or a deputy at Indianapolis, Fort Wayne, South Bend, Hammond, Terre Haute, Evansville, and New Albany. Such offices shall be kept open at all times for the transaction of the business of the court.

Sec. 5. That all civil suits and proceedings not of a local character which shall hereafter be brought in said district against a single defendant, or where all the defendants reside in the same division in said district, shall be brought and tried in the division in which the defendant or defendants reside, but if there are two or more defendants residing in different divisions such suit or proceeding may be brought and tried in either division.

Sec. 6. That in all cases of removal of suits and proceedings from the courts of the State of Indiana to the court of the United States in said district such removal shall be to the United States court in the division in which the county is situated from which the removal is made.

Sec. 7. That prosecution for crimes or offenses hereafter committed in said district shall be tried within the division in which said crimes or offenses are committed.

Sec. 8. That in all civil suits and proceedings and all prosecutions for crimes and offenses now pending in, or that have heretofore been tried or determined in, the circuit or district court of said district which would, in cases which if instituted after the passage of this act, be required to be brought or tried in any particular division thereof, such suits, proceedings, prosecutions, and all motions and petitions relating thereto shall be filed in or transferred to the division in which such suits, proceedings, and prosecutions would have been brought or filed after the passage of this act, and there disposed of in the same manner and with like effect as if the suit, proceeding, or prosecution had been originally there instituted; and all process, writs, and recognizances relating to such suits and proceedings, and all prosecutions for crimes and offenses so transferred shall be considered as belonging to the terms of the court in which they are tried in the same manner and with like effect as if they had been issued or taken in reference thereto originally.

Sec. 9. That either party in a civil or criminal proceeding may apply to the court for a change of venue from the division where a suit or proceeding has been instituted to an adjoining division and the court in its discretion may grant such a change.

Mr. WATSON. Mr. President, I want to offer some amendments, changing some of the counties from one division to another.

The PRESIDING OFFICER. The Senator from Indiana offers certain amendments to the amendment, which the Secretary will report.

The READING CLERK. On page 7, line 23, strike out the words "counties of Boone, Clinton, Delaware" and in lieu thereof to insert the words "counties of Bartholomew, Boone, Brown, Clinton, Decatur, Delaware."

Mr. ROBINSON. May I inquire of the Senator proposing this amendment whether the same has been considered by the Judiciary Committee of the Senate?

Mr. WATSON. Oh, no; for the reason that the bill provides that certain counties shall be placed in certain divisions; but after the committee had reported the bill I talked to two or three of the Senators and suggested certain changes to them.

Mr. ROBINSON. Does the junior Senator from Indiana [Mr. RALSTON] agree that the amendment would effectuate the convenience of possible litigants?

Mr. RALSTON. Yes; I agree to that.

Mr. WATSON. The junior Senator from Indiana and I agree on most things, I may say, except in campaign times.

Mr. ROBINSON. I am glad to have the Senator say so.

The PRESIDING OFFICER. The question is upon agreeing to the amendment to the committee amendment.

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The Secretary will state the next amendment to the amendment.

The READING CLERK. On page 7, line 24, after the word "Henry," to insert the word "Howard"; on page 7, line 25, after the word "Monroe," to insert the word "Montgomery" and to strike out the word "Putnam"; on page 8, lines 1 and 2, to strike out the words "Tippecanoe, Warren"; on line 7, to strike out the word "Howard"; on line 11, after the word "Newton," to insert the words "Tippecanoe, Warren"; on line 13, to strike out the word "Fountain"; on line 14, to strike out the word "Montgomery," and after the word "Parke," to insert the word "Putnam"; on lines 16 and 17, to strike out the words "Crawford," "Lawrence," and "Orange"; on line 20, to strike out the words "Bartholomew, Brown"; on line 21, after the word "Clark," to insert the word "Crawford," and to strike out the word "Decatur"; on line 22, after the word "Jennings," to insert the word "Lawrence"; and after the word "Ohio," to insert the word "Orange"; on page 10, line 22, strike out the period and insert a colon in lieu thereof and the following proviso:

Provided, That the judge of said division may, in his discretion, cause a jury to be summoned in any criminal case from said division or from any division adjoining the one in which said case is to be tried.

The amendments to the amendment were agreed to.

The amendment as amended was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

The title was amended so as to read: "An act to authorize the appointment of an additional district judge in and for the district of Indiana and to establish judicial divisions therein, and for other purposes."

J. W. COOK

The bill (H. R. 3046) for the relief of J. W. Cook was announced as next in order.

Mr. FLETCHER. Let the bill go over.

Mr. WALSH of Montana. Mr. President, I trust a brief statement of that matter will induce the objector to withdraw his objection.

This man, Mr. Cook, had a contract to carry the mail from the station in the city of Billings to the post office, and during the war he had to be escorted by United States troops, and being thus escorted one day a firearm in the hands of one of the escort was accidentally discharged and a bullet hit him in the foot, entirely destroying the use of his foot, which had to be amputated, according to my recollection. He has been in very poor health ever since, and I think that justice has been too long delayed. I hope the objection will be withdrawn. The Committee on Claims thought it was a meritorious case.

Mr. FLETCHER. In view of the Senator's statement, I withdraw the objection.

The bill was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of \$3,500 to J. W. Cook in full compensation for injuries sustained and for reimbursement of expenses incurred as a result of being accidentally shot on December 30, 1921, while employed at Billings, Mont., as a contract mail carrier.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

FRED W. STICKNEY AND H. A. REYNOLDS

The bill (H. R. 3505) for the relief of Fred W. Stickney and H. A. Reynolds was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Fred W. Stickney and H. A. Reynolds the sum of \$197.50, out of any money in the Treasury not otherwise appropriated, as compensation for the construction of 214 rods of fence on the division line between the lands of said Fred W. Stickney and H. A. Reynolds and lands owned by the United States and occupied by the Indians in Sherwood Valley, Calif., the said amount being one-half of the cost of said fence.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

HENRY A. KESSEL CO. (INC.)

The bill (H. R. 1082) for the relief of Henry A. Kessel Co. (Inc.) was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the claim of Henry A. Kessel Co. (Inc.), a corporation, as owner of the motor launch *Gled*, against the United States of America, as owner of the Army transport barge No. 842, for damages alleged to have been occasioned said Henry A. Kessel Co. (Inc.) as a result of a collision between its launch *Gled* and said Army transport barge No. 842 at the Army Engineers' Piers, Norfolk, Va., in the Elizabeth River, on April 11, 1919, may be litigated and determined in the District Court of the United States for the Eastern District of Virginia at Norfolk, sitting as a court of admiralty and acting under the rules governing such a court; and said court shall have jurisdiction to hear and determine said litigation and to enter a judgment for such damages and costs, if any, as it shall find to be due from the United States of America to Henry A. Kessel Co. (Inc.) or from Henry A. Kessel Co. (Inc.) to the United States of America, ascertained upon the principles and measures of liability applicable in like cases in admiralty between private persons or corporations; and Henry A. Kessel Co. (Inc.) and the United States of America shall have all rights of appeal as in a similar case between private persons or corporations: *Provided*, That notice of any suit brought by Henry A. Kessel Co. (Inc.) by virtue hereof shall be given to the Attorney General of the United States in the manner provided by any order entered by the District Court of the United States for the Eastern District of Virginia, at Norfolk, in said cause, and it shall be the duty of the Attorney General of the United States to cause the United States attorney for the eastern district of Virginia, at Norfolk, to appear on behalf of the United States and protect and defend its interests: *Provided further*, That the proceeding hereby authorized shall be begun within four months from the date of the passage of this act.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

JOSEPH P. RYAN

The bill (H. R. 1338) for the relief of Joseph P. Ryan was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Joseph P. Ryan the sum of \$1,000 for medical expenses in connection with injuries sustained while in line of duty as searcher in the United States customs intelligence bureau, port of New York.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

WILLIAM J. M'GEE

The bill (H. R. 2005) for the relief of William J. McGee was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury and the Comptroller General of the United States, be, and they are hereby, authorized and directed to credit in the accounts of the Treasurer of the United States the sum of \$514.95, now carried in the accounts of the office of the Assistant Treasurer of the United States at San Francisco, Calif., and representing a balance due to the United States from William J. McGee, former Assistant Treasurer of the United States, when the subtreasury at San Francisco was discontinued December 20, 1920, due to a loss in current and uncurrent silver dollars amounting to \$454.95, and a further loss of \$60, due to the payment of a disbursing officer's check on a forged indorsement, these losses having occurred through no fault or negligence on the part of the said Assistant Treasurer; and for this purpose the sum of \$514.95 is hereby appropriated out of any money in the Treasury not otherwise appropriated.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

J. M. FARRELL

The bill (H. R. 2745) for the relief of J. M. Farrell was announced as next in order.

Mr. ROBINSON. Mr. President, the statement in the face of the bill does not justify the relief the bill seeks to give. I do not know what the facts are, but unless some Senator is prepared to present them, I shall ask that the bill go over.

The PRESIDING OFFICER. The bill goes over, under objection.

MRS. E. L. GUESS

The bill (H. R. 2989) for the relief of Mrs. E. L. Guess was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of \$100 to Mrs. E. L. Guess, in full compensation for injuries received by her at Memphis, Tenn., on December 21, 1920, by reason of the negligence of an employee of the United States Government driving a truck owned by the United States Government and operating in the parcel post of the Post Office Department.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

JIM HENNESSEE

The bill (H. R. 8343) for the relief of Jim Hennessee was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Jim Hennessee, of Chattanooga, Tenn., the sum of \$55. Such sum is the amount of a money order issued to the said Jim Hennessee at Palmer, Tenn., June 8, 1921, No. 5397, and payable to George Hennessee, at Spokane, Wash., which was unlawfully collected by a person other than the payee. The Secretary of the Treasury is directed to deduct from such sum any payment to the said Jim Hennessee in respect to such money order.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ESTATE OF WALTER A. RICH

The bill (S. 2139) for the relief of Bertha N. Rich Reisinger was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with an amendment, to strike out all after the enacting clause and to insert:

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to the estate of Walter A. Rich, deceased, out of any money in the Treasury not otherwise appropriated, the sum of \$5,000 in full settlement against the Government as compensation for the death of said Walter A. Rich, who was killed by the accidental discharge of a machine gun at the Interstate Fair at Trenton, N. J., October 2, 1920.

Mr. ROBINSON. I think a statement should be made to the Senate explaining the bill. Of course, opportunity is not afforded to read the report, which appears to be quite lengthy.

Mr. EDGE. Mr. President, if I may, for the Senator's information I will state that this claim has been cut down from \$15,000 to \$5,000. The claim arises out of an accident due to the explosion of a machine gun, which killed a man in no way connected with the service of the United States. It has the approval of the War Department, as the Senator will see, as a result of the findings of a court-martial that tried the soldier who was supposed to be guilty. I feel that the relief is in every way justified.

Mr. ROBINSON. I recall that a year or two ago there were pending before the Committee on Claims of the Senate two bills for the relief of certain persons who while training, I think, were injured on account of the use of defective rifles at target practice at what was formerly Camp Pike. The War Department, as I remember, admitted that the rifles were defective, but the defects were not such that the department knew of them or could be advised of them. The department reported those bills adversely. Can the Senator state whether any action has been taken by the Committee on Claims on those bills? I believe that at least one of these bills was reported by the committee, that for the relief of Young Belding, and that it passed the Senate.

Mr. EDGE. I am not a member of the Committee on Claims; but this bill was reported by the Senator from Oklahoma [Mr. HARRELD], who is not in the Chamber.

Mr. ROBINSON. I shall not object to the consideration of the bill now pending, because I think that in all such cases relief should be granted. Here, for instance, is a young man who was practically compelled to perform military service in time of peace. Through no fault or carelessness of his own he was permanently injured, and to say that there is no moral liability on the part of his Government is, in my judgment, wrong, unfair, and oppressive.

Mr. EDGE. I certainly concur with the view expressed by the Senator from Arkansas. Here is an innocent bystander, who is interested in watching the operations of a Government force handling a machine gun, and in the midst of their maneuvers the gun is accidentally or in some way discharged and he is killed and his widow left at the time, as I recall the circumstances, absolutely penniless. The War Department holds a regular court-martial, the finding of which is covered in the report which I have in my hand, and while they did not hold any soldier guilty they did advise that the estate of the deceased should be given proper compensation on account of this fatal accident. The amount has been cut down from \$15,000, as originally reported two or three years ago, to \$5,000, because in the meantime the widow has remarried. There is a unanimous report of the committee.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

The title was amended so as to read: "A bill for the relief of the estate of Walter A. Rich, deceased."

POSTAGE STAMP IN MEMORY OF THE NORWEGIAN CRUISER
"RESTAURATIONEN"

The joint resolution (S. J. Res. 133) authorizing and requesting the Postmaster General to design and issue a special postage stamp to commemorate the arrival in New York on October 9, 1825, of the sloop *Restaurationen*, bearing the first shipload of immigrants to the United States from Norway, and in recognition of the Norse-American centennial celebration in 1925, was considered as in Committee of the Whole and was read, as follows:

Resolved, etc., That the Postmaster General is authorized, and he is hereby requested, to design and issue a special postage stamp of the denomination of 2 cents in commemoration of the arrival in New York on October 9, 1825, of the sloop *Restaurationen*, bearing the first shipload of immigrants to the United States from Norway, and in recognition of the Norse-American centennial celebration in June, 1925.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

The Committee on Post Offices and Post Roads reported an amendment to the preamble, to strike out "Minneapolis, Minn.," and insert "the Minnesota State Fair Grounds," so as to make the preamble read:

Whereas the sloop *Restaurationen*—the *Mayflower* of the Norsemen—on July 4, 1825, sailed out of Stavanger Harbor, Norway, with 52 emigrants on board; and

Whereas this vessel, after a perilous and romantic voyage through the British Channel and by the way of the island of Madetra, reached the port of New York on October 9, 1825; and

Whereas there are now approximately 2,000,000 descendants of the Norsemen in the United States, who have been an important factor in developing large sections of our country and in otherwise contributing to the moral and material welfare of our Nation; and

Whereas the coming of the sloop *Restaurationen* with her human cargo to our shores is to be commemorated by a centennial celebration at the Minnesota State Fair Grounds, in June, 1925, which centennial is also to be observed by descendants of the Norsemen throughout the United States: Therefore be it

The amendment to the preamble was agreed to.

The preamble as amended was agreed to.

MARY T. METCALFE

The bill (S. 3370) for the relief of Mary T. Metcalfe was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Interior is hereby authorized and directed to issue patent to Mary T. Metcalfe (homestead entry, Las Cruces 08883) for the southeast quarter of section 15, township 23 south, range 9 west, New Mexico principal meridian, in the Las Cruces land district, New Mexico.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CODIFICATION OF LAWS

The joint resolution (S. J. Res. 141) providing for the appointment of a commission to consolidate, codify and revise, and reenact the general and permanent laws of the United States in force December 2, 1923, was announced as next in order.

Mr. SMOOT. Let the joint resolution go over.

The PRESIDING OFFICER. The joint resolution will be passed over.

REORGANIZATION OF EXECUTIVE BRANCH OF THE GOVERNMENT

The bill (S. 3445) to provide for the reorganization and more effective coordination of the executive branch of the Government, to create the department of education and relief, and for other purposes, was announced as next in order.

Mr. SMOOT. I shall ask that the bill go over to-day, because it would be impossible to pass it, but I desire to state that I have received a letter from the White House to-day asking that this bill be taken up at an early date and passed, so that it may become a law at the present session of Congress. I hope to bring it before the Senate at the very earliest date possible.

The PRESIDING OFFICER. Objection having been made, the bill will be passed over.

FRED E. JONES DREDGING CO.

The bill (H. R. 1078) for the relief of the Fred E. Jones Dredging Co. was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of \$13,457.64, in full settlement against the Government, to the Fred E. Jones Dredging Co., of Norfolk, Va., for damages arising from the sinking of its dredge No. 3 by the U. S. Army transport *Northern Pacific*, in the Elizabeth River, Norfolk, Va., on the 25th day of September, 1919.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

J. JESSOP AND SONS

The bill (H. R. 2335) for the relief of J. Jessop and sons was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, directed to pay to J. Jessop and sons, out of any money in the Treasury not otherwise appropriated, the sum of \$750, in full payment for damage to lands owned by said J. Jessop and sons inflicted thereon by the Government while using said lands in connection with an Army training camp at Camp Kearney, Calif.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

STANDARD OIL CO. AT SAVANNAH, GA.

The bill (H. R. 2373) for the relief of the Standard Oil Co. at Savannah, Ga., was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of \$839 to the Standard Oil Co. at Savannah, Ga., being the amount due said company for damages made by the U. S. dredge *Cumberland* on the riverside wharf of the company.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (H. R. 6498) for the relief of May Adelaide Sharp was announced as next in order.

Mr. SMOOT. Let the bill go over.

The PRESIDING OFFICER. The bill will go over under the objection of the Senator from Utah.

The bill (H. R. 6328) for the relief of Charles F. Peirce, Frank T. Mann, and Mollie V. Gaither was announced as next in order.

Mr. FLETCHER. I think the bill had better go over. I do not quite understand it.

The PRESIDING OFFICER. The Senator from Florida objects, and the bill will go over.

The bill (H. R. 5448) for the relief of Clifford W. Seibel and Frank A. Vestal was announced as next in order.

Mr. ROBINSON. Let the bill go over.

The PRESIDING OFFICER. Objection is heard, and the bill will go over.

The bill (H. R. 5774) for the relief of Beatrice J. Kettlewell was announced as next in order.

Mr. DIAL. Let the bill go over.

The PRESIDING OFFICER. Objection is made, and the bill goes over.

BERTRAM GARDNER

The bill (H. R. 7194) for the relief of Bertram Gardner, former collector of internal revenue for the first district of New York, was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to credit the account of Bertram Gardner, former collector of internal revenue for the first district of New York, by reason of shortage of 1,628 distilled-spirit export stamps, each stamp valued at 10 cents, a total of \$162.80, which stamps were destroyed by fire.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ALICE M. DURKEE

The bill (S. 52) for the relief of Alice M. Durkee was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with an amendment, in line 6, to strike out "\$5,000" and insert in lieu thereof "\$2,000," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Alice M. Durkee, of Lynn, Mass., out of any money in the Treasury not otherwise appropriated, the sum of \$2,000, in full settlement for injuries received by being struck by a United States mail truck in the city of Boston April 29, 1921.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

YVONNE THERRIEN

The bill (S. 54) for the relief of Yvonne Therrien was announced as next in order.

Mr. ROBINSON. Let the bill go over.

Mr. HARRELD. This is a companion bill to the one just passed.

Mr. ROBINSON. A bill was presented for \$2,500. The committee saw fit to reduce the amount to \$300. Let the bill go over.

The PRESIDING OFFICER. The bill will go over under objection.

WYNONA A. DIXON

The bill (S. 594) for the relief of Wynona A. Dixon was announced as next in order.

Mr. SMOOT. Let the bill go over.

Mr. SHEPPARD. Let me say to the Senator from Utah that this is an appropriation to pay for claimant's interest in a certain number of bales of cotton that were taken by the Federal forces and used for fortifications in Louisiana during the Civil War. The claimant was loyal to the United States. I under-

stand it was customary for the Federal forces to pay for property commandeered and used for military purposes.

Mr. SMOOT. There were 300 bales of cotton; but there were also 3,000 bushels of sweet potatoes, 3,000 bushels of corn, 10 barrels of sugar, 10 barrels of molasses, 2 barrels of sirup, 30 mules, 5 brood mares, horses and carriages, 40 fattening hogs, 100 range hogs, 50 milch cows, 100 dry cows, 40 beeves, and a long list of other stock. It is one of those old Civil War claims.

Mr. SHEPPARD. The Senator is reading from the claimant's petition. The Court of Claims found that the cotton which was taken and used in fortification constituted the overwhelming bulk of the property seized. The Senator will find the findings of the Court of Claims on the next page.

Mr. SMOOT. Let the bill go over to-day.

Mr. SHEPPARD. I think after the Senator looks into it he will favor the passage of the bill. Let me read just this item, if the Senator will permit, as to the claimant:

She was in frequent communication with the Federal troops and, by her acts and the open expression of her sympathies, made herself extremely unpopular outside of the Federal lines. After the death of the petitioner's mother the Federal officers, knowing of her loyalty to the Union, protected the orphan girl, the petitioner, and sent her to New Orleans, where she was placed in the care of her brother-in-law, Dr. Madison Marsh, who was loyal to the Union and a refugee from Port Hudson, La.

I ask the Senator to look carefully into the bill.

The PRESIDING OFFICER. The Senator from Utah objects, and the bill goes over under objection.

ROOSEVELT MEMORIAL ASSOCIATION

The joint resolution (S. J. Res. 135) granting permission to the Roosevelt Memorial Association to procure plans and designs for a memorial to Theodore Roosevelt was considered as in Committee of the Whole and was read, as follows:

Whereas the Roosevelt Memorial Association, a corporation of the District of Columbia, has petitioned the Congress in relation to the proposal of the association to erect an enduring monument to the memory of Theodore Roosevelt in the city of Washington: Therefore be it

Resolved, etc., That permission is hereby given to the Roosevelt Memorial Association to procure at its own expense plans and designs for the erection of a permanent memorial to Theodore Roosevelt upon a site within the following-described area: That portion of the territory included in the Park Commission plan of 1901 lying in general between the Washington Monument and the Potomac River and bounded by Fifteenth and Seventeenth Streets projected southward, including the waters of Twining Lake.

SEC. 2. That the plan and design procured or selected by the Roosevelt Memorial Association shall take into account the requirements of traffic circulation and of recreational facilities and shall be submitted to the Congress before the 1st day of January, 1925.

SEC. 3. That no authority to proceed with the execution of such plan or with the erection of the memorial shall be deemed to be conferred upon the Roosevelt Memorial Association unless or until the plan and design shall first have been approved by the Congress.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

LEBANON NATIONAL BANK

The bill (H. R. 3748) for the relief of Lebanon National Bank was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to redeem, in favor of the Lebanon National Bank, Lebanon, Tenn., the coupon No. 9, matured April 15, 1923, in the amount of \$2.12, from permanent coupon bond No. B-03144745 in the denomination of \$100 of the fourth Liberty loan 4½ per cent bonds of 1930-1938, and the following coupons from 4½ per cent Treasury notes, Series C-1925, issued December 15, 1922, maturing June 15, 1925, payable to bearer; coupons No. 1, maturing June 15, 1923, in the amount of \$112.50 each, from notes Nos. 7650 and 7651 in the denomination of \$5,000 each; coupons No. 1, maturing June 15, 1923, in the amount of \$22.50 each from notes Nos. 41206, 41207, 41208, 41209, 41210, 41211, 41212, 41213, 42357, 42358, 42359, and 42360 in the denomination of \$1,000 each; and the coupon No. 1, maturing June 15, 1923, in the amount of \$11.25, from note No. 12445 in the denomination of \$500; such redemption to be made, without presentation of the said coupons, which have been destroyed: *Provided*, That the said coupons shall not have been previously presented for payment: *Provided further*, That the said Lebanon National

Bank shall first file in the Treasury Department a bond in the penal sum of double the amount of said coupons, in such form and with such surety or sureties as may be acceptable to the Secretary of the Treasury to indemnify and save harmless the United States from any loss on account of the coupons herein described.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CHAMBER OF COMMERCE OF NORTHAMPTON, MASS.

The bill (H. R. 4250) for the relief of the chamber of commerce of the city of Northampton, Mass., was announced as next in order.

Mr. FLETCHER. Let the bill go over.

The PRESIDING OFFICER (Mr. FESS in the chair). Objection is made, and the bill will be passed over.

PHILIP T. POST

The bill (S. 2033) for the relief of Philip T. Post was announced as next in order.

Mr. DIAL. Let the bill go over.

Mr. BRUCE. I trust the Senator from South Carolina will not press his objection. The bill is for a very small amount, only \$383.63, for stenographic services rendered by Mr. Post in connection with proceedings for one of the judge advocate generals, and rendered outside of his office hours and during periods of holidays. He rendered service to one judge advocate and then was employed by others subsequently, and rendered them services.

Later on there was a proclamation approved by the Secretary of War and issued by The Adjutant General in regard to Army field clerks which specifically stated that Army field clerks could legally be appointed and paid for services as court-martial reporters. Subsequently an objection was made by one of the subordinates to the payment of the bill on the ground that Mr. Post was in the service and was a field clerk, and that it would be paying him double compensation to allow him the amount of the bill. His services were rendered outside of his office hours and during holidays, and his right to receive compensation under the statute was approved by the high Government authorities to whom I have referred.

Mr. DIAL. Does the committee approve it?

Mr. BRUCE. It is favorably reported from the Committee on Claims.

Mr. SMOOT. If the Senator from South Carolina is not going to object, I shall object to its consideration.

Mr. BRUCE. There is nothing more to be said about it then.

The PRESIDING OFFICER. The bill goes over on objection of the Senator from Utah.

ROBERT G. HILTON

The bill (H. R. 2656) to permit the correction of the general account of Robert G. Hilton, former Assistant Treasurer of the United States, was announced as next in order.

Mr. HOWELL. Mr. President, I do not fully understand the reason for making this allotment.

Mr. BRUCE. I shall be glad if the Senator from Nebraska will allow me to explain it. Mr. Robert G. Hilton, who is a bank officer connected with one of the substantial banks of Maryland, a citizen of the very highest standing, as I can speak from my own personal knowledge, for character and capacity, was an assistant treasurer of the United States at Baltimore. The subtreasury in Baltimore was discontinued on January 14, 1921. The money in store at the subtreasury was moved elsewhere. When the accounts of Mr. Hilton were checked up in connection with the removal it was found that he was some \$32,000 short. No one ever has pretended that he was guilty of any defalcation or of any form or neglect or improvidence in connection with the removal of the money from the subtreasury or in any other respect.

After a careful review of the circumstances, under date of February 18, 1924, Mr. Mellon, Secretary of the Treasury, said: "I have no objection to the proposed relief." That is the conclusion reached by the Secretary of the Treasury after he had made a careful review of all the circumstances surrounding the loss of this sum of money. It was doubtless abstracted by some one when it was in process of removal from the subtreasury to the other depository to which it was carried.

There has never been the slightest intimation or slightest suspicion that Mr. Hilton, who, as I said, is a gentleman of the very highest standing for integrity and intelligence and everything else that honors a man, was guilty of any misconduct or even of any neglect or improvidence in connection with the loss sustained by the Government. It seems to me that when the Secretary of the Treasury himself, after calling attention to

the fact that in such cases officials like Mr. Hilton have not been held responsible, says he has no objection to the passage of the bill, that the Senator from Nebraska should have no objection.

Mr. FLETCHER. He had no direct contact with the money at all?

Mr. BRUCE. None at all.

The PRESIDING OFFICER. The time of the Senator from Maryland has expired.

Mr. HOWELL. I dislike to object to the passage of a bill of this character. However, it seems to me that there ought to be a better explanation of the loss of the money. If money is intrusted to a public official and it is removed under his direction, and he can not account for some \$32,000, and there is no explanation as to how and where the money went or when it went, are we simply to hold that the Government shall assume the responsibility?

The PRESIDING OFFICER. Does the Senator from Nebraska object to the consideration of the bill?

Mr. HOWELL. I object.

The PRESIDING OFFICER. The bill will go over under the rule.

BILLS PASSED OVER

The bill (H. R. 1539) for the relief of Caleb Aber was announced as next in order.

Mr. DIAL. Let the bill go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (H. R. 21) to amend the patent and trade-mark laws, and for other purposes, was announced as next in order.

Mr. SMOOT. I will ask that the bill go over to-day. I have received letters about it.

The PRESIDING OFFICER. The bill will be passed over.

UNITED STATES INDUSTRIAL REFORMATORY

The bill (H. R. 2869) for the establishment of a United States industrial reformatory was announced as next in order.

Mr. FLETCHER. Let the bill go over.

Mr. CURTIS. I would like very much to have the Senator from Florida withdraw his objection. This is a departmental bill. The penitentiaries have a capacity of 4,935 prisoners and they are now taking care of 5,558. It is proposed to establish a reformatory into which shall go the young men between the ages of 17 and 30 who have committed their first offenses. If such a reformatory is not established it will be necessary to establish another penitentiary.

Mr. ROBINSON. Where is it to be located?

Mr. CURTIS. The location is not provided for. A commission is provided to select a site.

Mr. WILLIS. I desire to ask the Senator from Kansas whether his attention had been drawn to the fact that of the surplus number which they are unable now to care for there are some 1,700 of relatively tender years between the ages of 17 and 30 who are first offenders. It is criminal, it is a crime against the criminal, to crowd these young men who are first offenders in with the old, hardened criminals.

The purpose of the bill is to provide an industrial reform school where these first offenders, these young men, can be cared for. As the Senator from Kansas has correctly stated, the department regards this measure as of very great importance. I believe in the interest of good management of the penitentiaries and reformatories the bill ought to be passed at this time.

Mr. FLETCHER. I am not in disagreement with the Senators who have referred to the matter at all. It is quite an important measure, however, and there is no report attached to my file at least. There is nothing to indicate whether the department has recommended it or what the committee even has done. The bill is here by itself and that is all. It is too important a matter to just guess about it.

Mr. WILLIS. While I do not have the honor of belonging to the Committee on the Judiciary I am advised that that committee relied upon the House committee's report, which is available and which is most convincing.

Mr. FLETCHER. The Senate committee ought to have made it a part of their report, then.

Mr. WILLIS. Perhaps so, but I can assure the Senator the fact is as indicated by the Senator from Kansas. There is a great demand for the enactment of the legislation at an early date, as is set forth at length in the House committee report. It is there said that the bill—

provides for the education and training of the inmates along the most advanced lines. The object sought to be obtained will be to lead the youthful inmate to regard himself as not yet sunk to the level of the

criminal class and to preserve his self-respect so as to enable him to go out at the end of his sentence feeling that he has not been branded as a felon.

As it is, these young men are crowded in with hardened criminals, who are there for the third or fourth time, and, as I said before, it is a crime against the criminal to make him face conditions of that kind. The purpose of the bill, which does not provide immediately for an appropriation, is to direct the Attorney General, the Secretary of War, and the Secretary of the Interior to work out the plans. The matter was fully considered in the House, and a voluminous and most convincing report was prepared by the House committee.

Mr. ROBINSON. If the Senator will yield, some time ago this measure was called to my attention, and I made a study of it and reached the conclusion that the bill should pass.

The PRESIDING OFFICER. Is there objection?

Mr. FLETCHER. I am not disposed to stand in the way of an early disposition of the matter, in view of what has been said about it. I confess I am taking it largely on faith and on credit, because I have not even had time to read the bill, much less to read the report on it. The purpose of it seems to be all right, and I think that ought to be done.

The bill was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the Attorney General, the Secretary of War, and the Secretary of the Interior be, and are hereby, authorized and directed to select a site for an industrial reformatory which shall be used for the confinement of male persons between the ages of 17 and 30 years, who have been or shall be convicted of offenses against the United States, including persons convicted by general courts-martial and consular courts, and sentenced for terms of imprisonment for more than one year, with or without hard labor, except those who have been convicted previously of an offense punishable by imprisonment for more than one year, and except also those convicted of treason, murder in the first or second degree, rape, or arson, and those sentenced to life imprisonment: *Provided*, That it shall be sufficient for the courts to sentence said class of offenders to imprisonment in the penitentiary without specifying the particular penitentiary or the United States industrial reformatory and the imprisonment shall be in such penitentiary or the United States industrial reformatory as the Attorney General shall from time to time designate.

SEC. 2. That upon the selection of an appropriate site the Attorney General shall submit to Congress estimate of the cost of purchasing the same, together with estimates of the expense necessary to construct the proper buildings thereon. For the purpose of construction of such buildings the Attorney General shall employ the labor of such United States prisoners confined in the United States penitentiary, Atlanta, Ga.; the United States penitentiary, Leavenworth, Kans.; the United States penitentiary, McNeil Island, Wash., and State or Territorial prisons, penitentiaries, or reformatories, who are eligible for confinement in said United States Industrial Reformatory under the provisions of this act, and who can be used, under proper guard, in the work necessary to construct the buildings. The Attorney General at the same time, and annually thereafter, shall submit estimates in detail for all expenses of maintaining the said industrial reformatory, including salaries of all necessary officers and employees.

SEC. 3. That the Secretary of the Treasury is hereby authorized, upon the request of the Attorney General, to cause the plans, drawings, designs, specifications, and estimates for the remodeling and construction of the necessary buildings to be prepared in the Office of the Supervising Architect of the Treasury Department, and the work of remodeling and constructing the said buildings to be supervised by the field force of said office: *Provided*, That the proper appropriations for the support and maintenance of the Office of the Supervising Architect be reimbursed for the cost of preparing such plans, drawings, designs, specifications, and estimates for the aforesaid work, and the supervision of the remodeling and construction of said buildings.

SEC. 4. That the control and management of the United States industrial reformatory shall be vested in the Attorney General, who shall have power to appoint a superintendent, assistant superintendent, and all other officers necessary for the safe-keeping, care, protection, instruction, and discipline of the inmates.

SEC. 5. That the discipline to be observed in said United States industrial reformatory shall be correctional and designed to prevent young offenders from becoming habitual criminals. It shall be the duty of the Attorney General to provide for the instruction of the inmates in the common branches of an English education, and for their training in such trade, industry, or skilled vocation as will enable said inmates, upon release, to obtain self-supporting employment and to become self-reliant members of society. For this purpose the At-

torney General shall establish and maintain a common school and trade schools in said industrial reformatory, and shall have authority to promulgate all such rules and regulations for the government of the officers of said industrial reformatory and the inmates thereof as he may deem proper and necessary.

SEC. 6. That the inmates of the United States industrial reformatory shall be employed only in the production and manufacture of supplies for the United States Government, for consumption in United States institutions, and in duties necessary for the construction and maintenance of the institution.

SEC. 7. That the Attorney General is hereby authorized, in his discretion, to transfer to the United States industrial reformatory, as accommodations become available, all persons eligible under the terms of this act for confinement in said industrial reformatory who are now, or shall hereafter be, confined in the United States penitentiary, Atlanta, Ga.; the United States penitentiary, Leavenworth, Kans.; the United States penitentiary, McNeil Island, Wash.; and State and Territorial prisons, penitentiaries, or reformatories, and who are proper subjects for confinement in said United States industrial reformatory: *Provided*, That the Attorney General shall not transfer any prisoner who has less than nine months to serve of the term for which he was sentenced. The Attorney General is hereby authorized, in his discretion, at any time to transfer from the United States industrial reformatory to any of the aforesaid United States penitentiaries, or a suitable State or Territorial penitentiary or reformatory, any person who is ineligible for confinement therein under the terms of this act, or any person who is apparently incorrigible, and whose presence in the said United States industrial reformatory is detrimental to the well-being of the institution. Such transfer shall, in the case of the United States penitentiaries and industrial reformatory, be made by the warden or superintendent of the institution from which the transfer is to be made, and in the case of State and Territorial penitentiaries or reformatories, such transfer shall be made by the United States marshal of the judicial district in which the institution from which the transfer is to be made is located. The actual and necessary expenses of such warden, superintendent, or marshal in making such transfer shall be paid, in the case of transfer from the United States penitentiaries and industrial reformatory, from the appropriation for the maintenance of the particular institution, and, in the case of transfer from State and Territorial penitentiaries, or reformatories, out of the judicial funds.

SEC. 8. That two citizens of the United States of prominence and distinction, who shall be appointed by the President for terms of two and four years, respectively, from the date of the taking effect of this act, the term of each to be designated by the President, but their successors shall be appointed for terms of four years, except that any person chosen to fill a vacancy shall be appointed only for the unexpired term of the citizen whom he shall succeed, and who shall serve without compensation, shall constitute, together with the Attorney General of the United States, the superintendent of prisons of the Department of Justice, and the superintendent of the United States industrial reformatory, who shall serve without additional compensation, a board of advisers of said reformatory. It shall be the duty of said board to devise ways and means looking to the reestablishment in society of the inmates discharged therefrom, whether by pardon, commutation, parole, or expiration of sentence, particularly with a view of securing suitable and remunerative employment for said discharged inmates: *Provided*, That the expenses of said board shall be paid out of the appropriation for the maintenance of the reformatory.

SEC. 9. That the inmates of the United States industrial reformatory shall be eligible for parole under sections 1, 2, 3, 4, 5, 6, 7, and 8 of the act of Congress approved June 25, 1910, being an act to provide for the parole of United States prisoners, and for other purposes, which provisions are hereby made to apply to all inmates of said reformatory. Such inmates shall be entitled to commutation allowance for good conduct in accordance with the provisions of the act of Congress approved June 21, 1902, and entitled "An act to regulate commutation for good conduct for United States prisoners," and the acts amendatory thereof and supplemental thereto.

SEC. 10. That every prisoner, when discharged from the United States industrial reformatory, shall be furnished with transportation to place of conviction, or place of bona fide residence, or to such other place within the United States as may be authorized by the Attorney General, and he shall also be furnished with suitable clothing and \$10 in money.

SEC. 11. That all acts and parts of acts inconsistent with the provisions of this act are hereby repealed.

Mr. WILLIS. I ask unanimous consent to print in the RECORD at this point the House report upon the subject.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Ohio? The Chair hears none.

The report is as follows:

[House Report No. 70, Sixty-eighth Congress, first session]

Mr. FOSTER, from the Committee on the Judiciary, submitted the following report to accompany H. R. 2869:

ESTABLISHMENT OF A UNITED STATES INDUSTRIAL REFORMATORY

The Committee on the Judiciary, to whom was referred H. R. 2869, for the establishment of a United States industrial reformatory, having considered the same, ordered it favorably reported with a recommendation that the bill be passed as amended.

The committee amendments are as follows:

Amendment No. 1: On page 1, line 7, strike out all after "years" down to and including "imprisonment" in line 15, and insert in lieu thereof the following:

"who have been or shall be convicted of offenses against the United States, including persons convicted by general courts-martial and consular courts, and sentenced for terms of imprisonment for more than one year, with or without hard labor, except those who have been convicted previously of an offense punishable by imprisonment for more than one year, and except also those convicted of treason, murder in the first or second degree, rape, or arson, and those sentenced to life imprisonment."

Amendment No. 2: On page 4 strike out line 13.

The number of Federal prisoners has been increasing so rapidly that the limit of accommodations in the three Federal penitentiaries has already been exceeded. The normal capacity of the three penitentiaries is 4,955 men. On January 8, 1924, there were actually in confinement 5,558 prisoners, an excess of 623 men. Physicians state that this overcrowding makes adequate hygienic measures difficult and endangers the health of the prisoners. Additional overcrowding will further jeopardize the health of the inmates. Overcrowding also presents a grave problem in morals and discipline. Aside from these considerations, however, unless additional accommodations are provided within the next few months the Government will be in the anomalous position of confining men with no place provided for their incarceration. This will be clearly seen from the following facts and figures:

The population of the three Federal penitentiaries increased from 2,340 on June 30, 1912, to 4,296 on June 30, 1921, and to 5,616 on June 30, 1923, a gain of 166 per cent in 11 years and a gain of 30.7 per cent in 2 years. Stating the same facts in a different manner, there was a daily average of 1,985.7 prisoners confined during the fiscal year 1912. In 1921 this daily average increased to 3,792 and in 1923 to 5,323.29, a gain of 168 per cent in 11 years and a gain of 40.3 per cent in the last two fiscal year.

Comparison of the actual number of prisoners in confinement on January 31, 1923, with the actual number confined on January 8, 1924, shows an increase of 373 men during that period. This number would have been augmented to 624 men except for the fact that, due to excessive overcrowding, 251 military prisoners were transferred to the disciplinary barracks of the War Department. On June 30, 1923, there were pending in the United States district courts criminal cases to the number of 67,534, and indications are that convictions during the present year will greatly exceed those in the last. (See exhibit.)

The necessity for another Federal penal institution is imperative. In establishing such institution, rather than make it another penitentiary, many considerations urge the establishment of a reformatory in which may be confined young male first offenders between the ages of 17 and 30 years. At the present time this class is confined in the overcrowded penitentiaries along with the older and hardened criminals. These youthful first offenders should by all means be segregated and subjected to separate treatment and special reformatory methods.

To accomplish this end this bill provides for the establishment of a United States industrial reformatory; the discipline therein is to be correctional and designed to prevent young offenders from becoming hardened criminals. It provides for the education and training of the inmates along the most advanced lines. The object sought to be obtained will be to lead the youthful inmate to regard himself as not yet sunk to the level of the criminal class and to preserve his self-respect, so as to enable him to go out at the end of his sentence feeling that he has not been branded as a felon.

In addition to schools in which there will be classes where they will be taught the rudimentary branches of English education and hear lectures on practical subjects, there will be conducted manual-training shops, where the boys will be taught to use their hands in trades of skill.

In all these respects the Federal Government is far behind most of the States.

The bill also provides for the appointment by the President of two prominent citizens who, together with the Attorney General, the superintendent of prisons of the Department of Justice, and the head of the reformatory, shall constitute a board of advisers. It will be the duty of this board to take an active interest in the immediate and future welfare of the inmates, particularly with respect to their establishment in society upon release. This is a very important feature, as turning prisoners loose at the expiration of their terms without a position in which they can earn a livelihood is so stupid a policy that it would not be tolerated were it not for the fact that it has a long tradition behind it. It is reasonable to expect that

the schooling of the inmates, their training in trades, and their return to society under the supervision of the advisory board will constitute positive and effective factors in preventing further lapses into crime.

Briefly, the object of the accompanying bill is to complete and perfect the Federal penal system. In bringing the law up to date no novel, fanciful, or idealistic theories of reformation are invoked, neither are any drastic or reactionary measures contemplated. The bill is in accord with legislation already on the statute books of a number of the more progressive States. It is designed to meet a condition and not a theory. We face the practical problem of providing a place of confinement for Federal prisoners. Some new Federal institution for the incarceration of the young first offender must be erected. There is no place for prisoners now and no other way in which accommodations can be secured.

The exhibit referred to above is as follows:

	Number of commitments during the fiscal years ending—		
	June 30, 1912	June 30, 1921	June 30, 1923
Atlanta.....	620	1,500	1,847
Leavenworth.....	553	1,046	1,452
McNeil Island.....	170	251	286
Total.....	1,343	2,797	3,615

	Number of prisoners remaining in prison—				
	June 30, 1912	June 30, 1921	June 30, 1922	June 30, 1923	Jan. 8, 1924
Atlanta.....	954	2,091	2,334	2,633	2,522
Leavenworth.....	1,165	1,907	2,671	2,696	2,496
McNeil Island.....	221	298	535	477	540
Total.....	2,340	4,296	5,540	5,616	5,558

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

J. M. FARRELL

Mr. JONES of Washington. Mr. President, a few moments ago we reached Order of Business 779 on the calendar, House bill 2745, for the relief of J. M. Farrell. That matter had been called to my attention before this session of Congress met, but it had slipped my mind. I looked it up in the Government report, and I find that the bill is to repay to Mr. Farrell a certain amount of liquidated damages that were assessed against him for delay in delivering lumber in Alaska. According to the report, according to the letter of Mr. Mears, the chairman of the railway commission in Alaska, there was an abnormal situation in 1916 with reference to shipping which made it almost impossible for Mr. Farrell to get a ship.

Mr. ROBINSON. Mr. President, I will ask the Senator if it was not the purpose of the provision for liquidated damages to put the burden upon the contracting party to make prompt deliveries?

Mr. JONES of Washington. It was. There is no doubt about that.

Mr. ROBINSON. If we are to establish the policy of relieving wherever it is difficult for the contractor to carry out his obligation, I should like to be informed what is the advantage of requiring the prompt fulfillment of contracts of this nature?

The PRESIDING OFFICER. The Chair is in doubt as to what the request of the Senator from Washington was.

Mr. JONES of Washington. I was going to submit a request after I had taken a moment or two to explain the situation. I take it from the report here that conditions became so abnormal as to be much more burdensome than anybody could contemplate at the time the contract was entered into; and I wanted to call attention to the fact that the Interior Department makes no objection to the matter, and, according to the showing made in the report, in several cases similar to this relief has been given; and so here the department makes no objection to the repayment if Congress should deem it wise to do it.

Mr. ROBINSON. But it makes no recommendation that the party be reimbursed, as the Senator will notice.

Mr. JONES of Washington. It makes no affirmative recommendation to that effect.

Mr. ROBINSON. It leaves the subject without recommendation.

Mr. JONES of Washington. It says:

As previously advised, neither the Alaskan Engineering Commission nor this department has objection to the enactment of legislation for the relief of Mr. Farrell.

It does not make an affirmative recommendation. The letter I have read from the Acting Secretary of the Interior, in which he makes that statement, is on page 2 of this report.

Then in Mr. Mears's letter he says:

Conditions at that time were so far from normal that I would not hesitate to recommend that this claim be allowed, if consistent with the policy of Congress on such matters, were it not for the very positive understanding had with the contractor, as set forth in the purchase order and other papers relating to the purchase, and the fact that a price somewhat in excess of that offered by another bidder for shipment from Canadian mills was paid Mr. Farrell on the ground that he offered more prompt delivery.

Mr. ROBINSON. Oh, certainly.

Mr. JONES of Washington. I wanted to call the Senator's attention to that. The bill has passed the House, and I had hoped we could recur to it and pass it.

Mr. ROBINSON. I think the bill had better go over for the present, in order that the Senate may have an opportunity of studying it. It is rather an important precedent. If it is to be adopted, it ought to be done with some caution.

Mr. JONES of Washington. Very well.

The PRESIDING OFFICER. Objection is made. The Secretary will state the next bill on the calendar.

COL. HARRY F. RETHERS, UNITED STATES ARMY

The bill (H. R. 5661) granting permission to Col. Harry F. Rethers, Quartermaster Corps, United States Army, to accept the gift of a Sevres statuette entitled "Le Courage Militaire" tendered by the President of the French Republic was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

LIEUT. L. D. WEBB, UNITED STATES NAVY

The bill (S. 1569) to compensate Lieut. L. D. Webb, United States Navy, for damages to household effects while being transported by Government conveyance was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Navy be, and he is hereby, authorized and directed to pay out of the appropriation for "Pay of the Navy" for the fiscal year ending June 30, 1922, to Lieut. L. D. Webb, United States Navy, such sum, not exceeding \$1,000, as may be determined by him to pay the amount of damage sustained in full settlement of all claims against the Government for damage to an automobile, silver service, and a piano shipped from San Francisco, Calif., to Washington, D. C., by Government conveyance under authority of section 12 of the act approved May 18, 1920.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

J. W. NEIL

The bill (S. 1221) for the relief of J. W. Neil was announced as next in order.

Mr. ROBINSON. Mr. President, what is the justification for this bill?

Mr. SMOOT. The bill speaks for itself. The department brought it to my attention.

Mr. ROBINSON. The bill does not make clear to me—it may to the Senator—the justification for the legislation. It says:

That the Secretary of the Treasury is hereby authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to J. W. Neil, of Ogden, Utah, the sum of \$7,947.53 as compensation for and in full satisfaction of any claim such J. W. Neil may have for losses suffered by reason of the libel of a carload of sugar belonging to him on May 21, 1920, by a United States marshal under color of the act entitled "An act to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel," approved August 10, 1917, as amended.

Mr. SMOOT. Yes.

Mr. ROBINSON. That does not make at all clear to me the facts in justification of the claim. The presumption is that if the officer libeled the carload of sugar, he had a right to do it.

Mr. SMOOT. But he did not have the right to do it.

Mr. ROBINSON. But the bill does not show any state of facts. The Senator says that the justification for the bill appears on its face. The bill does not show any state of facts.

Mr. SMOOT. No; I did not say on the face of the bill; I said the reports from the department.

The PRESIDING OFFICER. Is there objection to the consideration of the bill?

Mr. ROBINSON. Unless the Senator can explain the circumstances of justification, I shall object.

Mr. SMOOT. I can not explain any more than what I have heard from the department. They recommend the passage of the bill, and they say that the United States in error libeled this carload of sugar.

Mr. ROBINSON. Let the bill go over for the present.

Mr. SMOOT. I am perfectly willing that it shall go over.

The PRESIDING OFFICER. The bill will be passed over. The Secretary will state the next bill on the calendar.

PONCA TRIBE OF INDIANS

The bill (S. 1392) authorizing the Ponca Tribe of Indians residing in the States of Oklahoma and Nebraska to submit claims to the Court of Claims was considered as in Committee of the Whole.

The bill had been reported from the Committee on Indian Affairs with amendments, on page 2, line 13, after the word "limitation," to insert "and any tribe or band of Indians deemed necessary to a final determination of any suit filed hereunder shall be joined as the court may order"; and on page 3, line 4, after the word "Indians," to insert "and in

no event to exceed the sum of "\$25,000," so as to make the bill read:

Be it enacted, etc., That all claims of whatsoever nature, both legal and equitable, which the Ponca Tribe of Indians residing in the States of Oklahoma and Nebraska may have against the United States, including among other things claims for moneys due the Ponca Tribe but allowed or paid to some other tribe or tribes of Indians, shall be submitted to the Court of Claims, with the right of appeal by either party to the Supreme Court of the United States for determination and jurisdiction is hereby conferred upon the Court of Claims to hear and determine any and all such claims and render final judgment thereon.

The Court of Claims shall advance the cause upon its docket for hearing, and shall have authority to determine and adjudge the rights, both legal and equitable, of the said Ponca Tribe in the premises: *Provided*, That the court shall hear and determine any legal or equitable defenses, set-offs, or counterclaims which the United States may offer against the said Ponca Tribe notwithstanding lapse of time or statutes of limitation, and any tribe or band of Indians deemed necessary to a final determination of any suit filed hereunder shall be joined as the court may order. The suit or suits instituted hereunder shall be begun within five years from the passage of this act by the Ponca Tribe of Indians as parties plaintiff against the United States as the party defendant. The petition or petitions may be verified upon information and belief as to the facts therein alleged by the attorney or attorneys employed by the Ponca Tribe under contract approved by the Secretary of the Interior and the Commissioner of Indian Affairs, as provided by existing law; and no other verification shall be necessary: *Provided*, That upon the final determination of such suit or suits the Court of Claims shall have jurisdiction to decree the fees to be paid to the attorney or attorneys not to exceed 10 per cent of the amount of the judgment rendered in favor of said Indians, and in no event to exceed the sum of \$25,000; and the same shall be paid out of any sum or sums found due said tribe.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

UINTAH AND WHITE RIVER TRIBES OF UTE INDIANS

The bill (S. 3080) for the relief of the Uintah and White River Tribes of Ute Indians, of Utah, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Indian Affairs with an amendment, on page 2, line 15, after the word "consideration," to strike out "and" and to insert:

Any suit or suits filed hereunder shall be commenced by petition, subject to amendment, to be filed in the Court of Claims within two years after the approval of this act by the attorney or attorneys to be employed by the said Indians under contract as required by sections 2103-5 of the United States Revised Statutes. Such petition shall be verified by the attorney or attorneys and shall set forth all the facts on which the claims for recovery are based, and shall be signed by the attorney or attorneys employed, and no other verification shall be necessary.

Upon final determination of such suit or cause of action the Court of Claims shall decree such fees to be paid the attorney or attorneys as it shall find reasonable, but in no case shall such fees amount to more than 10 per cent of any judgment recovered in such suit or cause, and in no event shall such fee amount in the aggregate to more than \$50,000 and shall be paid out of any judgment recovered, and the balance of such judgment shall be placed in the Treasury of the United States to the credit of the Indians entitled thereto, where it shall bear interest at the rate of 4 per cent per annum.

And—

So as to make the bill read:

Be it enacted, etc., That to carry into effect the existing agreement between the Uintah and White River Tribes of Ute Indians of Utah respecting the lands in the former Uintah Indian Reservation in said State, ceded by them to the United States, jurisdiction is hereby conferred upon the Court of Claims to hear, determine, and render final judgment, with right of appeal as in other cases, on the claims and rights of said Indians under said agreement and the acts of May 27, 1902 (32 Stat. p. 263), March 3, 1905 (33 Stat. p. 1069), and all other acts of Congress relating thereto, including the value of all lands ceded by the said Indians which have been set apart and reserved from the public lands as forest reservations or for other public uses under existing laws and proclamations of the President, as if disposed of under the public land laws of the United States, as provided by said agreement and acts of Congress, and the money due therefor; and the court shall set off against any sum found due said Indians any sum or sums that shall be found to be properly chargeable under the terms of said agreement and acts of Congress and also any sum or sums paid by the United States to or for the benefit of said Indians, whether

as a gratuity or otherwise, except such sums as have been paid for a specific purpose and an adequate consideration.

Any suit or suits filed hereunder shall be commenced by petition, subject to amendment, to be filed in the Court of Claims within two years after the approval of this act by the attorney or attorneys to be employed by the said Indians under contract as required by sections 2103-5 of the United States Revised Statutes. Such petition shall be verified by the attorney or attorneys and shall set forth all the facts on which the claims for recovery are based, and shall be signed by the attorney or attorneys employed, and no other verification shall be necessary.

Upon final determination of such suit or cause of action the Court of Claims shall decree such fees to be paid the attorney or attorneys as it shall find reasonable, but in no case shall such fees amount to more than 10 per cent of any judgment recovered in such suit or cause, and in no event shall such fee amount in the aggregate to more than \$50,000 and shall be paid out of any judgment recovered, and the balance of such judgment shall be placed in the Treasury of the United States to the credit of the Indians entitled thereto, where it shall bear interest at the rate of 4 per cent per annum.

And the action herein authorized shall be conducted by the attorneys already appointed by said Indians by permission of the Commissioner of Indian Affairs, and in rendering judgment herein the court shall set apart such compensation to the said attorneys as it may deem reasonable and just for legal services rendered before the appropriate committees of Congress and departments of the Government and in conducting the said cause before the courts to a final determination, and said compensation shall be paid to said attorneys by the Secretary of the Treasury out of any moneys in the Treasury arising from the sale of said ceded lands or from the proceeds of said judgment, and the balance of said judgment shall be held in the Treasury for the benefit of said Indians as a trust fund, and the interest thereon shall be distributed annually to them in accordance with existing law.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

JACOB CREW

The bill (S. 3247) providing for the payment of any unappropriated moneys belonging to the Apache, Kiowa, and Comanche Indians to Jacob Crew was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized to pay Jacob Crew, of Anadarko, Okla., the sum of \$606.97, out of any moneys unappropriated under his control belonging to the Apache, Kiowa, and Comanche Indians, the same being payment in full for the claim of said Crew for a corn crop which was upon said town site of Anadarko when said land was sold for town-site purposes.

Mr. ROBINSON. Mr. President, may I ask the Senator reporting this bill whether it was referred to the Commissioner of Indian Affairs, and whether a report was made by that officer upon the bill?

Mr. HARRELD. Yes; it was referred to him and a favorable report was made. This bill was introduced and a favorable report made on it several years ago, and it was passed by one House. It has been pending from time to time for a good while. Each time a favorable report has been made on it.

Mr. ROBINSON. I note that the report from the department appears to be under date of December, 1901—twenty odd years ago. How does it happen that the bill has been so long delayed?

Mr. HARRELD. I do not know; but it has been passed first by one House and then by the other, and it never got through both Houses up to the present time.

Mr. ROBINSON. There seem to be reports from both the Indian Bureau and the Commissioner of the General Land Office in favor of it.

Mr. HARRELD. It is a just claim, I think. There was a corn crop growing on this town site when it was taken for town-site purposes, and the Government had a one-third interest in the corn crop. This man Crew owned the remainder. This bill is to reimburse him for the corn crop which was destroyed when this town site was established. It is a very large town now.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

RALPH OLE WRIGHT AND VARINA BELLE WRIGHT

The bill (S. 3281) for the relief of Ralph Ole Wright and Varina Belle Wright was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with an amendment, on page 2, line 3, after the words "sum of", to strike out "\$10,000" and insert "\$2,500, said sum to be in full settlement of the claim," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Ralph Ole Wright and Varina Belle Wright, the parents of Ralph Atkinson Wright, deceased, who while serving as a seaman, second class, at the United States Naval Training Station at Great Lakes, Ill., while in the performance of his duty at the radio station at Great Lakes, Ill., without any fault of his own, on June 15, 1922, met his death from electric shock by coming in contact with the high-tension switches on the switchboard in basement of building No. 63 at the United States Naval Training Station, Great Lakes, Ill., in use as a transmitting and receiving radio station, the sum of \$2,500, said sum to be in full settlement of the claim.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

FRED A. GOSNELL AND OTHERS

The bill (S. 2976) to authorize the Comptroller General of the United States to relieve Fred A. Gosnell, former disbursing clerk, Bureau of the Census, and the estate of Richard C. Lappin, former supervisor of the Fourteenth Decennial Census for the Territory of Hawaii, and special disbursing agent, in the settlement of certain accounts, was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Comptroller General of the United States be, and he is hereby, authorized to relieve Fred A. Gosnell, former disbursing clerk, Bureau of the Census, from accountability or responsibility for losses for which he was accountable or responsible, by crediting his account with the sum of \$1,460.68, paid out by him in good faith, through error, in auditing and misinterpretation of the provisions of the Fourteenth Decennial Census act, during the census period from July 1, 1919, to July 1, 1922; and also the estate of Richard C. Lappin, former supervisor of the Fourteenth Decennial Census for the Territory of Hawaii and special disbursing agent, from accountability or responsibility for losses for which he was accountable or responsible, by crediting his account with the sum of \$91.50 paid out by him in good faith during the period from July 1 to September 30, 1920.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MRS. JOHN P. HOPKINS

Mr. DIAL. Mr. President, a short time ago I objected to the consideration of Order of Business 767, House bill 3411, for the relief of Mrs. John P. Hopkins. I will ask now to recur to that bill. I have gone into the facts, and have been convinced that perhaps there is some justice in it, and that the bill probably ought to pass. I therefore withdraw my objection.

Mr. SMOOT. Mr. President, just let it go over for a few moments.

The PRESIDING OFFICER (Mr. WILLIS in the chair). The bill will be passed over, under objection, for the time. The Secretary will state the next bill on the calendar.

STANSFIELD A. AND ELIZABETH G. FULLER

The bill (H. R. 914) granting six months' gratuity pay to Stansfield A. and Elizabeth G. Fuller was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (H. R. 1326) for the relief of Clara T. Black was announced as next in order.

Mr. ROBINSON. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 1807) to provide for the creation, organization, administration, and maintenance of a naval reserve and a Marine Corps reserve was announced as next in order.

Mr. ROBINSON. Mr. President, that seems to be a very important bill, and I suggest that it can not be considered and disposed of under the order we are now proceeding.

The PRESIDING OFFICER. The bill will be passed over.

The bill (H. R. 9076) to amend sections 2 and 5 of the act entitled "An act to provide the necessary organization of the customs service for an adequate administration and enforcement of the tariff act of 1922 and all other customs revenue laws," approved March 4, 1923, was announced as next in order.

Mr. JONES of Washington and other Senators. Let that go over.

The PRESIDING OFFICER. The bill will be passed over. Mr. SMOOT. Mr. President, this bill came from the House, and for some reason was read twice, considered, and placed on the calendar. The bill ought to have been referred to the Committee on Finance, and I ask that that be done.

The PRESIDING OFFICER. The Senator from Utah asks unanimous consent that House bill 9076, Order of Business 823, be taken from the calendar and referred to the Committee on Finance. Without objection, that order will be made.

Mr. SMOOT. I want to say that there is also a Senate bill of the same purport. It is a very important measure, but I am not going to ask that it be considered at this time, because I think the Senate committee will report the House bill rather than the Senate measure.

The PRESIDING OFFICER. The Secretary will state the next bill on the calendar.

JOHN BAUMEN

The bill (H. R. 6506) for the relief of John Baumen, was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ESTATE OF C. M. COLE

The bill (H. R. 4760) for the relief of the estate of C. M. Cole, of Butler County, Ky., was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (H. R. 5819) for the relief of the estate of the late Capt. D. H. Tribou, chaplain United States Navy, was announced as next in order.

Mr. ROBINSON. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

ALBERT E. LAXTON

The bill (H. R. 7420) for the relief of Albert E. Laxton was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (H. R. 8258) for the relief of Capt. Frank Geere was considered as in Committee of the Whole.

Mr. SMOOT. Let that bill go over, Mr. President.

The PRESIDING OFFICER. The bill will be passed over.

APPRAISER OF MERCHANDISE, PORTLAND, OREG.

The bill (S. 3352) to provide for the appointment of an appraiser of merchandise at Portland, Oreg., was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That on and after the passage of this act the Secretary of the Treasury is authorized and directed to appoint, pursuant to the civil service laws and regulations, an appraiser of merchandise at Portland, Oreg., prescribe his duties when not otherwise defined by law, and fix his compensation.

SEC. 2. So much of paragraph 3 of section 2587 of the Revised Statutes as provides for the appointment of an appraiser of merchandise at Portland, Oreg., is hereby repealed.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

LIEUT. RICHARD EVELYN BYRD, JR., UNITED STATES NAVY

The bill (S. 3433) for the relief of Lieut. Richard Evelyn Byrd, jr., United States Navy, was announced as next in order.

Mr. SMOOT. Let that bill go over.

Mr. SWANSON. Mr. President, I should like to make a statement about that bill.

Mr. SMOOT. I should like to have it go over.

Mr. SWANSON. I should like to make a statement in regard to it, because the subject will come up again, if the Senator will withhold his objection for the present.

This bill is a just one, and should be passed. Lieutenant Byrd, while he was at the Naval Academy, had some trouble with his foot in the athletic exercises there. He got well and graduated, and went into the Navy. After he became a junior lieutenant, however, he could not be promoted, as the trouble recurred. He was ordered before a court of inquiry, appeared before the court of inquiry, and they retired him as a junior lieutenant.

As soon as the war came on he volunteered and went into the aviation service, the most dangerous service in the entire Navy, and served abroad. He went everywhere they went. He

is now in the Navy and has been in active service ever since that time. He did not desire to retire; his retirement was against his wish. He can not serve on battleships and in such service. He can not give good service there, but in the aviation service, the most dangerous and important service of all, he is an excellent officer, and now is in charge of the aviation reserve force, which he organized. The men who were graduated with him are now lieutenant commanders in the Navy. He has had active service ever since he entered the aviation service. All this bill does is to provide that if he should be retired he would have the same position his comrades would have. The department has recommended him highly for promotion. They all tell us that the aviation service really has the most efficient personnel. I am sure there is not a man on the Naval Affairs Committee in either House who does not think that Mr. Byrd is entitled to this right.

Mr. ROBINSON. Mr. President—

Mr. SWANSON. I yield.

Mr. ROBINSON. I will say to the Senator that there is a bulletin which states that the department considers that Lieutenant Byrd has rendered exceptional service, and that his case is a deserving one. The only reason favorable action is not recommended is that it is not general legislation.

Mr. SWANSON. I will say to the Senator that I assisted in fixing the law in the act of 1916 which would not permit a man who is on the retired service to receive a rank higher than that of lieutenant commander when he is transferred to active service.

Mr. SMOOT. That is a good law.

Mr. SWANSON. That was fixed in that way because we did not desire to have men who retired on their own volition coming and doing the work of people that we need in the Navy.

The PRESIDENT pro tempore. The time of the Senator has expired.

Mr. SWANSON. I ask for five minutes more.

Mr. SMOOT. There is no need for the Senator to speak longer, for I shall object to the consideration of the bill. The Senator can talk if he wants to, and I have no objection to his having five minutes extra, but I shall object to the consideration of the bill.

Mr. SWANSON. If the Senator would examine into this case, and go and consult the Navy Department about it, and then tell me that a retired officer who would go and serve eight years in war, in the most dangerous service—the aviation service—become an expert in that service, and then, when the time comes, that the Government can not reward him because there is no general law, I would say he was mistaken in his judgment. He is now in active service doing this work. He is doing the work that any graduate of the academy does, except that his service is more dangerous—in the Aviation Corps—and when a man did not shirk, and entered the most dangerous service during the war, it is a gross act of injustice to refuse to let this be fixed up for him.

The PRESIDING OFFICER. The bill goes over, under objection.

Mr. SMOOT. For the record, I want to say that the Acting Secretary of the Navy says:

In view of the fact that this legislation is for the benefit of an individual and not for the general good of the naval service, the department can not consistently recommend its passage.

Upon that statement I shall object, for the present at least.

DAMAGE BY U. S. S. "LAMBERTON"

The bill (S. 708) for the relief of various owners of vessels and cargoes damaged by the U. S. S. *Lamberton* was announced as next in order.

Mr. ROBINSON. Mr. President, this appears to be an omnibus claims bill for damages against the Government through the operation of a destroyer. The claimants are some 20 in number. I would like to have an explanation of how it happens that so many claims are embraced in one bill.

Mr. CURTIS. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

GROVER ASHLEY

The bill (S. 615) for the relief of Grover Ashley was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with an amendment, to strike out all after the enacting clause and to insert:

That the Secretary of the Treasury be, and he is hereby, authorized to pay, out of any money in the Treasury of the United States not otherwise appropriated, to Grover Ashley the sum of \$778.80.

The amendment was agreed to.

Mr. JONES of Washington. The bill apparently does not indicate what that is for. I wish the Secretary would read it.

The PRESIDENT pro tempore. The Secretary has read all there is to the bill.

Mr. JONES of Washington. That is what I thought, and the bill apparently does not indicate anything but that this is simply a donation.

Mr. ROBINSON. The preamble explains that the money was taken from him by a lieutenant acting as adjutant.

Mr. JONES of Washington. The Secretary did not read the preamble, so I did not know what it was.

Mr. ROBINSON. The preamble will be read after the bill.

Mr. JONES of Washington. I know, but that does not inform us; I would like to have the preamble read.

The PRESIDENT pro tempore. The Secretary will read.

The READING CLERK. The committee proposes to strike out the preamble in the following words:

Whereas Grover Ashley was a private in the Eighteenth Field Artillery, American Expeditionary Forces; and

Whereas, while under arrest, he was relieved of a sum of money amounting to \$815.15 by officer of the day, Second Lieut. Charles S. Allen; and

Whereas said officer either stole said money or permitted it to be stolen: Therefore

And to insert in lieu:

Whereas Grover Ashley was a private in the Eightieth Field Artillery, American Expeditionary Forces; and

Whereas while in confinement he was relieved of \$70 United States currency and 5,290 francs, French currency, by Second Lieut. Charles S. Allen, personnel adjutant; and

Whereas only part of this currency has been returned to Grover Ashley and the balance, equivalent in United States currency to \$778.80, was lost through inexcusable negligence on the part of Charles S. Allen, then a second lieutenant, United States Army: Therefore

Mr. SMOOT. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

STONE TOWING LINE

The bill (H. R. 1682) for the relief of the Stone Towing Line was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the Stone Towing Line, Wilmington, N. C., the sum of \$1,519.15, as reimbursement of costs of repairs to its wharf known as the steamer *Wilmington's* wharf, at Southport, N. C., damaged in collision with the U. S. dredge *Absecon*, on July 20, 1919, in accordance with report submitted in Senate Document, No. 382, Sixty-sixth Congress, third session.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

LIEUT. E. J. McALLISTER

The bill (H. R. 6241) for the relief of Lieut. E. J. McAllister was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Lieut. E. J. McAllister, Tenth Regiment United States Infantry, the sum of \$116.88, in full compensation for damages to automobile, resulting from collision with truck belonging to the United States Army, which occurred at Camp Sherman, Ohio, August 1, 1921.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ESTATE OF CHARLES L. FREER

The bill (S. 3368) to cancel the additional taxes, together with all penalties and other charges assessed against the estate of Charles L. Freer, deceased, and to remit any further taxes, penalties, or charges which may hereafter be found due from the said estate, was announced as next in order.

Mr. ROBINSON. Mr. President, a House bill similar to this has already passed the Senate to-day. I presume this bill should be indefinitely postponed.

Mr. CURTIS. I ask that the bill be indefinitely postponed. The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

BILL PASSED OVER

The bill (S. 1640) to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United

States," approved July 1, 1898, and acts amendatory thereof and supplementary thereto, was announced as next in order.

Mr. JONES of Washington. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

JOHN F. MALLEY

The bill (S. 2714) for the relief of John F. Malley was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with amendments, on line 6, to strike out the word "sum" and insert the word "sums," and after the numerals "\$1,200" to insert "and \$683.34, respectively," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to credit to John F. Malley, former collector of internal revenue of the State of Massachusetts, and his accounts with the sums of \$1,200 and \$683.34, respectively, being the value of internal revenue stamps charged to him, stolen, lost, or accidentally destroyed at Boston, Mass., in the spring and summer of 1918.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

MARGARET RICHARDS

The bill (S. 854) for the relief of Margaret Richards was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with an amendment, on line 6, to strike out "\$10,000" and to insert in lieu thereof "\$5,000," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Margaret Richards, of Little Rock, Ark., the sum of \$5,000 for injuries sustained while en route to Camp Pike to participate in an entertainment for convalescent soldiers on May 6, 1920.

Mr. DIAL. Mr. President, this bill appears simply to be a donation to this lady. The report, on page 3, says:

The board therefore recommends that the accident was due to no fault or negligence on the part of the driver, Albert Bruner, or anyone else in the military service, and no responsibility can be placed on anyone in the military service.

Whether or not Congress wants to donate that money I do not know.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (S. 3327) to provide for the cooperative marketing of agricultural commodities was announced as next in order.

Mr. CURTIS. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2646) to provide for the expeditious and prompt settlement, mediation, conciliation, and arbitration of disputes between carriers and their employees and subordinate officials, and for other purposes, was announced as next in order.

Mr. DIAL. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

LEHIGH VALLEY RAILROAD CO. AND McALLISTER LIGHTERAGE LINE (INC.)

The bill (S. 2293) for the relief of Lehigh Valley Railroad Co. and McAllister Lighterage Line (Inc.) was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with amendments, on page 2, line 23, after the word "damage" and the comma, to strike out the words "including interest"; and on page 3, line 12, to strike out the words "Provided further, That all proceedings heretofore taken in said suits, pleadings filed, testimony taken, decisions rendered, and orders entered shall stand, saving to all parties, including the United States, their rights of appeal," so as to make the bill read:

Be it enacted, etc., That the claim of Lehigh Valley Railroad Co., as carrier and bailee of a quantity of steel billets laden on board the barge McAllister No. 85, against the United States for damage to and loss of said billets, and the claim of McAllister Lighterage Line (Inc.), as carrier and bailee of a quantity of steel billets laden on board the barge

McAllister No. 85 and as owner of the barge McAllister No. 85, against the United States for the loss of and damage to said steel billets and for losses sustained by reason of damage to the barge McAllister No. 85, all alleged to have been caused by collision on the 7th day of November, 1917, between said barge and the United States steamship *Aeolus*, then in the possession and control of the United States and being operated by the Navy Department in its transport service, in the slip adjoining No. 1 pier, Hoboken, N. J., may be sued for by Lehigh Valley Railroad Co. and McAllister Lighterage Line (Inc.) in the District Court of the United States for the Southern District of New York, sitting as a court of admiralty and acting under the rules governing such court in the suits heretofore commenced in the said district entitled "Lehigh Valley Railroad Co., as bailee of a quantity of steel billets laden on board the barge McAllister No. 85, libellant, against steam tug J. P. McAllister, her engines, boilers, etc., McAllister Lighterage Line (Inc.), claimant," in which the steamship *Aeolus* has been impleaded and the United States of America has appeared as claimant, and "McAllister Lighterage Line (Inc.), libellant, against steamship *Aeolus*, United States of America, claimant"; and such court shall have jurisdiction to hear and determine such suits and to enter judgments or decrees for the amount of such damage and costs, if any, as shall be found to be due against the United States in favor of said Lehigh Valley Railroad Co. or said McAllister Lighterage Line (Inc.), or against the said Lehigh Valley Railroad Co. or said McAllister Lighterage Line (Inc.) in favor of the United States upon the same principles and measures of liability as in like cases in admiralty between private parties and with the same rights of appeal: *Provided*, That such notice of proceeding with the said suits shall be given to the Attorney General of the United States as may be provided by order of the said court, and it shall be the duty of the Attorney General to cause the United States attorney in such district to appear and defend for the United States: *Provided further*, That such notice of proceeding with the said suits shall be given and proceedings in said suits shall be commenced within four months of the date of the passage of this act.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (S. 3398) to authorize the city of Norfolk, Va., to construct a dam from the southern and northern banks of Lafayette River to the southern and northern edges of the channel of said river was announced as next in order.

Mr. ROBINSON. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

NORWEGIAN STEAMSHIP "HASSEL"

The bill (H. R. 7558) to authorize the payment of an indemnity to the Government of Norway on account of losses sustained by the owners of the Norwegian steamship *Hassel* as the result of a collision between that steamship and the American steamship *Ausable* was announced as next in order.

Mr. CURTIS. Let that go over. It does not seem to have been referred to any committee.

Mr. REED of Pennsylvania. Mr. President, that is the same as Senate bill 2718, which is on the calendar as Order of Business 594, and which was passed.

Mr. CURTIS. Then I ask that the House bill be indefinitely postponed.

Mr. REED of Pennsylvania. Would it not be better to pass this and reconsider the action in passing the Senate bill?

Mr. SMOOT. I have a number of letters here in relation to this very bill, objecting to some of the provisions in it, and suggesting amendments to it.

The PRESIDENT pro tempore. The Chair understands that the Senator from Minnesota [Mr. SHIPSTEAD] asked that this bill be passed and that the Senate bill be indefinitely postponed.

Mr. SMOOT. I object to that, Mr. President. I ask unanimous consent for the reconsideration of the vote by which the Senate bill was passed, and then we can bring it back before us.

The PRESIDENT pro tempore. The Senate bill has not been passed.

Mr. SMOOT. That is all right, then.

Mr. REED of Pennsylvania. Was not Senate bill 2718 passed?

The PRESIDENT pro tempore. When the bill was reached it was passed over upon the suggestion of the Senator from Minnesota. This bill is in Committee of the Whole and open to amendment.

Mr. SMOOT. I object.

Mr. ROBINSON. Let this bill go over, too.
The PRESIDENT pro tempore. The bill will be passed over.

BILLS PASSED OVER

The bill (S. 2424) to reduce the fees for grazing livestock on national forests was announced as next in order.

Mr. CURTIS. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2844) to place the agricultural industry on a sound commercial basis, to encourage agricultural cooperative associations, and for other purposes, was announced as next in order.

Mr. CURTIS. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 3278) to establish a council on universities and colleges in the District of Columbia, and for other purposes, was announced as next in order.

Mr. HARRELD. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 25) authorizing a per capita payment of \$50 each to the members of the Red Lake Band of Chippewa Indians from the proceeds of the sale of timber and lumber on the Red Lake Reservation was announced as next in order.

Mr. HARRELD. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

PONCA TRIBE OF INDIANS

The bill (H. R. 4275) authorizing the Ponca Tribe of Indians residing in the States of Oklahoma and Nebraska to submit claims to the Court of Claims was announced as next in order.

Mr. HARRELD. A bill similar to that was passed a little while ago. Let this be passed over for the present, so that I may look into the matter. I am sure we passed a bill similar to it. I would like to have it passed over for the moment.

The PRESIDENT pro tempore. It will be passed over temporarily.

LANDS OF INDIANS OF QUAPAW AGENCY

The bill (H. R. 4818) to perfect the title of purchasers of Indian lands sold under the provisions of the act of Congress of March 3, 1909 (35 Stat. L. p. 751), and the regulations pursuant thereto as applied to Indians of the Quapaw Agency, was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That in all cases where lands allotted to members of any of the tribes belonging to the Quapaw Agency in Oklahoma are held under a trust or other patent containing restrictions on alienation, and said restrictions have been or shall hereafter be removed by order of the Secretary of the Interior pursuant to the act of March 3, 1909 (35 Stat. L. p. 751), or said lands or any portion thereof have been or shall hereafter be sold by said allottee or his heirs under the regulations of the Secretary of the Interior pursuant to said act, the deed of such allottee or his heirs executed after the removal of such restrictions, or when approved by the Secretary of the Interior, shall convey full title to the lands or interest so sold the same as if a fee simple patent without restrictions had been issued to the allottee: *Provided,* That nothing in this act shall be construed to apply to the lands of the Kaw or Osage Indians, or to lands of Indians of the Five Civilized Tribes in Oklahoma.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

PONCA TRIBE OF INDIANS

Mr. HARRELD. Recurring to Order of Business 854, House bill 4275, I find that it is identical with Senate bill 1392, Order of Business No. 815, which was passed a while ago. I move that the vote by which the Senate bill was passed be reconsidered.

The PRESIDENT pro tempore. The Senator from Oklahoma asks unanimous consent that the vote by which Senate bill 1392 was passed be reconsidered. Is there objection? The Chair hears none, and the vote will be reconsidered.

Mr. HARRELD. I ask that we return now to Order of Business No. 854.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 4275) authorizing the Ponca Tribe of Indians residing in the States of Oklahoma and Nebraska to submit claims to the Court of Claims, which was read, as follows:

Be it enacted, etc., That all claims of whatsoever nature, both legal and equitable, which the Ponca Tribe of Indians residing in the States of Oklahoma and Nebraska may have against the United States, in-

cluding among other things, claims for moneys due the Ponca Tribe but allowed or paid to some other tribe or tribes of Indians, shall be submitted to the Court of Claims, with the right of appeal by either party to the Supreme Court of the United States for determination; and jurisdiction is hereby conferred upon the Court of Claims to hear and determine any and all such claims and render final judgment thereon.

The Court of Claims shall advance the cause upon its docket for hearing, and shall have authority to determine and adjudge the rights, both legal and equitable, of the said Ponca Tribe in the premises: *Provided,* That the court shall hear and determine any legal or equitable defenses, set-offs, or counterclaims including gratuities which the United States may offer against the said Ponca Tribe notwithstanding lapse of time or statutes of limitation, and any tribe or band of Indians deemed necessary to a final determination of any suit hereunder shall be joined as the court may order. The suit or suits instituted hereunder shall be begun within five years from the passage of this act by the Ponca Tribe of Indians as parties plaintiff against the United States as the party defendant. The petition or petitions may be verified upon information and belief as to the facts therein alleged by the attorney or attorneys employed by the Ponca Tribe under contract approved by the Secretary of the Interior and the Commissioner of Indian Affairs, as provided by existing law; and no other verification shall be necessary: *Provided,* That upon the final determination of such suit or suits the Court of Claims shall have jurisdiction to decree the fees to be paid to the attorney or attorneys not to exceed 10 per cent of the amount of the judgment rendered in favor of said Indians and in no event to exceed the sum of \$25,000, together with all necessary and proper expenses incurred in preparation and prosecution of the suit; and the same shall be paid out of any sum or sums found due said tribe.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. HARRELD. I now ask for the indefinite postponement of Senate bill 1392.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

BUREAU OF INDIAN AFFAIRS APPROPRIATIONS

The bill (H. R. 7077) to amend an act entitled "An act to amend an act entitled 'An act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1914,' approved June 30, 1913," approved May 26, 1920, was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That section 1 of an act entitled "An act to amend an act entitled 'An act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1914,' approved June 30, 1913," approved May 26, 1920, be, and is hereby, amended to read as follows:

"That the Secretary of the Interior is hereby authorized to pay, out of any funds of the Creek, Cherokee, Choctaw, Chickasaw, and Seminole Nations, on deposit in the Treasury of the United States, the proportionate cost of street paving, construction of sidewalks and sewers heretofore or hereafter constructed and abutting on unsold lots belonging to any of said tribes and as may be properly chargeable against said town lots, said payments to be made upon submission of proof to said Secretary of the Interior showing the entire cost of the said street paving, sidewalk, and sewer construction, and that said improvement was duly authorized and undertaken in accordance with law: *Provided,* That the Secretary of the Interior shall be satisfied that the charges made are reasonable and that the lots belonging to the above-mentioned tribes against which the charges were made have been enhanced in value by said improvements to not less than the amount of said charges."

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

SALE OF LANDS ON QUAPAW INDIAN AGENCY, OKLAHOMA

The bill (H. R. 7453) to amend an act approved March 3, 1909, entitled "An act for the removal of the restrictions on alienation of lands of allottees of the Quapaw Agency, Okla., and the sale of all tribal lands, school, agency, or other buildings on any of the reservations within the jurisdiction of such agency, and for other purposes," was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That section 1 of the act of March 3, 1909 (35 U. S. Stat. L. p. 751), being "An act for the removal of the restrictions on alienation of lands of allottees of the Quapaw Agency, Okla., and the sale of all tribal lands, school, agency, or other buildings on any of the reservations within the jurisdiction of such agency, and

for other purposes," be, and the same is hereby, amended so as to authorize the sales, under regulations prescribed by the Secretary of the Interior, and upon application of allottees or heirs of lands allotted to Indians of the Quapaw Agency, Okla., and now held and designated as homesteads, whenever in the opinion of the Secretary such sales would be for the best interests of the applicants.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILLS AND RESOLUTIONS PASSED OVER

The bill (S. 3459) to encourage and promote the sale and export of agricultural products grown within the United States was announced as next in order.

Mr. DIAL. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The resolution (S. Res. 253) to continue the Select Committee on the Veterans' Bureau was announced as next in order.

Mr. REED of Pennsylvania. Let the resolution go over.

The PRESIDENT pro tempore. The resolution will be passed over.

The bill (H. R. 5420) to provide fees to be charged by clerks of the district courts of the United States was announced as next in order.

Mr. JONES of Washington. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 5423) to amend section 2 of the act of August 1, 1888 (25 Stat. L. p. 357), was announced as next in order.

Mr. JONES of Washington. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The resolution (S. Res. 227) to authorize an adjustment of the claim of the city of New York for expenses incurred on behalf of the United States during the Civil War was announced as next in order.

Mr. DIAL. Let the resolution go over.

The PRESIDENT pro tempore. The resolution will be passed over.

The bill (H. R. 8086) to amend the act entitled "An act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1915," approved August 1, 1914, was announced as next in order.

Mr. SMOOT. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

FEES FOR CLERKS OF UNITED STATES COURTS

Mr. PEPPER. Mr. President, Calendar No. 861, the bill (H. R. 5420) to provide fees to be charged by clerks of the district courts of the United States was called a moment ago, and on the suggestion of a Senator it was to go over. I wish to ask permission to make a moment's statement in regard to the bill, with the permission of the Senator who requested that it be passed over.

It will be remembered that this morning half a dozen bills were passed by the Senate relating to practices in the district courts and offices of clerks of the courts of the United States. I called attention to the fact in the case of one of those bills that the House of Representatives had passed a similar measure and procured the substitution of the House bill after reconsideration of the passage of the Senate bill, and the House bill was passed. I have since discovered that the House had passed two of the other measures which we passed this morning, and one of them is House bill 5420, Order of Business 861. I should like to ask unanimous consent to reconsider the action taken in the case of Senate Calendar 675, the bill (S. 2173) to provide fees to be charged by clerks of the district courts of the United States, in order that I may then ask for the consideration and disposition of Senate Calendar 861, to which I have just referred.

Mr. ROBINSON. Are the two bills identical?

Mr. PEPPER. They are identical, with the single exception that the House has substituted February 1, 1925, for the effective date. The effective date in the bill as the Senate passed it was inadvertently allowed to remain as July 1, 1924.

Mr. ROBINSON. I suggest to the Senator that it would require an amendment to the House bill now, since July 1, 1924, has already passed, and perhaps he had just as well let the House act upon the Senate bill. Nothing can be accomplished here now. It is getting very late in the day and a number of Senators are anxious to leave.

Mr. PEPPER. It would take but a moment to dispose of it.

Mr. ROBINSON. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

BILLS PASSED OVER

The bill (S. 3394) to amend section 26 of the interstate commerce act as amended was announced as next in order.

Mr. SMOOT. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 3035) to provide for the appointment of a commissioner of reclamation, and for other purposes, was announced as next in order.

Mr. JONES of Washington. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

STATISTICS OF COTTON

The bill (S. 3530) to amend the act entitled "An act authorizing the Director of the Census to collect and publish statistics of cotton" was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the first sentence of section 2 of the act entitled "An act authorizing the Director of the Census to collect and publish statistics of cotton," approved April 2, 1924, is amended to read as follows:

"Sec. 2. That the statistics of the quantity of cotton ginned shall show: The quantity ginned from each crop prior to August 1, August 16, September 1, September 16, October 1, October 18, November 1, November 14, December 1, December 13, January 16, and March 1, by States, the name, post-office address, and owner of each ginnery reporting to the Bureau of Census, together with the quantity ginned by each ginnery; and the name of the special agent or other employee of the Bureau of the Census reporting for each district statistics of the quantity of cotton ginned: *Provided*, That the Director of the Census may limit the canvasses of August 1 and August 16 to those sections of the cotton-growing States in which cotton has been ginned."

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CONSTRUCTION OF RURAL POST ROADS

The bill (H. R. 4971) to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, as amended and supplemented, and for other purposes, was announced as next in order.

Mr. STERLING. Mr. President, I want to say just a word in regard to the bill. It is a very important measure and should be passed at an early date. It is a bill appropriating for good roads, \$75,000,000 for the year 1926, and a like amount for the year 1927 for good roads generally, and \$7,500,000 for each of two years for forest roads and trails. It is in pursuance of a policy of the Government in regard to good roads as established by the act of 1916, the first Federal highway act, and by the more comprehensive act of 1921. I hope the bill will pass. It is a House bill.

Mr. SMOOT. I was asked by a Senator to object to the consideration of the bill if it came up to-day and therefore I shall have to object to the passage of the bill to-day.

Mr. STERLING. Very well.

The PRESIDENT pro tempore. The bill will be passed over.

RETIREMENT FOR DISABILITY IN LIGHTHOUSE SERVICE

The bill (S. 3613) to provide for retirement for disability in the Lighthouse Service was announced as next in order.

Mr. SMOOT. Let the bill go over.

Mr. JONES of Washington. If the Senator will withhold his objection just a moment, I think he will withdraw it when I read from the letter of the department upon which the committee acted, as follows:

The employees of the field service of the Lighthouse Service now may be retired for age under the lighthouse retirement act of June 20, 1918, but these provisions should be extended to cover cases of disability before the retirement age is reached. The general civil service retirement act of May 22, 1920, contains such a provision, as do the laws applying to the Coast Guard, the Coast and Geodetic Survey, and the Army and Navy, and the result is that the field employees of the Lighthouse Service are now the only persons in the Government service who can not be retired for disability. Retirement for disability is of especial importance in the work of the Lighthouse Service, because it is essential that the personnel on lighthouse vessels and stations shall be physically competent; the work is hazardous, and the safety of lives and property is dependent on its faithful performance. This provision will increase the efficiency of the Lighthouse Service by tending to reduce accidents and to increase the reliability of aids to navigation.

I call the Senator's attention, too, to this part of the letter:

References will be found in my annual reports for 1922, 1923, and 1924, recommending this legislation, the present need of which is urgent. Reports have been received by the department of a number of distressing cases, not due to misconduct, such as blindness, heart or other organic trouble, paralysis, and cancer.

Upon that letter the Commerce Committee was unanimous in recommending the bill, and I hope the Senator will withdraw his objection.

The PRESIDENT pro tempore. Is the objection withdrawn?

Mr. SMOOT. I have not had time to read in detail nor to study the bill as I should. I do not know where this special privilege granted to field clerks and other employees of the Government is going to end. I can not see where it is going to end. It seems to me it will not be many years before we will have every man and every woman who works for the Government of the United States put in some particular position, forever and ever to draw compensation from the United States, not under the retirement law but following the plan mapped out here for the Army and Navy. We are fast drifting to that end. The bill may be all right, but I have not had time to study it, and for that reason I object to its consideration at this time. I will ask the Senator to let it go over to-day and I will give it attention at the first opportunity.

The PRESIDENT pro tempore. The bill will be passed over.

CLAIM OF NEAR EAST RELIEF

The joint resolution (S. J. Res. 118) to authorize the United States Shipping Board to adjust the claim of the Near East Relief was announced as next in order.

Mr. REED of Pennsylvania. Mr. President, at the last session we passed a bill canceling a claim of the United States against the Near East Relief for some quarter of a million dollars or \$300,000. A representation was made at that time that the Near East Relief was entirely without assets, that the claim was utterly worthless, and that was given as the reason why we ought to pass the bill.

Here comes a bill showing that they have an asset in the shape of a claim against the Shipping Board. The bill, if passed, would be nothing more nor less than a charitable donation by the United States Government to the Near East Relief work. I do not think, when we have just been through the other process of canceling a claim against them, that we ought to be asked now to make a contribution to them.

Mr. JONES of Washington. The bill does not contemplate the payment of any money to them. It is to be repaid in the transportation of their supplies if there are any to be transported. That is all the bill provides.

Mr. REED of Pennsylvania. We pay them in services.

Mr. JONES of Washington. We pay them in services by transporting supplies that they are taking for the relief of people for which they get nothing. It is an eleemosynary institution.

Mr. REED of Pennsylvania. I know it is, but I do not think the United States ought to be compelled to contribute to an eleemosynary institution without a frank disclosure by them of all the facts. I do not believe they gave us a frank disclosure when we passed the other bill. I know I raised the question then, and I was told by the sponsor of the other bill that the organization had absolutely nothing; that it was going out of business as fast as it could, and that our claim was utterly worthless. Here they bob up with some assets.

Mr. JONES of Washington. Of course, I knew nothing about that.

Mr. REED of Pennsylvania. Of course, the Senator had nothing to do with that, and I am not in any way ascribing any blame to him.

Mr. JONES of Washington. The Shipping Board recommended the matter to us very strongly. The Near East people paid the Shipping Board, I think, something over \$400,000 for the transportation of their supplies, with the understanding that there would be no return cargo, and therefore the freight charges were higher. They did help in giving a return cargo of some \$70,000 of freight, and for that reason they come to the Shipping Board asking for reimbursement, and the Shipping Board recommends it. The Commerce Committee knew nothing about the other matter and simply acted on these facts.

Mr. REED of Pennsylvania. I think I shall ask that the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

LAND IN DULUTH, MINN.

The bill (S. 3123) authorizing the Secretary of Commerce to convey certain lands to the city of Duluth, Minn., was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc., That the Secretary of Commerce is authorized to convey to the city of Duluth, Minn., the following-described land, now a part of the fisheries station in said city: Beginning at a point on the east line of Sixtieth Avenue east in the city of Duluth, State of Minnesota, said point lying 15.96 feet in a southerly direction from a point at the intersection of the center line of London Road, extended with the said east line of Sixtieth Avenue east; thence extending in an easterly direction at an angle of 68° and 15' to the left of said east line of Sixtieth Avenue east, a distance of 37.80 feet to a point of curve; thence continuing on a curve to the left whose radius is 1,390.7 feet, a distance of 406.3 feet to the center line of Lester River as now located; thence in a southerly direction along the center line of said Lester River, a distance of 72.8 feet to a point; thence westerly, parallel to the curve above described and distant therefrom 68 feet, a distance of 178.2 feet to a point; thence northerly on a radial line a distance of 8.5 feet to a point; thence westerly parallel to the curve first above described and distant therefrom 57.5 feet, a distance of 278.1 feet to a point of tangency; thence westerly on a tangent line a distance of 12.50 feet to a point on the east line of Sixtieth Avenue east; thence northerly on said east line of Sixtieth Avenue east a distance of 62.82 feet to a point of beginning and there terminating, containing an area of 0.637 acre: *Provided*, That the land authorized to be conveyed hereunder shall be used for the construction of and be maintained as a public highway free of any expense to the United States, and all work thereon shall be such as not to interfere with the operations and efficiency of the fisheries station and in a manner satisfactory to the Secretary of Commerce: *Provided further*, That in the event of the discontinuance by the city of Duluth of the use of the above-described property as a public highway or the failure to maintain same in a manner satisfactory to the Secretary of Commerce, the title of said land shall revert to the United States.*

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PAUL CRUM

The bill (H. R. 3388) to place the name of Paul Crum on the muster rolls of Company E, First Regiment Nebraska Infantry, United States Volunteers, was announced as next in order.

Mr. SMOOT. Let the bill go over.

Mr. FRAZIER. Will the Senator from Utah withhold his objection a moment until I can make a brief statement?

Mr. SMOOT. Certainly.

Mr. FRAZIER. The beneficiary of the bill is a North Dakota boy who was under age at the time of the Spanish-American War. He ran away from home and got over to Manila and went into the service there and made a mighty good record. If the bill is passed, it will put him in line for the McKinley medal, and that is all it amounts to.

Mr. SMOOT. The bill has no reference whatever to the McKinley medal. It gives him all rights and privileges as if he had never left the Army. I can not see any reason why the bill was reported. There is no report upon it from the department. I would like, at least, to know what the department has to say in relation to it.

Mr. REED of Pennsylvania. Mr. President, will the Senator permit an interjection?

Mr. SMOOT. Certainly.

Mr. REED of Pennsylvania. The Committee on Military Affairs considered the case very carefully. As a matter of fact, Congress has previously passed a bill crediting this man with his service up to March 28, 1899. That was a mistake in date, but the bill which was passed would entitle him to a pension, if any pension were paid to Spanish War veterans. However, he has never made any effort to get a pension. He is not at all disabled. He is practicing law now successfully. The only purpose in having a new bill presented is to make him eligible for the McKinley medal, which is highly prized by the men who had service in the Spanish-American War.

Mr. SMOOT. That may be the only purpose of the bill, but that is not the only result that can follow from its passage.

Mr. REED of Pennsylvania. He is not entitled to a pension even if the bill should pass.

Mr. SMOOT. If it was extended to June 20, 1899, and he was considered to have served until that time, then he would be entitled to a pension.

Mr. REED of Pennsylvania. No.

Mr. SMOOT. I do not see why.

Mr. REED of Pennsylvania. Because veterans of the Spanish War are not entitled to service pensions.

Mr. SMOOT. But the Senator knows very well there will probably not another session of Congress pass before they are entitled to it. I know there is a general feeling in this Chamber that such a law should be enacted for the Spanish War veterans.

Mr. REED of Pennsylvania. He would already fall within the provisions of such an act, because his service has been legitimated by the prior act. We passed another bill for him at a prior Congress.

Mr. SMOOT. I do not remember that act.

Mr. REED of Pennsylvania. It is an unusual case. This young man was under age and tried to enlist, and they would not take him. Somehow he smuggled himself on a transport, went to the Philippines, joined up with a company, was carried through in uniform, and participated in all the battles. He was waging a private war of his own against Spain, because he never was a part of our military forces. All the bill does is to assimilate his war into our war and recognize him as a part of that military force.

Mr. SMOOT. That is a splendid statement of the case, but did not the Government pay him while he was serving?

Mr. REED of Pennsylvania. Not a cent. We fed him, because he joined the company at mess, and he got clothing in some manner, so that he was uniformed as a soldier, but he was never on the rolls and never got a cent of pay, and yet he served.

Mr. ROBINSON. All he wants is a medal?

Mr. REED of Pennsylvania. Yes.

Mr. ROBINSON. Then I say give it to him.

Mr. SMOOT. But that is not what the bill provides.

The PRESIDENT pro tempore. Does the Senator from Utah withdraw his objection?

Mr. SMOOT. Yes; I will withdraw my objection.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That Paul Crum, formerly of the city of Fargo, State of North Dakota, shall be held and considered to have served as a private in Company E, First Regiment Nebraska Infantry, United States Volunteers, in the war with Spain, from March 28, 1899, to June 20, 1899, and to have been honorably discharged of said last date.

SEC. 2. That said Paul Crum be, and he is hereby, entitled to all privileges and immunities belonging to a private soldier of said regiment, including all medals, citations, and decorations for remaining in the service after the expiration of the usual term of enlistment during the war with Spain, the same as though he had been regularly enlisted therein.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

TRANSFER OF LIGHTHOUSE REAL PROPERTY

The bill (S. 3571) authorizing the transfer of real property no longer required for lighthouse purposes was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of Commerce be, and he is hereby, authorized to transfer to the War Department for military purposes that portion of the Elm Tree Beacon Lighthouse Station described as follows, the same being no longer needed for lighthouse purposes:

Beginning at a point on the center of a granite monument on the southwesterly side of New Dorp Lane, which monument marks the northwesterly corner of the property and bears 125° 50' 15.53 feet from a monument of the topographical department of New York City, thence the property line bears 122° 9' 92.38 feet to the center of a similar granite monument, thence continuing in the same straight line 154.66 feet more or less to high-water line of New York Bay, thence along the said high-water line as the same winds and turns to the southwesterly corner of a stone jetty, thence along the southwesterly face of the said jetty 301° 9' 144.03 feet to the westerly corner thereof, thence 38° 54' 1.56 feet, thence 304° 7' 75 feet to the center of a granite monument at the southwesterly corner of the property, thence 36° 35' 229.033 feet to the center of the stone monument at the point or place of beginning, being an area of 1.1 acres more or less.

SEC. 2. The transfer herein authorized shall be made without charge to the War Department.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

SUPPRESSION OF LIQUOR TRAFFIC AMONG INDIANS

The bill (S. 2375) to facilitate the suppression of the intoxicating liquor traffic among Indians was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the first paragraph of section 6 of the act of November 23, 1921 (ch. 134, 42 Stat. L. pp. 222-223), shall not apply to operations in Indian country under the special laws prohibiting the introduction, sale, gift, possession, manufacture, etc., of intoxicating liquors within Indian country.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

COMPILATION OF INDIAN LAWS AND TREATIES

The resolution (S. Res. 271) authorizing preparation of compilation of Indian laws and treaties was announced as next in order.

Mr. SMOOT. Let the resolution go over.

Mr. HARRELD. Does the Senator want a statement with reference to the resolution, or does he want to have it go over without any explanation?

Mr. SMOOT. I want it to go over.

The PRESIDENT pro tempore. The resolution will be passed over.

CHIPPEWA INDIANS OF MINNESOTA

The bill (H. R. 26) to compensate the Chippewa Indians of Minnesota for lands disposed of under the provisions of the free homestead act was announced as next in order.

Mr. ROBINSON and Mr. DIAL. Over.

The PRESIDENT pro tempore. The bill will be passed over.

OMAHA INDIAN RESERVATION LANDS

The bill (H. R. 6541) to amend an act entitled "An act to provide for the disposal of the unallotted lands on the Omaha Indian Reservation, in the State of Nebraska," was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the act approved May 11, 1912 (37 Stat. L. p. 111), entitled "An act to provide for the disposal of the unallotted land on the Omaha Indian Reservation, in the State of Nebraska," is hereby amended by striking out all after the enacting clause and inserting the following:

"That the Secretary of the Interior be, and he is hereby, authorized to cause to be surveyed, if necessary, and appraised in such manner as he may direct, in tracts of 40 acres each, or as nearly thereto as the Secretary may deem practicable, and after such survey and appraisalment to sell and convey in quantities not to exceed 160 acres to any one purchaser, all the unallotted lands on the Omaha Indian Reservation in the State of Nebraska except such tracts as are hereinafter specifically reserved: *Provided*, That the said land shall be sold to the highest bidder under such regulations as the Secretary of the Interior may prescribe, but no part of said land shall be sold at less than the appraised value thereof: *Provided further*, That the use of the underground mineral rights of the unallotted lands be, and the same are hereby, reserved for the benefit of the children who are entitled to participate in said lands under the act of May 11, 1912, supra.

"SEC. 2. That the Secretary of the Interior is hereby directed to reserve from sale under the terms of this act the following tracts of land in sections 24, 25, and 26, in township 25 north, range 9 east of the sixth principal meridian in Nebraska for the purposes designated: Sixty acres of the land now used for agency purposes described as the southeast quarter of the northwest quarter and the south half of the northeast quarter of the northwest quarter of section 25 be reserved for agency and school purposes for so long as the need thereof exists; and 40 acres for use as a tribal cemetery, described as the southwest quarter of the southwest quarter of section 24, including the tract now used for that purpose: *Provided*, That two and one-half acres thereof may be reserved for the use of the Presbyterian Church now located thereon so long as needed for religious or educational purposes; and 230 acres, more or less, described as the east half of the northeast quarter of section 26, and the west half of the northwest quarter and the north half of the northeast quarter of the northwest quarter of section 25, and that portion of the southeast quarter of the northwest quarter of section 25 lying south and west of a certain irrigation ditch consisting of approximately 10 acres, and the southeast quarter of the southwest quarter of section 24, for the special and specific use of the Omaha Tribe, to be used for fair purposes, camping grounds, race track, and other tribal needs, the same to be held in reserve from the sale authorized by this act until such time as the Secretary of the Interior may determine that such lands are no longer needed for such purposes.

"SEC. 3. That the proceeds of such sale, after paying all the expenses incident to and necessary for carrying out the provisions of this act, and after reimbursing the general trust fund of the tribe for any assessment paid therefrom for protecting the unallotted tribal lands from overflow, shall be divided pro rata among the children of the Omaha Tribe living on May 11, 1912, who have not received allotments of land under the acts of August 7, 1882 (22 Stat. L. p. 341), and March 3, 1893 (23 Stat. L. p. 630), and shall be expended for the benefit of said Indians when and in such manner as in the opinion of the Secretary of the Interior shall be to their best interests, and pending such expenditure by the said Secretary the sums due the respective Indians shall be placed to the credit of the said Indians in the Treasury of the United States, and shall bear interest at the rate of 5 per cent per annum, but in the event of the death of any such Indian

while there remains in the Treasury to his credit any part of the sum so deposited the said sum shall be paid at once to his heirs, who shall be determined by the Secretary of the Interior in accordance with the laws of descent in force in the State of Nebraska, and the action of the Secretary of the Interior in determining the legal heirs of any deceased Indian, as provided herein, shall in all respects be conclusive and final.

"Sec. 4. That for the purpose of carrying out the provisions of this act there is hereby authorized to be appropriated the sum of \$1,000, or so much thereof as may be necessary, to be reimbursable out of the funds arising from the sale of said lands.

"Sec. 5. That sections 1, 3, and 4 of this act shall not become operative so long as the need thereof exists of maintaining an agency and school for the Omaha Tribe of Indians residing on the Omaha Indian Reservation in the State of Nebraska."

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

YANKTON BAND OF Santee SIOUX INDIANS

The bill (H. R. 8545) conferring jurisdiction on the Court of Claims to determine and report upon the interest, title, ownership, and right of possession of the Yankton Band of Santee Sioux Indians to the Red Pipestone quarries, Minnesota, was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

UNITED STATES BOTANIC GARDEN

The joint resolution (H. J. Res. 257) providing for the procurement of a design for the use of grounds in the vicinity of the Mall by the United States Botanic Garden was considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

OHIO RIVER BRIDGE

The bill (S. 3428) authorizing the construction of a bridge across the Ohio River to connect the city of Portsmouth, Ohio, and the village of Fullerton, Ky., was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Fullerton & Portsmouth Bridge Co., a corporation organized and existing under the laws of the State of Kentucky, its successors and assigns, is hereby authorized to construct, maintain, and operate a bridge and approaches thereto across the Ohio River, at a point suitable to the interests of navigation, to a point in Greenup County, Ky., near the village of Fullerton, from a point near the central portion of the city of Portsmouth, county of Scioto, in the State of Ohio, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 28, 1906.

Sec. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS, ETC., PASSED OVER

The bill (H. R. 4168) to amend an act entitled "An act to punish the unlawful breaking of seals of railroad cars containing interstate or foreign shipments, the unlawful entering of such cars, the stealing of freight and express packages or baggage or articles in process of transportation in interstate shipment, and the felonious asportation of such freight or express packages or baggage or articles therefrom into another district of the United States, and the felonious possession or reception of the same," approved February 13, 1913 (37 Stat. L. p. 670), was announced as next in order.

Mr. FESS. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

The resolution (S. 283) favoring the allotment of sufficient funds to the Interstate Commerce Commission to enable it to carry on the work of valuation of common carriers was announced as next in order.

Mr. SMOOT. Let that go over.

The PRESIDING OFFICER. The resolution will be passed over.

OUACHITA RIVER BRIDGE

The bill (S. 3621) granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a bridge across the Ouachita River at or near Monroe, La., was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the State Highway Commission of Louisiana to construct, maintain, and operate a bridge and approaches thereto across the Ouachita River,

at a point suitable to the interests of navigation, at or near Monroe, La., and in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

Sec. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BAYOU BARTHOLOMEW BRIDGE, LA.

The bill (S. 3622) granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a bridge across the Bayou Bartholomew at each of the following-named points in Morehouse Parish, La.: Vester Ferry, Ward Ferry, and Zachary Ferry, was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the State Highway Commission of Louisiana to construct, maintain, and operate a bridge and approaches thereto across the Bayou Bartholomew, at a point suitable to the interests of navigation, and in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, at or near each of the following-named points in Morehouse Parish, La.: Vester Ferry, Ward Ferry, and Zachary Ferry.

Sec. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

COOSA RIVER BRIDGE

The bill (H. R. 9518) granting the consent of Congress to the State of Alabama, through its highway department, to construct and maintain a bridge across the Coosa River at or near Leesburg, Ala., was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

DELAWARE RIVER BRIDGE

The bill (S. 3584) to extend the time for completing the construction of a bridge across the Delaware River was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the time for completing the construction of the bridge authorized by act of Congress approved August 24, 1912, to be built by the Pennsylvania Railroad Co. and the Pennsylvania & Newark Railroad Co. across the Delaware River near the city of Trenton, N. J., which has heretofore been extended by Congress to August 24, 1925, is hereby extended for a further period of three years from the last-named date.

Sec. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

LANDS IN MONTANA

The bill (H. R. 7522) to authorize and direct issuance of patents to purchasers of lots in the town site of Bowdoin, Mont., was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

KARL T. LARSON, DECEASED

The bill (S. 3548) for the relief of the heirs of Karl T. Larson, deceased, was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the homestead entry No. 051866, Glasgow, Mont., made by Karl T. Larson, deceased, on September 21, 1917, under section 2289, Revised Statutes, for lot 8, section 29, lots 5 and 6, section 28, and lot 2, section 33, township 28 north, range 53 east, Montana meridian, containing 155.84 acres, be, and the same is hereby, validated, and the Secretary of the Interior is hereby authorized to issue patent thereon to Lars Larson, for the benefit of the heirs of the said Karl T. Larson.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CANADIAN CAR & FOUNDRY CO. (LTD.)

The bill (S. 3505) for the relief of Canadian Car & Foundry Co. (Ltd.) was considered as in Committee of the Whole and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to refund to the agency of the Canadian Car & Foundry Co. (Ltd.), the sum of \$192,278.83 paid by the agency of the Canadian Car & Foundry Co. (Ltd.), as duties on certain materials imported into the United States for shipment abroad but which were destroyed by fire after such manufacture and before the same were exported, such refund to be paid out of any money in the Treasury not otherwise appropriated.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

THOMAS C. JOHNSON, DECEASED

The bill (S. 3534) to correct the military record of Thomas C. Johnson, deceased, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Military Affairs with an amendment, on page 1, line 10, after the word "That," to strike out "other than as above set forth," so as to make the bill read:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, or benefits upon honorably discharged soldiers and their widows, Thomas C. Johnson, who was a private in Company G, Eighteenth Regiment Iowa Volunteer Infantry, shall hereafter be held and considered to have been mustered in as a member of said company or regiment on December 22, 1863, and honorably discharged therefrom on December 1, 1864: *Provided,* That no bounty, pay, pension, or other emolument shall accrue prior to or by reason of the passage of this act.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ALBERT E. MAGOFFIN

Mr. WILLIS. Mr. President, earlier in the day objection was made by the Senator from South Carolina [Mr. DIAL] to the consideration of Senate bill 3066, Order of Business 638. I understand that the Senator is not now disposed to press that objection, and I ask unanimous consent to return to the bill. Its consideration will take only a moment.

The PRESIDENT pro tempore. Is the objection to the consideration of the bill withdrawn?

Mr. DIAL. Mr. President, I do not insist on the objection, although I think it is bad legislation.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (S. 3066) for the relief of Albert E. Magoffin, which was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Albert E. Magoffin, out of any money in the Treasury not otherwise appropriated, the sum of \$75 in full settlement of all pay, bounty, and allowance due by reason of his service in the Eighty-ninth Regiment Ohio Volunteer Infantry during the Civil War.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

COMMISSIONER OF RECLAMATION

Mr. McNARY. Mr. President, a few moments ago I was called from the Chamber, and while absent this body reached the consideration of Order of Business 870, Senate bill 3035. I ask unanimous consent to recur to that bill.

Mr. SMOOT. Mr. President, I will say to the Senator that the Appropriations Committee have inserted in the Interior Department appropriation bill the very item for which this bill provides.

Mr. McNARY. Very well.

Mr. SMOOT. I think it will become a law quicker in that way than in any other.

Mr. McNARY. Very well, Mr. President. I am very happy to have that statement in the RECORD. My point is accomplished, and I will not press the request.

Mr. ROBINSON. What salary does the commissioner receive now?

Mr. SMOOT. Seven thousand five hundred dollars.

EDITH BOLLING WILSON

Mr. BURSUM. Mr. President, I ask unanimous consent to present a report favoring the passage of a special act granting a pension to the widow of Woodrow Wilson. I ask consent that the report be received and that the bill be given immediate consideration.

The PRESIDENT pro tempore. The Senator from New Mexico asks unanimous consent to report favorably, from the

Committee on Pensions, Senate bill 3707, granting a pension to Edith Bolling Wilson. Is there objection to the presentation of the report? The Chair hears none.

The Senator from New Mexico asks unanimous consent for the immediate consideration of the bill. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll the name of Edith Bolling Wilson, widow of Woodrow Wilson, late President of the United States, and to pay her a pension at the rate of \$5,000 per year from and after the passage of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

COLUMBIA RIVER BRIDGES

Mr. JONES of Washington. Mr. President, from the Committee on Commerce I ask unanimous consent to report back favorably, with amendments, Senate bill 3640, granting the consent of Congress to the State of Washington to construct, maintain, and operate a bridge across the Columbia River south of Chelan Falls, Wash., and I submit a report (No. 827) thereon. I ask unanimous consent for the immediate consideration of the bill.

The PRESIDENT pro tempore. Is there objection to the reception of the report? The Chair hears none. The Senator from Washington asks unanimous consent for the immediate consideration of the bill. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The amendments were, on page 1, line 6, before the word "about," to strike out "on State road No. 10, at a point," and to insert "at a point suitable to the interests of navigation"; in line 7, after the word "between," to strike out "Orondo in"; and in line 8, after the word "and," to strike out "Chelan Falls in," so as to make the bill read:

Be it enacted, etc., That the consent of Congress is hereby granted to the State of Washington, or its assigns, to construct, maintain, and operate a bridge and approaches thereto across the Columbia River at a point suitable to the interests of navigation, about one mile south of Chelan Falls, between Douglas County and Chelan County, Wash., in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. The right to alter, amend, or repeal this act is hereby expressly reserved.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. JONES of Washington. From the same committee, I ask unanimous consent to report back favorably, with an amendment, Senate bill 3641, granting the consent of Congress to the State of Washington to construct, maintain, and operate a bridge across the Columbia River at Vantage Ferry, Wash., and I submit a report, No. 828, thereon. I ask unanimous consent for the immediate consideration of the bill.

The PRESIDENT pro tempore. Is there objection to the reception of the report? The Chair hears none. The Senator from Washington asks unanimous consent for the immediate consideration of the bill. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The amendment was, on page 1, line 6, after the words "Columbia River," to strike out "on State road No. 7, at," and to insert "at a point suitable to the interests of navigation, at or near," so as to make the bill read:

Be it enacted, etc., That the consent of Congress is hereby granted to the State of Washington, or its assigns, to construct, maintain, and operate a bridge and approaches thereto across the Columbia River at a point suitable to the interests of navigation, at or near Vantage Ferry, between Kittitas and Grant Counties, Wash., in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. The right to alter, amend, or repeal this act is hereby expressly reserved.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. JONES of Washington. From the same committee, I ask unanimous consent to report back favorably, with amendments, Senate bill 3642, granting the consent of Congress to the State of Washington to construct, maintain, and operate a bridge across the Columbia River at Kettle Falls, Wash.; and I submit a report (No. 829) thereon. I ask unanimous consent for the immediate consideration of the bill.

The PRESIDENT pro tempore. Is there objection to the reception of the report? The Chair hears none. The Senator from Washington asks unanimous consent for the immediate consideration of the bill. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The amendments were, on page 1, line 6, after the words "Columbia River," to strike out "on State road numbered 3, at Kettle Falls," and to insert "at a point suitable to the interests of navigation, at or near Kettle Falls, and"; in line 7, after the word "between," to strike out "Laurier in"; and in the same line, after the word "and," to strike out "Coville in," so as to make the bill read:

Be it enacted, etc., That the consent of Congress is hereby granted to the State of Washington, or its assigns, to construct, maintain, and operate a bridge and approaches thereto across the Columbia River at a point suitable to the interests of navigation, at or near Kettle Falls, and between Ferry County and Stevens County, Wash., in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

Sec. 2. The right to alter, amend, or repeal this act is hereby expressly reserved.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

PRICES OF FARM PRODUCTS

Mr. NORBECK. Mr. President, on behalf of a subcommittee appointed by the Committee on Agriculture and Forestry, I ask that the time be extended until February 1 within which to make the report on Senate Resolution 249, authorizing an investigation of the amount of losses sustained by the farmers of the United States on account of governmental fixing of price on wheat during the World War. The original resolution calls for a report by January 1.

Mr. SMOOT. It is a Senate resolution, is it?

Mr. NORBECK. It is.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the time is extended accordingly.

ADJOURNMENT

Mr. CURTIS. Mr. President, I move that the Senate adjourn, the adjournment being, under the order previously made, until Friday at 12 o'clock.

The motion was agreed to; and (at 4 o'clock and 35 minutes p. m.) the Senate adjourned until Friday, January 2, 1925, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES

TUESDAY, December 30, 1924

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O God of our fathers, we thank Thee for the memory of the past, for those who lived according to Thy law and labored in Thy Spirit. May their influence so abide that it shall reveal unto us our greater and our better selves. This day keep our hearts pure, our visions clear, and our actions upright. As we engage in our labors may we breathe the atmosphere of truth and goodness. Dispel all sadness and sorrow from our lives and let the light of Thy presence fall upon our firesides and loved ones wherever they may be, O Lord of mercy and love. Amen.

The Journal of the proceedings of yesterday was read and approved.

ADJOURNMENT OVER NEW YEAR'S DAY

Mr. LONGWORTH. Mr. Speaker, I ask unanimous consent that when the House adjourns to-morrow it adjourn to meet on Friday, January 2, 1925.

The SPEAKER. The gentleman from Ohio asks unanimous consent that when the House adjourns to-morrow it adjourn to meet on Friday next. Is there objection?

There was no objection.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

A message in writing from the President of the United States, by Mr. Latta, one of his secretaries.

TREASURY AND POST OFFICE APPROPRIATION BILL

Mr. MADDEN. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 10982) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1926, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 10982, with Mr. TILSON in the chair.

The Clerk reported the title of the bill.

The CHAIRMAN. The Clerk will continue the reading of the bill for amendment.

The Clerk read as follows:

For incidental and contingent expenses, \$1,000.

Mr. SMITH. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. SMITH: Page 35, line 4, after the word "expenses," strike out "\$1,000" and insert in lieu thereof "\$1,500."

Mr. SMITH. Mr. Chairman, on account of the increasing amount of business at the assay office at Boise, Idaho, it is necessary to have, for contingent expenses, \$1,500 instead of \$1,000.

The appropriation for the incidental and contingent expenses for the fiscal year 1924 was \$1,000, and it was necessary to appropriate \$300 additional in the deficiency appropriation bill enacted during the last session.

For the current fiscal year \$1,000 was appropriated, and it will be necessary to have a deficiency appropriation for the balance of the fiscal year of from three to five hundred dollars.

The Budget recommended an appropriation of \$1,500 for the incidental and contingent expenses for the next fiscal year. The hearings disclose that when the Director of the Mint was before the subcommittee he stated that from this appropriation of \$1,500 it would be necessary to purchase a new grinder, and in addition the usual quantity of acid, fuel, chemicals, crucibles, and other articles must be purchased.

The volume of business at the Boise assay office has increased 100 per cent during the last year, \$200,000 having been paid for bullion during the first six months of the current fiscal year. During the last fiscal year there were 553 deposits of gold and silver, the coining value of which was \$296,936.88.

I hope my amendment may be adopted, as the office can not be operated for less than \$1,500 for contingent expenses.

Mr. MADDEN. Mr. Chairman, in order to save time I will say that the committee inadvertently struck out the increase of \$500 in the item to which the gentleman from Idaho offers his amendment. Last year we had to grant a deficiency appropriation to meet the needs of this office, and the amendment the gentleman offered should be adopted.

Mr. BLANTON. This is a small item, Mr. Chairman; but does the chairman of the committee know what the extra \$500 is for?

Mr. MADDEN. Yes. They spent \$1,300 in 1924 for this same activity. We had to grant them a deficiency item of \$300. When we were considering it we overlooked the fact that we had to give them a deficiency.

Mr. BLANTON. Suppose the item had been left at \$1,000, what particular hurt would have come?

Mr. MADDEN. We would have to give them a deficiency later on.

Mr. BLANTON. It is an increase in some salary there?

Mr. MADDEN. No; this is the purchase of materials in connection with the assays.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Idaho.

The amendment was agreed to.

Mr. WILLIAMSON. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read, as follows:

Amendment offered by Mr. WILLIAMSON: Page 35, following line 4, insert a new paragraph as follows:

"Deadwood (S. Dak.) assay office: Salaries—for compensation of officers and employees at rates corresponding as nearly as may be practicable to the rates established by the classification act of 1923 for similar positions in the departmental services in the District of Columbia, \$5,280; for incidental and contingent expenses, \$400."

Mr. BLANTON. Mr. Chairman, I make the point of order against the amendment that it is unauthorized by law.

Mr. WILLIAMSON. Mr. Chairman, the point of order is not valid against this amendment. The assay office at Deadwood has been established as a matter of law for many years.

Mr. BLANTON. As I understood it, the office there was discontinued.

Mr. WILLIAMSON. It has at no time been discontinued since I have known anything about it, and I have known about it for a long time.

Mr. BLANTON. If that is so, why have they not allowed this fund?

Mr. WILLIAMSON. Because they are seeking to abolish the office by denying the appropriation for its maintenance.

Mr. BLANTON. If it is an institution of the Government, it could go on and function just as the Idaho office is functioning and establish a deficiency item, which the Appropriations Committee always comes in and provides for in a deficiency appropriation bill.

Mr. WILLIAMSON. Whatever the fact may be in regard to that, Mr. Chairman, the fact is that the office is a going institution and has been for many years. It was authorized by statute as early as 1873.

The CHAIRMAN. Unless this office is authorized by law the point of order will lie against it, and the Chair desires to be furnished with the authority for this appropriation.

Mr. BLANTON. I ask the gentleman from South Dakota to show the authority for it.

Mr. WILLIAMSON. Mr. Chairman, reading from page 1403, section 5714, of Barnes' Code:

Deadwood Assay Office: Said assay office shall be conducted under the provisions of the act entitled "An act revising and amending the laws relative to the mints, assay offices, and coinage of the United States," approved February 12, 1873.

There is a later act of February 19, 1897.

The CHAIRMAN. In the United States Statutes at Large, volume 29, on page 559, at the bottom of the page, the Chair finds this authorization:

The Secretary of the Treasury is hereby authorized and directed to use the unexpended balance of the appropriation of \$15,000 for establishing an assay office at Deadwood, S. Dak., made by the sundry civil appropriation act approved June 11, 1896.

Mr. WILLIAMSON. That is a later act. The original law is still in force.

The CHAIRMAN. There has been no repeal, so far as the gentleman from Texas knows, of this statute?

Mr. BLANTON. Except the attempt of the Committee on Appropriations to starve it to death by not supplying appropriations.

The CHAIRMAN. The Chair overrules the point of order.

Mr. WILLIAMSON. Mr. Chairman and gentlemen of the committee, as I stated a moment ago, the assay office at Deadwood, S. Dak., has been an active and going institution for many years. The Black Hills region in which this office is located is the richest gold-mining region in the United States and has the largest gold-producing mine in the world, producing in the neighborhood of between \$6,000,000 and \$7,000,000 annually in gold. There are also other gold-producing mines in the hills at the present time, besides a large number of other mines, including silver, tin, feldspar, and innumerable other minerals.

The Black Hills is perhaps the richest mining region in the entire country, when you take into consideration the area involved. The assay offices were not intended to pay their own way. There is not one that does it in the whole country. Regardless of the volume of its business, there is not one that pays the cost of operation. That question therefore is not involved. If that were the criterion, all would have to go; yet a number are retained, and among these I notice some of the heaviest losers. The question then is whether an assay office is a useful and necessary institution in the neighborhood where it is located. The assay office at Deadwood has been of great help to the miners and prospectors throughout the years of its existence. The need for the office is probably greater now than in any year in the immediate past, because the

mining industry in the hills is beginning to recover from the relapse suffered during the war.

I notice the report given by Mr. Grant to the Committee on Appropriations is very incomplete and, in fact, misleading, so far as the office at Deadwood is concerned. In the year 1924 there appears to have been 38 deposits, upon which there were made 228 assays. There were also 456 assays of gold and silver and 64 assays of base metals; and I find from the figures from July 1, 1924, to December 4, 1924, that there has been a considerable increase in the work of the Deadwood office, indicating a better condition in the hills and a greater demand for the facilities afforded by this office than there has been in the past three or four years.

I hope the chairman of the committee will not resist my amendment providing for the necessary appropriation and that the House will approve it by an affirmative vote. Mr. Chairman, I ask unanimous consent to insert a letter which I wrote to the chairman of the Appropriations Committee, in order that I may place before the Congress the facts as furnished by the assayer in charge.

The CHAIRMAN. The gentleman from South Dakota asks unanimous consent to insert the letter indicated. Is there objection?

There was no objection.

Following is the letter referred to:

DECEMBER 9, 1924.

HON. MARTIN B. MADDEN,
Chairman Appropriations Committee,
House of Representatives, Washington, D. C.

MY DEAR MR. MADDEN: Some time ago I wrote the assayer in charge at Deadwood, S. Dak., for a report on the business transacted there during the fiscal year ending June 30, 1924; also a report from July 1 to December 1. This report is as follows:

Operations Deadwood assay office

	Fiscal year ended June 30, 1924	Since July 1, 1924
Deposits received.....	38	7
Melts of bullion.....	51	12
Value of deposits:		
Gold.....	\$7,371	\$782
Silver.....	\$12,768	\$2,733
Assays of—		
Deposits.....	228	24
Gold and silver.....	456	244
Base metal.....	64	27
Forest Service.....	0	6
Special bullion.....	0	1

Six assays are generally run on each deposit of bullion.

Accompanying this report I received the following letter from the assayer in charge under date of December 4, 1924:

"Your telegram received, and I inclose statement of operations from fiscal year ended June 30, 1924, also the amount of business from July 1 up to present date.

"We are receiving an increase of correspondence and assays from different States, as the mint department is turning inquiries in regard to assays over to this office, and we are now receiving assays from nearly every State, including a good many from Southern States.

"The Cutting Mining Co., a short distance from the Homestake, are now operating with a large force of men and are blocking out ore in the mine and building a mill and will be ready to operate about January 1.

"The Trojan will start extensive development work shortly to open up some higher grade of ore to mix with their low-grade ore and will again be a producer of bullion.

"The Keystone Arsenic Co., at Keystone, have produced a lot of high-grade arsenic and are now combining several good properties under one head, and this will make them a strong company, as the ore carries gold and silver as well as arsenic."

I believe that in the interest of the development of mining in the hills region that the assay office should be continued. Considerable activity has developed in that region during the past summer and more is in prospect. In the interest of the little fellows the assay office ought to be continued.

Yours truly,

WM. WILLIAMSON.

The CHAIRMAN. The gentleman from Illinois [Mr. MADDEN] is recognized.

Mr. MADDEN. The committee has no desire to embarrass any section of the country in the transaction of important business, but the Director of the Mint, who came before the

committee, recommended the abolishment of the Deadwood office. He says that it is not necessary. At the same time he says that if they have assays to make on any of the materials produced in that section they would have to go to Denver, which is about 12 hours away. The committee itself, under the recommendation made by those in responsible charge of the work, would be derelict in the performance of its duty if it recommended an appropriation for the continuation of this office.

Of course, we sympathize with the gentleman who represents that district on the floor, and he undoubtedly knows a great deal about the hardship that might follow the closing of the office; much more than we do. But as a committee, speaking for the House, we are bound to take notice of the recommendation of those who are charged with the responsibility of recommending, and we come here not with any desire to embarrass the gentleman who speaks for the district, nor the people who live in the territory, nor to make it harder for those who are engaged in mining to conduct their work. But I do not see what else we can do other than what we have done.

Mr. WILLIAMSON. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. Yes; indeed.

Mr. WILLIAMSON. So far as the convenience of the assay office at Denver is concerned, that same argument will apply to others of these offices. The point is that if you are going to take the assay office away from there, you are going to seriously interfere with the mining activities in the hills. The individual prospector goes to the home office for the purpose of having his ores assayed, and if he has to send a long distance he will probably be compelled eventually to quit the business. In the interest of continued mining in the hills, it seems to me this appropriation ought not to go out.

Mr. BYRNS of Tennessee. Mr. Chairman, I want to say a word by way of supplementing what the gentleman from Illinois [Mr. MADDEN] has said relative to what was stated by the Director of the Mint with reference to this office. Here is where \$5,000 can be saved without detriment to anyone, according to the Director of the Mint; and certainly, it seems to me, the committee was justified in following the recommendations of the Director of the Mint and of the Budget Director, and that Congress would not be justified if it failed to do so.

Mr. WILLIAMSON. Mr. Chairman, will the gentleman yield?

Mr. BYRNS of Tennessee. Certainly.

Mr. WILLIAMSON. So far as any "detriment" is concerned, the offices left in the bill are no more important than the offices taken out, and the saving spoken of would not in fact be a real saving. It is true that the office has not a large volume of business at the present time, but the mere fact that there has been a depression heretofore, and that the need of it was less in the past few years than now, ought not to be a reason for discontinuing the office at the present time, when the report of the assayer in charge shows that the business is on the increase. If the director had been frank in the matter with the committee he would have called attention to this increase.

Mr. BYRNS of Tennessee. So far as I am concerned, I have felt for many years that nearly all of these assay offices could be eliminated without detriment to anyone. I have always favored the elimination of these assay offices, with the exception of two or three, like Seattle and possibly other places. The Director of the Mint was of the opinion that this office, including one other office, could be eliminated and should be eliminated at this time. Without regard to what he may have thought of some other office he certainly selected the two offices which he thought should by all means go and not be appropriated for. Now, here is what he says, gentlemen, just briefly, because his statement is worth more than any I can make. Mr. Grant said this:

Mr. GRANT. In 1923 Deadwood did a business of \$22,319. There were 24 deposits—only 2 a month. Last year, 1924, they had 37 deposits and did a business of \$35,170. They also did \$294 worth of assaying in 1924.

Mr. VARE. Is that the total amount of business they did?

Mr. GRANT. That is the total amount.

Mr. BYRNS. Where do these deposits come from, individuals?

Mr. GRANT. Yes; they are all individuals. Some of them come from close to Deadwood and some come from other places in the State.

Mr. BYRNS. What is the nearest assay office to Deadwood?

Mr. GRANT. The nearest would be Carson City, but San Francisco would be nearer because it is direct. Carson City is off the main line, but it is quite easy for those shippers to ship to San Francisco the amount of stuff they have.

Mr. BYRNS. It would not be much expense?

Mr. GRANT. No; very little.

Mr. THATCHER. Is this elimination of the Deadwood office made at your recommendation or upon recommendation by the Budget?

Mr. GRANT. Both; the Budget asked me my opinion, if I thought this office were of sufficient use to the public and the Government to keep it open.

Mr. THATCHER. You do not think it is of sufficient importance?

Mr. GRANT. No, sir. Let me correct myself. You asked me the nearest place to ship from here. Denver will be the nearest; it is quite near; it is less than 12 hours ride.

Mr. BYRNS. And you say it would be very little expense for them to ship it there?

Mr. GRANT. Very little.

Mr. THATCHER. That will result in the saving of about how much?

Mr. GRANT. Last year the Deadwood office received gross expenses of \$5,117 and they took in \$363. The loss was \$4,754.

Now, further:

Mr. VARE. You felt that you were not justified in keeping the office open?

Mr. GRANT. I did not consider it justified.

Mr. BYRNS. Was this assaying for people there?

Mr. GRANT. No; most of it from the outside. It comes from all over the United States.

Mr. BYRNS. You mean the assaying done at Deadwood?

Mr. GRANT. The assaying done at Deadwood and Salt Lake, both.

Mr. BYRNS. It was not local?

Mr. GRANT. No, sir; only a part was local.

Mr. BYRNS. Why send it to Deadwood?

Mr. GRANT. Because we try to send the assays to the offices having the least work. A great many of those assays come to Washington; they think we have an assay office here for that purpose.

Mr. BYRNS. This was ore from other sections being assayed at this place, and the elimination of the office would not result in the slightest inconvenience in the matter of assaying?

Mr. GRANT. Not the slightest; 50 per cent of that came from the South.

I submit, gentlemen, that under those circumstances the committee was justified in not making an appropriation for the Deadwood office.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. WILLIAMSON. Mr. Chairman, I ask unanimous consent that the gentleman from Tennessee may proceed for an additional two minutes.

The CHAIRMAN. The gentleman from South Dakota asks unanimous consent that the gentleman from Tennessee may have his time extended two minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. WILLIAMSON. Will the gentleman yield for a question?

Mr. BYRNS of Tennessee. Yes.

Mr. WILLIAMSON. While all the gentleman has read is perhaps true in a sense, the fact is it does not give a true picture of the situation at all. The number of deposits is not the important thing; it is the number of assays made. Now, if the director had been frank with the committee in giving all the information the committee ought to have had before it he would have told the committee that there were 748 assays made during the year 1924 and not lead the committee to believe the office was of no importance because, forsooth, there were only two deposits a month in 1923. There appears to have been 748 assays for the year 1924.

Mr. BYRNS of Tennessee. Let me ask the gentleman a question. I do not think the director stated just how many assays were made, but he does state that the total receipts from the assays amounted to \$294. Now, does the gentleman think that in the interest of economy it is worth while for the United States Government to spend \$5,117 in the maintenance of the Deadwood assay office in order to take in \$294, when the Director of the Mint says positively it will not result in the slightest inconvenience to anyone to send the assays to the Denver office, which is 12 hours away? He says that will not cause the slightest inconvenience, will involve no delay in time, and at the same time will involve very little expense to anyone.

Mr. WILLIAMSON. I want to say, so far as that last statement is concerned, that it is not true that the discontinuance of the office will not cause any inconvenience.

Mr. BYRNS of Tennessee. We must look to the Director of the Mint for that.

Mr. WILLIAMSON. And so far as the receipts are concerned, you are maintaining an office at Helena, Mont., which, while it has a larger business, has an income of only \$800. You are losing on that office annually over \$5,000, considerably more than you are losing on the Deadwood office.

The CHAIRMAN. The time of the gentleman from Tennessee has again expired. The question is on agreeing to the amendment offered by the gentleman from South Dakota.

The question was taken; and on a division (demanded by Mr. WILLIAMSON) there were—ayes 14, noes 46.

So the amendment was rejected.

The Clerk read as follows:

For incidental and contingent expenses, including new machinery and repairs, wastage in the melting and refining department, and loss on sale of sweeps arising from the treatment of bullion, \$90,000.

Mr. LEATHERWOOD. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Utah offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LEATHERWOOD: Page 35, line 21, after the figures "\$90,000," insert a new paragraph, as follows:

"SALT LAKE CITY, UTAH, ASSAY OFFICE

"Salaries: For compensation of officers and employees at rates corresponding as nearly as may be practicable to the rates established by the classification act of 1923 for similar positions in the departmental services in the District of Columbia, \$3,600. For incidental and contingent expenses, \$300."

Mr. LEATHERWOOD. Mr. Chairman, some days ago I appeared before the Committee on Appropriations and presented to them at that time my views with reference to the advisability of abolishing the Salt Lake City assay office by failure to provide funds for the next fiscal year.

May I call the attention of the gentlemen of the committee for a moment to a phase of this question which I have not heard emphasized this morning? If we are to abolish these offices upon the basis of the excess of cost of maintenance over actual fees taken in, then upon the report of the Director of the Mint and upon the record before the committee practically every assay office should be abandoned.

I find in examining the record that the greatest loss is in the New Orleans office, where there is an excess of cost of maintenance of something like \$10,400 over the receipts of the office.

Mr. BYRNS of Tennessee. Will the gentleman yield right there?

Mr. LEATHERWOOD. I will yield in a moment. I ask you to consider for a moment another phase of this question. I now yield to the gentleman for a question.

Mr. BYRNS of Tennessee. The gentleman spoke of New Orleans. I want to call his attention to the statement of the director to the effect that the business at that office in 1924 was \$1,314,946. The director states that they get a lot of bullion from South America—South American coins and some Mexican.

Mr. LEATHERWOOD. Will the gentleman yield to me?

Mr. BYRNS of Tennessee. Yes.

Mr. LEATHERWOOD. I want to call the attention of the gentleman to the fact that the figures the gentleman has just quoted represent the value of the bullion received; but I also call the gentleman's attention to the fact that in the Report of the Director of the Mint, upon page 7, the excess of the cost of maintaining the office over the gross receipts from assays was \$10,796.87.

But, gentlemen of the committee, I maintain that is not the real test or the real reason for maintaining these offices. The Salt Lake City assay office is in the center of one of the great mining districts of the West. No greater mining district, perhaps, is served anywhere in the United States than that served through this local assay office. I call the attention of the members of the Committee on Appropriations and the attention of you gentlemen of this committee here that the amount received in fees in these assay offices is not the real test as to whether they should be continued.

Five or six years ago a struggling mine that was using the assay office at Salt Lake City is now producing more lead and silver than any other mine in the United States, or in the world, for that matter. The test is what is the Government getting back from our State by the development of the mining industry. If you examine the returns from that State as to

what the Government gets back from Utah, you will find that a large percentage of the income coming from that State back to the Federal Government comes from the values produced from the mines and from the development of the mining industry of that country.

Why select this office, which is a service station for a great industry, and abolish it?

The CHAIRMAN. The time of the gentleman from Utah has expired.

Mr. LEATHERWOOD. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. The gentleman from Utah asks unanimous consent to proceed for five additional minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. LEATHERWOOD. Mr. Chairman, I want to further call the attention of this committee to the fact that you can not be governed wholly by the figures for the last fiscal year with reference to these offices. The past two years have been periods of depression in the mining industry. The price of metals is now coming back and the men are going out into the hills again and prospecting. They are looking for new sources of great wealth. Nearly all of the great office buildings in my State were built from incomes derived from the mines. Many of the large incomes that are taxed by the Government in my State are derived from the dividends from these mines which have been developed, many of them, in the last few years, from most humble beginnings.

I call your attention to the business transacted in this particular office, and I call it especially to the attention of the great Appropriations Committee. It will show you the development of the business, and I have no doubt the same showing could be made with reference to the assay office at Deadwood, to which the gentleman from South Dakota addressed himself. In the Salt Lake assay office, comparing the last 11 months of 1923 with the first 11 months of 1924, I invite your attention to what is going on.

For the last 11 months of 1923 the receipts in gold in that office were only 384.58 ounces, while for the first 11 months of this year the receipts in gold were 5,322.67 ounces.

For the last 11 months of 1923 the value of the gold was \$7,949.86, while for the first 11 months of 1924 the value of the gold taken in was \$110,029.18. For the last 11 months of 1923 the number of ounces of silver received was 902.49, while for the first 11 months of 1924 the number of ounces of silver was 6,542.84. The value of the silver for 1923 was \$578.84, while for the first 11 months of 1924 the value of the silver was \$4,308.49. The increase in the value of the silver taken in 1924 over that in 1923 was \$3,729.65. The increase in the value of the gold taken in 1924 over that of 1923 was \$102,079.32. The increase in the number of ounces of gold taken in 1924 over that of 1923 was 4,938.093.

In addition to that, gentlemen, I want to call attention to the fact that the figures show the value of the bullion received from the 2d of December to the 26th of December of this year to be \$11,000, at a time, Mr. Chairman, when transportation was largely paralyzed by virtue of great storms in the mountain country, and it has been difficult for men to go from place to place. The enormous increase of business comes along day after day and month after month at this office. Now, gentlemen, I want to know in all fairness what excuse there is for taking away from these people in that great district that pays so much in taxes to this Government on large sums of money derived from the mines? Why take away this instrumentality, when if you attempt to justify it on the ground of reducing the excess of cost of operation over receipts, then this office makes the best showing of any one in the list, although it is not the greatest in point of bullion received?

The CHAIRMAN. The time of the gentleman has again expired.

Mr. LEATHERWOOD. I ask for 2 minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. LEATHERWOOD. I yield to no man on the floor in my desire to cooperate with this great Appropriation Committee in economizing and saving the Treasury of this Government from useless expense. But, Mr. Chairman, I can not sit idly by and see the instrumentalities of this great western country destroyed one by one when I believe you are doing it under a mistaken idea.

I have no criticism to make against Mr. Grant, who appears on behalf of the mint. I have only to say in the greatest kindness that he does not understand our problems nor the problems of mining out in that country. I wish these gentle-

men who are so ready to strike at that great industry could come out and see what we are doing to contribute to the wealth of this country. I appeal to you, gentlemen, not to destroy this instrumentality for the sake of the paltry dollars involved, this service to the people that will indirectly, Mr. Chairman, bring into the Treasury of the United States by fostering the mining industry a thousand dollars for every one invested in cost of operation. [Applause.]

Mr. MADDEN. Mr. Chairman, it is unfortunate that conditions are as they are. Nobody would like more to accommodate the people of that section of the country than I. But we have a Director of the Mint who is presumed to have direct official knowledge of the conditions in all these places. Prior to the time he was appointed Director of the Mint he was superintendent of the Denver Mint for a long time. He is presumed to be a practical man. I would like to ask the gentleman from Utah what he would do if he was in our place in the face of this testimony. I will not ask him to answer until I have read the testimony:

Mr. VARE. Why did you discontinue the assay office at Salt Lake City?

Mr. GRANT. The same reason we discontinued Deadwood.

Mr. VARE. Suppose you place some statistics before us along that line.

Mr. GRANT. Salt Lake City did a business of \$15,042 in 1923 and a business of \$61,189 in 1924.

Mr. VARE. I assume you are stating the value of the deposits?

Mr. GRANT. Yes, sir.

Mr. VARE. How many deposits were there?

Mr. GRANT. One hundred and thirty-five in 1924 and 130 in 1923.

Mr. VARE. What were the receipts in 1923?

Mr. GRANT. \$508 in 1923 and \$502 in 1924.

Mr. VARE. What were the expenditures?

Mr. GRANT. The expenditures were \$4,073 in 1923 and \$4,074 in 1924.

Mr. VARE. Where would be the next nearest place to transfer this business?

Mr. GRANT. The nearest place is San Francisco.

Mr. BYRNS. Or Denver?

Mr. GRANT. Or Denver; about the same distance. Both the Deadwood and the Salt Lake office are in the post-office buildings and that space should be taken up by something else.

Mr. VARE. Will there be any great inconvenience to those having business with this office by its discontinuance?

Mr. GRANT. No; I do not think so. There will be a little, but not enough to keep it up.

Mr. VARE. Not enough to justify keeping the office open?

Mr. GRANT. No; not enough to keep the office open; that is my opinion.

Mr. BYRNS. These receipts come from assaying, this is the same condition that applies to Deadwood, and they will be diverted to the other places for the reason you stated?

Mr. GRANT. Yes; particularly the assaying; it is nearly all diverted there.

Now, this man speaks for the assay offices and is an official representative of the Government. Coming before the Appropriations Committee he says that even the space that the assay office occupies in the public building ought to be dedicated to some other use. We were trying to give Mr. Grant every chance in the world to make a case for the Salt Lake office. Every time we gave him the chance to make a case he made the case so bad that we could not act favorably on it. What were we to do in face of all this testimony? Of course, the gentleman from the Salt Lake district understands the mining needs and understands the importance of the continuation of the office. He understands this sort of preliminary work, the discovery of mines and the future development, and we would like to take his judgment, but when the man who is paid by the Government to administer the office says that he has no use for the office, what could the committee do? What do you suppose you would say if it was not an assay office, if we should come in here and say in the face of the protest of the director that we will appropriate the money anyhow?

We would not have the confidence of the House very long. Of course, I have no personal pride about this thing at all. We are simply reporting to you the facts as we find them and leaving the matter to your judgment to decide what should be done.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. LEATHERWOOD. Mr. Chairman, I ask unanimous consent that the time of the gentleman from Illinois be extended for three minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. LEATHERWOOD. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. Yes.

Mr. LEATHERWOOD. Mr. Chairman, I take it that the question which the chairman has directed to me is what I would do in view of such circumstances as he has delineated in his statement. I realize fully that the committee must be bound to a great extent by the statement of the Director of the Mint, but I also realize that the committee is not divested of its right to hear all of the evidence and to use its best judgment. What I would do if I were a member of this great committee would be to exercise my best judgment and not be bound by the statement of some one who may have overlooked some very important facts. I believed that was what the committee was going to do. As I glance back over the history of this committee I find several cases where this great committee has not been bound by the statements of officials of the Government as to conditions, but has exercised its discretion—wisely, I think—in protecting industry and in protecting the rights and welfare of the Government. So I am not very forcibly impressed with the idea that we must bow before the statement of any individual who may have appeared before the committee. Let us have all of the facts, Mr. Chairman, and weigh them.

Mr. MADDEN. Mr. Chairman, what I endeavored to say to the committee was that we presented the case on the facts stated by Mr. Grant. We have no pride of opinion about it. We do not care what the Committee of the Whole does in connection with it. If that committee wants to pass this amendment offered by the gentleman from Utah, it will not make me sore at all.

Mr. BYRNS of Tennessee. Mr. Chairman, the committee has not been controlled or actuated by any purpose of discriminating against any of these assay offices. This action was taken with reference to this office just as it was taken with reference to the Deadwood office on the express, positive, emphatic recommendation of the Director of the Mint, which was approved by the Director of the Budget. The Director of the Mint is a competent officer. He was appointed by the President of the United States. He certainly has in his mind all of the facts, or he ought to have in mind all of the facts, since he is a capable, conscientious officer of the Government. The gentleman from Utah [Mr. LEATHERWOOD] in his opening remarks seemed to think that there was some motive of discrimination on the part of the committee. We have eliminated from our recommendation to this House only those two offices which were recommended by the Director of the Mint and the Director of the Budget to be eliminated, and as one member of the committee I believe their reasons for such recommendation to have been good.

The gentleman has referred to New Orleans and said that there is more justification for the Salt Lake office than there is for the office at New Orleans. I call attention to the fact that in 1924 the business done in the New Orleans assay office amounted to \$1,314,946, as compared with a business of \$61,189 in the Salt Lake office in 1924. There were 500 deposits in the assay office in New Orleans in 1924 as compared with only 135 in the Salt Lake office. I submit that the comparison made by the gentleman from Utah is most unfortunate, waving for the moment the fact that the New Orleans assay office is the only southern assay office on the extreme southern border, and it receives South American bullion and South American coin, and bullion and coin from Mexico, which are assayed there and which, of course, makes its business so considerable and most important to the United States.

The gentleman from Illinois has read the testimony of the Director of the Mint. Let me read one other statement that he made. Speaking of the Salt Lake office he was asked by me the question:

These receipts come from assaying, this is the same condition that applies to Deadwood, and they will be diverted to the other places for the reason you stated?

Mr. GRANT. Yes; particularly the assaying; it is nearly all diverted there.

I submit that if we really want to practice economy, here is the time to practice it. Taking the statements of the director, there is no more reason for eliminating the Deadwood office than there is for eliminating the Salt Lake office. If you are going to maintain one in the face of the statement of the Director of the Mint then I am in favor of maintaining both; but as a Member of this House, believing in and seeking to practice economy, I think we not only ought to eliminate both

these offices but if I had my way there would be a number of others eliminated, and which I believe the director thinks could be eliminated without any particular inconvenience to the Government.

Mr. LEATHERWOOD. Mr. Chairman, will the gentleman yield?

Mr. BYRNS of Tennessee. Yes.

Mr. LEATHERWOOD. Is it not a fact that you maintain both an assay office and a mint at New Orleans?

Mr. BYRNS of Tennessee. They have no mint in actual operation. They used to have a mint there. There are a good many silver dollars which are stored there. It is a storage place.

Mr. LEATHERWOOD. Has there been any minting of coin during the last fiscal year in that office?

Mr. BYRNS of Tennessee. I think not, and not for many years. They discontinued the mint many years ago.

Mr. LEATHERWOOD. It is carried as a mint and assay office.

Mr. BYRNS of Tennessee. It is only an assay office. The building there, Government property, formerly used as a mint is now used for storing silver coins. There is no minting done there at all.

The CHAIRMAN. The time of the gentleman from Tennessee has expired. The question is on the amendment offered by the gentleman from Utah.

The question was taken; and on a division (demanded by Mr. LEATHERWOOD) there were—ayes 11, noes 26.

So the amendment was rejected.

The Clerk read as follows:

PUBLIC BUILDINGS, CONSTRUCTION AND RENT

Birmingham, Ala., post office and courthouse: For extension of mailing platform and changes in approaches, and miscellaneous minor items, \$25,000.

Mr. LANHAM. Mr. Chairman, I move to strike out the last word, for the purpose of asking the chairman of the committee one or two questions. I notice that in this section of the bill, which has to do with the construction and rent of public buildings, there are three or four items, each of which is under \$20,000 in amount. The last paragraph of the section is the usual and general provision appropriating \$800,000 for the use of the Supervising Architect in remodeling, enlarging, and extending occupied public buildings. That paragraph contains the provision that no expenditure may be made from it in excess of \$20,000 for any single improvement.

Now I would like to ask the gentleman from Illinois why these three or four items in this section of less than \$20,000 each are provided for specifically and not allowed to be taken care of out of the general appropriation of \$800,000?

Mr. MADDEN. Well, under that appropriation no money can be expended in excess of \$20,000 in any one case, and no money at all can be expended except where they acquire additional space by the expenditure. These special items are in cases where no additional space is to be obtained. In several cases much more was asked for than was allowed, and only a part of the things they wanted to do were authorized.

Mr. LANHAM. These are for purposes not included in the work of a general character covered in the last paragraph?

Mr. MADDEN. Yes. We put \$400,000 on that appropriation for increase of space in order that all the sections of the country might get much-needed improvements.

Mr. LANHAM. I think the committee has acted wisely in that regard. Is it customary in this section of this bill to make provision for specific places, and is there express authority for it?

Mr. MADDEN. It is a work in progress, where they have modifications to make in order to improve the facilities. For the expenditures here there is ample authority in law.

Mr. LANHAM. Then there is no encroachment on the prerogatives of the Committee on Public Buildings and Grounds?

Mr. MADDEN. None whatever. Our committee would not do that. We religiously refrain from that.

Mr. LANHAM. And these appropriations here are authorized by existing law?

Mr. MADDEN. Yes, indeed. We did not grant all that they asked, I will say to the gentleman.

Mr. WINGO. Mr. Chairman, I ask leave to proceed out of order.

The CHAIRMAN. The gentleman from Arkansas asks leave to proceed out of order. Is there objection?

There was no objection.

Mr. WINGO. Mr. Chairman and gentlemen of the committee, on yesterday I spoke in general debate in the House as in Committee of the Whole, as will appear on page 962 of the

RECORD. My remarks there, as is apparent to even a foolish bureaucrat, were in reference to an editorial in a newspaper. My object in taking the floor was well known; it was to read the editorial and get it in the RECORD as part of my remarks. As leave to extend it in the Appendix had been refused in the beginning, I frankly stated to the House that I would not have time to read all of the article, but asked leave to extend my remarks by printing it in extenso. The Chairman put the question very properly, using the words "to embody." The official reporters of debates, whose duty it is so to do under the rules, which are printed in the RECORD and which have been prepared by the Joint Committee on Printing, very properly prepared the manuscript for the Public Printer; but that bureaucrat, or one of his underlings, decided that my speech would appear better if it were distributed in sections throughout this "great religious daily" known as the CONGRESSIONAL RECORD. [Laughter.]

Now they took the head and the tail of my speech and scattered it all around, and left just the umbilicus, so to speak, in the RECORD proper. [Laughter.] I spent the morning in trying to find out from the bureaucrats who preside over the Temple of Printing by whose authority this was done, and they shunted me successively to seven different persons or phones, and finally one of them informed me that Congress had nothing to do with the printing of the RECORD; that the Committee on Printing controlled that, and they referred me to rule 9.

Rule 9 provides for printing in the Appendix where one asks leave to extend remarks by inserting a newspaper or magazine article, and nothing more, and makes no remarks on the floor; but it is further provided—

But this rule shall not apply to quotations which form part of a speech of a Member, or to an authorized extension of his own remarks.

But, of course, Mr. Chairman, in this day, when Congress is supposed not to have enough sense to know how to expend the people's money, it is an insignificant thing to say that the Congress has not sense enough to control the recital of its own proceedings which take place in the Committee of the Whole. I realize that it serves no useful purpose for me to rise and express my opinion on this matter. Owing to parliamentary restrictions I am not permitted to express my opinion on the action of the Public Printer or on the condition that is responsible for this situation. The economy part of it is their only plea; but that economy shall be shattered, so far as the day's proceedings are concerned, in a protest against such asinine interference with the printing of remarks that are uttered by Members on this floor. [Applause.]

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Brooklyn, N. Y., post office: For extension of toilet room and miscellaneous changes incident thereto, \$50,000.

Mr. SUMNERS of Texas. Mr. Chairman, I ask unanimous consent that I may proceed for 10 minutes out of order.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to proceed for 10 minutes out of order. Is there objection?

There was no objection.

Mr. SUMNERS of Texas. Mr. Chairman and gentlemen of the committee, while technically I may be proceeding out of order, as a matter of fact I think I am proceeding in order.

I want to direct the attention of the committee to the very significant statement made by the distinguished gentleman from Illinois [Mr. MADDEN] in charge of this bill, and I am presuming, too, to direct the attention of the committee not only to what the gentleman said—but I want also to call the attention of the Congress and of the country to another phase of the same matter. The gentleman from Illinois [Mr. MADDEN] said:

The hope for the future lies in not taking on new Federal activities or enacting legislation which greatly increases the cost of government. Normal growth of the Government as now constituted is natural and must be expected in many lines, but the precipitation of the Government into further lines of new activity and Federal aid to States in various fields will not only increase our expenditures and therefore our taxes, but will be an invitation and inducement to the States to do likewise. The remedy lies with us. If we are to have further tax reduction we must refrain from creating fresh obligations, many of which start in a small way, but take on accretions and a momentum that jolt the Treasury severely.

It will be observed that the gentleman from Illinois was dealing purely with the question of revenue and of expenditure. Some time ago I had occasion to investigate the ex-

penditure of one fund of a million dollars on the 50-50 arrangement between the Federal Government and the States.

The hearings upon that item disclosed that there had been expended in the city of Washington \$86,000 for additional clerk hire in connection with the disposition of that fund, and that in addition to that expenditure it was necessary for the representatives of the States to come to Washington, at State expense, to straighten out, as it was expressed, the kinks that developed in getting back to the States their share of the money.

From the standpoint of economy, of sound governmental policy generally, of the most ordinary common sense, could anything be more absurd? We send the tax gatherers of the Federal Government into the States to collect from the people of the States money in taxation, bring it to Washington, clear it through the Federal Treasury, and send a part of it back to the very source from which it came, deducting therefrom, however, the cost of collection, the cost of distribution, and the cost of maintaining an ever-increasing army of Federal employees. But I want to direct the attention of the country to a very significant and tremendously important fact with reference to what is happening to our system of government through this process of concentration. Time has arrived, gentlemen of the Congress, when we must be candid with our respective constituents with regard to what we know is happening to our system of government—we have concentrated at Washington a total of governmental responsibilities which is beyond human capacity intelligently and efficiently to deal with. Now, that is a plain statement of a fact which everybody who has any sense knows. As these additional powers come up from the States, it is not humanly possible to handle them through the machinery of the Federal Government functioning under popular control. God Almighty has fixed the limitations upon human capacity, and we have reached it, we have gone beyond it. I emphasize the statement, I make it in all deliberateness and with all certainty of the fact. It is not humanly possible to deal with these additional governmental responsibilities as they come up from the States, dealing with them through the agencies of popular government. We must deal here with great legislative matters; we pass great appropriation bills when only a very small number of the Members of Congress understand all the details of need which we ought to understand in order to be certain of an individual and independent judgment with regard to all these items of appropriations. Now, those are facts. But that is not all.

As these powers come up to us we shunt them out to a bureau, because the machinery of the Federal Government is absolutely overloaded. And may I direct the attention of my colleagues to this fact: That when we shunt these governmental responsibilities out to these bureaus we give to them an aggregate of power which no human beings have ever been able to exercise without tyranny, oppression, extravagance, and corruption? I do not mean to reflect upon the present personnel, but it is axiomatic in our system of Government—not as a theory but as a thing determined by human experience in the realm of Government—that you can not put legislative, executive, and judicial powers in the same personnel and preserve liberty. You can not preserve efficiency in Government; you can not avoid favoritism and corruption. And yet that is exactly what we do and do not because we will to do it but because we have no other choice than to do it. We give to these bureaus the power to make rules, the power to construe their rules, and the power to enforce their rules, which are all the powers a king ever had. All three powers of Government concentrated in an irresponsible personnel; I mean that they are not directly answerable to the people.

That is not all that is happening. Of course, I am covering a great big subject in a very limited time. This is happening: That as these powers and responsibilities gather about the small number of elected agents of the Federal Government there is less and less time—and this is a very significant fact—for these elected representatives of the Government to supervise the activities of the appointed personnel. Why, we do not know what they are doing in these bureaus and departments. We hear of it months and sometimes years after it has been done, and most of the time never at all.

I hope it will be understood that I am not criticizing individuals, but that I am discussing a condition and a system which obtains. And so it is coming about that though we have the paraphernalia for popular government, and though in theory we have these bureaus that are agencies of popular

government effectuating the public will, the truth of it is that we have these bureaus which are becoming more and more the actual, the unsupervised governors of the people. You take a bureau employee who goes out into a remote community—I wish I had the time to analyze just what this bureau organization is—he comes in contact with an American citizen of humble position; he tells him what he must do; and that man of humble position, far removed from the Federal Capital, is powerless to resist the mandate of a man who comes to him with all the powers of the great Federal Government.

May I say in passing that it was a tremendously fortunate thing that a man like John Marshall sat on the supreme bench during the formative period of the Government. Written constitutions, of course, can never be or hold within themselves the element of cohesive strength in government; they can only help hold territorial units and people together until, if they have sufficient community of interest and homogeneity, they grow together at the point of contact. That development has already come about and now we have reached the situation where we must begin an intelligent decentralization of governmental power and responsibility. [Applause.] And I want to make this observation: In the name of progress many reactionary measures are proposed. I say in all kindness to my friends, that after the formative period of a popular government, all true progress in that government must be in that direction which puts the power to govern and the responsibility to govern close to the governors, to the people. It is not progress to move these governmental powers and responsibilities away from the units of government more directly under popular control.

Now, summing up—because I think my time must be about spent—not only is the question of revenue involved, but the question of preserving a system of government under popular control is involved. Whenever you take away from those agencies in government that are close to the people—those agencies administered more directly by a personnel elected by the people to administer that government—the right to govern, and more important still, the necessity to govern, and move that power to Washington, you do that which is directly to the interest of somebody who wants to use the government for a selfish advantage and you do that thing directly contrary to the interest of the average citizen who can not reach to the National Capital. I make no appeal to prejudice. I appeal to knowledge and to judgment. The great interests can send their representatives to Washington to present their matters to these appointed people, who are the real administrators of the Federal Government in so far as its operation directly affects the citizen, but the average citizen can not do that. He can not come to Washington to the Government, but the Government, its power and its responsibility, can be sent back to him. It must be done to reduce the load on the Federal Government so that it can properly do that which it alone can do. It must be sent back to the States in order that they may be compelled to exercise those essential powers and discharge those responsibilities which they must retain in order that through their exercise they may keep the governmental vigor necessary for them to have in order properly to discharge the governmental responsibilities which the States alone can discharge. Strength comes from the struggle and efficiency comes from experience. We must send these responsibilities back to the people in order that through the grapple with the problems incident to self-government their governmental capacity may keep pace with the increase in the difficulties of government. The strength of government, its security, and its glory does not depend upon its institutions formally established, but upon the governmental capacity of its people. Neither constitutions nor statutes can create governments.

We are destroying our system of government at both ends and at its foundation. We are breaking down at the Federal end by the overload of governmental responsibility. We are changing its distinctive characteristics from that of a representative government to a bureaucracy, the least efficient, the most expensive, the most corrupt, and in some respects the most tyrannical of all the known systems of government. And we are weakening the sense of responsibility and of power and of self-reliance of the citizens with reference to the operation and the control of their system of government. This Federal Government can not endure resting upon a citizenship which fails for any reason to make its States function to the approximate maximum of their governmental capacity. It is not the right of the people to govern which is the important thing to preserve. It is the necessity to govern which is of transcendent importance.

But we are not dealing now with theories or with governmental philosophy. We do not confront free choice. We confront inexorable necessity.

A few days since, in the consideration of a proposition to reduce the obligatory jurisdiction of the Supreme Court, I asked Mr. Justice Van Devanter, of that court, this question:

I understand, in substance, the statement which you make to this committee and which we may make to our colleagues, is that your court, by reason of the concentration of responsibility here, does not have the time properly and expeditiously to take care of those cases which, in their nature, it is necessary shall be finally decided by the Supreme Court?

And he replied:

I mean to say that directly.

That condition obtains everywhere in the Federal Government.

We are at the decision point. We choose between decentralization, with the possibility of preserving efficient Federal and State Governments, and a citizenship developing to equal in capacity the larger and more difficult problems of the future, or a bureaucracy.

I wish I had the time to discuss the State end of this matter. Let us of the States be warned, however, by what we observe of the operation of that great law which will not permit power of any sort to remain where it is not exercised.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. SUMNERS of Texas. Mr. Chairman, may I have two minutes more?

The CHAIRMAN. The gentleman from Texas asks unanimous consent to proceed for two additional minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. SUMNERS of Texas. Now, I hope in the two minutes to give a sort of picture of what the Federal Government is. In so far as its functioning machinery is concerned, here in the city of Washington to-day are assembled all the elected agents of the Federal Government, every one of them; and when you enumerate them you find there are less than 600. There are between 500,000 and 600,000 civilian employees of the Federal Government operating its machinery. When we are assembled here there lies all the back country to the Pacific. It is no reflection upon the intelligence of the men who assemble here that they do not know what these more than a half million appointed people are doing. It is not humanly possible. Nearly all of the less than 600 elected agents of the people belong to the legislative branch of the Government having nothing to do with the administration of government nor the adjudication of conflicts that arise under our system of government.

When you come to examine just what is the organization of the administrative-executive branch of the Government you find over 500,000, and only one of them is elected, if we may say that the President is elected by the people, and I assume we may, for all practical purposes. There is one man, and just one man, out of more than half a million who is responsible to the sovereign citizens of this country.

The President must deal with the great national problems, with the great international problems. It would be absurd to expect him to know any considerable part of what these more than half a million people are doing. In so far as the details of governmental administration are concerned, they are governing the people of the Nation unsupervised and uncontrolled. That is what they are doing. And yet we are being pressed from every angle to put the most delicate and the most far-reaching of all governmental powers—powers over the people—in this sort of governing personnel. By constitutional amendment and statutory enactment we are taking away from the States and their people vital and necessary governmental powers and loading them upon this great, rapidly becoming bureaucratic Federal Government, which, it would not be too extravagant to say, if held to the responsibility of functioning through the machinery of a popular government, has broken down under the weight of its present overload. The people are ready to listen if we will dare to tell them the truth. They are ready to preserve our system of government and to preserve and to develop their own governmental capacity by coming again to a grapple with the problems and responsibilities incident to the state of a self-governing free people. We have got to do it or reconcile ourselves to being governed by a Federal bureaucracy.

Mr. LaGUARDIA. Mr. Chairman, I move to strike out the last two words for the purpose of asking the chairman of the subcommittee a question. The item provides for \$50,000 for extensions to the Brooklyn post-office building.

Mr. MADDEN. That is to remodel the toilet rooms and the swing room.

Mr. LaGUARDIA. I want to call the attention of the chairman and the committee to the fact that both the Brooklyn and the New York post-office buildings have become obsolete and antiquated, and we will have items each year for extensions and repair. I personally doubt the wisdom of spending any money on these two old structures. We need two new buildings. Of course, that is a matter that is not under the jurisdiction of this committee at this time; but in connection with the use of buildings in New York City and in keeping with the policy of economy outlined by the administration, I desire to call the chairman's attention to the necessity of greater scrutiny in the renting of buildings for the Post Office Department in New York City.

As the chairman knows, it is necessary to rent branch offices all over the city, and often this very important duty is delegated to a clerk or to an employee who has not the experience or the contact to strike the best bargain. This results in excessive rents at certain points being paid or in leases being entered into with the Government at points where a branch office would not be necessary owing to the constant shifting character of various neighborhoods in our greater city.

If greater efficiency is to be obtained by the Post Office Department, at the same time exercising some degree of economy in the renting of branch offices, I would suggest to this committee, when making appropriations, that they see to it that a committee of proper, competent men are assigned to the very important duty of carrying on the real estate business of the Post Office Department in New York City, which has become a very important factor in the business of that office.

Mr. MADDEN. I thank the gentleman for his statement, and we will pay some attention to it the next time we have the question up.

The pro forma amendment was withdrawn.

The Clerk read as follows:

St. Louis (Mo.) post office: For reconstruction and repairs to skylights and roof, \$25,000.

Mr. DYER. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Missouri offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. DYER: On page 37, after line 2, insert a new paragraph as follows:

"St. Louis (Mo.) customhouse: For alterations and repairs, \$35,000."

Mr. DYER. Mr. Chairman, the principal Government building in St. Louis is the United States customhouse. In this building are housed the courts, the marshals, the clerks, and various agencies of the Government.

This building is in the most advantageous section of the city from the standpoint of value and convenience. The post office at St. Louis maintains on the main floor of this building a branch. This branch or this space could be rented for one hundred times the amount that ought to be given over to a branch of the post office; but, outside of that, the collector of the customs informs me that for the sum of \$35,000 he can make sufficient alterations on other floors of the building that will enable him to house other agencies of the Government that are now paying rents in various office buildings; and he tells me, and I am satisfied of the fact, that if he is allowed this amount of money to make necessary alterations he can house additional agencies of the Government that will save to the Government a great deal of money. I think he can save in one year the total amount I have asked the committee to authorize him to have to make the necessary alterations in the customhouse on Olive Street between Eighth and Ninth Streets.

Mr. BYRNS of Tennessee. Will the gentleman yield?

Mr. DYER. I yield to the gentleman.

Mr. BYRNS of Tennessee. Why did he not submit an estimate for this item through the regular channel? Does not the gentleman think it would be a rather bad policy and would it not establish a rather bad precedent if we were to adopt an amendment of this kind which has not been estimated for and has not been given consideration by those in charge of the matter here in Washington? I have some improvements in the customhouse in Nashville I would like to have made, but I would not expect Congress to authorize an appropriation unless the recommendation came through the regular channels.

Mr. DYER. I will state to the gentleman that a number of years ago this Congress enacted a law to authorize the construction of a Government building in St. Louis for the purpose of housing various agencies of the Government upon

ground which the Government now owns. The authorization was for a \$1,000,000 building. A number of times the Treasury Department asked the Committee on Appropriations for the money to go ahead with this building, but due to various reasons, which I have no doubt were good, because I have very great regard for the Committee on Appropriations and its able chairman, nothing has been done and the Government has been going on and on and continuing to pay an enormous amount of rent for space in many office buildings.

I spoke to the Director of the Budget about this matter, and I think I can say for him that he is favorable to it. Why he did not send in an estimate for it this year, I do not know, but I do not see any reason why we should not vote this amount of money at this time to save an enormous amount of rental expense to the Government.

Mr. MADDEN. Mr. Chairman, the gentleman from Missouri has made a very good speech on a very important subject, but there is no reason why the Committee of the Whole House should adopt the amendment. First, there has been no consideration given to the question. It has not been submitted by the President; it was not submitted to the Supervising Architect of the Treasury; it was not submitted to the Committee on Appropriations. It has not been given consideration anywhere except by the collector of customs at St. Louis.

Now, if the collector of customs believes that he ought to have additional space which would cost \$35,000 to create, he ought to have asked the gentleman from Missouri, who is very well advised on such subjects, what method he should pursue in order to get it. He ought to have found out just where to begin.

Mr. DYER. Mr. Chairman, I think the gentleman is right in his analysis of the situation, but the collector has recently come into office and he was not advised of the situation. With the assurance which I am sure I have of the Committee on Appropriations, I ask leave to withdraw my amendment and will see that it is presented to them in a proper way later.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent to withdraw his amendment. Is there objection?

There was no objection.

Mr. WINGO. Mr. Chairman, I move to strike out the last word. I suppose there is no doubt, Mr. Chairman, that there are many places in the United States where there is need of either addition to the present public buildings or the erection of new public buildings. I think it is also true that minds that have enough intelligence to be practical and who are not misled by the false cry of the pork barrel know that it would be economy on the part of the Government if we entered into an intelligent, sane, and consistent building program. But the propaganda has spread over this land in a twofold character. One is that any kind of a public building in anything but a city is nothing but pork-barrel legislation, and the other propaganda is that the Congress of the United States either has not the character or the intelligence to frame a public building bill. That reflection on the intelligence of Congress is a part of the general reflection that representative government is a failure.

I was somewhat interested last night when I spent several hours in going through a collection of newspaper clippings from different parts of the United States that had been made for me bearing upon this propaganda that is directed at the overthrow of constitutional government, because the merest tyro in the study of representative government knows that the keystone of our system of government of Anglo-Saxon civil institutions is that the people's representatives shall hold the power, especially the purse strings.

I say I was interested in reading the different articles, and I was struck by the oft repetition of some of the same phrases in the different publications throughout the United States.

With great glee they announce to an unrestrained and speculative world that they can engage in speculation to the limit, because, forsooth, on the 4th day of March Congress will adjourn and there will be no extra session. Time and time and time again running through these statements was one made by one of the great magazines of this country that Congress could not handle anything, that it did not have the intelligence or knowledge to legislate upon anything, and the people have come to believe that that is true. As stated before by me, the average man thinks 434 Members of Congress are deficient in character and intelligence. They acquit their own Congressman because—the muckrakers may say what they please—with all the faults, idiosyncracies, and weaknesses of any Member in this House the strife and competition in American politics is such that no man wholly deficient in character,

or courage, or intelligence can be reelected time and again to this House. There may be a freak creep into this body now and then, but he is not reelected.

Now, to come back to the public-building proposition: Every business man in this House knows that it would be economy to the Government if we should pass an intelligent, constructive building program for the next 10 or 15 years. What are you going to do about it? Are you going, as Members of the House, to say, "That is true; but if you bring out a public building bill on the floor weak, miserable Members can not restrain themselves in the discharge of their duties under their oaths, but will submit to logrolling, and that we shall have a pork barrel bill."

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. WINGO. I ask for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. WINGO. So, forsooth, it is proposed that Congress enter a written confession on the record of the charge of incompetency, of its weakness of character, and that to some bureau shall be delegated the exercise of that judgment which Members of Congress should exercise. Oh, it is true, Mr. Chairman, that I may be partial to the towns and communities in my district, but who knows better than I, the Representative of those people, the needs of that section that under the philosophy of government I am charged, under my oath and duty to speak for and represent? Some bureaucrat, however perfect a gentleman he may be, how good he may be on the adding machine, what does he know about the needs of the Federal activities in Texarkana or Van Buren, Ark.?

He does not know. In the rush of consideration of all of the different needs of the United States, it would mean that some little clerk coming down some day, having had possibly a bad night and feeling grouchy, would undertake to slash and cut and say, "They do not need that there; they do not need that here," or on some other day he might feel a little bit better and give more than there was particular need for. Is he any stronger than a Member of Congress? Is he any less susceptible to the wiles and flattery of Members of Congress who may approach him and by partisan influence or personal favoritism get something? And is it possible that the American people do not understand the inherent vices of bureaucratic government?

Mr. MADDEN. Of course, the man that the gentleman is talking about could not be elected to Congress.

Mr. WINGO. Certainly not; and that brings me back to the statement that, whatever may be the faults of each Member of this House, a great congressional district can not be fooled year in and year out and send a man to this House, a man who is wholly deficient in character or intelligence. I for one scorn and am irritated by this suggestion that we must acquiesce in this drive that seeks to destroy representative government. In the last campaign we heard a great deal about the effort of LA FOLLETTE to overthrow our Constitution. Yet some of the same gentlemen who were lying awake nights and having conniption fits over that, in their newspapers day in and day out are sneering at Congress and seeking to undermine the confidence of the American people in their own chosen Representatives, and they continually cry out, "Turn all of the functions of representative government over to some bureaucrat."

The gentleman from Missouri [Mr. DYER] mentioned a condition at St. Louis. I have no doubt but that what he says is true. I can tell him of a great building in the southwestern part of this Nation where recently a small corridor, which is the only place where witnesses can await their turn to be called, was not half large enough to hold the Government's witnesses, much less the witnesses for the defense. The district attorney's office is not big enough to cuss a cat in, and if you threw a cat through it, his passage would deface the furniture. The tragedy of it was that the editor of the paper in that very city joined in the cry recently and talked about this "pork-barrel" proposition. I cut out that clipping and sent it to the head of the committee down there with the statement that their editor was saying it would be "pork barrel" to give them any enlargement of that building. Gentlemen, I can name you another post office where to-day the Government of the United States by its power holds on to a man's piece of property, when he has a standing bid for it of three times what the Government is paying him. It is one of those old leases where the Government did not have the right of renewal, but what practical remedy has he in the courts? He has to furnish the building, the fuel, the lights, the fixtures, and everything for that post office for one-third of what private enterprise would give him for the

same space. The Government has held onto it for 10 years, and you can not even get a post-office inspector to go there.

Let us have the manhood to repel this insinuation and meet the needs of the Government. If anything is of a pork-barrel nature or is waste, cut it out; but surely this Congress has enough sense to determine the needs of the Government for public buildings. [Applause.]

The Clerk read as follows:

Remodeling, etc., public buildings: For remodeling, enlarging, and extending completed and occupied public buildings, including any necessary and incidental additions to or changes in mechanical equipment thereof, so as to provide or make available additional space in emergent cases, not to exceed an aggregate of \$20,000 at any one building, \$800,000.

Mr. COOPER of Ohio. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. COOPER of Ohio: Page 37, line 22, strike out the figures "\$20,000" and insert in lieu thereof the figures "\$40,000."

Mr. COOPER of Ohio. Mr. Chairman, I have no desire to take up the time of the committee, except to offer this amendment and see if some relief can not be granted to post offices and public buildings that need additions at this time. This bill provides a total amount of \$800,000, which can be expended for this purpose, but there is a limitation of \$20,000 to any one building. There are conditions in post offices throughout our country that are very bad at this time. The Post Office Department would like to give some relief, but they are limited to the expenditure of \$20,000 on any one building. I have been told that the chairman of the Budget Commission, the Treasury Department, and the Post Office Department recommend that this amount be increased. Just why the committee did not put it in there I do not know.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. COOPER of Ohio. Yes.

Mr. MADDEN. They did not recommend anything, and they did not recommend this amount. The committee itself put it in there. We added \$400,000 to what they recommended, because we wanted to furnish relief. If the amendment of the gentleman prevails, the relief that we seek to give to the country will be dissipated. There may be two or three places where they ought to have \$40,000, but if you are going to establish \$40,000 as a limit, what they will do is to put up a new building with the \$40,000 and take away all of the added facilities that we are trying to propose by the \$800,000 appropriation. The amendment ought not to prevail.

Mr. COOPER of Ohio. Mr. Chairman, I believe the bill provides that no part of the \$800,000 can be used for new buildings.

Mr. MADDEN. Oh, this will tear them down and build them up.

Mr. COOPER of Ohio. It can be expended only for extensions on buildings already erected. I know of one condition where \$40,000 would build an addition to the post office which would probably meet the requirements of that office for the next 10 or 15 years to come. This office was built when the population of that particular city I have in mind was about 75,000. To-day the population is over 160,000, and just to show you the business it does, last week on one day they handled 181,380 pieces of mail, and on another day they handled 183,320 pieces. The employees are on top of one another; they have no room at all to work. They have erected a little temporary shed of sheet iron on the Government property, in which they are trying to handle the parcel post. We have the ground there, we have plenty of room, and for forty or fifty thousand dollars an addition could be put to this post office which would meet the requirements for the next 10 or 15 years. Under the provisions of this bill the Post Office Department is limited to \$20,000 as the amount that it can expend on any one building. I offer the amendment because I know that there are conditions in our country that could be remedied if the Post Office Department were permitted to expend \$40,000 instead of \$20,000, which is the limit that can be expended under the bill which we are now considering.

Mr. MADDEN. Mr. Chairman, the bulk of the money carried in the \$800,000 item will be expended in minor alterations to procure additional space. Perhaps there may not be more than \$2,500 spent on a single building, but they never should spend to exceed \$20,000. There would be no object in increasing the amount if we were going to increase the limit which can be spent on any one building to \$40,000. The purpose of

the increase of the sum recommended is to give added opportunities in the form of alterations. If there is a single case somewhere that ought to have \$40,000, and which has merit, that case ought to be submitted by itself and given special treatment; but under no circumstances, in my judgment, should the limit which may be expended on any one building be increased above the \$20,000. I hope the amendment of the gentleman from Ohio will be voted down.

Mr. WINGO. The gentleman from Illinois [Mr. MADDEN] has the correct idea about the specific item. I think some of us who have been here for some time will recall that there has never been any trouble about specific items when the department wanted to spend more than was authorized. In fact, in one city whose daily newspapers are constantly demanding that marble palaces be built in the cities of the country yet denounce as "pork barrel" any suggestion of fulfilling the needs of smaller cities of the country. I noticed that those newspapers were very influential when a few years ago the department saw the necessity of increasing the cost of the "facade"—I believe that is what they call it. I will say to my friend from Kansas that is the front of a building. As I recall, they said that absolutely the harmonious existence of the denizens of that city would be disturbed perpetually if we did not expend \$385,000 more in the decoration of that facade of the building, the front. I also remember how the department estimated for and Congress finally under pressure paid the bill for \$413,000 for interior decorations of a building in a city where they insist it is "pork barrel" to build a \$50,000 building in a western town.

Gentlemen, these people who demand great buildings in a city will insist upon and they will expend on mural decorations in each one of these great million dollar buildings more than it costs to build all the public buildings in a great many of the agricultural States.

Mr. BEGG. Mr. Chairman, will the gentleman yield right there?

Mr. WINGO. In a moment. There has been more money spent in mural decorations than on the facades. I believe that is right. I will ask my old friend from Florida [Mr. SEARS] if it is not a correct statement to say that more money has been spent in mural decorations in one building in one city than all the post-office buildings in the State of Arkansas have cost since they commenced erecting public buildings there. Then you did not hear any cry of "pork barrel."

Mr. BEGG. I agree that what the gentleman says has happened, but does the gentleman believe that the Treasury Department and the Supervising Architect's Office are at the present time wasting money on extravagant exteriors, or are they trying in every way they can to meet the necessities of post offices throughout the country?

Mr. WINGO. I think perhaps the gentleman is correct as to recent work; but does the gentleman think that the Supervising Architect's Office, in the last analysis, controls these things?

Mr. BEGG. I think the Supervising Architect's Office at this very minute is doing all it can to provide, at a minimum of cost, the absolutely necessary space required by the Post Office Department in a number of cities. I have visited them recently, and I know they are doing that.

Mr. WINGO. You are going to put through some big buildings—marble palaces—for certain cities in America, and I hope my friend will be here long enough—and I hope I will—fow me to indulge in that summum bonum of feminine felicity, "I told you so," and point to the interior decorations and artistic facades that will cost more than all the public buildings in the State of Kansas, outside of her big cities. But the point I am driving at is this: Why is it not "pork barrel" to meet the public needs of the city of Washington and yet it is "pork barrel" to meet the needs of Des Moines, or Van Buren, or Frankfort, or some other smaller city?

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. BEGG. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Ohio moves to strike out the last word.

Mr. BEGG. Mr. Chairman and gentlemen of the committee, I do not anticipate using five minutes, but I simply want to say that I do not think this Congress ought to be afraid to provide adequate housing facilities for our Post Office Department simply because we can not build a post-office building in every city for every Congressman. I would like to have several post offices built in my district, and my people would like to have them. Not every city needs them, but there are some cities that must of necessity enlarge their quarters if they are

to work to the best advantage. It is poor business not to provide the necessary facilities.

If this committee, composed of business men, found their help cramped for quarters to such an extent they could not work efficiently in the discharge of their duties, what would they do? Would they refuse to build an enlargement, even at the cost of \$40,000, just because they could not build a whole new factory building for 5 years or 10?

Now, consider the matter on a business basis. I happen to know something about this good city that my colleague is interested in, Youngstown, Ohio, a city that has more than doubled in population in the past five years. The parcel post itself has doubled in the past five years.

Mr. MADDEN. They do not say that.

Mr. BEGG. Will the gentleman indulge me just a moment? Those conditions of cramped quarters in that city I happen to know from first-hand information.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. BEGG. I yield to the gentleman.

Mr. MADDEN. The gentleman said that the parcel post had increased fivefold.

Mr. BEGG. No; I said it had doubled; if not in the past five years, then in the past several years.

Mr. MADDEN. The record has been closed by the report of the commission on the ascertainment of cost. It shows that the parcel-post business now is over a million parcels less than it was two years ago. Whether or not that is a correct statement of the facts I do not know, but that is what the report on the ascertainment of the cost of handling shows. It shows that there were a million less parcels for 1923 than there were for 1921 or 1922.

Mr. BEGG. Does the gentleman mean a million less parcels or a million less of cost in handling parcels?

Mr. MADDEN. A million less parcels.

Mr. BEGG. That has nothing to do with the actual condition obtaining in this particular city. A visit to the Post Office Department will show any man that there is congestion there and that they can not work efficiently. Anyway, I am not one Member of Congress who is afraid to trust the Post Office Department in providing adequate facilities for the employees. If it were a new building that they wanted in Youngstown, I would be opposed to it unless I could get a new building in Sandusky.

But when it comes to an enlargement of the present limited quarters by the expenditure of only \$20,000 additional to the \$20,000 that is needed it seems to me good business should recommend it.

Mr. WINGO. Will the gentleman yield?

Mr. BEGG. I would like to add one more sentence, and then I will yield, because I will be through. Twenty thousand dollars more added to the estimates for this particular building is just about half enough. If we give them \$20,000 this year and let it stand half finished, they can finish it next year; but if we raise the limitation, we could provide for the spending of \$40,000 this year; let them use that amount at once and have a completed building. I will now yield to the gentleman from Arkansas.

Mr. WINGO. Does not the gentleman realize that the condition which he is discussing at Youngstown is only typical of 30, 40, or 50 different places in the United States?

Mr. BEGG. I will simply say this: There should be no limit as to any one place, and I repeat that if—

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. BEGG. Mr. Chairman, I ask for two minutes more.

The CHAIRMAN. The gentleman from Ohio asks unanimous consent to proceed for two additional minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. BEGG. I repeat if we can not trust the Treasury Department and the Post Office Department to go only to the extent that is reasonable then we are in a bad way. That is all I have to say.

Mr. HUDSON. Will the gentleman yield?

Mr. BEGG. Yes.

Mr. HUDSON. Is it not a fact that perhaps the expenditure of \$20,000 would merely be a waste, because that amount will not meet the conditions in many of these cities?

Mr. BEGG. That might be true.

Mr. HUDSON. Twenty thousand dollars is allotted to the city of Flint for a building which was created for a population of 25,000, while that city has a population of 200,000, and the expenditure of \$20,000 will not relieve the condition there, and that expenditure will be wasted money. That is true in a dozen other cities outside of the Detroit situation.

Mr. HULL of Iowa. Will the gentleman yield?

Mr. BEGG. Yes.

Mr. HULL of Iowa. If you are going to take care of the situation that exists all over the country, should you not make your amendment carry a greater amount? Should you not change the amount from \$800,000 to \$1,600,000, if you are going to raise or double the limitation?

Mr. BEGG. No; I will say to the gentleman from Iowa that I do not think that follows at all. In the first place, I do not know, and neither does the gentleman, that every city needs twice \$20,000. The chances are that one-quarter of \$20,000 would be ample for a majority of the post-office enlargements, but that would not be true in some cities. There are a few cities, like Flint, Mich., and Youngstown, Ohio, whose population has probably doubled or trebled in the past 10 or 15 years, and those cities can not get the needed enlargement with this small amount.

Mr. HULL of Iowa. The gentleman from Ohio knows, and every Member of the House knows, that \$800,000 will not take care of the situation.

Mr. BEGG. Well, I do not know that. The department asked for \$400,000 and the committee gave \$800,000.

Mr. MADDEN. Mr. Chairman, I have tried to impress upon the committee that the appropriation we are proposing is intended to be used for minor repairs; not for the construction of new buildings, but for minor repairs in such cases as will yield a little more space when the repairs are made.

Mr. HUDSON. Will the gentleman yield?

Mr. MADDEN. Yes.

Mr. HUDSON. The gentleman means alterations, then, and not repairs?

Mr. MADDEN. Well, minor alterations.

Mr. HUDSON. The situation is that minor repairs will not relieve conditions.

Mr. MADDEN. Well, we can not start a public buildings bill on this repair item. Now, the money expended last year was \$375,000, and in connection with the expenditure of that sum the Treasury Department acquired 62,000 additional square feet of space. That was on 91 buildings and all over the United States, and it never was intended that this appropriation should apply to specific cases.

Mr. BEGG. Will the gentleman yield?

Mr. MADDEN. Yes.

Mr. BEGG. Does the gentleman think he is quite fair when he insinuates, if I understand him correctly—

Mr. MADDEN. I did not insinuate anything.

Mr. BEGG. Or made the statement that if this amendment were to be adopted they could go on and build new buildings, because under this very paragraph they could not build new buildings.

Mr. MADDEN. I know. It is not the intention to either build new buildings or so to repair or alter buildings that it will be equivalent to building a new structure. I ask the committee this question: What is the use of recommending double the amount in order that all sections of the country may be accommodated by the expenditure of money for needed alterations? If you are going to double the limit to be expended on any one building, you do away by that act with the very thing we are trying to do. I do not think any one place ought to be singled out, I do not care where it is—Youngstown, Chicago, New York, or any other place—but the money should be placed at the disposal of the Supervising Architect, and he, in cooperation with the communities where they need the expenditure, shall expend it in the most judicious way.

Mr. HUDSON. Will the gentleman yield?

Mr. MADDEN. Yes.

Mr. HUDSON. The gentleman suggests that this ought to be left to the discretion of the Supervising Architect.

Mr. MADDEN. Well, it is.

Mr. HUDSON. But does not the bill forbid that, for it says only \$20,000 to a place where needed?

Mr. MADDEN. Well, I say, within the limit of the discretion we allow.

Mr. HUDSON. Well, if \$20,000 will not remedy the situation, then he can not spend anything there?

Mr. MADDEN. Then they can do what other people have done.

Mr. HUDSON. And the serious situation must continue.

Mr. MADDEN. They can seek an estimate that would bring the specific case within our jurisdiction, or they can go to the Committee on Public Buildings and Grounds, if they want a new building, and have a bill reported and get it acted on. [Laughter.] But this item ought not, under any circumstances, to be enlarged.

Mr. HUDSON. Will the gentleman yield?

Mr. MADDEN. Yes.

Mr. HUDSON. The gentleman is speaking facetiously now.

Mr. MADDEN. No; I am speaking by the cards. I ask for a vote, Mr. Chairman.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Ohio.

The amendment was rejected.

The Clerk read as follows:

New Orleans (La.) Marine Hospital No. 14: For steam heat for old ward and incinerator, \$5,000.

Mr. STENGLE. Mr. Chairman, I move to strike out the last word for the purpose of asking the Chairman a question. On page 38, line 101, which the Clerk has just read, appear the words "for steam heat for old ward and incinerator, \$5,000." I want to inquire why an incinerator needs steam heat.

Mr. MADDEN. It is for the construction of the incinerator and the steam heat.

Mr. STENGLE. Should we not put a comma after the word "ward" and not create the impression, which I have gotten, that you are going to warm up an incinerator?

Mr. MADDEN. We have to warm this up before it will incinerate.

Mr. WINGO. Will the gentleman yield?

Mr. STENGLE. Certainly.

Mr. WINGO. Does the gentleman think a comma would be a sufficient buffer between old wards and incinerators?

Mr. STENGLE. No; but the chairman of the committee would be.

Mr. WINGO. Mr. Chairman, I rise in opposition to the amendment.

My friend from Ohio, the administration leader on this floor, and a very able one, I will say—candor compels me to admit that, as well as a warm personal affection for the gentleman—in the course of his remarks last made on this floor, said, "Can you not trust the department?"

Gentlemen, this illustrates the false philosophy that is abroad in the land. Suppose I was to say, "Can you not trust the Department of Justice to make all the laws necessary to punish crime in this country?" There is quite a difference between trusting a department to administer laws made by Congress and to expend appropriations authorized by Congress and in leaving both the enactment of the law and the administration of the law in one department.

There was a time when it was the philosophy of our Government that we had three separate, coordinate branches; that the legislative branch enacted the laws and the Department of Justice and the other executive departments administered the laws. That was no reflection upon these departments. This was not the intention of the founders of the Government, when they said, "No; we will not concentrate in the administrative-executive branch of the Government also the making of the laws." It was the wisdom of the forefathers that we would not concentrate in one of the three coordinate branches of the Government too much power, and our old, foolish forefathers following out the same folly of their Anglo-Saxon ancestors said the representatives of the people should hold the purse strings. They presupposed that they had both the intelligence and the courage and the character to spend the people's money wisely.

But in this new day, this new apostle of this new idea of government says, "Oh, that old system is a failure, can you not trust the department?" Suppose the gentleman should say, "We will abolish the judicial department and the legislative department and let the executive do it all." That is the logic of the gentleman's remarks. Well, I am not worried; sooner or later we will come back to it. The people will get tired of this and ultimately will fall onto this propaganda.

The American people, as I have often repeated, have a line of thought and a characteristic that is well illustrated by an old story that you may have heard many times. A friend was attending a Fourth of July picnic and he had imbibed too freely of roasting-ear wine and other things and was waiting at a wayside station out in Kansas or somewhere else for the return excursion train to take him back to his own home. He felt a little sleepy and was nodding a little bit at the station and the flies were kind of swarming around after the sweetness on his face, and every now and then he would wake up and rub them off, but finally a wasp lighted on the side of his nose and as he wiped him off the wasp stung him, and he roused up and said, "Just for that you will all have to move." [Laughter.] Some of these days the American people will get impatient of bureaucracy and will rise up and say, "Just for that you will all have to move," and we will go back to the old constitutional government of three separate coordinate

branches, with the representatives of the people controlling the purse strings and the representatives of the people determining how that purse shall be drawn on.

Mr. BEGG. Will the gentleman yield?

Mr. WINGO. With pleasure.

Mr. BEGG. Does the gentleman think that is what was the matter with the American people last November?

Mr. WINGO. If the gentleman does not know what was the matter with them, he does not show that usual astuteness which was largely responsible for his unanimous selection as the administration leader on this floor, and possibly the gentleman will take time in his own time to explain what is the policy of this administration on meeting the needs of public buildings. I am sure the House will be delighted to know.

The Clerk read as follows:

PUBLIC BUILDINGS, REPAIRS, EQUIPMENT, AND GENERAL EXPENSES

Repairs and preservation: For repairs and preservation of all completed and occupied public buildings and the grounds thereof under the control of the Treasury Department, and for wire partitions and fly screens therefor; Government wharves and piers under the control of the Treasury Department, together with the necessary dredging adjacent thereto; care of vacant sites under the control of the Treasury Department, such as necessary fences, filling dangerous holes, cutting grass and weeds, but not for any permanent improvements thereon; repairs and preservation of buildings not reserved by vendors on sites under the control of the Treasury Department acquired for public buildings or the enlargement of public buildings, the expenditures on this account for the current fiscal year not to exceed 15 per cent of the annual rentals of such buildings: *Provided*, That of the sum herein appropriated not exceeding \$115,000 may be used for the repair and preservation of marine hospitals, the national leprosarium and quarantine stations (including Marcus Hook) and completed and occupied outbuildings (including wire partitions and fly screens for same), and not exceeding \$24,500 for the Treasury, Treasury Annex, Liberty Loan, Butler, and Auditors' Buildings in the District of Columbia: *Provided further*, That this sum shall not be available for the payment of personal services except for work done by contract or for temporary job labor under exigency not exceeding at one time the sum of \$100 at any one building, \$930,000.

Mr. HUDSPETH. Mr. Chairman, I move to strike out the last word for the purpose of asking my friend, the gentleman from Tennessee [Mr. BYRNS], who seems to be more convenient to me on this side and who is a good lawyer and has shown himself to be thoroughly familiar with this measure, a question. You have the term here "such as necessary fences" under the appropriation for the Treasury Department. I want to state to my friend this case: There is a strip of land to the east of my home city where the beautiful Rio Grande in its rampages at one time turned to the south 1 mile and threw this land to the north of the present bed of the river. This area contains 347 acres of land. There is no line marking it at all. It is almost in the suburbs of the city, and at present it is known as "bootleggers' island," or more properly designated the "Cordova cut-off." It was asked of me by the customs department of my home city and other Federal departments at one time to secure a sum for the building of a fence in order to protect our Federal officials. A great many good officials and good men serving our Government have been foully murdered by lawbreakers on this spot.

I went to the Secretary of the Treasury, Mr. Mellon, and it was stated at that time that Mexico would match the \$10,000, I asked of Mr. Mellon—\$20,000 being necessary, as it was estimated, and the splendid Secretary of the Treasury found the \$10,000 and had it set aside, but Mexico, with that characteristic movement of hers that she transacts all of her business in the "manana," or on the to-morrow, when the time came for the expenditure of this \$10,000 on her part, failed to have the aforesaid sum in readiness, and claimed it had lapsed into the Treasury.

I want to say to my friend from Arkansas I am not so well versed in the king's English, but I do understand this façade statement of his after his lucid definition which he states is the front or exterior. It is a "dangerous front" that we are confronting and some of our good customs and immigration officials are killed there almost every month.

Only last week, I believe, two were killed trying to enforce the law against smuggling. It is necessary that something be done. There ought to be a fence similar to that that marks the boundary line at Tia Juana. I want to ask my friend from Tennessee if, under this appropriation reported by the committee, it would be permissible to take a sufficient sum to build a fence there to protect the officers of the American Government from assassination?

Mr. BYRNS of Tennessee. I think that the gentleman will find that this relates to the care of vacant sites belonging to the Government.

Mr. HUDSPETH. This is under the Treasury Department. It says "care of vacant sites under the control of the Treasury Department, such as necessary fences," and so forth. I very much doubt whether the department would have any authority to build a fence under that provision, except where it was necessary to preserve vacant sites.

This is a vacant site, although it does not belong to our Government, but belongs to Mexico. There is a boundary line there, and it appealed to the Secretary of the Treasury so that he granted us the sum of \$10,000, to be matched by an equal sum from the Mexican Government, to build a fence so that the line could be marked.

Mr. BYRNS of Tennessee. Was that under a provision similar to this?

Mr. HUDSPETH. As I recollect, it was under a like appropriation. If the Mexican Government had carried out its agreement the fence would have been built. What I would like to ask the gentleman is whether a sufficient sum could be taken from this appropriation of over \$900,000 to build a fence across this bootleggers' refuge, because there is nothing there to mark the boundary line.

Mr. WINGO. If the gentleman wants an expert opinion—

Mr. HUDSPETH. That is what I want, and that is the reason I asked the gentleman from Arkansas to remain.

Mr. WINGO. I do not think this appropriation refers to political fences or bootleggers' fences.

Mr. HUDSPETH. This is neither. It is a fence to protect our officers against smugglers and other lawbreakers that enter the country. The same kind of a fence existed at Tia Juana for a number of years. I know the disposition of the Secretary of the Treasury is to allocate the money if he can find it.

Mr. WINGO. I think the gentleman will have to put in an amendment.

Mr. BYRNS of Tennessee. I do not think this appropriation would apply to any such purpose.

Mr. MADDEN. I do not think you could use it for that purpose.

Mr. HUDSPETH. Would the chairman of the committee have any objection to an amendment providing that so much of this sum as is sufficient may be used by the Secretary of the Treasury for that purpose?

Mr. MADDEN. I think I should object to it; I think that it ought to go through the proper channels.

Mr. HUDSPETH. I want to say to the gentleman that it has been through the proper channel. It has not been submitted to the Appropriations Committee. I admit I have not been all over the city of Washington and seen every official on the highways and in the byways, but I did see the Secretary of the Treasury, who wants to protect the lives of his officials and also see that the laws are enforced, and he recommended it strongly.

Mr. MADDEN. I did not mean that the gentleman should go to every official.

Mr. HUDSPETH. I did not attempt to go to everybody.

Mr. WINGO. Did the gentleman go to the Lord of the Budget?

Mr. HUDSPETH. No; I did not.

Mr. BYRNS of Tennessee. This appropriation is for the preservation of the property of the United States and applies to vacant lots. I understand the gentleman desires this fence for an entirely different purpose, a very laudable and proper purpose, and one that should be allowed.

Mr. MADDEN. If the gentleman from Texas will give the Committee on Appropriations a chance to look into it, we will look into it on the first opportunity.

Mr. HUDSPETH. I will give the gentleman's committee a chance to look into it, because the Secretary of the Treasury says that he lost within a year a number of valuable men right there. I hope this will be impressed upon the committee and the chairman and that they will look into it.

Mr. MADDEN. We will be glad to do it.

Mr. HUDSPETH. Mr. Chairman, with the generous statement of the chairman of the committee and also the sympathetic attitude of my friend from Tennessee [Mr. BYRNS] I withdraw the pro forma amendment.

The Clerk read as follows:

CONTINGENT EXPENSES, POST OFFICE DEPARTMENT

For stationery and blank books, index and guide cards, folders and binding devices, including purchase of free penalty envelopes, \$27,000.

Mr. LAGUARDIA. Mr. Chairman, I move to strike out the last word. I desire to ask the chairman if it is not possible to have a larger fund set aside in order that injuries sustained by persons and property, especially in the city of New York, where traffic conditions are very bad, may be settled without having to introduce and pass a claims bill in Congress? As the gentleman from Illinois knows, we have hundreds of mail trucks going through the streets of the city of New York, through the various congested parts of the city, in order to get mail and deliver mail to the many branch offices. People are constantly being injured by them. Children are injured. The gentleman from Illinois is familiar with the procedure necessary to get a bill through Congress. It takes years. Many of these people are in poor condition, and something ought to be done so that a small claim can be adjusted, and funds should be available for that purpose.

Mr. MADDEN. They now have authority to settle claims up to a given amount—

Mr. LAGUARDIA. Five hundred dollars.

Mr. MADDEN. And to pay them. We are giving them here \$10,000.

Mr. LAGUARDIA. As the gentleman will readily understand, where a child is killed or where it loses a limb—

Mr. MADDEN. Five hundred dollars is as far as the Post Office Department can go in a settlement of any claim.

Mr. LAGUARDIA. But it is not enough.

Mr. MADDEN. We would not want to authorize the Postmaster General to adjust claims of larger amounts than that.

Mr. LAGUARDIA. I understand; but as a practical proposition, suppose just compensation for an injury amounts to \$1,000 or more. By the time the claim goes through Congress, as the chairman knows, years may have elapsed. An injured person can not understand such delay.

Mr. MADDEN. Of course that is legislation, and we would not have any objection to such legislation provided the law, if such a law were enacted authorizing settlement for a larger amount by the Postmaster General, compelled him to come to the Appropriations Committee after he had made the settlement and before the payment was made.

Mr. LAGUARDIA. That would be satisfactory.

Mr. MADDEN. That is what we do with the Army and Navy Departments.

Mr. LAGUARDIA. Under such a plan, in a year anyway, claims could probably be paid.

Mr. MADDEN. I think somebody ought to have supervision, because the Postmaster General himself personally does not settle the claims. We ought to have some review somewhere to see that no collusion occurs.

Mr. LAGUARDIA. Then the gentleman would favor legislation that would enlarge the amount?

Mr. MADDEN. Yes; that would enlarge the amount.

Mr. LAGUARDIA. And have the Postmaster General come into the Committee on Appropriations and get an allowance each year?

Mr. MADDEN. Yes.

Mr. LAGUARDIA. That would help some. Conditions are bad now, and they create a great deal of hardship in many families.

Mr. MADDEN. I think that is true. We find that to be the case.

The Clerk read as follows:

For pay of letter carriers, City Delivery Service, \$92,000,000.

Mr. STENGLE. Mr. Chairman, occasionally from the ranks of private citizenship there steps forward a character which shines almost as brightly as the midday sun, causing his fellow beings to feel that the whole world was better because he had lived. Such a character was the late Edward J. Cantwell, for the past 26 years secretary of the National Association of Letter Carriers, who recently passed on to his final reward.

Unusual as it may seem to some for us to pause in our deliberations in order to pay tribute to the memory of a private citizen, I feel that this House will honor itself if it shall record here in the very midst of its discussion of postal legislation a brief reference to this noble American.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. STENGLE. Yes.

Mr. MADDEN. I want to say that I knew this man. I knew him for many years. I knew him in his work and had daily contact with him for more than 10 years. There never was a man in any walk of life who was cleaner, truer, broader, or more truthful in his dealings with men than was Edward J. Cantwell.

Mr. STENGLE. To all of which I say, Amen.

Ed Cantwell, as the most of the Members of this House know, was a man of wonderful personality, firm convictions, honesty of purpose, and devotion to duty. He was a conspicuous and successful leader of men, one who always commanded respect and held the confidence of those who knew him best. His convincing frankness and unerring judgment inspired high regard and esteem for the organization of which he was so long an honored member and directing genius. His heart and mind were filled with the sweetest attributes of real fraternity. He breathed the very essence of love and helpfulness and daily poured out these richest treasures of his life that all might benefit thereby. The nobility of his character shines out like a lustrous star, reflecting its beauty and brilliance wherever men have had opportunity to meet and know him. Although he was extremely modest, he possessed an undaunted and courageous manhood; his life was square and true to the trusts imposed upon him by both God and man. Surely the world is much better because he lived.

He gave his life to a cause; indeed, he was so wrapped up in his desire to make the lives of our letter carriers more livable and their homes and firesides more cheerful, that he forgot his frail body and sacrificed his all for their sake. I feel, my colleagues, that nothing would more clearly describe his real vision of a true letter carrier than the words of Blanche Goodman Eisen, of Chattanooga, Tenn., which run as follows:

When martial airs are playing
And streets with flags are gay,
And men in khaki uniforms
Are cheered along the way,
There comes to mind an army
That marches day by day;
The chaps who link the world of men—
The boys in bluish-gray.

They boast no crack battalions;
No chevrons do they wear;
On them no one in high command
Bestows the *croix de guerre*;
No wild huzzas acclaim them;
No "front-page heroes" they,
The lads who give us service plus—
The boys in bluish-gray.

In gloomy city canyon,
On winding village street,
On upland chill or arid plain,
Their steady footsteps beat,
With heavy-laden knapsacks
They "carry on" each day;
No slackers mar the columns of
The boys in bluish-gray.

They do not stop for weather,
Whatever storms impend;
A sacred obligation theirs
The letters that you send.
So doff your hats! Salute them!
And bounteous homage pay
The men who bring our daily mail—
The boys in bluish-gray!

The Clerk read as follows:

For the operation and maintenance of the Airplane Mail Service between New York, N. Y., and San Francisco, Calif., via Chicago, Ill., and Omaha, Nebr., and for the installation, equipment, and operation of the Airplane Mail Service by night flying, and to enable the department to make the additional charges for both night and day service on first-class mail matter, in accordance with existing law, including necessary incidental expenses and employment of necessary personnel, \$2,600,000.

Mr. HUDSON. Mr. Chairman, I move to strike out the last word for the purpose of asking the chairman of the committee why there seems to be a change in the appropriation allowed for the Air Mail Service, which seems to be to be a very important branch of our department and affects our great industrial centers. There is apparently a cut of \$150,000 below what was appropriated last year.

Mr. MADDEN. The existing appropriation is \$2,750,000. The department asked for \$2,600,000 for the next year. They say that \$2,600,000 is all they need to do the same work that they are doing now, and that if they had the \$150,000 more it might possibly lead to some extravagance which would not be justified. They want to avoid temptation toward extravagance.

Mr. HUDSON. Is there any plan in the department for the expansion of the Air Mail Service?

Mr. MADDEN. They have nothing in contemplation now, unless they should operate under an act which was passed recently by the House. Whether it has been passed by the Senate I do not know.

Mr. LaGUARDIA. Not yet.

Mr. HUDSON. This does not provide for expansion?

Mr. MADDEN. This just carries on the work between New York and San Francisco, which is all they think they ought to do until they are certain it would be justified.

Mr. HUDSON. Mr. Chairman, I withdraw the pro forma amendment and ask unanimous consent to extend my remarks in the RECORD on this bill.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. HUDSON. Mr. Chairman, perhaps no one appropriation bill considered by Congress at this session is of greater interest to all the people than the bill (H. R. 11072) now before it. It touches by its expenditures for the Department of the Post Office in a very intimate and impartial way the life of the Nation. No citizen, be he or she ever so humble, but what it serves. Its representative, along the valleys and over the plains, in hamlet, village, and city, is anxiously looked for day after day as the messenger linking families together and the bearer of precious news. No business, whatever its size and volume, but must be dependent upon the service of this great Federal Government department.

The dispatch and efficiency with which the department may function is of the highest importance and the greatest consideration.

Then there are two factors that must be taken into consideration in the rendering of the best service by the department to its vast clientele scattered over the Nation, indeed, over the world.

ITS PERSONNEL AND ITS EQUIPMENT

It is, Mr. Chairman, my purpose to address myself in these few remarks to the latter, and only to say in passing that to my mind there is no more conscientious, efficient, painstaking, thoughtful Federal employee than those in the various branches of our mail service. In many instances, though illy paid and with increasing duties, nevertheless they have kept faith and served on. It is sincerely to be hoped that this Government will speedily do these faithful employees of the Government justice in the way of increased compensation.

Turning, Mr. Chairman, to the equipment of the department for the carrying on of this important, vital Government business—and Mr. Chairman, because of the necessity to be brief—I can only touch the one phase of the question, viz, that of adequate buildings and space in which to conduct the postal business of the Government.

The Government for 14 years has refused to pass any appropriation for the purchase of sites and the construction of buildings to house the Government's business in various sections of the Nation. Neither has it made any adequate provision for enlargements or extensions of buildings already erected but long since become wholly inadequate to the absolute needs of the communities in which they are located.

Mr. Chairman and gentlemen of this committee, consider for a minute the provision which this bill carries for the use of the department for the coming fiscal year. Under the item, public buildings, Office of the Supervising Architect:

For remodeling, enlarging, and extending completed and occupied public buildings, including any necessary and incidental additions to or changes in mechanical equipment thereof, so as to provide or make available additional space in emergent cases, not to exceed an aggregate of \$20,000 at any one building, \$800,000.

There are in my district at least two, if not three, cities where the conditions both for the public and the employees of the post office are intolerable. The inconvenience the patrons of the office are put to, as well as the insufficient service rendered the business interests of the cities in question, is really beyond description. The postmasters and employees of these cities are doing their best to render something near adequate service. They are bearing the burden of criticism unjustly while working under conditions that oftentimes not only makes their work doubly hard, but under conditions that greatly menace their health.

Mr. Chairman, the reason for all of this is the plea of economy in public expenditures and the cry of "pork barrel" legislation. May I say that there is no one among my colleagues that is a stronger advocate of economy in public expenditures than myself.

The President's stand for "economy, and after that, more economy," meets with my heartiest cooperation. But in the present instance the spending of \$800,000 next year—

For remodeling, enlarging, and extending completed and occupied public buildings, including any necessary and incidental additions to or changes in mechanical equipment thereof, so as to provide or make available additional space in emergent cases, not to exceed an aggregate of \$20,000 at any one building—

to my mind is not economy, but extravagance. Make the number of buildings treated, as above, less and the amount that can be expended \$50,000, or even \$75,000, and in so doing you can bring a measure of real relief to the cities where the situation is most pressing indeed.

The city of Flint, Mich., has a public office building erected to serve a city of 30,000 population. To-day it is a city of 150,000. The department has altered and remodeled and changed until the last available foot of working space has been utilized. The chamber of commerce in the rush times goes out and, at its own expense, rents additional space or the work of the post office would perforce be compelled to be carried on under a tent or the skies of heaven itself. When the post office was erected in this city in 1909 there were employed 12 clerks, 13 carriers, and its receipts for that year were \$58,925. For the present year, 1924, this office employs 51 clerks, 65 carriers, and its receipts are \$419,325.

Twenty thousand dollars can not help in any material way such a situation, yet conditions are critical for the still fast-growing business of that great industrial city.

Mr. Chairman, will you bear with me while I call to your attention one or two other instances of the same character?

Lansing, the capital city of Michigan, because of the fact that it too has in the past 10 years tripled its population, by the expansion of its great industrial concerns, and the ever-increasing growth of the State government, is suffering most seriously for lack of room in its Federal building. This appropriation of \$800,000 will not relieve in any way the very acute situation in this city. Built for a city of 25,000 and slightly enlarged once, it is trying to serve a city and community of more than 125,000. This Federal building when erected in 1914 employed in the post office 27 clerks, 29 carriers, and its receipts for that year were \$212,211.72. For the present year, 1924, this office employs 59 clerks, 49 carriers, and its receipts for the year are \$574,284.88.

Pontiac, a city of 50,000 population, has been promised relief for 10 years, and yet awaits the action of Congress. The legislation has been passed, but not the appropriation. In this splendid city patrons stood for hours at a time in line trying to be served during the recent holiday season. But, Mr. Chairman, it is not simply at such times as this that inconvenience and delay is occasioned, but the service is constantly delayed and hampered because of the lack of room. Some relief must be given or business will suffer greatly. When this post office was erected in 1912 the receipts of the office amounted to \$46,573.46, and there were employed 13 clerks and 15 carriers. To-day there are employed in the office 24 clerks and 29 carriers and the receipts for the present year are approximately \$146,000.

Mr. Chairman, I am aware that these situations which I call the committee's attention to can be duplicated in other sections of the country; my colleagues have called the attention of Members of Congress to them, both in this session and in former sessions. The question is, "What shall we do in the matter?" Can we not enact legislation in this session that will put this entire matter up to a commission of some kind, which will find the places such as I have named, and then make an appropriation ranging over 5 or 10 years that will bring some measure of relief to these great centers of population and industry which they are so urgently in need of.

The outlying districts of Detroit have grown so rapidly in population and commercial importance that it is hard for the imagination of one's mind to follow. One year is sufficient to change a series of farms to a community with 1,200 or 2,000, or even in one instance 2,400, new homes built and occupied within the year. Villages in five years have grown from 500 in population, and with little commercial standing, to cities of ten, twelve, or fifteen thousand inhabitants and financial and business interests of relative importance. So rapid has been this growth the problem of handling its postal needs has been almost impossible. Congress or the department has not foreseen these rapid growths and adequate funds have not been asked or granted by Congress. Civic bodies of one kind and another have tried to help meet these situations by furnishing buildings and paying salaries. This spirit is most commendable, but, Mr. Chairman, there is a limit. Congress must

face these imperative calls and provide the funds necessary to give adequate postal facilities everywhere.

These cities need help and their need is imperative. They have struggled along with buildings outgrown in capacity 10 years ago. Existing industries have expanded many times, doubling and trebling their pay rolls and employees. Banks have expanded, stores have grown, schools have multiplied, transportation facilities have increased; in fact, every facility of a growing city has increased but one, namely, its postal facilities.

Yet it is true, Mr. Chairman, that in these cities we have added a few more carriers to the force, and in some instances have altered buildings so as to make more room, but, as I stated a moment ago, the limit then has been reached—was reached, indeed, five years ago. To add more carriers will not solve—will almost increase the difficulty of the situation. The remedy is more room, either by an addition of sufficient size or new buildings. I repeat, the question has gone beyond a question of economy; it is a situation that demands relief. The demand is imperative, insistent, and just. Congress must meet it, and to delay is not economy or justice to these great cities and their commercial and industrial interests.

The Clerk read as follows:

For pay of rural carriers, substitutes for rural carriers on annual and sick leave, clerks in charge of rural stations, and tolls and ferrage, Rural Delivery Service, and for the incidental expenses thereof, \$88,350,000.

Mr. BUSBY. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Mississippi offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BUSBY: Page 63, line 7, after the word "thereof," strike out "\$88,350,000," and insert in lieu thereof "\$89,250,000."

Mr. BUSBY. Mr. Chairman and gentlemen of the committee, this amendment that I have offered seeks to restore this particular item to the same amount that was carried in the bill last year.

You will remember that the House recommitted and instructed the Committee on Appropriations to put in an additional million dollars. I want to call your attention, as I started to do yesterday when my time expired, to the fact of that having been done last year. For the 10-year period the average number of routes put in operation per annum was 160, but we found last year 1,302 extensions of routes that had been approved hanging over down at the Post Office Department. We found 496 inspected and approved rural routes that were hanging over because we had not furnished them enough money to put them into operation.

Now, this last year, according to the Fourth Assistant Postmaster General, Mr. Billany, he put into operation 525 routes and expended \$275,000 in addition thereto for extensions. Get that figure, gentlemen—\$275,000 for extensions. The bill that is before the House just now provides only \$350,000 for extension service and for new routes. If every cent of that were spent—and it all can not be spent by the department, because they are bound to maintain a margin to operate on—but if it were all expended at the average cost of \$1,900 per route, only 165 routes could be put into operation. The Fourth Assistant Postmaster General testified that there is now, after he puts into operation 100 more routes that he expects to put into operation, a situation where 423 routes will be carried over to 1926 without any additional routes being approved hereafter, and you gentlemen who represent sections of the country that need mail service, especially in the western section of the country, where the development and opening up of the sections you represent depend upon reasonable mail facilities, can easily see why it is necessary to have this work extended and the service given to the people, especially where it is proper and where it has been inspected and approved by the department. Is it not much better to put this service on and give your people the benefit of this mail service than to let these routes lie approved in the hands of the Fourth Assistant Postmaster General and he not be able to do a thing because we have not furnished the money?

I called your attention yesterday to a letter received from him, where he says it is impossible for him to put on and carry these routes over 1926 because he has not been given the money in the estimates. Let us see why he can not carry these routes. They have what they call fixed charges—that is, so many routes at such and such a cost per employee come to so many dollars. That is a fixed charge. In the appropriation bill for 1925, the one that the Post Office Department is now operating under, the fixed charge was \$82,965,000; but the

fixed charge in this bill, although we have 525 additional routes to carry through 1926, is \$82,779,000, or \$186,000 less than we provided last year, although we have enough additional routes on to make an expenditure of \$900,000 more than we had last year.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. BUSBY. Mr. Chairman, I ask for five additional minutes.

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent to proceed for five additional minutes. Is there objection?

There was no objection.

Mr. BUSBY. I shall not take up all that time. I just want to answer the question of the gentleman from Illinois [Mr. MADDEN], the chairman of the committee, propounded on yesterday about the time my time expired. He called attention to the fact that although the estimate made by the Budget Bureau was for \$100,000 for putting into operation new work, they gave an additional \$150,000. I find that the exact amount given is \$350,000 for extension and for new service as against \$1,750,000 for this year, a falling off of \$1,400,000, which means an absolute curtailment of putting into operation any of the new projects or giving the new service that we are bound to have if we have adequate service in some sections of the country.

I offer this amendment to raise the amount back to what we carried in the last Post Office appropriation bill. If it is not needed, it certainly will not be expended and will not be wasted. I hope the committee will incorporate this amendment into the bill. [Applause.]

Mr. MADDEN. Mr. Chairman, the gentleman from Mississippi is always very industrious, and intelligently industrious. I commend him for his industry and for his intelligence. He has made a study of this problem. He is a new Member of Congress. He deserves every credit for the work he has done for delving into a problem that requires a lot of work.

But last year the gentleman said, I think, that if we did not appropriate the \$1,000,000 which he proposed there would be no extension of rural routes. I do not pretend to quote him, and I do not want to make any misstatement. If I should make one I would be glad to be corrected. The House in its wisdom agreed with him and disagreed with the committee, showing that they had great confidence in him and very little confidence in us. [Laughter.]

Mr. BUSBY. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. Yes, indeed.

Mr. BUSBY. Does not the gentleman suppose that that grew out of past experience in trying to get rural routes established?

Mr. MADDEN. No. I think most of the Members thought they were increasing the pay of rural carriers. [Laughter.]

I think that, because a number came to see me in order to find out whether this had anything to do with increasing the pay of rural carriers. Well, we put the \$1,000,000 in the bill, and they did get all or nearly all the new routes established which the gentleman hoped for. If I am wrong, the gentleman will correct me.

Mr. BUSBY. If the gentleman will yield further, I call attention to the fact that the hearings disclose that \$275,000 was spent for extensions of routes, that 525 routes were put into operation, and that the average cost per route is \$1,830, which would make \$997,500, or a total of \$1,272,500, as against \$750,000 as provided in the bill, which shows that a part of that \$1,000,000 was needed.

Mr. MADDEN. Well, I want to show where the gentleman's mathematics were wrong, and I will try to do it. He said we could not get any routes unless we had a new \$1,000,000. Well, the House agreed with him. I think they did not quite understand the question, and I have explained why I think they did not understand it. We did get the routes. He admits that, and he admits that the routes we did get, with the extensions, amounted to a little more than \$1,000,000. Is that right?

Mr. BUSBY. About one million and a quarter, or a little better.

Mr. MADDEN. A little over \$1,000,000. Now, I maintained then that we could get these routes without adding the \$1,000,000 to the bill, and I think I shall be able to prove I was right. In the first place, they have not used the \$1,000,000 that was put in the bill, but they did give the routes, and they now say to us that at the end of this fiscal year they will have \$1,435,000 left in this fund which will not be used, all of

which goes to prove that the \$1,000,000 then put in was not needed.

Mr. BUSBY. Will the gentleman yield again?

Mr. MADDEN. Yes.

Mr. BUSBY. Will the gentleman please explain this paragraph in the letter written by the Fourth Assistant Postmaster General?

Mr. MADDEN. I would not pretend to explain what somebody else writes. Do not put that job up to me.

Mr. BUSBY. This comes from the Fourth Assistant Postmaster General.

Mr. MADDEN. I would not undertake that, but I will tell what the figures are. I would not pretend to do that, because it might be difficult for the Fourth Assistant Postmaster General to explain it himself.

Mr. BUSBY. Then I will ask this: Is it not a fact that they are always required to keep a substantial margin in those funds above the amounts authorized for emergency cases?

Mr. MADDEN. Well, I do not know what is required. I do not interpret the laws and I do not administer them. We provide what we think is the proper amount.

Mr. BUSBY. Just this other question.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. MADDEN. Mr. Chairman, I ask for two or three minutes more in order to answer the gentleman's question.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to proceed for three additional minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. BUSBY. Is it not a fact that \$300,000 of the \$1,000,000 authorized in the last appropriation bill went into the preceding year to take care of pending routes they could not establish?

Mr. MADDEN. We made \$300,000 immediately available, yes.

Mr. BUSBY. And that does not count on this year?

Mr. MADDEN. And they did get the routes. They got the \$1,000,000, but they did not use it, for they have \$1,435,000 left, or will have at the end of the fiscal year, and they have the routes. Now, they only asked us for \$88,200,000, and they say they can not use more than \$88,350,000 successfully, and we have given them \$88,350,000. I think we have met the needs of the service and I think we ought not to compel the President of the United States to take more money than he wants.

I ask for a vote, and I hope the amendment offered by the gentleman from Mississippi will not prevail.

Mr. HUDSPETH. Will the gentleman yield before he takes his seat?

Mr. MADDEN. Yes.

Mr. HUDSPETH. Do I understand the gentleman to make the statement that they have sufficient funds for the creation of all necessary rural routes in the future that they may be called upon to create?

Mr. MADDEN. That is what they said; that if they got \$150,000 more than was recommended they would have an adequate sum, and we gave them that additional amount.

Mr. HUDSPETH. Who made that statement?

Mr. MADDEN. The Fourth Assistant Postmaster General.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Mississippi.

The question was taken; and on a division (demanded by Mr. BUSBY) there were—ayes 13, noes 34.

So the amendment was rejected.

The Clerk completed the reading of the bill.

Mr. MADDEN. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with the amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. TILSON, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee having had under consideration the bill (H. R. 10982) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1926, and for other purposes, had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. MADDEN. Mr. Speaker, I move the previous question on the bill and all amendments thereto to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put the amendments in gross.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be read a third time, and was read the third time.

Mr. BUSBY. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. The gentleman from Mississippi offers a motion to recommit, which the Clerk will report.

The Clerk read as follows:

Mr. Busby moves to recommit the bill to the Committee on Appropriations with instructions to that committee to report the same back forthwith with the following amendment:

"On page 63, line 7, after the word 'thereof,' strike out the figures '\$88,350,000' and insert in lieu thereof '\$89,250,000.'"

Mr. BUSBY. Mr. Speaker, I move the previous question on the motion to recommit.

The previous question was ordered.

The SPEAKER. The question is on the motion to recommit. The question was taken; and on a division (demanded by Mr. BUSBY) there were—ayes 14, noes 47.

Mr. BUSBY. Mr. Speaker, I object to the vote, on the ground that no quorum is present, and I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Mississippi makes the point of order that no quorum is present. It is clear there is no quorum present. The Doorkeeper will close the doors, the Sergeant at Arms will bring in absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 69, nays 147, answered "present" 1, not voting 215, as follows:

 Mr. Mills with Mr. Connery.
 Mr. Free with Mr. Crosser.
 Mr. Clarke of New York with Mr. Doyle.
 Mr. Anthony with Mr. Wright.
 Mr. Haugen with Mr. Peery.

Mr. Kless with Mr. Salmon.
 Mr. Bixler with Mr. Griffin.
 Mr. Anderson with Mr. Boylan.
 Mr. Erum with Mr. Taylor of Colorado.
 Mr. Fitzgerald with Mr. Deal.
 Mr. Kelly with Mr. McClintic.
 Mr. Brand of Ohio with Mr. Johnson of Texas.
 Mr. Thompson with Mr. Willson of Indiana.
 Mr. Stalker with Mr. Cullen.
 Mr. Winslow with Mr. Lilly.
 Mr. Sanders of Indiana with Mr. Davey.
 Mr. Reed of West Virginia with Mr. Hawes.
 Mr. Porter with Mr. Lea of California.
 Mr. Perlman with Mr. Jost.
 Mr. Moore of Ohio with Mr. McDuffie.
 Mr. Sanders of New York with Mr. Fulbright.
 Mr. Christopherson with Mr. Mead.
 Mr. McLaughlin of Nebraska with Mr. Prall.
 Mr. Holaday with Mr. McSwain.
 Mr. Merritt with Mr. O'Connell of New York.
 Mr. Ramseyer with Mr. Buckley.
 Mr. Scott with Mr. Oliver of Alabama.
 Mr. Johnson of Washington with Mr. Minahan.
 Mr. Leach with Mr. Lyon.
 Mr. McKensie with Mr. Logan.
 Mr. Rogers of Massachusetts with Mr. Oliver of New York.
 Mr. Fredericks with Mr. Reed of Arkansas.
 Mr. McLeod with Mr. Shallenberger.
 Mr. Robison of Kentucky with Mr. Collins.
 Mr. Dempsey with Mr. Stevenson.
 Mr. Roach with Mr. Goldsborough.
 Mr. Snell with Mr. Spearing.
 Mr. Gifford with Mr. Corning.
 Mr. Reed of New York with Mr. McSweeney.
 Mr. Sweet with Mr. Steagall.
 Mr. Rosenbloom with Mr. Milligan.
 Mr. Schall with Mr. Lanford.
 Mr. Phillips with Mr. Johnson of Kentucky.
 Mr. Nolan with Mr. Martin.
 Mr. Peavey with Mr. Hull of Tennessee.
 Mr. Miller of Illinois with Mr. Evans of Montana.
 Mr. Stephens with Mr. Hill of Alabama.
 Mr. Fish with Mr. Byrnes of South Carolina.

Mr. JOHNSON of South Dakota. Mr. Speaker, on this roll call I voted "nay." I have a pair with the gentleman from Nebraska, Mr. Howann. If he were present, he would vote "yea." Therefore I withdraw my vote and answer "present."

The result of the vote was announced as above recorded.

The doors were opened.

The SPEAKER. The question is on the passage of the bill.

The question was taken, and the bill was passed.

On motion of Mr. MADDEN, a motion to reconsider the vote by which the bill was passed was laid on the table.

PROPOSED NATIONAL BOARD OF PUBLIC WORKS

Mr. THOMAS of Oklahoma. Mr. Speaker, I ask unanimous consent to extend my remarks in the Record on a bill that I have introduced, H. R. 11064, an act creating a national board of public works.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. THOMAS of Oklahoma. Mr. Speaker, I have just introduced in the House H. R. 11064, same being a bill to be entitled "An act creating a national board of public works, defining the duties thereof, and for other purposes," which bill proposes the creation of such board to consist of three members, not more than two of whom shall be members of the same political party, and each member of the board shall be experienced in public affairs.

The members of the board shall be appointed by the President, by and with the advice and consent of the Senate.

The members shall serve for six-year terms save of those first appointed; the President shall designate one of the members to serve for two years, one to serve for four years, and one to serve for six years.

The members shall give bond and shall be subject to removal by the President.

The members shall not engage in any other business during the time of their service on the board.

Section 4 of the bill provides—

Said board shall have charge of the architecture, engineering, construction, repair, and maintenance of all buildings and works built or occupied by or on behalf of the Government; it shall have authority to purchase all material and perform all other duties necessary in the construction, repair, and maintenance of all such buildings and works.

Section 11 of the bill provides—

That said national board of public works shall have authority—when there is a surplus of supplies, equipment, tools, or machinery in one department and the same is not necessary for said department and would be necessary for another or additional department of government—then said board shall have authority to transfer said supplies, equipment, tools, or machinery to said department in need of the same.

Section 12 of the bill provides that—

The said national board of public works shall assume jurisdiction of buildings and works already under construction and shall proceed with the construction of new buildings and works only upon orders of the President, and the activities of such board shall at all times be subject to the order of the President.

The operations of the Government in the construction of public buildings and public works are so widely scattered that the time seems near when such operations must be centered in one governmental agency.

The Secretary of the Interior in his annual report for the fiscal year 1924 recommends the creation of a bureau of public works. His recommendations are found on page 11 of his report and are as follows:

Government responsibilities in construction, now scattered through the different Federal departments, have reached such magnitude that they need to be organized and coordinated. This should be accomplished by bringing them together under a single control through the creation of a bureau of public works, constituted under the Department of the Interior.

The establishment of such a bureau would create a coordinated governmental industrial organization, efficient and economical in times of peace, ready in time of war or emergency to bring instantly into action the whole unified engineering and public works functions of the Government.

It would render even more efficient the present Budget system, with standardized and simplified specifications and contract forms, coordinated estimates, and unified control of governmental construction activities.

It would enable the governmental service to attract and hold the highest type of technically trained men by offering more permanent and attractive work and ample scope for the exercise of technical and administrative ability.

The personnel for such a technical bureau could readily be assembled from the different departments of the Government to create this essential instrument of administration.

The detail business of the Government is handled by the various Cabinet departments, and at present a number of such departments have organized special construction bureaus to have charge of public buildings and public works under their immediate supervision.

These 10 national departments are as follows:

Department of State, Department of the Treasury, Department of War, Department of Justice, Post Office Department, Department of the Navy, Department of the Interior, Department of Agriculture, Department of Commerce, and Department of Labor.

The Treasury Department maintains a Coast Guard Bureau, a bureau known as "Supervising Architect," and also has a "Bureau of Supply," and a "General Supply Committee."

The Department of War maintains a bureau known as the "Office of the Chief of Engineers." Under this bureau we have subdivisions as follows:

- a. Board of Engineers for Rivers and Harbors.
- b. Office of Public Buildings and Grounds.
- c. United States Engineer Office.
- d. Mississippi River Commission.
- e. California Debris Commission.

The Department of the Navy maintains bureaus as follows:

- a. Bureau of Construction and Repairs.
- b. Bureau of Engineering.

The Department of the Interior maintains bureaus which supervise vast construction works such as the Bureau of Reclamation and the Alaskan Railroad.

The Department of Commerce maintains Bureau of Lighthouses and the Department of Agriculture has control of all moneys appropriated for road construction.

In addition to the 10 major departments of State, we have numerous secondary departments to be considered, as the United States Shipping Board, Emergency Fleet Corporation, the United States Veterans' Bureau, which is at present constructing numerous hospitals throughout the country for the relief of the ex-service men.

It is not the purpose of the bill to take over and assume jurisdiction of each of the departments, bureaus, and commissions just mentioned, but only such of them and such work as may be ordered by the President.

The real purpose of the bill is that of economy; economy to be secured through one board instead of many; elimination of duplication in overhead expenses; the saving of equipment and materials, and saving in making purchases of supplies—all to be accomplished by starting and developing a new and separate board independent of all Cabinet departments, bureaus, and commissions, and subject only to the order of the

President. The work of this board should perhaps first start in a small way and thereafter be developed so as eventually to have supervision of such construction activities of the Government as may be found to be efficient and to the best interests of the public service.

THE UNITED STATES COAST GUARD AND THE ENFORCEMENT OF THE EIGHTEENTH AMENDMENT

Mr. HUDSON. Mr. Speaker, under leave to extend my remarks in the Record, given to-day, it is my desire to call the attention of the House more especially to the work of the Coast Guard in relation to the suppression of smuggling along our coast line and thus greatly aiding in the enforcement of the eighteenth amendment.

President Coolidge in his first message to this Congress said:

The prohibition amendment to the Constitution requires the Congress and the President to provide adequate laws to prevent its violation. It is my duty to enforce such laws. For that purpose a treaty is being negotiated with Great Britain with respect to the right of search of hovering vessels. To prevent smuggling the Coast Guard should be greatly strengthened and a supply of swift power boats should be provided. The major sources of production should be rigidly regulated and every effort should be made to suppress interstate traffic. With this action on the part of the National Government and the cooperation which is usually rendered by municipal and State authorities prohibition should be made effective. Free government has no greater menace than disrespect for authority and continual violation of law. It is the duty of a citizen not only to observe the law but to let it be known that he is opposed to its violation.

Carrying out the recommendation of the President, Congress accordingly in the appropriation bill for 1925 carried an item of \$12,194,900 in the allotment for the work of the Coast Guard. That item was for the building and reconditioning of certain types of boats for the further strengthening of the Coast Guard. This program meant the reconditioning of 20 destroyers and 2 mine sweepers laid up for a number of years in the navy yard. These boats were not to be constructed; they simply required reconditioning for the service of the Coast Guard. It also called for the construction of 223 cabin cruiser type of motor boats and 100 picket boats. This enlargement of the fleet of the Coast Guard, authorized at the last session of Congress, Mr. Speaker, has gone forward with dispatch under the able direction of Rear Admiral Billard and his splendid corps of officers, and we are told by the rear admiral that all of the above boats will be in operation with a full personnel by July 1, 1925.

The Coast Guard is one of the oldest organizations under the Federal Government. It was created under an act of the First Congress and approved by President Washington on August 4, 1790. For nearly a century and a half it has had a most honorable and distinguished record of service. The work and service of the Coast Guard for the Nation in time of peace is of a varied character, but always for the peace, the protection, the safety, and the defense of the Nation and the enforcement of its laws.

From the date of its organization, Mr. Speaker, one of the duties of the Coast Guard, may I say the original duty, was the enforcement of laws—the customs laws, the prevention, if you please, of smuggling into the United States from the sea. In the early days there was much of this smuggling, and the vessels of the guard were very actively engaged in the apprehending of the fast sailing craft that stole into the bays and inlets along our coast line in an effort to land contraband goods.

In the early part of the nineteenth century the service of the Coast Guard waged unrelenting warfare on the pirates that infested the Caribbean Sea and the Gulf of Mexico. And, gentlemen of the House, they stamped out these depredations.

To-day we are faced with another condition of smuggling and piracy that makes the stories of the nineteenth century fade into insignificance. Great fleets of vessels carrying thousands upon thousands of dollars' worth of rum stand off the shore at various points along the Atlantic coast and in a lesser degree the Pacific coast. These are mostly of foreign register. Their crews and owners are of the most reckless and lawless character. This traffic constitutes a grave menace to the peace, health, and prosperity of our country. The difficulties encountered in stopping this traffic are enormous, but not insurmountable. The service is throwing itself with energy and steadily increasing success into meeting this serious situation.

I quote from the hearing on this bill on page 211:

Admiral BILLARD. The Coast Guard is making more seizures and accomplishing more to-day than ever before.

Mr. VARE. It ought greatly to lessen the general violation of law throughout the country.

Admiral BILLARD. It will certainly lessen the smuggling by sea.

Mr. THATCHER. When you get the fleet in action do you expect a very marked cessation among the smugglers?

Admiral BILLARD. We very confidently look for that.

I quote further from Admiral Billard in his article on "The United States Coast Guard. Its task in enforcing the eighteenth amendment":

The Coast Guard is under no misapprehension as to the magnitude of the job it has to do. Its officers are entirely familiar with the difficulties that confront them. They know the great extent of our coast lines, with their innumerable harbors of refuge for fleeing rum runners and of the vast number of speedy launches that swarm around the rum fleets lying off our coasts.

The Coast Guard officers know that their service has had imposed upon it a tremendous task, more arduous and more difficult than ever before assigned to a seagoing force in time of peace. But they, and the enlisted men under them, are undertaking this big job energetically, efficiently, and zealously. Why? Because they look upon the whole matter as something in the line of duty.

The Coast Guard is in this fight to uphold the honor and dignity of the Constitution of the United States as it has done since 1790.

Through its long history the Coast Guard has never yet failed in any task assigned it. It now faces the greatest and most trying task in its long history, but officers and men, with one accord, are going into this fight to uphold the Constitution with a splendid determination to give the best that is in them.

This splendid spirit and determination ought to be contagious and it might well be emulated by every branch of the Federal Government to the end that defiance of the Constitution of the United States may end.

The appropriation which this bill carries for the maintenance of the enlarged fleet of the service amounts to nine and a half millions of dollars. It surely is amply justified.

The action of the Department of State in securing anti-smuggling treaties with other nations is most wholesome and effective at this time, when we consider them in connection with the anti-smuggling work of our Coast Guard Service. Following is the list of treaties concluded between the United States and foreign countries for the prevention of the smuggling of intoxicating liquors. These treaties fall into two classes, namely (1), those which have been proclaimed, and (2) those which have been signed and no further action taken with respect thereto:

Country	Signed, 1924	Senate consent, 1924	Pro- claimed, 1924
Great Britain.....	Jan. 23	Mar. 13	May 22
Norway.....	May 24	May 31	July 2
Germany.....	May 19	May 26	Aug. 11
Sweden.....	May 22	May 26	Aug. 19
Denmark.....	May 29	June 3	July 25
Italy.....	June 3	June 4	Oct. 25

CLASS II

Panama, June 6, 1924; Netherlands, June 30, 1924; France, August 21, 1924.

On June 6, 1924, the Department of State announced that a convention was signed on that date by the United States and Canada for the suppression of smuggling operations across the international boundary, the prosecution of persons violating the narcotic laws of either Government, and for kindred purposes. It provided that each Government should furnish information upon request to the appropriate officer of the other concerning clearances of vessels or the transportation of cargoes, shipments, or loads of articles across the international boundary when the importation of the articles transported by land is subject to the payment of duties; also information respecting clearances of vessels to any ports when there is ground to suspect that the owners or persons in possession of the cargo intend to smuggle it into American or Canadian territory. Clearances are to be denied to vessels carrying cargo consisting of articles the importation of which is forbidden by either country when it is evident from tonnage, size, or general character of the vessel, or the length of the voyage, or certain other conditions, that the vessel will be unable to carry the cargo to the destination proposed in the application for clearance.

Mr. Speaker, a new day of law enforcement and observance of all laws is before us. The increasing benefits of a sober manhood and a temperate Nation are so manifest that each succeed-

ing year will see an increasing host who will hail the writing of the eighteenth amendment into the Constitution of our Nation as the greatest act of any people anywhere on the face of the earth.

The testimony now being written by manufacturers, business leaders of every kind, physicians, nurses, and social workers as to the improvement in the condition of the population at large which has taken place since the adoption of the eighteenth amendment is so potent that it will soon convince the doubting Thomases of our population. Enforcement is constantly improving and complete enforcement will follow with better trained and reliable enforcement officers, coupled with the conviction that is rapidly growing in the hearts and minds of the people, both foreign and native born, that complete disuse of alcoholic drinks will result in enormous benefits to any people which accomplishes it.

Let us strengthen every department of the Government that law may be honored and observed and the fabric of our national life be the stronger and the purer.

Mr. Speaker, I want to close my remarks by quoting the happy New Year message of Dr. W. B. Wheeler:

Uncle Sam starts on his fifth year water-wagon journey happy, prosperous, and hopeful. Each month he earns seven billions, saves a billion, pays premiums on a billion dollars' worth of new insurance, gives in charity \$25,000,000 at home and \$4,000,000 in philanthropic gifts to wet Europe, and carries in his pocketbook, unbanked, over \$400,000,000. Meanwhile \$3,000,000 of the public debt are paid each working-day.

Uncle Sam's garage stores 15,552,077 automobiles, seven-eighths of the world's total. He daily spends over a million dollars on the movies, another million on the radio, another million on outdoor sports. He has cut over half a million from the yearly arrests for drunkenness, reduced his penitentiary population by 5,000 in the last year, closed the doors of many jails once crowded, decreased alcoholic insanity by two-thirds, and lowered his almshouse ratio from 91 per 100,000 to 71, the smallest in our history. Only one drink cure survives for each 10 that prospered under license. He has increased longevity three years per person. He erected homes for 295,193 families during the first six months of the past year. His industrial accidents are 250,000 fewer per year than when beer made men clumsy.

Uncle Sam has 14,346,701 telephones. Few of his children are poor. He saves \$74,000,000 per year once spent to relieve drink-caused poverty. Instead of beer he buys bonds, until one in five are security holders. Private buyers alone hold over \$4,000,000,000 in foreign bonds, besides the enormous issues of domestic, industrial, and public securities.

Over 25,000,000 of his boys and girls are in school. Daily over 3,000 new members join his churches, which spent \$250,000,000 in the past year for new buildings.

ORDER OF BUSINESS

Mr. LONGWORTH. Mr. Speaker, I ask unanimous consent that bills on the Private Calendar unobjected to may be in order on Friday.

The SPEAKER. The gentleman from Ohio asks unanimous consent that bills on the Private Calendar unobjected to may be in order on Friday.

Mr. BOX. That does not involve pending business?

Mr. LONGWORTH. That does not interfere with the vote on any bill where the previous question has been ordered.

Mr. BOX. The Oliver bill. Is there any other bill?

Mr. LONGWORTH. Only one bill.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

Mr. SEARS of Florida. Reserving the right to object—and I shall not object—the majority leader will recall that the day we recessed for the holidays he made some remarks, and I made a few remarks and stated that I hoped when we reconvened he could give us some definite idea as to when we could expect the rivers and harbors bill to be taken up for consideration. I do not know whether he is now able to give us the data, but I read in last night's paper that the bill possibly would not be reached until some time in February. Of course, the majority leader knows that if that is true, we might as well tell the country that there will be no rivers and harbors bill at this session.

Mr. CRAMTON. Does the gentleman think the country could stand that shock?

Mr. SEARS of Florida. The country withstood one shock last November, and it might stand a second shock; yes.

Mr. LONGWORTH. I will say to the gentleman from Florida that I have no further information at present than I had before.

Mr. SEARS of Florida. Can not the gentleman from Ohio assure us that it will be taken up soon? This is a vital question to many sections of the country, and the bill ought to be considered and passed at this session. We know that it could not pass the Senate if it did not go over there earlier than February.

Mr. LONGWORTH. I made this request because we finished the appropriation bill to-day in such a remarkably short time. I am informed by the chairman of the Committee on Appropriations that the Army bill will be ready to be taken up on Saturday and that leaves Friday an open day. Thereafter an urgent deficiency bill is ready, which will be taken up at the conclusion of the Army bill. I can give the gentleman from Florida no further assurance.

Mr. WINGO. It is now only 4 o'clock in the afternoon, what is the objection to taking up the rivers and harbors bill and passing it this afternoon? [Laughter.]

Mr. LONGWORTH. I believe the rule for its consideration has not been brought in.

Mr. SEARS of Florida. I do not believe in lobbying. I know the country is interested in this rivers and harbors bill, and, evidently from the answer of the gentleman from Ohio, the newspaper article is correct and we will not have a rivers and harbors bill at this session. Those who are interested in it—gentleman from Ohio and New York and Michigan—might get busy and perhaps assist in having the bill considered.

Mr. LaGUARDIA. May I ask the gentleman from Ohio if we will take up the unfinished business from the Committee on Claims on Friday morning?

Mr. LONGWORTH. If my request is granted, bills from the Committee on Claims unobjected to would be in order.

Mr. LaGUARDIA. And the unfinished business would be in order?

Mr. LONGWORTH. Yes.

Mr. BOX. The gentleman from Ohio knows the interest in the Oliver bill. The gentleman is going to insist on there being a quorum, and unless the gentleman is assured that a quorum is here—

Mr. LONGWORTH. "The gentleman from Ohio" can not be assured of a quorum. There are more than 150 bills on the calendar, and if there is not sufficient interest for Members to be here I shall make a motion to adjourn.

Mr. GARNER of Texas. The request of the gentleman from Ohio is to consider bills on the Private Calendar unobjected to. By unanimous consent you can set an order aside, and it might be as well to consider the Oliver bill at some other time.

Mr. LONGWORTH. I do not believe that could be done, because the Chair ruled that when the previous question was ordered it was in order on the next day on which the Private Calendar was considered.

Mr. GARNER of Texas. But the gentleman will remember that this is unanimous consent. We could have unanimous consent not to vote on it, regardless of the rules, at this session. So if the gentleman wants to consider bills on the Private Calendar unobjected to, regardless of the question of a quorum, he could make a request for unanimous consent not to vote on the Oliver proposition.

Mr. LONGWORTH. I am not making this request on my own motion. I do not think that would be a proper request to make at this time. Certainly it is true, under the ruling of the Chair, that whenever a claims day comes, and no preferential motion is made, the first business in order would be the final vote on the Oliver bill.

Mr. GARNER of Texas. Yes; but the gentleman is asking unanimous consent now, and he can ask unanimous consent in such a form that the Oliver proposition could not be considered next Friday. The query is whether the gentleman desires to make that request.

Mr. LONGWORTH. I do not think I care to make that request.

Mr. GARNER of Texas. In other words, the gentleman wants it considered next Friday?

Mr. LONGWORTH. Personally, I do not care whether it is considered or not; but that is the orderly way to dispatch business.

Mr. GARNER of Texas. But why take the chance of no quorum being present?

Mr. LONGWORTH. But I am not taking any chances. There are 150 private bills on the calendar. If my request is not granted, those bills can not be considered, and if gentlemen have not enough interest to be here, well and good.

Mr. GARNER of Texas. I want to see the bills considered. I was only trying to point out a way whereby you could avoid the question of a quorum on Friday, because the gentleman, my

colleague from Texas [Mr. Box], has notified the gentleman from Ohio that he must have a quorum present if he is to vote on the Oliver bill.

Mr. BEGG. Has the gentleman from Texas consulted his colleague from Texas who usually makes the point of no quorum?

Mr. GARNER of Texas. My colleague, Mr. Box, has just said that we must have a quorum at that time.

Mr. BEGG. He is not the gentleman from Texas to whom I refer.

Mr. WINGO. What is the objection to passing it over until some other day?

Mr. LONGWORTH. But I have not made that request.

Mr. WINGO. Why not make it?

Mr. LONGWORTH. If gentlemen are going to be captious about the matter, I shall withdraw the request. I am asking this at the request of a number of gentlemen. I have no personal interest one way or the other, whether it be agreed to or not. I have made the request.

Mr. WINGO. But the gentleman misunderstands my suggestion. I am not going to object. I am going to be here. Some of the gentlemen are not going to be here, and perhaps we will not have a quorum. It occurred to me that it would be avoiding the captious to simply agree that we will consider unobjected bills on that day, and then, after the new year, when we come around automatically to the regular claims day, we could take up the Oliver bill. I think that would be showing consideration for those who want to consider bills on the Private Calendar.

Mr. LONGWORTH. But I am showing consideration. However, there are certain gentlemen who want to vote on the Oliver bill, and I am willing to take the chance of a quorum being present.

Mr. BOX. Mr. Speaker, certain gentlemen who want to vote on the Oliver bill have requested that it be not considered in their absence, and they can not well be here. They so advised me. I am not disposed to embarrass the business of the House, but I do believe that a bill of such importance ought to be considered by something like a full House. The gentleman from Ohio is managing the business of the House, of course, in his own way, but I would be glad if he could so modify his request as to make it include other business on the Private Calendar, and then let that business be considered on another day.

Mr. LONGWORTH. In the circumstances I should not feel justified in making that request myself, though I shall not object if the gentleman from Texas makes it.

Mr. BYRNS of Tennessee. Mr. Speaker, there are one or two gentlemen whom I know are very anxious to have the Oliver bill voted on. That bill has been pending here for two or three years. It has now reached a point where it can be voted on. Although I have no interest in it myself, I expect to vote for the bill. I would not be willing to consent that any action be taken by the House which would displace that bill on the calendar and possibly throw it over so that it could not be considered at this session.

Mr. BOX. Mr. Speaker, I object to the request.

Mr. BYRNS of Tennessee. Especially in the absence of the gentleman from Tennessee [Mr. TAYLOR].

The SPEAKER. The gentleman from Texas [Mr. Box] objects to the request of the gentleman from Ohio.

Mr. BOX. I object with the understanding that a vote on the Oliver bill is going to be insisted upon. I would be glad to see the calendar considered if the request could be so modified that the vote on the Oliver bill be not taken.

The SPEAKER. That bill will be in order whether the request is made or not.

Mr. WINGO. Mr. Speaker, a parliamentary inquiry. That is the order under the general rules of the House, but if the House to-day by unanimous consent agreed that it will consider only certain bills, which excludes the Oliver bill, would not that be permissible, and it would not destroy the privileged status of the Oliver bill, would it? If the House did not take any further action by unanimous consent, then on the next Friday that the Private Calendar is in order the vote would come on the Oliver bill.

The SPEAKER. Certainly; but the gentleman from Texas intimated that this request was to make the Oliver bill in order. The Chair wished to set that right.

Mr. LONGWORTH. The Oliver bill is in order on Friday.

Mr. WINGO. I think possibly the Chair has a different conception of it. I gathered from the last statement of the Chair that the request of the gentleman in its present form is really what the gentleman from Texas wanted—not to vote on the bill Friday, but to consider other bills unobjected to.

The SPEAKER. The gentleman from Ohio has not made that request.

Mr. LONGWORTH. Let me call the attention of the gentleman to the fact that it would be impossible to secure unanimous consent that the Oliver bill should not be considered.

Mr. WINGO. If the gentleman is confronted with that situation, I appreciate the difficulty.

Mr. GARNER of Texas. If I understand the parliamentary situation, it is this: If the request be objected to, then on Friday automatically the Oliver bill will come before the House for a vote?

The SPEAKER. Certainly.

Mr. GARNER of Texas. And then we would not have an opportunity to consider bills on the calendar unobjected to?

The SPEAKER. That is correct.

Mr. GARNER of Texas. So that nothing would be gained by an objection.

Mr. BOX. Mr. Speaker, I withdraw my objection, reserving the right to object further. I understood that this business was not to be considered last week or this week. I understood, perhaps misunderstanding the statement of the gentleman from Ohio, that that business would not be considered this week.

Mr. LONGWORTH. I did not anticipate it would. It is the remarkable dispatch of the public business by the House that has made it possible. In fact, it has made it necessary. Let me call the attention of the gentleman to the fact that we have to-day passed the necessary bills appropriating for all of the functions of five great departments of the Government, which is a record-breaking performance, so far as I know.

That is very good. Friday we find to be the day upon which we expected to pass the bill referred to, and we find that there is now a Friday upon which claims are in order.

Mr. BOX. The gentleman from Ohio is to be congratulated on his good management and on the good support he has had on both sides of the House.

Mr. LONGWORTH. And on the gentleman's cooperation.

Mr. BOX. The gentleman from Texas does not want to be an obstructionist. The gentleman from Tennessee [Mr. GARRETT] had the assurance that this bill would not be taken up. The gentleman from Texas, I say, does not want to obstruct the public business, and while he feels that this situation ought not to have occurred in this way he withdraws his objection, not desiring needlessly to obstruct the public business.

Mr. SWING. Mr. Speaker, reserving the right to object—though I shall not object—we had up a short time back, the first time, I recall, a bill from the Committee on Claims. It was the first time, I remember. Will there be an opportunity to consider bills from other committees on the Private Claims Calendar under the general rules of the House?

Mr. LONGWORTH. I assume so. But the way to dispatch business on the Private Calendar is to do it by the process of elimination.

Mr. SWING. But it is unfair to many meritorious bills to have some one person set up his peculiar intelligence as the test of the merit of bills reported by committees that have given the measures careful consideration. Mr. Speaker, I withdraw my reservation of the right to object.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The SPEAKER. It is so ordered.

PRESIDENT'S MESSAGE—MAP OF THE WORLD

The SPEAKER laid before the House the following message from the President of the United States, which was read and, with the accompanying papers, referred to the Committee on Appropriations and ordered to be printed:

To the Congress of the United States:

I transmit herewith a report by the Secretary of State recommending a request to Congress to enact legislation providing for an appropriation of \$30 for the payment for the calendar year 1925 of a contribution by the United States toward the secretarial expenses of the Bureau for the International Map of the World.

The matter is fully explained in the report of the Secretary of State. In view of the importance which the Secretary of the Interior attaches to this bureau and its work, I trust that the small appropriation recommended will be granted.

CALVIN COOLIDGE.

THE WHITE HOUSE,
Washington, December 30, 1924.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. McDUFFIE (at the request of Mr. BANKHEAD), from December 29, indefinitely, on account of illness in his family.

To Mr. PATTERSON, for four days, on account of important business.

To Mr. LOWREY, for five days, on account of important business.

ADJOURNMENT

Mr. MADDEN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 10 minutes p. m.) the House adjourned until to-morrow, Wednesday, December 31, 1924, at 12 o'clock noon.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. ROACH: Committee on War Claims. H. R. 9471. A bill for the relief of Henry T. Hill; without amendment (Rept. No. 1068). Referred to the Committee of the Whole House.

Mr. WILLIAMS of Michigan: Committee on War Claims. H. R. 5236. A bill for the relief of Mrs. M. J. Adams; with an amendment (Rept. No. 1069). Referred to the Committee of the Whole House.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. CABLE: A bill (H. R. 11167) providing for the transmission by registered mail of the results of the votes cast by presidential electors for President and Vice President to the Secretary of State of the United States; to the Committee on Election of President, Vice President, and Representatives in Congress.

By Mr. DOMINICK: A bill (H. R. 11168) granting the consent of Congress to S. M. McAdams, of Iva, Anderson County, S. C., to construct a bridge across the Savannah River; to the Committee on Interstate and Foreign Commerce.

By Mr. REED of West Virginia: A bill (H. R. 11169) to amend, revise, and reenact subchapter 3, sections 546 and 547, of the Code of Law of the District of Columbia, relating to the recording of deeds of chattels; to the Committee on the District of Columbia.

Also, a bill (H. R. 11170) to amend, revise, and reenact section 549 of subchapter 4 of the Code of the District of Columbia, relating to the appointment of deputy recorder of deeds, and fixing the compensation therefor; to the Committee on the District of Columbia.

By Mr. WINTER: A bill (H. R. 11171) to provide for aided and directed settlement on Government land in irrigation projects; to the Committee on Irrigation and Reclamation.

By Mr. GRAHAM: A bill (H. R. 11172) providing for the temporary detail of commissioned officers and enlisted men of the Army, Navy, and Marine Corps, and for other purposes; to the Committee on the Judiciary.

By Mr. WILSON: A bill (H. R. 11173) providing for the extension and enlargement of the post office and court building at Monroe, La.; to the Committee on Public Buildings and Grounds.

By Mr. GRAHAM: A resolution (H. Res. 388) for the immediate consideration of House bill 8711, to authorize the consolidation and coordination of Government purchases, to enlarge the functions of the General Supply Committee, and for other purposes; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BECK: A bill (H. R. 11174) granting an increase of pension to Caroline Cox; to the Committee on Invalid Pensions.

By Mr. BELL: A bill (H. R. 11175) granting an increase of pension to William S. Kemp; to the Committee on Pensions.

Also, a bill (H. R. 11176) granting a pension to John H. Hubbard; to the Committee on Pensions.

By Mr. BROWNING: A bill (H. R. 11177) granting a pension to Georgia A. Godwin; to the Committee on Invalid Pensions.

By Mr. BULWINKLE: A bill (H. R. 11178) granting a pension to Burl A. Fry; to the Committee on Pensions.

Also, a bill (H. R. 11179) granting a pension to John A. Mulwee; to the Committee on Pensions.

By Mr. COLE of Ohio: A bill (H. R. 11180) granting a pension to Mary Walterhouse; to the Committee on Invalid Pensions.

By Mr. DENISON: A bill (H. R. 11181) granting an increase of pension to Frances Miller; to the Committee on Invalid Pensions.

By Mr. FAUST: A bill (H. R. 11182) for the relief of Theodore W. Goldin; to the Committee on Military Affairs.

By Mr. FISH: A bill (H. R. 11183) granting an increase of pension to Mary A. Corwin; to the Committee on Invalid Pensions.

By Mr. FULBRIGHT: A bill (H. R. 11184) granting an increase of pension to Martha Weston; to the Committee on Invalid Pensions.

By Mr. GIBSON: A bill (H. R. 11185) granting a pension to Nellie Mooney; to the Committee on Invalid Pensions.

By Mr. HUDDLESTON: A bill (H. R. 11186) granting a pension to William Lanier; to the Committee on Pensions.

By Mr. KENDALL: A bill (H. R. 11187) granting an increase of pension to Bert Walker; to the Committee on Pensions.

Also, a bill (H. R. 11188) granting a pension to Rachel Wood; to the Committee on Invalid Pensions.

By Mr. KOPP: A bill (H. R. 11189) granting a pension to Hannah L. Jennings; to the Committee on Invalid Pensions.

By Mr. LEA of California: A bill (H. R. 11190) granting an increase of pension to Elizabeth Siegler; to the Committee on Invalid Pensions.

By Mr. LINEBERGER: A bill (H. R. 11191) granting a pension to Ida M. Uline; to the Committee on Invalid Pensions.

By Mr. LUCE: A bill (H. R. 11192) granting a pension to Carrie E. Miett; to the Committee on Invalid Pensions.

By Mr. McLAUGHLIN of Michigan: A bill (H. R. 11193) to provide for the retirement of Clarence W. Sessions, judge of the District Court for the Western District of Michigan; to the Committee on the Judiciary.

By Mr. MOREHEAD: A bill (H. R. 11194) granting a pension to Mary Demaree; to the Committee on Invalid Pensions.

By Mr. O'BRIEN: A bill (H. R. 11195) granting a pension to Sarah Jane Hardy; to the Committee on Invalid Pensions.

By Mr. PARKER: A bill (H. R. 11196) granting a pension to Anna Wilson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11197) granting an increase of pension to Mary Anne Bain; to the Committee on Invalid Pensions.

By Mr. ROMJUE: A bill (H. R. 11198) granting an increase of pension to Matilda Hester; to the Committee on Invalid Pensions.

By Mr. SANDERS of New York: A bill (H. R. 11199) granting an increase of pension to Frederick Sholes; to the Committee on Pensions.

By Mr. STEPHENS: A bill (H. R. 11200) granting a pension to Elizabeth J. Waddell; to the Committee on Invalid Pensions.

By Mr. SWING: A bill (H. R. 11201) for the relief of Charles Satchuel Taylor; to the Committee on Naval Affairs.

By Mr. SWOPE: A bill (H. R. 11202) granting a pension to Priscilla Allison; to the Committee on Invalid Pensions.

By Mr. THOMAS of Kentucky: A bill (H. R. 11203) granting an increase of pension to Nancy E. Belk; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11204) granting an increase of pension to Lee Byrd; to the Committee on Pensions.

By Mr. TILSON: A bill (H. R. 11205) granting an increase of pension to Sarah A. Chadwick; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11206) to correct the military record of John T. O'Neil; to the Committee on Military Affairs.

By Mr. TREADWAY: A bill (H. R. 11207) granting an increase of pension to Ellen Manix; to the Committee on Invalid Pensions.

By Mr. WOOD: A bill (H. R. 11208) granting a pension to Lucinda Weaver; to the Committee on Invalid Pensions.

By Mr. WOODRUFF: A bill (H. R. 11209) granting a pension to Francis Forbes; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

3314. By Mr. LEE of Georgia: Petition of sundry citizens of Rome, Ga., protesting against the passage of the compulsory Sunday observance law (S. 3218); to the Committee on the District of Columbia.

3315. By Mr. LINDSAY (by request): Petition of the Religious Liberty Association, C. S. Longacre, general international secretary, of Takoma Park, Washington, D. C., with request that said petition be entered in the CONGRESSIONAL RECORD and then referred to the House Committee on the District of Columbia, which may ultimately have to consider the compulsory Sunday observance bill (S. 3218), against which the Religious Liberty Association is unalterably opposed; to the Committee on the District of Columbia.

3316. By Mr. MILLIGAN: Petition of sundry citizens of Gentry, Mo., protesting against the passage of the compulsory Sunday observance law (S. 3218); to the Committee on the District of Columbia.

3317. By Mr. O'CONNELL of New York: Petition of the Jamaica Women's Club, of Jamaica, Long Island, N. Y., favoring the postal salary increase bill (S. 1898); to the Committee on the Post Office and Post Roads.

3318. Also, petition of Fox Patrol of Troop No. 14, Boy Scouts of America, Woodhaven, Long Island, N. Y., favoring the postal salary increase bill (S. 1898); to the Committee on the Post Office and Post Roads.

3319. Also, petition of the Arthur McArthur Camp, United Spanish War Veterans, favoring House bill 5954, for a uniform and equal standard for rating of all United States war veterans; to the Committee on World War Veterans' Legislation.

HOUSE OF REPRESENTATIVES

WEDNESDAY, December 31, 1924

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Almighty God, our Heavenly Father, as we pause in Thy holy presence, we are reminded that we are standing on the very verge of the old year. We thank Thee that the life of God and the life of man have been united and that behind the scenes on earth there surges still Thy mercy which floods the world. In abiding memory help us to treasure the good, the beautiful, and the true. Thy amazing love, so immense and free, have been our comfort and our support. Soon we shall be in the doorway of the new year. For all that awaits us, give us knowledge with conviction, ability with self-control, and the deepest thought with the deepest feeling. May our imperative concern be to fear God, to love righteousness, and to build manhood. As our dear ones of the hearthstone turn the new leaf of the new book with gladness, may it be prophetic of a year full of joy, love, and happiness. The Lord bless our President and Heaven's choicest blessings fall upon our entire country. O Lord God, the years are forming and disappearing; the months are woven only to be unraveled. We are powerless to stay the day when we shall pass forever from the scenes we love. O help us to carry along with us the choicest thoughts and aspirations, and whisper Thy presence to us each passing day, through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

CALENDAR WEDNESDAY

The SPEAKER. This is Calendar Wednesday. The Clerk will call the roll of committees.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Craven, one of its clerks, announced that the Senate had passed with amendment bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 8235. An act for the relief of Aktieselskabet Marie di Giorgio, a Norwegian corporation of Christiania, Norway.

The message also announced that the Senate had passed without amendment bills of the following titles:

H. R. 162. An act to amend the act establishing the eastern judicial district of Oklahoma, to establish a term of the United States District Court for the Eastern Judicial District of Oklahoma at Pauls Valley, Okla.;

H. R. 644. An act providing for the holding of the United States district and circuit courts at Poteau, Okla.;

H. R. 704. An act to authorize the Court of Appeals for the First Circuit to hold sittings at San Juan, P. R.;

H. R. 914. An act granting six months' gratuity pay to Stausfield A. and Elizabeth G. Fuller;

H. R. 1078. An act for the relief of Fred E. Jones Dredging Co.;

H. R. 1082. An act for the relief of Henry A. Kessel Co. (Inc.);

H. R. 1333. An act for the relief of Joseph P. Ryan;

H. R. 1682. An act for the relief of the Stone Towing Line;

H. R. 2005. An act for the relief of William J. McGee;

H. R. 2335. An act for the relief of J. Jessop and sons;

H. R. 2373. An act for the relief of the Standard Oil Co., at Savannah, Ga.;

H. R. 2369. An act for the establishment of a United States industrial reformatory;

H. R. 2989. An act for the relief of Mrs. E. L. Guess;

H. R. 3046. An act for the relief of J. W. Cook;

H. R. 3388. An act to place the name of Paul Crum on the muster rolls of Company E, First Regiment Nebraska Infantry, United States Volunteers;

H. R. 3504. An act for the relief of Cornelia M. A. Tower;

H. R. 3595. An act for the relief of Fred W. Stickney and H. A. Reynolds;

H. R. 3511. An act to extend relief to the claimants in township 16 north, ranges 32 and 33 east, Montana meridian, Montana;

H. R. 3748. An act for the relief of Lebanon National Bank;

H. R. 4275. An act authorizing the Ponca Tribe of Indians residing in the States of Oklahoma and Nebraska to submit claims to the Court of Claims;

H. R. 4318. An act for the relief of Edward S. Schelbe;

H. R. 4432. An act for the relief of Orville Paul;

H. R. 4760. An act for the relief of the estate of C. M. Cole, of Butler County, Ky.;

H. R. 4818. An act to protect the title of purchasers of Indian lands sold under the provisions of the act of Congress of March 3, 1909 (35 Stat. L. p. 751), and the regulations pursuant thereto as applied to Indians of the Quapaw Agency;

H. R. 5425. An act to provide for the disposition of moneys paid to or received by any official as a bribe which may be used as evidence in any case growing out of any such transaction;

H. R. 5661. An act granting permission to Col. Harry F. Rethers, Quartermaster Corps, United States Army, to accept the gift of a Sevres statuette entitled "Le Courage Militaire," tendered by the President of the French Republic;

H. R. 6241. An act for the relief of Lieut. E. J. McAllister;

H. R. 6383. An act for the relief of the Maryland Casualty Co., the United States Fidelity & Guaranty Co., of Baltimore, Md., and the National Surety Co.;

H. R. 6384. An act for the relief of the Maryland Casualty Co., the Fidelity & Deposit Co. of Maryland, and the United States Fidelity & Guaranty Co., of Baltimore, Md.;

H. R. 6506. An act for the relief of John Baumen;

H. R. 6541. An act to amend an act entitled "An act to provide for the disposal of the unallotted lands on the Omaha Indian Reservation in the State of Nebraska";

H. R. 6817. An act to provide for the construction of a vessel for the Coast Guard;

H. R. 7077. An act to amend an act entitled "An act to amend an act entitled 'An act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1914,' approved June 30, 1913," approved May 26, 1920;

H. R. 7194. An act for the relief of Bertram Gardner, former collector of internal revenue for the first district of New York;

H. R. 7296. An act for the relief of John W. Dilks;

H. R. 7420. An act for the relief of Albert E. Laxton;

H. R. 7453. An act to amend an act approved March 3, 1909, entitled "An act for the removal of the restrictions on alienation of lands of allottees of the Quapaw Agency, Okla., and the sale of all tribal lands, school, agency, or other buildings on any of the reservations within the jurisdiction of such agency, and for other purposes";

H. R. 7522. An act to authorize and direct issuance of patents to purchasers of lots in the town site of Bowdoin, Mont.;

H. R. 8100. An act for the relief of the estate of Charles L. Freer, deceased;

H. R. 8343. An act for the relief of Jim Hennessee;

H. R. 8545. An act conferring jurisdiction on the Court of Claims to determine and report upon the interest, title, ownership, and right of possession of the Yankton Band of Santee Sioux Indians to the Red Pipestone quarries, Minnesota;

H. R. 9518. An act granting the consent of Congress to the State of Alabama through its highway department to construct and maintain a bridge across the Coosa River at or near Leesburg, Ala.; and

H. J. Res. 257. Joint resolution providing for the procurement of a design for the use of grounds in the vicinity of the Mall by the United States Botanic Garden.

The message also announced that the Senate had passed bills and joint resolutions of the following titles, in which the concurrence of the House of Representatives was requested:

S. 876. An act to provide for the disposition of bonuses, rentals, and royalties received under the provisions of the act of Congress entitled "An act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain," approved February 25, 1920, from unallotted lands in Executive order Indian reservations, and for other purposes;

S. 854. An act for the relief of Margaret Richards;

S. 747. An act for the relief of Joseph F. Becker;

S. 685. An act to authorize the Secretary of Commerce to sell certain department publications and to provide for crediting the department's printing allotment with the proceeds;

S. 660. An act for the relief of the Ogden Chamber of Commerce;

S. 369. An act to amend an act entitled "An act for the relief of Indians occupying railroad lands in Arizona, New Mexico, or California," approved March 4, 1913;

S. 308. An act to reimburse the State of Montana for expenses incurred by it in suppressing forest fires on Government land during the year 1919;

S. 1543. An act for the relief of George E. Harpham;

S. 1392. An act authorizing the Ponca Tribe of Indians residing in the States of Oklahoma and Nebraska to submit claims to the Court of Claims;

S. 1340. An act to make the necessary survey and to prepare a plan of a proposed parkway to connect the old Civil War forts in the District of Columbia;

S. 1179. An act to authorize the Commissioners of the District of Columbia to close certain streets, roads, or highways in the District of Columbia rendered useless or unnecessary by reason of the opening, extension, widening, or straightening, in accordance with the highway plan, of other streets, roads, or highways in the District of Columbia, and for other purposes;

S. 1033. An act to establish the Benning National Forest in the State of Georgia;

S. 1022. An act for the relief of Francis Nicholson;

S. 1016. An act for the relief of Augusta Reiter;

S. 994. An act to amend the act of March 3, 1885, entitled "An act providing for allotment of lands in severalty to the Indians residing upon the Umatilla Reservation, in the State of Oregon, and granting patents therefor, and for other purposes";

S. 1897. An act for the relief of Mrs. Benjamin Gauthier;

S. 1893. An act to refund certain duties paid by the Nash Motors Co.;

S. 1828. An act to supplement the military record of Lieut. Commander Charles O. Maas;

S. 1733. An act to authorize the Secretary of War to secure for the United States title to certain private lands contiguous to and within the Militia Target Range Reservation, State of Utah;

S. 1705. An act for the relief of the heirs of Ko-mo-dal-kiab, Moses agreement allottee No. 33;

S. 1665. An act to provide for the payment of one-half the cost of the construction of a bridge across the San Juan River, N. Mex.;

S. 1653. An act authorizing the expenditure for certain purposes of receipts from oil and gas on the Navajo Indian Reservation in Arizona and New Mexico;

S. 1569. An act to compensate Lieut. L. D. Webb, United States Navy, for damages to household effects while being transported by Government conveyance;

S. 52. An act for the relief of Alice M. Durkee.

S. 1937. An act for the relief of the Staples Transportation Co., of Fall River, Mass.;

S. 2053. An act to provide for designating the route of the Old Oregon Trail;

S. 2079. An act for the relief of the owner of the American steam tug *O'Brien Brothers*;

S. 2130. An act for the relief of the owner of the ferryboat *New York*;

S. 2139. An act for the relief of the estate of Walter A. Rich, deceased;

S. 2173. An act to provide fees to be charged by clerks of the district courts of the United States;

S. 2174. An act to provide for accounting by clerks of United States district courts of fees received by them in naturalization proceedings;

S. 2175. An act to provide for reporting and accounting of fines, fees, forfeitures, and penalties, and all moneys paid to or received by clerks of United States courts;

S. 2176. An act to amend section 2 of the act of August 1, 1893 (25 Stat. L. p. 357);

S. 2179. An act to provide for the rendition of accounts by United States attorneys, United States marshals, clerks of United States courts, and United States commissioners;

S. 2223. An act for the relief of the estate of Robert M. Bryson, deceased;

S. 2254. An act for the relief of the Beaufort County Lumber Co., of North Carolina;

S. 2293. An act for the relief of Lehigh Valley Railroad Co. and McAllister Lighterage Line (Inc.);

S. 2375. An act to facilitate the suppression of the intoxicating liquor traffic among Indians;

S. 2458. An act to authorize the payment of the indemnity to the Swedish Government for the losses sustained by its nationals in the sinking of the Swedish fishing boat *Lilly*;

S. 2478. An act to carry out the findings of the Court of Claims in the case of Kate Reaney Zeiss, administratrix of William B. Reaney, survivor of Thomas Reaney and Samuel Archbold, against the United States;

S. 2503. An act for the relief of W. H. King;

S. 2520. An act to give the Court of Claims jurisdiction to hear and adjudge the claims of the estate of John Frazer, deceased, and others;

S. 2534. An act for the relief of J. E. Sancier;

S. 2568. An act for the relief of the owners of the steam tug *Joshua Lovett*;

S. 2689. An act for the relief of the First International Bank of Sweetgrass, Mont.;

S. 2691. An act to amend the Penal Code;

S. 2714. An act for the relief of John F. Malley;

S. 2774. An act for the relief of G. Ferlita;

S. 2794. An act for the relief of Margaret B. Knapp;

S. 2833. An act for the relief of Rinald Bros., of Philadelphia, Pa.;

S. 2838. An act to provide for expenditure of tribal funds of Indians for construction, repair, and rental of agency buildings and related purposes;

S. 2842. An act to provide for compulsory school attendance, for the taking of a school census in the District of Columbia, and for other purposes;

S. 2860. An act for the relief of the Canada Steamship Lines (Ltd.);

S. 2879. An act for the relief of James E. Jenkins;

S. 2950. An act to define and determine the character of the service represented by the honorable discharge issued to John McNickle, of Company L, Seventh Regiment New York Volunteer Heavy Artillery, under date of September 27, 1865;

S. 2976. An act to authorize the Comptroller General of the United States to relieve Fred A. Gosnell, former disbursing clerk, Bureau of the Census, and the estate of Richard C. Lappin, former supervisor of the Fourteenth Decennial Census for the Territory of Hawaii, and special disbursing agent, in the settlement of certain accounts;

S. 2992. An act for the relief of the Berwind-White Coal Mining Co.;

S. 3036. An act to amend the law relative to timber operations on the Menominee Reservation in Wisconsin;

S. 3053. An act to quiet title to original lot 4, square 116, in the city of Washington, D. C.;

S. 3066. An act for the relief of Albert E. Magoffin;

S. 3072. An act to refund taxes paid on distilled spirits in certain cases;

S. 3073. An act for the relief of George A. Berry;

S. 3080. An act for the relief of the Utah and White River Tribes of Ute Indians of Utah;

S. 3084. An act to enlarge the fish cultural station at Orangeburg, S. C.;

S. 3123. An act authorizing the Secretary of Commerce to convey certain land to the city of Duluth, Minn.;

S. 3173. An act to provide for the construction of a memorial bridge across the Potomac River from a point near the Lincoln Memorial in the city of Washington to an appropriate point in the State of Virginia, and for other purposes;

S. 3235. An act for the relief of Christina Conniff;

S. 3247. An act providing for the payment of any unappropriated moneys belonging to the Apache, Kiowa, and Comanche Indians to Jacob Crew;

S. 3252. An act referring the claim of the State of Rhode Island for expenses during the war with Spain to the Court of Claims for adjudication;

S. 3281. An act for the relief of Ralph Ole Wright and Varina Belle Wright;

S. 3292. An act granting the consent of Congress to the city of Hannibal, Mo., to construct a bridge across the Mississippi River at or near the city of Hannibal, Marion County, Mo.;

S. 3346. An act to provide that jurisdiction shall be conferred upon the Court of Claims, notwithstanding the lapse of time or statutes of limitation, to hear, examine, and adjudicate and render judgment in any and all legal and equitable claims arising under or growing out of any treaty or agreement between the United States and certain bands of Indians, and for other purposes;

S. 3352. An act to provide for the appointment of an appraiser of merchandise at Portland, Oreg.;

S. 3357. An act to amend sections 2 and 5 of the act entitled "An act to provide the necessary organization of the customs service for an adequate administration and enforcement of the tariff act of 1922 and all other customs revenue laws," approved March 4, 1923;

S. 3370. An act for the relief of Mary T. Metcalfe;

S. 3392. An act to amend section 558 of the Code of Law for the District of Columbia;

S. 3428. An act authorizing the construction of a bridge across the Ohio River to connect the city of Portsmouth, Ohio, and the village of Fullerton, Ky.;

S. 3505. An act for the relief of Canadian Car & Foundry Co. (Ltd.);

S. 3530. An act to amend the act entitled "An act authorizing the Director of the Census to collect and publish statistics of cotton";

S. 3534. An act to correct the military record of Thomas C. Johnson, deceased;

S. 3548. An act for the relief of the heirs of Karl T. Larson, deceased;

S. 3571. An act authorizing the transfer of real property no longer required for lighthouse purposes;

S. 3584. An act to extend the time for completing the construction of a bridge across the Delaware River;

S. 3640. An act granting the consent of Congress to the State of Washington to construct, maintain, and operate a bridge across the Columbia River south of Chelau Falls, Wash.;

S. 3641. An act granting the consent of Congress to the State of Washington to construct, maintain, and operate a bridge across the Columbia River at Vantage Ferry, Wash.;

S. 3642. An act granting the consent of Congress to the State of Washington to construct, maintain, and operate a bridge across the Columbia River at Kettle Falls, Wash.;

S. 3707. An act granting a pension to Edith Bolling Wilson;

S. J. Res. 46. Joint resolution for the relief of Capt. Ramon B. Harrison;

S. J. Res. 131. Joint resolution authorizing the Director of the United States Veterans' Bureau to take assignments of certain claims of patients of General Hospital No. 55, Fort Bayard, N. Mex.;

S. J. Res. 133. Joint resolution authorizing and requesting the Postmaster General to design and issue a special postage stamp to commemorate the arrival in New York on October 9, 1825, of the sloop *Restaurationen*, bearing the first shipload of immigrants to the United States from Norway, and in recognition of the Norse-American Centennial celebration in 1925; and

S. J. Res. 135. Joint resolution granting permission to the Roosevelt Memorial Association to procure plans and designs for a memorial to Theodore Roosevelt.

EMERGENCY MAIL SERVICE IN ALASKA

Mr. MOORE of Ohio (when the Clerk called the Committee on the Post Office and Post Roads). Mr. Speaker, I am directed by the Committee on the Post Office and Post Roads to call up H. R. 6581, a bill authorizing the Postmaster General to provide emergency mail service in Alaska.

The SPEAKER. The gentleman from Ohio calls up the bill H. R. 6581, which the Clerk will report.

The Clerk read the title of the bill.

The SPEAKER. This bill is on the Union Calendar, and the House will automatically resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill, and the gentleman from Connecticut [Mr. TILSON] will take the chair.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 6581, with Mr. TILSON in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of H. R. 6581, which the Clerk will report.

The Clerk read the bill, as follows:

Be it enacted, etc., That hereafter the Postmaster General is authorized to provide difficult or emergency mail service in Alaska, including the establishment and equipment of relay stations, in such manner as he may think advisable without advertising therefor.

With the following committee amendment:

Page 1, line 3, after the word "That," strike out the word "hereafter."

Mr. MOORE of Ohio. Mr. Chairman and gentlemen of the committee, since 1901 this language, or similar language, has been carried in the annual appropriation bill, and the object of this bill is to give permanency to the legislation which we have been passing since 1901 for emergency mail service in Alaska. At certain seasons of the year in Alaska the regular carriers and those who carry the mail from place to place are unable to perform their duty and the mail accumulates, and that has been the necessity from year to year for this emergency legislation. Such legislation has been necessary each year, and the Post Office Department recommends that it be made permanent law, in order to do away with the necessity of passing language similar to this from year to year. Mr. Triem, of the Post Office Department, appeared before the committee and it is recommended by the Post Office Department. The Delegate from Alaska [Mr. SUTHERLAND] also told of the conditions there, and it seems to me it is desirable that this shall be made permanent legislation. That was the opinion of the committee, and the bill has been unanimously reported. I do not see any particular necessity for taking any more of the time of the committee, unless some Member has some questions to ask about the legislation.

Mr. LANHAM. Will the gentleman yield?

Mr. MOORE of Ohio. Yes.

Mr. LANHAM. While this is to be permanent legislation, it does not provide, does it, for permanent mail routes? It simply provides authority to take care of emergency cases, and these routes and facilities will be used only in time of emergency, and it is not contemplated that these will be permanent mail-service routes.

Mr. MOORE of Ohio. It is not. The bill provides that the authority shall exist in cases of emergency and it is so intended. It will have nothing to do with the regular mail service, but it will only assist when an emergency develops because of the ice, snow, and things of that kind, when the regular carriers can not handle the mail and when there is an accumulation of the mail.

Mr. RANKIN. Let me ask the gentleman a question. Does the Postmaster General have that same authority relative to conditions in the continental United States and the other Territories?

Mr. MOORE of Ohio. Well, I am not positive, but I should think not. If he had general authority for emergency cases like this, I should think it would apply to Alaska. That is merely my opinion, because I have not had that question raised so I could make an extensive investigation of that fact. But if the Postmaster General had general authority, I should think there would not be any necessity for this particular legislation for Alaska.

Mr. RANKIN. It seems to me that if we are going to pass legislation of this kind, putting this provision into the permanent law, that the same reasons which would argue in favor of passing it relative to Alaska would also apply to the continental United States.

Mr. MOORE of Ohio. Well, I do not believe there would be in continental United States any of the extreme conditions which exist in Alaska.

Mr. RANKIN. I will name one to the gentleman. Day before yesterday, in the town of Corinth, in my district, they had the most disastrous fire they ever had in the history of that city, and, among other things, it destroyed the Government post-office building. Now, there is an emergency that is as real and as urgent as any that will happen in Alaska or any other territory, and I just want to ask the gentleman whether or not this same provision would apply there, and whether the Postmaster General would have the same right to go ahead and make temporary provision for taking care of that situation.

Mr. MOORE of Ohio. I may say, in reply to the gentleman, that I do not know. He may know more about that local condition, but it seems to me that in a case like that the Post Office Department now has the authority to do that, although I am not sure.

Mr. RANKIN. I am asking for that information.

Mr. SUTHERLAND. The case the gentleman speaks of would not involve the letting of a contract for carrying the mail.

Mr. RANKIN. Oh, well, these are only temporary contracts as provided for in this bill, and this will involve the making of temporary contracts for the housing of the post office and for the handling of the mail at Corinth, and it is a situation that is very grave. So it seems to me that if we are going to make this provision for any Territory or insular possessions there ought to be some such provision for taking care of a similar situation at home.

The CHAIRMAN. The Clerk will read the bill for amendment.

The Clerk read the bill, with the following committee amendment:

Page 1, line 3, after the word "That," strike out the word "hereafter."

The CHAIRMAN. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

Mr. MOORE of Ohio. Mr. Chairman, I move that the committee do now rise and report the bill to the House with an amendment with the recommendation that the amendment be agreed to and the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. TILSON, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 6581) authorizing the Postmaster General to provide emergency mail service in Alaska, and had directed him to report the same back to the House with an amendment with the recommendation that the amendment be agreed to and the bill as amended do pass.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. MOORE of Ohio, a motion to reconsider the vote by which the bill was passed was laid on the table.

AIR MAIL SERVICE—POST OFFICE DEPARTMENT

Mr. LA GUARDIA. Mr. Speaker, I am directed by the Committee on the Post Office and Post Roads to call up the bill (S. 1051) to authorize and provide for the payment of the amounts expended in the construction of hangars and the maintenance of flying fields for the use of the Air Mail Service of the Post Office Department.

The Clerk read the title of the bill.

The SPEAKER. This bill is on the Union Calendar, and the House automatically resolves itself into the Committee of the Whole House on the state of the Union; and the gentleman from Connecticut [Mr. TILSON] will take the chair.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill S. 1051, with Mr. TILSON in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of Senate bill 1051, which the Clerk will report.

The Clerk read as follows:

An act (S. 1051) to authorize and provide for the payment of the amounts expended in the construction of hangars and the maintenance of flying fields for the use of the Air Mail Service of the Post Office Department

Be it enacted, etc., That the Postmaster General is hereby authorized and directed to investigate, adjust, reimburse, and pay to municipalities and citizens found to be entitled thereto the proper and just amounts heretofore expended in the construction of hangars and the maintenance of flying fields, including the lease and clearing of fields therefor, insurance, and other necessary expenses incurred in connection therewith, at Reno, Nev.; Salt Lake City, Utah; Cheyenne, Wyo.; North Platte, Nebr.; and Omaha, Nebr., for the use of the Air Mail Service of the Post Office Department, where such hangars were constructed and such flying fields maintained under an understanding with a duly authorized officer or agent of the Post Office Department that reimbursement therefor would be made.

Sec. 2. That there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of \$175,000, or so much thereof as may be necessary to carry out the provisions of this act.

Mr. BEGG. Mr. Chairman, I hesitate to take a chance on killing the day, but I notified the committee that I would not submit to the passage of this bill without a quorum. If the committee insists on calling the bill up, I am going to make a point of no quorum.

The CHAIRMAN. The committee has called it up.

Mr. BEGG. Then I make the point of no quorum, Mr. Chairman.

The CHAIRMAN. The Chair will count.

Mr. BEGG. Mr. Chairman, I move the committee do now rise.

The question was taken; and on a division (demanded by Mr. BEGG) there were—ayes 12, noes 38.

So the committee refused to rise.

Mr. BEGG. Mr. Chairman, I make the point of no quorum.

The CHAIRMAN. The gentleman from Ohio makes the point of no quorum. The Chair will count. [After counting.] Sixty-eight gentlemen present; not a quorum. The Clerk will call the roll.

The Clerk called the roll, when the following Members failed to answer to their names:

[Roll No. 16.]

Ackerman	Eagan	Lehlbach	Richards
Anthony	Fairchild	Lilly	Roch
Arnold	Fairfield	Lindsay	Robison
Bacharach	Favrot	Linthicum	Rogers, Mass.

Doyle	Larson, Minn.	Reece	Woodrum
Drane	Lazaro	Reed, Ark.	Wright
Drewry	Lea, Calif.	Reed, N. Y.	Zihlman
Driver	Leach	Reed, W. Va.	

The committee rose; and the Speaker having resumed the chair, Mr. TILSON, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee having under consideration the bill H. R. 1051, finding itself without a quorum he had caused the roll to be called, when 218 Members answered to their names, and he reported the names of the absentees for entry in the Journal.

The committee resumed its session.

The CHAIRMAN. The Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Postmaster General is hereby authorized and directed to investigate, adjust, reimburse, and pay to municipalities and citizens found to be entitled thereto the proper and just amounts heretofore expended in the construction of hangars

and the maintenance of flying fields, including the lease and clearing of fields therefor, insurance, and other necessary expenses incurred in connection therewith, at Reno, Nev.; Salt Lake City, Utah; Cheyenne, Wyo.; North Platte, Nebr.; and Omaha, Nebr., for the use of the Air Mail Service of the Post Office Department, where such hangars were constructed and such flying fields maintained under an understanding with a duly authorized officer or agent of the Post Office Department that reimbursement therefor would be made.

Sec. 2. That there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of \$175,000, or so much thereof as may be necessary to carry out the provisions of this act.

With the following committee amendment:

Strike out all after the enacting clause and insert the following: "That the Postmaster General is hereby authorized to adjust, reimburse, and pay to municipalities and citizens found to be entitled thereto the proper and just amounts heretofore expended in the construction of hangars and the maintenance of flying fields, including the lease and clearing of fields therefor, insurance, and other necessary expenses incurred in connection therewith: *Provided*, That title to such hangars shall be vested in the United States Government and that no further rental shall be paid for such hangars."

Mr. LAGUARDIA. Mr. Chairman, by direction of the Committee on the Post Office and Post Roads, I reported this bill for the consideration of the House. A like bill was introduced in the previous Congress, and the Members will find the hearings under H. R. 11723. The committee this year used the hearings held by the committee in the previous Congress, feeling that it was not necessary to recall various representatives before the committee another time. We did call the Second Assistant Postmaster General.

Mr. BLANTON. Will the gentleman yield?

Mr. LAGUARDIA. I yield.

Mr. BLANTON. I notice that so far in this session of Congress every bill that has come to the House from the great Committee on the Post Office and Post Roads has been reported by the distinguished gentleman from New York.

Mr. LAGUARDIA. Oh, no.

Mr. BLANTON. But they have been fathered on the floor by the distinguished gentleman from New York.

Mr. LAGUARDIA. No.

Mr. BLANTON. Who has had charge of other bills on the floor that come from the Committee on the Post Office and Post Roads?

Mr. LAGUARDIA. The gentleman from Iowa [Mr. RAMSEYER], and the gentleman from Ohio [Mr. MOORE] had charge of the bill we just passed.

Mr. BLANTON. I have seen the gentleman from New York sitting with the committee's secretary, and I am simply trying to get at the new change or transformation.

Mr. LAGUARDIA. The gentleman knows that the gentleman from New York attends to his duty and feels his responsibility as a member of the committee.

Mr. BLANTON. Oh, I commend the gentleman for being able to lead that committee.

Mr. LAGUARDIA. I do not lead the committee.

Mr. WATKINS. Does not the gentleman know that always on the return of the prodigal son they kill the fatted calf? [Laughter.]

Mr. LAGUARDIA. They did not open any bottle. [Laughter.] We called the Second Assistant Postmaster General before the committee and asked him what his views were at this time, he having previously testified, and he urged a favorable consideration of the bill.

Now, the bill provides for the reimbursement not only to cities but to individuals of certain expenditures made by them for the construction of hangars. This is what happened. Under the previous administration Colonel Jordan, who had the Air Mail Service in charge, went through the country to establish air mail routes. He had no funds. He was keen to get service throughout various cities along the route. He called upon chambers of commerce, upon municipalities, for assistance.

Mr. BEGG. Will the gentleman yield?

Mr. LAGUARDIA. I will.

Mr. BEGG. Is it true, or is it not, that not nearly half of the cities have asked for reimbursement for their donation to the Government?

Mr. LAGUARDIA. I would not say that that was correct.

Mr. BEGG. Is the gentleman in possession of the information as to how much this will cost?

Mr. LAGUARDIA. I am coming to that.

Mr. JOHNSON of Washington. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. JOHNSON of Washington. Is not this a proposition to revive some new style of pork-barrel legislation?

Mr. DOWELL. Oh, it is even worse than that. [Laughter.]

Mr. LAGUARDIA. This is not pork-barrel legislation.

Mr. SMITH. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. SMITH. I want to ask the gentleman if this bill has been referred to the Postmaster General?

Mr. LAGUARDIA. Yes; I am coming to that.

Mr. SMITH. Where is his response? It is not in the report.

Mr. LAGUARDIA. Yes; you will find it on page 3.

Mr. SMITH. It is not in the report I have.

Mr. LAGUARDIA. I beg the gentleman's pardon, we are considering the Senate bill. The complete report you will find with bill H. R. 3261.

Mr. SIMMONS. Are those reports available?

Mr. LAGUARDIA. Yes; if you will read the report on H. R. 3261, which is to be considered together with S. 1051, you will get the desired information.

Mr. SMITH. The report I have in my hand is a report by the gentleman from New York on the Senate bill 1051. What I wish to learn is the report of the Postmaster General on this bill.

Mr. LAGUARDIA. You will find it on page 3 of the report on H. R. 3261.

Mr. JONES. Will the gentleman yield?

Mr. LAGUARDIA. I yield.

Mr. JONES. Were not all of these cities and towns anxious to make the donation in order to secure the route?

Mr. LAGUARDIA. No doubt about that.

Mr. JONES. Was any assurance given by the man who located the routes that this would be repaid?

Mr. LAGUARDIA. Yes.

Mr. JONES. What authority did he have to make that promise?

Mr. LAGUARDIA. He did not have any authority.

Mr. JONES. Did he go out and assume that authority?

Mr. LAGUARDIA. There is no question about that.

Mr. JONES. Is he still in the service?

Mr. LAGUARDIA. No. That was Colonel Jordan. He was employed under the previous administration.

Mr. RAKER. The gentleman has gone into the matter fully and is familiar with the facts—

Mr. LAGUARDIA. Oh, give me a chance to state them.

Mr. RAKER. Would the gentleman advise the committee now of the approximate amount that is claimed to be due—the total amount?

Mr. LAGUARDIA. Yes; if gentlemen will just give me about five minutes. Then I shall yield to Mr. LEATHERWOOD, the introducer of the bill.

Mr. RAKER. Is the gentleman going to give that information to the House now?

Mr. LAGUARDIA. Yes; right now. Colonel Jordan, representing the Post Office Department, went through the country and represented to individuals and municipalities that if they would erect hangars and flying fields, that as soon as the air-mail line was established, they would be reimbursed.

Mr. DOWELL. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Not now. Just give me a chance. The service was established, and then the Postmaster General of the new administration found itself confronted with continued demands on the part of these individuals for reimbursement. And now, in reply to the question of the gentleman from California [Mr. RAKER], let me state the amounts claimed by these various cities. Omaha, Nebr., claims \$40,000—and I shall give only the round figures; North Platte, Nebr., \$14,000; Cheyenne, Wyo., \$15,000; Salt Lake City, Utah, \$18,000; Reno, Nev., \$41,000; Newark, N. J., \$7,000; Bellefonte, Pa., \$2,000; Cleveland, Ohio, \$10,000; Bryan, Ohio, \$1,000; Chicago, Ill., \$14,000; St. Louis, Mo., \$28,000; La Crosse, Wis., \$3,000; Minneapolis, Minn., \$20,000; Iowa City, Iowa, \$4,000; Rawlins, Wyo., \$2,000; Rock Springs, Wyo., \$12,000; San Francisco, Calif., \$40,000.

This is the difficulty that the Post Office Department finds itself in. The hangars are the property of these individuals. The fields are being leased by the Government. If there is a leakage in a hangar, we can not make the repairs and our equipment is exposed to the weather. If we have to make any alteration, any addition, we can not do it, so that the department felt that it could rid itself of this annoyance by being given authority not to pay these full amounts but to make settlements all along the line.

We provide in the bill that no settlement should be made unless the Government took title to the property. That would in itself, I believe, entirely answer the suggestion made by the

gentleman from Iowa [Mr. DOWELL] that this is a "pork-barrel" proposition, because this is not giving something and getting nothing, but it is getting property in each instance where settlement is made.

Mr. BUSBY. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. BUSBY. Is it not a fact that it has developed that a number of these places are out of line with the project of the Government to develop the Air Mail Service, and that they want to get paid for this before they are definitely abandoned by the Government?

Mr. LAGUARDIA. Yes; but if my colleague will read the bill he will see that we do not provide for those places in the bill, and it is not contemplated to make any settlement except for the property that we are actually using.

Mr. BUSBY. Why not limit in the bill the places that are to be settled with.

Mr. LAGUARDIA. The gentleman can see the difficulty about that. That is exactly what the Senate bill does. At the suggestion of the Second Assistant Postmaster General we authorize the Postmaster General to carry on negotiations for settlement in such cases as he deems necessary for the protection of the service. He will settle in such places where he is actually using the property for the protection of Government property.

Mr. BUSBY. Is it not the intention of all these places, some of which have never claimed or asked for settlement of expenditures made back from the beginning down to the present time, to come in and present their claims for settlement before the places are definitely abandoned as a part of the plan for carrying on the Air Mail Service?

Mr. LAGUARDIA. Not at all. The gentleman should know better. This does not legalize the claims. It simply vests the Postmaster General with authority to make such settlement as he deems necessary.

Mr. RAKER. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. RAKER. The gentleman has stated approximately the amounts claimed. There is this provision in the bill:

That title to such hangars shall be vested in the United States Government and that no further rental shall be paid for such hangars.

Will the gentleman advise the committee what is the estimated value of these hangars as presented to the committee, so that we will then have the total amount that is claimed and the total value of the property to be turned over to the Government?

Mr. LAGUARDIA. It was estimated that \$175,000 would be sufficient. That was in the previous Congress. I believe that the Postmaster General can make settlements for much less, and that he would not use more than perhaps \$100,000.

Mr. RAKER. The gentleman does not get the question. What is the estimated value of the hangars that will go to the Government under this bill?

Mr. LAGUARDIA. This is just the value of the hangars, and we figure that perhaps within \$100,000 we can acquire the hangars we are using now and be free to make the necessary repairs and have title to the property, and not be simply a tenant at will. We are renting the fields. This does not include the fields.

Mr. WAINWRIGHT. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. WAINWRIGHT. What is the estimated value of the real estate, the fee to which will be conveyed to the Government, provided they make these payments?

Mr. LAGUARDIA. There is no real estate involved.

Mr. JONES. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. JONES. Does the Post Office Department contemplate sending Colonel Jordan out to make these settlements?

Mr. LAGUARDIA. The gentleman will have to ask Mr. Burleson about that. He was your man, not ours.

Mr. JONES. I am talking about the man who did it.

Mr. LAGUARDIA. No.

Mr. JONES. What service was he in—in the Army?

Mr. LAGUARDIA. No.

Mr. JONES. Then why was he called a colonel?

Mr. LAGUARDIA. Oh, the gentleman knows that there were a lot of Washington colonels created during the war.

Mr. JONES. I understand; but I want to know what became of him.

Mr. LAGUARDIA. I do not know where he is. He is not in the Government service.

Mr. JONES. Did the committee have him before it at the time of the hearings?

Mr. LAGUARDIA. The previous Congress did.

Mr. JONES. Did the gentleman's committee have a quorum present when this bill was reported?

Mr. LAGUARDIA. When the bill was reported, of course; when the bill was reported we had a quorum.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. BLANTON. The gentleman from New York stated a while ago that when the money was paid out the Government would take title. The gentleman from New York was asked as to the value of the property, the land that would be taken, and the gentleman stated that there was no land.

Mr. LAGUARDIA. No real estate.

Mr. BLANTON. But there is property situated on somebody's land, for the use of which somebody can charge rental.

Mr. LAGUARDIA. We are under lease for the land.

Mr. BLANTON. And if we give them up when we pay for them, and establish a straight line instead of a roundabout one, we shall get no benefit whatever for these hangars that we are asked to pay out this unlimited amount of money for.

Mr. LAGUARDIA. It is not an unlimited amount of money.

Mr. BLANTON. The gentleman will remember that the amount in the bill was fixed at \$175,000, and his committee cut that out and put in no limitation whatever.

Mr. LAGUARDIA. Because we considered the \$175,000 too much.

Mr. BLANTON. The Postmaster General could expend \$175,000,000 under this bill.

Mr. LAGUARDIA. Where is he going to get the money?

Mr. BLANTON. You will authorize him to make settlements and give him unlimited authority. I have seen these settlements made, and I have seen Congress always pay the Government's debts when the settlements are made.

Mr. LAGUARDIA. Let me explain. It would be very costly for the Government to go out and buy all the land necessary for landing fields. As the gentleman knows, a landing field must be rather large, and it must be in close proximity to a city, and the purchase of such land would be very costly. Now, they have been able to negotiate very satisfactory leases for the use of these landing fields.

I may say that it is indifferent to me what you will do about this bill, but the Post Office Department is in this predicament. They have the land, but they are simply tenants at will. As to these hangars, they are not authorized to pay a penny on them, and some of our equipment is not properly cared for on account of the condition of these hangars.

Mr. VAILE. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. VAILE. Can these hangars be removed, if we abandon these fields, without great expense?

Mr. LAGUARDIA. Oh, there is always expense, as the gentleman knows.

Mr. VAILE. Would we not be in the same situation as we were in after the war when we would have to abandon expensive buildings or sell them for a song?

Mr. LAGUARDIA. I think we have had some lessons in that line from our experience in the war concerning aviation.

Mr. FRENCH. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. FRENCH. Can the gentleman tell us what the terms of the leases are?

Mr. LAGUARDIA. I have them here.

Mr. FRENCH. Are they for 10 years or 50 years or what period of time?

Mr. LAGUARDIA. They are short-time leases. I have them here. They are not long leases.

Mr. FRENCH. I think the Members of the House ought to know, because it is of great importance, whether or not we are going to spend \$175,000 or any sum of money for hangars and buildings on land under short-time leases. If we had long-time leases, or if we owned the land, it would be a different proposition. But if the leases run for short periods of time I submit it is a dangerous proposition to authorize the acquisition of hangars or other buildings upon the lands as may be done under the bill before us.

Mr. LAGUARDIA. I took that matter up with the Second Assistant Postmaster General, and I can understand the gentleman's feeling in the matter. It is difficult, let me say to the gentleman, to get long-term leases on land situated as is required for the landing fields. Frequently we will have to acquire permanent landing fields. But, as the gentleman knows, up to a few days ago the Air Service was simply a year-to-year proposition carried on an appropriation bill. The Post Office Department could not go out and acquire the land necessary for landing fields when the service was not permanently estab-

lished. But we passed a law here a few days ago, and if the Senate passes it the Postmaster General will then know that the Air Service is something permanent, and he can make necessary preparations and go out and make long-term leases. But no Postmaster General can go out and make long-term leases and acquire land when he is conducting only a temporary proposition from year to year.

Mr. FRENCH. Does not the gentleman think we should await action by the Senate before undertaking to consider a bill of this kind? My attention has just been called to the last paragraph of the bill, with the suggestion that the title of the land under the last proviso would pass to the Government. That is obviously incorrect, and the gentleman, who speaks for the committee, did not make the statement. I call the attention of the Members of the House to the fact that under the proviso the Government may acquire only the hangars and other buildings and not the land.

Mr. LA GUARDIA. We are not pretending anything else.

Mr. FRENCH. Will the gentleman bear with me a moment further? I submit we are proceeding too fast in the matter of authorizing the acquisition of hangars and property to be placed on the land when we have no general law under which long-time leases or ownership of the land may be acquired.

Mr. LA GUARDIA. I have stated the circumstances under which leases are entered into by the Government, and also the difficulties that the Postmaster General was confronted with.

Mr. DOWELL. Mr. Chairman, will the gentleman yield?

Mr. LA GUARDIA. Yes; but let me finish the reply, if the gentleman will listen to it. The Postmaster General has looked into that and has reasonable assurance—and he can not have anything more—that he will be able to extend these leases. That is all any man can get.

Mr. FRENCH. Does not the gentleman know that when he goes from the Capitol Building to the Union Station, two or three blocks, he sees advertisements for the sale of land on which the Government has spent thousands and thousands of dollars in the erection of buildings? We built those buildings during the war and had no reasonable assurance when those buildings were built touching the time they would be occupied.

Mr. LA GUARDIA. The gentleman is in error. We had no such assurance, and some of us resisted the spending of the money at the time.

Mr. FRENCH. That is what I say, and the case is on all fours with the present proposition.

Mr. LA GUARDIA. We have such assurances.

Mr. FRENCH. Are they in contract form?

Mr. LA GUARDIA. They are not in contract form.

Mr. BLANTON. They are confidential with the committee?

Mr. LA GUARDIA. No; they are not with the committee.

Mr. FRENCH. Then what is the nature of the assurance?

It seems to me we are going too fast with this part of the program. If we are going to acquire hangars, first of all we should acquire the land under long-time leases or by the acquisition of title to the land itself.

Mr. LA GUARDIA. Let me say something to the gentleman, who is an expert on naval affairs. I understand that the Navy Department, for which the gentleman is spokesman on the floor from time to time, had title to certain very valuable lands, but notwithstanding that they gave up that title.

Mr. RAKER. Will the gentleman yield?

Mr. LA GUARDIA. Yes.

Mr. RAKER. Could the gentleman tell the committee whether or not these leases permit the lessees to sublet or lease the property?

Mr. LA GUARDIA. The leases are now direct with the Government.

Mr. RAKER. The Government has leases on the land?

Mr. LA GUARDIA. Yes.

Mr. RAKER. The Government now holds the leases on the land?

Mr. LA GUARDIA. Yes; exactly.

Mr. WAINWRIGHT. What about the removal of the buildings?

Mr. LA GUARDIA. There is no question about the removal of the buildings.

Mr. RAKER. Then are the hangars and other fixtures such that they are a part of the realty?

Mr. LA GUARDIA. Exactly.

Mr. RAKER. Is that right?

Mr. LA GUARDIA. Of course, under the law they would be a part of the realty.

Mr. RAKER. Then they can not be moved?

Mr. LA GUARDIA. They can not be moved by the Government, but I understand the Postmaster General has reserved the right to the title of the hangars in the leases; in other

words, that if the leases terminate I believe the Postmaster General can, in his settlement, reserve the right to remove the hangars.

Mr. RAKER. Is there a provision in the leases to the effect that when the leases expire the Government can remove the hangars?

Mr. LA GUARDIA. No; and there could not be any such provision, because we do not own the hangars now, and that is what we are trying to get around; but in the event of a settlement, he would take title to the hangars and reserve that right for the Government.

Mr. RAKER. The hangars belong to private individuals now?

Mr. LA GUARDIA. Yes.

Mr. RAKER. The land belongs to a private individual, say, B?

Mr. LA GUARDIA. Exactly.

Mr. RAKER. The Government has a lease on the land?

Mr. LA GUARDIA. Yes.

Mr. RAKER. That is funny.

Mr. LA GUARDIA. Of course it is. It is a very peculiar legal situation to be in.

Mr. JONES. Will the gentleman yield?

Mr. LA GUARDIA. Yes.

Mr. JONES. I notice in the hearings the report of the inspector to the effect that the Air Mail Service made no official agreement that the individuals or organizations contributing to the establishment of these air mail stations were to be repaid, and, according to the inspector's report, when the matter of remuneration was first brought up by the individuals or organizations desiring such remuneration Mr. Jordan, in writing, officially denied that he had ever made the promises attributed to him in the affidavits, and the report further states that there are no communications in the files supporting these claims. Now, what evidence has the gentleman, outside of the evidence of the people who are interested, that any such promise was ever made? It seems that Mr. Jordan denies it and the inspector denies that there was ever any such authorization or agreement. Now, what proof is there?

Mr. LA GUARDIA. Mr. Jordan went from place to place, made public statements in the press and made such assurances publicly, and there is not the slightest doubt that he left these people under the impression that they would be reimbursed. Of course, he had no authority, and I do not believe any Member here questions that.

Mr. BEGG. Will the gentleman yield?

Mr. LA GUARDIA. Yes.

Mr. BEGG. I would like to ask the gentleman a serious question for his interpretation. When this route was proposed to be established there was more or less rivalry between the cities near the proposed route. Mr. John J. McInerney, commissioner of finance of the city of Cheyenne, testified, and my question is: What interpretation does the gentleman put on this statement and whether it was not a direct contribution by the city without expectation of remuneration? Mr. McInerney, the financial man, testified:

Mr. Jordan, apparently for the purpose of stimulating interest, set forth that the city of Laramie, Wyo., would doubtless be interested in the event Cheyenne declined to meet the requirements.

Now, does not the gentleman interpret that—and all the testimony is that way—to mean that these cities were vying with one another in raising a campaign locally for the purpose of getting funds to buy fields with the idea of getting the United States to establish an air route?

Mr. LA GUARDIA. There is no doubt about that; I want to say to my colleague from Ohio, but yet—

Mr. BEGG. If the gentleman concedes that, then he can add his "but yet" later and let me ask him one more question.

Mr. LA GUARDIA. No; let me complete my answer. But that does not relieve us of the situation in which we find ourselves, with valuable Government property in buildings on which we are not authorized to spend one cent for the necessary repairs and maintenance.

Mr. BEGG. The United States can extricate itself from that without difficulty through some other procedure than this.

Mr. LA GUARDIA. How? If you will appropriate a couple of hundred thousand dollars to build hangars and put that amendment in the bill, I will vote for such an amendment right away.

Mr. BEGG. Let me ask the gentleman my other question. If the city that was successful in the competition with other cities, and secured hangars and landing fields, is entitled to compensation from the Government, is not the city that tried

and failed entitled to damages? One is just as reasonable as the other.

Mr. LA GUARDIA. Well, I am not going to pass upon the good sportsmanship of any city, but I am interested in protecting the equipment we have, and we are taking good care of that equipment and we need it to be in safe buildings; it ought to be properly protected from the elements, and we must maintain and repair those buildings, and that is the proposition in which I am interested.

Mr. DOWELL. These buildings were erected by private individuals?

Mr. LA GUARDIA. Yes.

Mr. BEGG. And they refuse to let the Government repair them?

Mr. LA GUARDIA. The gentleman knows the Government can not do that.

Mr. DOWELL. Is it not a fact that the cities made small contributions and that the larger contributions were made by individuals?

Mr. LA GUARDIA. Yes.

Mr. DOWELL. And those contributions were made for the purpose of getting landing fields?

Mr. LA GUARDIA. There is no doubt about that.

Mr. DOWELL. They got the landing field which they paid for, and now the gentleman wants to reimburse them and does not make any argument for anything in the future.

Mr. LA GUARDIA. The gentleman wants to protect Government property; that is all. If you can find a way out of it, I will go with you.

Mr. DOWELL. I want to protect the Government Treasury instead of the hangars that were bought by the other people.

Mr. ROSEN BLOOM. Will the gentleman yield?

Mr. LA GUARDIA. Yes.

Mr. ROSEN BLOOM. In direct connection with this proposed legislation, does not the gentleman believe the time has arrived in our advancement when Uncle Sam should get a hair cut and a shave, because not only in the United States but throughout the world they seem to mistake him for Santa Claus, and I think it is about time we gave him a hair cut and a shave.

Mr. RAKER. Will the gentleman yield?

Mr. LA GUARDIA. Yes.

Mr. RAKER. The gentleman having explained about the leases, the Government holding them, will the gentleman tell the committee who built these hangars?

Mr. LA GUARDIA. These private individuals, chambers of commerce, clubs, and so on.

Mr. RAKER. Did they not contribute the money and the Government build and supervise them?

Mr. LA GUARDIA. I do not think so.

Mr. RAKER. That is an important proposition here.

Mr. LA GUARDIA. I am quite sure about that.

Mr. RAKER. Is it not true that the city contributed the necessary amount of money and the Government superintended and built the hangars on the land that the Government had leased, taking the lease in its own name?

Mr. LA GUARDIA. I think we supervised it, but, of course, we did not build them. We did not have the funds to build them at all.

Mr. BLANTON. Will the gentleman yield for one question?

Mr. LA GUARDIA. I yield to the introducer of the bill.

Mr. BLANTON. For just one question. The report filed by the distinguished scouting ace of the official flying service of the Republican steering committee shows that the inspector claims, as was shown here a moment ago, that there was no assurance given by anyone representing the Government, Mr. Jordan or anybody else, that they would be reimbursed. If the gentleman has any other information bearing on that question, does not the gentleman think it is due to the House and to the committee that is now considering the bill that the gentleman should furnish the evidence?

Mr. LA GUARDIA. Certainly.

Mr. BLANTON. The gentleman has not done that.

Mr. LA GUARDIA. The gentleman will find it in the hearings on H. R. 11723.

Mr. BLANTON. Oh, when we take up a bill here we are supposed to go on the hearings furnished with the bill, and the gentleman has not furnished us with those hearings.

Mr. LA GUARDIA. I explained in my opening remarks that we used the hearings of the previous Congress. Some of these people have had to travel a long way. The hearings were still fresh and we proceeded on those hearings. We then called the Second Assistant Postmaster General and brought them up to date.

Mr. BLANTON. Would the gentleman be kind enough to give us the name of one witness, outside of the claimants themselves, who will testify of any representations made on the part of the Government; just one witness?

Mr. LA GUARDIA. I have stated, in reply to the gentleman from Idaho [Mr. FRENCH] that it was pretty common knowledge at the time Mr. Jordan traveled throughout the country.

Mr. BLANTON. It was rumored.

Mr. LA GUARDIA. No; it was not a rumor.

Mr. BLANTON. It was hearsay.

Mr. LA GUARDIA. It was more than hearsay. It was established—it was history.

Mr. BLANTON. Well, it ought to be definite testimony.

Mr. LA GUARDIA. Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The gentleman from New York reserves 28 minutes.

Mr. BEGG. Mr. Chairman—

The CHAIRMAN. For what purpose does the gentleman from Ohio rise?

Mr. BEGG. I ask recognition in opposition to the bill.

The CHAIRMAN. Is there a member of the Committee on the Post Office and Post Roads opposed to the bill who claims recognition?

Mr. ROMJUE. Mr. Chairman, I am opposed to the bill, but if the gentleman wants to speak in opposition to the bill now, I will yield.

The CHAIRMAN. The Chair will recognize the gentleman from Missouri for one hour.

Mr. ROMJUE. Mr. Chairman, I yield 10 minutes to the gentleman from Ohio [Mr. BEGG].

Mr. BEGG. Mr. Chairman and gentlemen of the committee, I think it is probably unnecessary to spend any time presenting the merits of this proposition, because I fail to find any merits.

The Post Office Department wanted to experiment in the establishment of Air Mail Service. Congress has not made a sufficient appropriation for that purpose. They let it be known that if they could get landing fields, and in some places hangars, they would make the experiment through a particular city. According to the testimony of the claimants, and that is the only testimony we have here supporting the bill at all, in every single statement of the claimants they all say that the representative of the Government, the main representative being a certain Colonel Jordan, stated the Government was without funds, and that the only way the city of X, for instance, could have a postal service through the air was for that city of X to furnish the Government with a free landing field and hangar.

Rivalry existed between all the cities in proximity to the proposed route, and each city made an effort to put on a campaign to raise funds by various and divers methods. Some of them were popular campaigns. Everyone of us has been in such campaigns. They invited this Colonel Jordan to speak during several of the campaigns, and in his speeches, each and every time according to the testimony, he specifically stated that the Government had not appropriated any money for the purpose of buying fields and building hangars, and if the city wanted the route through its particular limits it would be compelled to furnish such facilities, and one city's possibility of securing the station was used as an inducement to spur on the other city, as evidenced by the testimony that I read to the gentleman from New York [Mr. LA GUARDIA] with reference to Cheyenne and Laramie, Wyo., in one of the campaign speeches to raise funds by popular subscription.

These funds were raised in this way, usually headed by the chamber of commerce, and the same kind of argument was used. Not a single place that I can find—and I am frank to admit I have not had a chance to review all the testimony this morning, not expecting the bill to come up—but in not a single instance, according to my memory and from what I have been able to review, can you find where a Government agent made a contract verbally binding this Government to compensate the people for their donation.

Mr. LA GUARDIA. Will the gentleman yield?

Mr. BEGG. No; I can not yield in 10 minutes. The gentleman has more time, and if he will grant me some of his time I will be pleased to yield.

Mr. LA GUARDIA. I yielded to the gentleman.

Mr. BEGG. I yield to the gentleman. I do not want to be discourteous; but I only have 10 minutes.

Mr. LA GUARDIA. The gentleman knows that no agent of the Government could possibly go out and make any kind of agreement that would bind the Government.

Mr. BEGG. I understand that, and I stated that there was not even a verbal agreement.

I would now like to read to this committee the kind of agreement that was entered into by the Government, the consideration being \$1 a year:

During the course of the investigation it was disclosed, that Mr. John A. Jordan entered into a written agreement with the community of Reno, including city and county officials in their official and personal capacity, and as quoted in full in the affidavit of Mayor Stewart, this agreement definitely sets forth that the field and hangar would be provided at the expense of the community and for the use of the Post Office Department and the consideration for this grant, to be paid for by the Post Office Department, is \$1 for the first year and \$1 for each succeeding year for a period of at least five years.

Now I submit that if a manufacturing establishment—and this used to be indulged in more or less—came to a city on a contract that if they would come to that city and establish their factory and operate the factory the city should donate them 10 acres of land tax free, there is not a court in the world that would hold that that city could come in and collect from that corporation reimbursement or assess taxes against it. That is our problem here—the identical problem. The cities contributed this gift for the consideration of the establishment of an air-mail station, and when the Government established the air-mail station I submit that we complied with all the elements in the contract. [Applause.] I am frank to say that wherever that happened I think the good faith of the city that comes and asks us for reimbursement is at question.

Mr. COLTON. Will the gentleman yield?

Mr. BEGG. Yes.

Mr. COLTON. Does the gentleman maintain that the city should keep the hangars in repair?

Mr. BEGG. No.

Mr. COLTON. This bill seeks to make it possible that they should keep it in repair.

Mr. BEGG. If that is all they want, that the Postmaster General should spend the money to improve the hangars to keep out the rain, I will tell you a simple way to do it—transfer the title to all the ground to the United States Government for the consideration of \$1; then we will repair them—but this is the most unfair proposition to my mind that I ever had referred to me.

Mr. NELSON of Wisconsin. Will the gentleman yield?

Mr. BEGG. Yes.

Mr. NELSON of Wisconsin. Does the bill authorize reimbursement for all these fields?

Mr. BEGG. Yes; for the field, the hangar, and all expenses that the Postmaster General or the Post Office Department shall decide to pay. In other words, if we pass the bill, as far as you and I are concerned, they can pay Omaha, Reno, Cheyenne, and these other cities. I do not have a station in my city, but I could get the land for the Government without any strings tied to it.

Mr. BLANTON. Will the gentleman yield?

Mr. BEGG. Yes.

Mr. BLANTON. Answering the gentleman from Utah [Mr. COLTON], he will find in the Post Office Department files leases for five years of offices for which the United States pays a dollar a year, where they not only furnish the building but every bit of equipment and furniture and keep them in repair, buildings where they could rent them to outside parties for \$3,000 or \$5,000. They ought to keep them in repair.

Mr. BEGG. There might be a bill drawn that I would not object to. I think the Post Office Department has in a few instances, not many, incurred moral obligations for a sum of money; but, as I say, this bill was called unexpectedly, and I can not find the testimony that I had last session. Now, if the statement I am about to make is not accurate, I will stand for a correction. According to my best memory, the few cities that were entitled to make a claim made their claims, and after they made their claims then these other cities all came in on the same ground when they did not have a single reason to ask for the return. Some cities that are being provided for in this bill have not even asked to be reimbursed. That is according to my best memory of the testimony.

Mr. SIMMONS. Will the gentleman yield?

Mr. BEGG. Yes.

Mr. SIMMONS. In the latter part of the report the Postmaster General's statement is—

H. R. 8261, introduced by Mr. LEATHERWOOD, provides for reimbursement at Reno, Nev.; Salt Lake City, Utah; Cheyenne, Wyo.; North Platte, Nebr.; Omaha, Nebr., or elsewhere, where such hangars were constructed and such flying fields maintained under an understanding

with an officer or agent of the Post Office Department that reimbursement therefor would be made. This bill appropriates the sum of \$175,000 or so much thereof as may be necessary to carry out the provisions of this act.

These are covered by this bill.

Mr. BEGG. They are all covered by the bill.

Mr. ROMJUE. Mr. Chairman, I yield 10 minutes to the gentleman from Mississippi [Mr. BUSBY].

Mr. BUSBY. Gentlemen of the committee, this is not a peculiar situation that we have before us, nor is it a new one. We all very well understand what enthusiasm can be aroused in a community when it is begun to be affected by any improvement. Just a few years ago, when it was first suggested that the Air Mail Service was going to be established in the United States, all the cities that thought it was possible to secure recognition and a station on the route got busy, and chambers of commerce got busy, and they stirred up the people, and they were glad and willing to provide certain facilities for a stop or station at their particular place. So they all started, in many instances and in various places, not at all according to any plan that was provided or worked out by the Post Office Department, but in a promiscuous sort of a way. They went about the proposition establishing what they conceived to be a necessary equipment for the station if the route should happen to be directed in their way. So they leased land and put forces to work grubbing off the stumps and did other things necessary to the establishment of this particular station at these places.

We have gone along, and the Post Office Department has somewhat developed a continuous plan for supplying air mail service. It now develops that a great many of these places are not in line at all with the project now being put forth by the department; and as shown by the information elicited just a moment ago from the gentleman in charge of the bill, we learn that some of these places are now being abandoned as unnecessary stations for the Air Mail Service. It is quite natural that they should come in here, since a bill has been introduced asking for authority to appropriate money out of the Federal Treasury to repay certain communities amounts they have expended, and this from the very initiation of the project. What does the bill provide? It says:

including the lease and clearing of fields therefor, insurance, and other necessary expenses incurred in connection therewith.

It will be seen, therefore, that it goes back to the beginning of the establishment of any of these fields and on down the line. It includes insurance and the other expenses that were put out by these people or by the chambers of commerce or by the cities where they appropriated the money to supply the hangar, as the case might be. I am not surprised at their coming to the Government and asking that the Government take over these propositions—useless to the Government, of course, in a number of instances; but as a Government we are able to pay, and they have no compunction of conscience about coming and asking us to include these other cities which got the benefit of the boost and the development incident to the establishment of the air mail. They now say that we should pay them back all that they have spent from the very beginning. I am opposed to any such proposition, and I gather from the sentiment expressed on the floor of the House that a large majority of the membership is opposed to the proposition. It is not a good business proposition. As the gentleman from Ohio [Mr. BEGG] just explained in detail, they have no legal claim; they got all they contracted for, all that was expected by them. Why should they now come in here and say that they want us to pay them back all this money after they got the benefit they expected?

Mr. SIMMONS. Mr. Chairman, will the gentleman yield?

Mr. BUSBY. Yes.

Mr. SIMMONS. If a representative of the Government comes and says that if certain conditions are met there is no question in his mind but that the Government will pay for that which is received, is it right for the Government to keep what it gets and say that it will not pay, even though the man that got it for the Government said that the Government would?

Mr. BUSBY. I believe that the Government ought to pay for what it contracts to pay. I do not believe that men should go about over the country presuming to bind the Government without legal authority. I do not believe that we as representatives of the Government should stand behind propositions that have never been authorized. The rules of the House recognize that, because we can not incorporate an amendment into an appropriation bill making an expenditure that has not been expressly authorized by law.

Mr. SIMMONS. But the Government has kept what it got as the result of an unauthorized act on the part of an agent, and now refuses to pay.

Mr. BUSBY. I do not know anything about what the Government has that it got in that way. If it has, then I am in favor of turning it loose. When we work out a plan for establishing the Air Mail Service and it has been passed on by the proper authorities, I am in favor of our getting behind it and paying the expenses of it, but not before.

Mr. MOORE of Virginia. Mr. Chairman, will the gentleman yield?

Mr. BUSBY. Yes.

Mr. MOORE of Virginia. Is it not a fact that in the last Congress a bill similar to the one we are now considering was before the Post Office and Post Roads and was referred to a subcommittee? Is it not a further fact that the subcommittee reported to the full committee recommending that the bill be laid on the table?

Mr. BUSBY. That is my understanding.

Mr. MOORE of Virginia. And that the subcommittee based its conclusion upon the very testimony that has been referred to here this morning? That subcommittee was strongly made up, consisting of Representatives KELLY, HARDY, RAMSEYER, SMITHWICK, and BOWLING. It seems to have been the unanimous opinion of the subcommittee that the bill ought not to receive favorable consideration.

Mr. BUSBY. I have been a member of this particular committee only about a week, and I am not advised as to what was done before I became a member of it.

Mr. TINCHER. Mr. Chairman, will the gentleman yield?

Mr. BUSBY. Yes.

Mr. TINCHER. Is not the principle involved in this bill one that would justify a citizen, if the bill should pass, in contracting with a post-office inspector to build a post office on the assumption that Congress would subsequently authorize the Postmaster General to pay for it?

Mr. BUSBY. I think the gentleman is right.

Mr. SIMMONS. And if the post-office building was constructed under the circumstances that the gentleman from Kansas recites and the Government accepted it and used it, then ought not we to pay for it?

Mr. BUSBY. I do not know of any such instance. Simply because we are either abandoning these propositions where the community has erected a hangar and where leases have expired or are of short duration, it strikes me that we are under no obligation in connection with the matter. We can not be forced into a situation that we do not want just because somebody presumes on our good nature.

Mr. LaGUARDIA. Where does the gentleman get the information that it is contemplated to pay for hangars that we are not using?

Mr. BUSBY. This bill is a blanket proposition. The limit in this bill is the sky and the extent the Treasury of the United States can supply funds.

Mr. LaGUARDIA. Does the gentleman know that it is expected to make these settlements out of existing appropriations, and not come in here and ask for additional appropriations?

Mr. BUSBY. I do not know that, nor do I know that it is expected that the Government should stand behind every proposition that some subordinate in the Government goes out and says the Government shall pay for, when he has no authority to do such a thing. [Applause.]

Mr. LaGUARDIA. Does the gentleman know that this House authorized hundreds of millions of dollars of settlements on contracts of just that kind?

Mr. BUSBY. I know that, and I know further that every time the Congress makes a blanket authorization such as is proposed in this bill the Government gets the hot end of it; and the gentleman knows it, too.

Mr. SIMMONS. When a community accepts the unauthorized act of a Government agent, ought not the Government to pay for it? The Government is accepting the use of the hangar out in my country.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. McSWAIN. Mr. Chairman and gentlemen of the committee, this seems to be another illustration of the general tendency here to encourage the people of the country to rely upon the Federal Government for everything. It is in discouragement of personal initiative and individual effort. If such things as this continue to go on, after a while the people will not want to walk from their homes out to the road to get their mail.

This is what happens down in our country sometimes when a community wants a new rural route established. The in-

spector goes over it and says, "Well, there is too poor a bridge over this creek, and there is too bad a road over this hill; but if you fellows will warn out the workers and fix the bridge and fix the road and keep it fixed, we will recommend the route." Then the people go out with their plows and scrapers and hoes and shovels and hammers and nails and improve the road and repair the bridge, and then the route is established. If this bill should go through, we would find those people coming here with a bill, asking to be reimbursed for that which they have voluntarily contributed to the Government.

Why, gentlemen, people used to do something for themselves. All the old monuments and statues in this city were erected by individual subscriptions. Go up Pennsylvania Avenue and you will see there a marble monument to old Benjamin Franklin, one of the founders of the Republic and one of the promulgators of republican principles throughout the world. It is now crumbling through the wasting processes of time and weather. You will see that that monument was donated to the National Capital by an individual citizen. If you will read this morning's papers, you will see that the Secretary of State has recommended the appropriation of a thousand dollars to buy a replica of the Houdon statue of George Washington to be placed down in the Pan American Building.

Times have changed. The incomparable monument to George Washington was fathered by individual subscriptions at the outset, and Edward Everett, the preeminently eloquent orator, went through the country with a spirit of patriotism and tongue of flame asking the people, who then were comparatively poor, to raise such a monument to the Father of his Country, and the people raised something over \$250,000. Finally the monument was finished by congressional appropriation.

The gentleman from New York [Mr. LaGUARDIA], who was the chief spokesman for the committee here, said that his sole interest is to preserve the property of the Government from deterioration while it is lodged for a day or two in these hangars. I would suggest to him a way in which it may be done without the appropriation of a single dollar. Convey to this city of Cheyenne, or whatever other name the city has, this suggestion, that if the city does not keep in order the hangar that is put there as the result of the contest between that city and other cities on the great transcontinental route another route will be opened there and some other city will get the landing field. No doubt the fact that the cities are included in that transcontinental route is printed on the letterheads of the chamber of commerce of each of those cities. No doubt it is a big asset to all these cities. It is one of the boosting features. At every meeting of the boosters' club the members doubtless boast about the participation of the city in the transcontinental mail route. Just tell them that if they do not stop the leaks in the roof they can no longer boast of their participation.

Mr. LaGUARDIA. Suppose they call our bluff. What then?

Mr. McSWAIN. Then we will put it at Laramie, under a bond that they will keep it in order; and if they do not keep it in order, then we will skip Laramie and go somewhere else.

Mr. LaGUARDIA. It is necessary to understand that they must have a landing field.

Mr. McSWAIN. If they do not want the air mail, then they can go without it. Other cities are begging for air mail service and are willing to foot the bills for landing fields and hangars.

Mr. LaGUARDIA. Mr. Chairman, I yield five minutes to the gentleman from Iowa [Mr. DOWELL].

The CHAIRMAN. The gentleman from Iowa is recognized for five minutes.

Mr. DOWELL. Mr. Chairman, this bill by its terms provides only for the reimbursement to those who have made contributions for the landing field of the Air Mail Service. It makes no provision whatever for any program or plan for the future of the Air Mail Service.

These contributions were made by the citizens of these various cities who desired the Air Mail Service, and while the bill provides for adjustment and payment to "municipalities and citizens found to be entitled thereto" I doubt if any city government appropriated money for this purpose. Anyway, the gentleman from New York [Mr. LaGUARDIA] has answered that most of these were private subscriptions. The Postal Department evidently understood that these contributions for the landing fields and hangars were made for the purpose of securing these landing fields in these various cities. I quote from the speech of Congressman Jefferson, from the State of Nebraska, on the 8th of January, I believe it was,

of 1921, where he quotes from the report of the Postmaster General; and I read as follows from that speech:

What is the fact in regard to the Air Mail Service?

That was the question then before the House, and Mr. Jefferis from Nebraska was attempting to show that the Government should continue to appropriate money for the carrying on of the Air Mail Service. He continued:

It is not propaganda in favor of it that is being put forth, as I understand it, but an earnest desire is being expressed by the business men of the great commercial centers of the United States. If you will refer to the report of the Postmaster General you will find that different cities of the country are raising or have raised, through subscriptions, large sums of money for the purpose of furnishing to the Postal Department landing fields and hangars for the operation of these air mail planes. In the city of Omaha, the report says that the commercial interests have cooperated splendidly with the Air Mail Service by furnishing a large landing field, and perhaps the largest civilian hangar in the United States.

The report of the Postmaster General in 1921, if Mr. Jefferis was correct, had no understanding that the Government would be called upon to reimburse the men who had furnished these fields for the purpose of operating the Air Mail Service.

It seems to me that at least in the interest of the Treasury of the United States Congress should accept the situation as it was evidently understood by the Postmaster General in 1921—that these were donations for the purpose of establishing mail routes through certain cities. [Applause.]

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. ROMJUE. Mr. Chairman, I yield 10 minutes to the gentleman from Texas [Mr. BLANTON].

The CHAIRMAN. The gentleman from Texas is recognized for 10 minutes.

Mr. BLANTON. Mr. Chairman, during the war, when cantonnments and various fields in the service were being established by the War Department, you found cities everywhere clamoring for recognition. They were offering to the Government every kind of an inducement imaginable to place an enterprise in their locality. They were offering great bodies of land and various other improvements connected with it absolutely free of charge. Why? They wanted the Government's money expended in their community on a Government enterprise, so they could profit by it financially.

Every time the State of Texas establishes a new normal school or other State college the legislature advertises for bids by various communities, and those communities raise funds by popular subscription among their citizens and offer so many acres of land—sometimes hundreds of acres and sometimes even into the thousands—to get the State to put that particular school in their community, because they want to profit by the expenditure of public funds in their community.

And when the Postmaster General was thinking about running this air mail service across the continent various towns and communities were interested in getting stations, and they made overtures to the department and said that the people would donate such and such property and make such and such an inducement for the Government to come there. You had rivalry between these cities. The Government accepted various of their propositions and went their way, and now, because the Government sees fit to go some other way, they want the Government to come in and pay for it.

Why, right now down in the Postmaster General's department you will find contracts with some of my constituents who furnish to the Government post offices at a dollar a year, where the post office, all the furniture, all the fixtures, and all the lock boxes, if you please, are kept in repair at the community's expense for so many years at a dollar or some other nominal consideration a year.

Are those buildings leaking? If they are, the Postmaster General says "You get busy and fix that roof; don't you let any more water come in," and they have to do it. For all of that they get \$1 a year. Why do we not reimburse them for some of those leases? If they could get rid of the Government just now, some of those leases could be made for several thousand dollars profit in all towns where there is a great demand for buildings. But the community and the parties in interest are tied up by a contract with the Government for \$1 a year.

Of all the ridiculous bills that I have seen come on this floor in the eight years of my service, whose enacting clause should be stricken out more than any other, this particular bill ought to have that kind of a surgical operation performed on it in a few minutes. I think the gentleman from New York [Mr. LAGUARDIA] ought to make that motion to strike out its enacting

clause. [Laughter.] I do not think this kind of a bill really appeals to him. If you could put your fingers on his bosom now and feel the real articulation of his heart throbs, I think you would find they would beat the other way and be against this bill. It is taking money out of the Treasury when it ought not to be taken out. It ought to stay there.

Mr. WEFALD. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. WEFALD. Does not the gentleman think that when the Committee on the Post Office and Post Roads has left it to the gentleman from New York [Mr. LAGUARDIA] to champion this bill on this floor—

Mr. BLANTON. He has championed every bill they have brought in at this new session.

Mr. LAGUARDIA. No; I have not.

Mr. BLANTON. The RECORD will show that he has been in control of the time here and that he has been at that desk pushing them through.

Mr. LAGUARDIA. No. The Post Office Committee is composed of very active members.

Mr. BLANTON. I am not complaining. I think the gentleman is about the best material they could find to put in charge of these bills, that is, this particular kind of bill.

Mr. LAGUARDIA. May I ask the gentleman this question?

Mr. WEFALD. May I complete my question? Does not the gentleman think this is a part of the punishment that is going to be inflicted on men like the gentleman from New York under a resolution passed by the National Republican Committee?

Mr. BLANTON. They are going to punish him after a while. He does not know it, but they are going to punish him later.

Mr. LAGUARDIA. The gentleman will take care of himself. The gentleman does not need to worry about that.

Mr. BLANTON. You know that in another body somewhere—I am not saying what body it is—they let a new Member come in and walk up to the front and take a prominent seat and stay there just two or three days, and then unceremoniously they take him back and seat him in the rear, and you know how they do it. That is about what this steering committee is going to do with the gentleman from New York.

Mr. LAGUARDIA. They will not take the gentleman off of the Committee of the Whole.

Mr. BLANTON. They are putting him in charge of bills which they do not want to get behind themselves. They do not want to father these bills, and they are putting them off on him. They are using our friend from New York as the head of his new party as their cat's-paw to pull these chestnuts out of the fire for them.

Mr. LAGUARDIA and Mr. MACLAFFERTY rose.

Mr. BLANTON. I yield first to our genial friend, the gentleman from New York.

Mr. LAGUARDIA. Of course, the gentleman is not serious when he says that the great Republican Party is using the new party to pull its chestnuts out of the fire. Of course, I can understand the readiness of the Republican Party to seek inspiration and new thought from the new party, and that is all. But let us get back to the question. The gentleman is very active on the floor of this House and takes a keen interest in all legislation. Assuming that this bill will meet its fate within a few minutes, does the gentleman realize we will have to come in and ask for an appropriation for landing fields and hangars?

Mr. BLANTON. I would rather do that, if it is necessary. Then we would know what we are doing. We would know how much we are spending. If the Postmaster General is going to conduct an air service, then let us give him definite money to locate his own air service, build his own hangars, and make his own plans. I would rather vote for that than to support this bill.

Mr. LAGUARDIA. That is what would happen.

Mr. BLANTON. But I will not vote for a blanket bill like this that will let the Postmaster General have open sesame through the front door of the Treasury and obligate public money to be paid out in unlimited amounts. You have taken out the limitation of \$175,000 from the bill and you leave this bill so that he could expend in settlements \$175,000,000 and we would be bound by those settlements. The gentleman from New York would say that the Government must pay its debts and that the Postmaster General was authorized by an act of Congress to make the settlements and that we must pay them, and the gentleman would insist upon appropriating the money to pay them.

I now yield to the gentleman from California.

Mr. MACLAFFERTY. The point of my question has almost gone, but I will say to the gentleman that I was interested in his statement of the treatment accorded the gentleman from

New York by the steering committee, and I wanted to know if the gentleman does not think that after putting him in charge of bills like this they sometimes turn around and fight him when he gets on the floor. I am for this bill and am going to vote for it. I believe in it.

Mr. BLANTON. I knew the gentleman was. I assumed that almost every man, probably, from the Pacific coast would vote for it.

Mr. MACLAFFERTY. No; I do not think so. I see opposition on the floor of this House to the bill from the Pacific coast.

Mr. BLANTON. Well, thank God for that.

Mr. MACLAFFERTY. I will agree that my support of the bill may be wholly mistaken, but it is entirely conscientious.

Mr. BLANTON. The gentleman thinks that locality and coveted air mail service across the continent for Californians has nothing to do with it?

Mr. MACLAFFERTY. No; but I see from the record of this House so many instances where just claimants against this Government are treated outrageously that I have said I would almost rather have a claim against his satanic majesty and have to go to heel to collect it than to have a claim against the Government of the United States.

Mr. BLANTON. I have seen so many bad bills passed by Congress almost without reading them that I feel just the other way. My sympathy is with the Government. My sympathy is with the people's Treasury. My sympathy is with the taxpayers. My sympathy is with the women and the little children who in the hot sun follow the plows out in California, in that Imperial Valley, and elsewhere over the United States, trying to pay the big interest and the big rentals they have to pay, where the land is worth from \$200 to \$300 an acre and on up. They are trying to make ends meet by working an entire year and sometimes not making more than \$400 or \$500 income from a whole year's work. It is from the angle of their viewpoint that I am inspecting these bills.

Mr. LAGUARDIA. Mr. Chairman, I yield 20 minutes to the gentleman from Utah [Mr. LEATHERWOOD].

Mr. LEATHERWOOD. Mr. Chairman and gentlemen of the committee, I am glad to have this opportunity of saying a few things with reference to this bill before this committee.

The bill as reported out with the amendment by the Committee on the Post Office and Post Roads merely contemplates, if I understand the language, giving authority to the Postmaster General to ascertain what the facts were surrounding the building of these hangars at various points; and in cases where there was a moral obligation on the part of the Government to make settlement, to make some sort of adjustment with the people who contributed the money.

Mr. RAKER. Mr. Chairman, I think I shall have to make a point of order. It seems there is going to be a motion to strike out the enacting clause; and if that is the case, there ought to be some more Members here to hear the gentlemen who know something about the bill.

Mr. LEATHERWOOD. I will ask the gentleman not to do that.

Mr. RAKER. I withdraw it.

Mr. LEATHERWOOD. The bill, as originally framed, gentlemen, contemplated including four or five cities where it was believed the facts surrounding the transaction at each of the cities were very similar. I want to say at the very outset, gentlemen, I can bring you no additional information other than that found in the printed reports and the hearings, except as to one particular city where I believe I know exactly what the facts were. I refer to Salt Lake City. I also want to say at the very outset that the State of Utah is not asking a dollar from the Government. The city of Salt Lake is not asking a dollar from the Government and expects not a dollar if this legislation should be enacted. The Chamber of Commerce of Salt Lake City expects not a dollar from the Government if this bill should be enacted.

After I have presented to you as briefly as I may the facts under which certain individuals contributed very substantial sums of money to the Government for the construction of the hangar at Salt Lake City I believe you will agree with me that some of the conclusions which gentlemen have reached here upon the floor of the House, apparently without any knowledge of the facts in the individual cases, are unwarranted.

Mr. ROMJUE. Will the gentleman yield?

Mr. LEATHERWOOD. Will the gentleman allow me to proceed with my statement of facts, and then a little later I will be very glad to yield to the gentleman and answer any questions?

I have listened with considerable interest to conclusions reached here by various gentlemen during the debate upon this bill; and if they are right as to their assumption of facts, I am not at variance with their conclusions; but I have heard two or three gentlemen this afternoon making positive statements here as to what the facts were surrounding this bill, that I am constrained to think are greatly misinformed as to what transpired.

As I stated a moment ago, I must confine myself to the city where I believe I know what the facts were, and let me say to the gentlemen from Texas who questioned whether there was a man upon the floor of the House who knew of his own knowledge what transpired that I think I can give him that information with reference to my city.

I want you to understand at the outset that Salt Lake City was not bidding for the erection of the hangar prior to the entry upon the scene on the part of the Government. From my own knowledge, I know that no individual or any chamber of commerce had any thought of bidding for the location of a hangar at that place. There appeared on the scene in 1920, Col. John A. Jordan, claiming at that time that he represented the Post Office Department of the United States, and no gentleman here has had the temerity to deny that he was representing the Post Office Department. He immediately got in touch with some of the business men of Salt Lake City through the chamber of commerce, stating that he was there on an emergency matter, that it was the intention of the Post Office Department to have the western air-mail route across the country established and to provide for it, and there would have to be quick action because of the urgent necessity of the Government. I am informed and believe that this same gentleman went to the county commissioners of Salt Lake County and asked them to provide the land for the landing field where there could be erected a hangar to care for the planes at Salt Lake City. The county commissioners consulted the county attorney, who informed them that they had no authority to appropriate a dollar of the taxpayers' money for that purpose. At the same time Colonel Jordan positively represented to certain business men that if they would meet this emergency, advance the money for the construction at once of the hangar, that as soon as he got back to Washington he would take the matter up with the Post Office Department and Congress, which was to meet soon—this was in the fall of 1920—and see that the business men would be reimbursed for every dollar they advanced for the construction of this hangar. Now, that is not disputed. It was admitted by the late Mr. Shaughnessy, Second Assistant Postmaster General, who made an investigation at my request, and found that Colonel Jordan did make the representations as I have stated.

I happened to be present accidentally at one meeting. I think the second or third day after Colonel Jordan made his appearance in the city, when he was discussing the urgency and the great necessity of the building of this structure, and in my presence he positively stated, without any equivocation, that if these business men would advance this money every dollar of it should be repaid. Nobody has ever denied that that statement was made, and two Postmasters General and one Assistant have admitted that these representations were made in substance as I have repeated them here to you.

Now, what happened on account of this investigation and with these assurances, not for the purpose of advertising that city, but believing that there was a necessity for this immediate construction, the money was advanced by several business men. One gentleman, the head of a hardware firm, furnished considerable of the material. They immediately caused to be constructed a hangar involving an expense of nearly \$10,000. This gentleman I speak of furnished the bulk of the material, and that, together with other credits that he had given, caused him to fail, and it was largely because of the large sum which he had advanced in this manner.

Now, in addition to that, the citizens of Salt Lake bought and paid, in round numbers, \$9,000 for the landing field. We are not asking one red cent from this Government to be paid back to anybody for the \$9,000 field. That, gentlemen, was a donation; and I want to say to you that the people out there do not give money for any purpose and then come to Congress and ask to have it handed back to them.

But we do believe the same rule of action, the same laws that apply between individuals should apply between the Government and an individual doing business with the Government. I am amazed to hear gentlemen versed in the law, who have not only a State but a national reputation as attorneys, make a statement and state conclusions here which as prac-

being attorneys they would not dare go back home and put into practice among the citizens in their district.

When this building was nearly completed—and up to this point the citizens were erecting it—the Government came in through another of its agents—a Captain Hinckley, I think—and said we must have certain doors on this building. The money put into the fund by citizens had been exhausted; and then, through the agent, who had the same authority that Colonel Jordan had, the Government went to the Campbell Construction Co. and authorized them to go ahead and put on top of that work certain additions, the building of certain doors and a wing room to protect the parts. The Government paid to the Campbell Construction Co. for that at one time \$3,200. Various modifications were made on the main building. In addition to that, the Campbell Construction Co. was instructed to build an office and storeroom in the immediate vicinity. That was built and paid for by the Government, and the contract was made by a gentleman who had no greater authority than Colonel Jordan.

Mr. RAKER. Was that change of construction and additions paid for by the Government?

Mr. LEATHERWOOD. It was paid out of Government money, because they had exhausted the fund that was furnished by the citizens.

Mr. NELSON of Wisconsin. And erected on private property?

Mr. LEATHERWOOD. On property that at every moment of time the citizens have been willing to give to the Government without asking a penny for it. In any way that the Government wants to take dominion of that landing field it may do so for the asking, but all these people want is that the Government shall keep its agreement.

Let us see now why the Government should keep the agreement. I ask you gentlemen who are practicing attorneys, who are practical business men, to follow me for a moment and see whether this is all a one-sided question. Early in the spring of 1921 this whole situation was brought to the attention of the Government. An investigation was made first by Mr. Shughnessy and later by his successor in office. As I stated in my opening remarks, they found that these representations had been made. You who have so glibly drawn some conclusions here, I ask you what, in equity and good faith, the Government should have done when this matter was brought to its attention, if Colonel Jordan acted without authority and the Government did not intend to keep its agreement with these citizens?

In business life and in the conduct of the business of your clients, you would say that one could not send out an agent and have him do something without authority, get property into his possession or under his dominion and then say that the agent had no authority but that the principal would keep and enjoy the fruits of his agent's unauthorized act. This great Government in the spring of 1921 ought to have said to these men in Salt Lake City, "We find upon investigation that this man had no authority," and then have turned back and ceased to possess and use the property. Did the Government do that? Not by any means. It kept on improving the property and at every minute of time since that moment it has had possession and use of this particular building.

Mr. GARRETT of Texas. Mr. Chairman, will the gentleman yield?

Mr. LEATHERWOOD. Yes.

Mr. GARRETT of Texas. Does not the gentleman think, however, that to meet the situation that he presents it would be better to have a private bill for relief of the particular persons rather than general legislation?

Mr. LEATHERWOOD. I think the gentleman and I are not very far apart upon that theory. This bill has been greatly modified since I presented the question on behalf of these people. I do not see that there is the danger in it that some of you gentlemen anticipate, but I do say that there is an opportunity here for the Government to do justice, and I think without any risk to the Treasury of the United States or to anybody concerned.

Briefly, those are the facts surrounding the advancement of the money in this particular place. I challenge any gentleman to produce any evidence that this particular city was bidding for this hangar in order to advertise itself for any purpose whatsoever. True, it has been claimed by one or two that that was the case. I think at one time before one of the committees, one of the post-office officials stated that it was located at this particular point because it was the home of the senior Senator from my State, but to show you how accurate that gentleman was, as they usually are, he did not know that Salt Lake had never been the home of the senior Senator from the State of

Utah, and that he had never had a home established under 50 miles from the city where the building was located.

Mr. WILLIAMSON. Mr. Chairman, will the gentleman yield?

Mr. LEATHERWOOD. Yes.

Mr. WILLIAMSON. I think the gentleman has made out a perfectly good case for his own city, but would it not be possible to fix a limitation in this bill beyond which the Post Office Department could not go? Here is a bill without any limitation whatever.

Mr. LEATHERWOOD. I appreciate that there is much force in the gentleman's suggestion, and I am limiting my remarks to this particular locality because I know what the facts are. I do not know what the facts are that surround these other points. There are gentlemen here who represent the districts in which some of these buildings are located who can speak more to the point in respect to the facts in those cases, but I want to present to you the facts with reference to Salt Lake City. I resent having the people in my district put in a position where it would appear they gave the Government something and now are trying to get it back. We do not grow that kind of people in my country.

Mr. ALLGOOD. Does the gentleman know why the bill was changed?

Mr. LEATHERWOOD. Oh, I have some idea.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield?

Mr. LEATHERWOOD. Yes.

Mr. LAGUARDIA. In reply to the suggestion made by the gentleman from South Dakota [Mr. WILLIAMSON] why the amount was stricken out, permit me to say that it was because we know that we can keep it below that amount; but if the committee desires to limit it to \$175,000, we feel confident we can make all the settlements within that amount.

Mr. LEATHERWOOD. I would not have asked for time this afternoon except for one purpose, and that is to put these business men out there right before this legislative body. Whatever the story may be some place else, I say to you there is not a scintilla of evidence to show that the conclusions drawn here against that little group of business men have any foundation in fact, and if they have no foundation in fact, then are you going now to do something that you would not dare go home and do as practicing lawyers representing clients in your district. Common honesty is just as important as between the Government and individuals as it is between individuals.

Mr. BUSBY. Mr. Chairman, will the gentleman yield?

Mr. LEATHERWOOD. Yes; for a question.

Mr. BUSBY. The argument of the gentleman has been a legal argument. Does the gentleman contend that the Government of the United States is ever bound except by its express authority?

Mr. LEATHERWOOD. Oh, I have had that question asked very often, but two Postmasters General, two Assistant Postmasters General, the superintendent of the great transcontinental air line, say that the Government is morally bound and that this legislation or something like it should be passed to do justice.

Mr. BUSBY. Is not this purely a question of agency, and is it not necessary always for the individual acting with the agent to prove the agent's authority, and that can not be done here?

Mr. LEATHERWOOD. Oh, yes, my young friend; but you have practiced law long enough, I have no doubt, to know that you can not come in and take advantage of the fruits of the unauthorized acts of your agent and enjoy those fruits and then deny the authority. [Applause.]

Mr. BUSBY. Does not the gentleman recognize that this act is ultra vires, beyond any authority?

Mr. LEATHERWOOD. I do not care what it was. The Government had its opportunity to play fair and it did not. It has kept the property and used it and enjoyed it, and now this House is about to say it will not let the Post Office Department pay because Jordan did not have authority.

Mr. BUSBY. Is this the first time the Government has ever been called upon to pass upon the proposition from a governmental standpoint?

Mr. LEATHERWOOD. Not by any means. It has been pressed before the great Post Office Department since the early spring of 1921. It has been before the Committee on Post Offices and Post Roads.

Mr. BUSBY. Does the gentleman contend that the Post Office Department can bind Congress and the lawmaking bodies of our Nation to perform under such circumstances?

Mr. LEATHERWOOD. The gentleman has not followed me. I say that morally and in equity and good conscience this

Congress should give the Post Office Department authority to do equity and to do justice as between these business men and the Government. [Applause.]

The CHAIRMAN. The time of the gentleman from Utah has expired.

Mr. ROMJUE. Mr. Chairman, I yield five minutes to the gentleman from Texas [Mr. BLACK].

The CHAIRMAN. The gentleman from Texas is recognized for five minutes.

Mr. BLACK of Texas. Mr. Chairman, I think the gentleman from Utah [Mr. LEATHERWOOD] in his excellent argument for his side of the question has overlooked one important consideration, and that is this: The Post Office Department has no power to erect buildings or construction of that sort without congressional action, but it does have power to make leases. For example, the Post Office Department has no authority to go down into my town and build a post-office building without the express authorization of Congress, but it does have the power, when it needs mail facilities, and it not only has the power but it has the resources to go down in my town and lease a building for that purpose.

I dare say that the Post Office Department now holds that flying field at Salt Lake City under a lease. I guess the consideration is probably \$1 a year. But it is holding it, and I want to propound this interrogatory to the gentleman from Utah, and ask him if I am not stating the facts correctly when I say the Government does now hold the property at Salt Lake City under a lease. Is not that correct?

Mr. LEATHERWOOD. In an attempt to try to do something in a way to repay these good people in the last few years they have been paying a rental upon that field. All that has been credited to the money expended, and the balance would be all that they would expect.

Mr. BLACK of Texas. Yes; I thought so. But if we had been moved a while ago by the eloquent remarks of the gentleman from Utah I fear we would have thought that the Government of the United States had gone in there as a trespasser and by force of arms was holding on to something which it had no right to hold.

Mr. RAKER. Mr. Chairman, will the gentleman yield?

Mr. BLACK of Texas. Yes.

Mr. RAKER. As a gentleman familiar with it and as a good lawyer, does the gentleman advise the committee that the Post Office Department had the right to lease these premises for the purpose for which they were used?

Mr. BLACK of Texas. Undoubtedly; of course it had.

Mr. COLTON. The gentleman understands that the lease money is for the hangar and not the land?

Mr. BLACK of Texas. I have not examined the lease.

Mr. LEATHERWOOD. As a fact, we are not getting a cent for the \$9,000 field, and we will never ask a cent.

Mr. BLACK of Texas. I do not know what the consideration of the lease is, but I dare say that the Government holds the lease to the land and all the improvements.

Now, whether or not it is paying sufficient consideration is not for me to say, but it is holding the property under a lease. Yes, a voluntary lease, under which there was an agreement by the Post Office Department and the owners of the property that the Government was to have the use of the property for the consideration therein named.

Mr. RAKER. Will the gentleman yield for another question?

Mr. BLACK of Texas. Yes.

Mr. RAKER. The gentleman is familiar with the subject, and we would like to have the information. The gentleman having answered, and everybody conceding, that the Government had the power to make the lease legally, how can the Government get out of paying for the material that goes on the leased premises obtained by one who claims to be an agent of the Government and the Government afterwards actually using that property?

Mr. BLACK of Texas. I will answer by saying that the Government did not lease these fields until the improvements had been made. That was the proposition. Representatives of the Post Office Department went down there and told the people that we were now about to begin the operation of an Air Mail Service that would be a great Nation-wide asset, and in order to do that we have got to have landing fields and we have got to have hangars; and they said to those people, "You construct them. We have not the money to do that. The appropriation from Congress is not sufficient to do it; but if you will do this for us, then we will make your city one of the landing fields on the route."

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BLACK of Texas. Will the gentleman yield me about three more minutes?

Mr. ROMJUE. Yes.

The CHAIRMAN. The gentleman from Texas is recognized for three minutes more.

Mr. BLACK of Texas. Now, here is the trouble with this bill.

Mr. SIMMONS. Mr. Chairman, will the gentleman yield right there?

Mr. BLACK of Texas. I want to complete this statement first, and then I will yield. You can take the view that the Salt Lake City item, for example, is a meritorious one. You can adopt that view. But if you do that and will read this bill, you are bound to adopt the view that it is too loosely drawn and will permit the settlement of claims that ought not to be allowed.

Mr. JOHNSON of Washington. And the invitation of other claims.

Mr. BLACK of Texas. Yes. Not only an invitation for other claims, but the bill contemplates them.

Now, let us read the report made by the distinguished gentleman from New York [Mr. LaGUARDIA]. As to Reno, Nev., it contemplates that a settlement will be made with that place for \$41,000. Now let us see about Reno, Nev. Whatever may be said as to the merits of the Salt Lake City claim, I do not see how anyone can read the hearings and say that Reno, Nev., has any equitable claim. Why do I say that? Let me read you the written proposition that Reno, Nev., has submitted through its mayor and committee of citizens:

The community of Reno, Nev., which includes the city and county officers in their official and personal capacities and the leading citizens of the community, hereby offer to the Aerial Mail Service of the United States Post Office Department the use and occupancy of an aerial landing field, dimensions not less than 2,600 feet north and south and 2,300 feet east and west, as a landing field for Aerial Mail Service.

And then it goes on and makes a further description. The consideration of this grant to be paid by the Aerial Mail Service of the Post Office Department is \$1 for the first year, and \$1 for each succeeding year for a period of at least five years, and so forth. It is signed by the mayor and leading citizens of that place.

Yet the bill contemplates that we reimburse the city of Reno, Nev., to the extent of \$41,000, notwithstanding their mayor and their committee of citizens sent a written statement to the Government—to the Post Office Department—to the effect that "If you will establish this route and make Reno, Nev., a landing field we will construct the landing field, and construct a hangar, tender you the full use of it, and all you will have to pay us for it is \$1 a year for five years." I submit this bill ought not to pass. If these are just claims, let them be submitted to the Committee on Claims and take their regular course. I shall vote to strike out the enacting clause of this bill.

The CHAIRMAN. The time of the gentleman from Texas has again expired.

Mr. ROMJUE. Mr. Chairman, I want to use about five minutes of my own time.

The CHAIRMAN. The gentleman has 11 minutes remaining.

Mr. ROMJUE. I want to call the attention of the committee to this situation: That here is a large number of claims, a multiplicity of claims, which this bill proposes, if enacted into law, to pay in one block or lump sum. I conceive that if there is merit in some of these claims there may not be merit in some of the other claims. If this becomes a law, you provide for the payment not only of those listed in the hearings, but God only knows how many other claims of similar character may arise and confront the Postmaster General.

In the first place, authority is given to the Postmaster General to settle all of these claims and pay any of them any amount under the sun he sees fit to pay them.

The gentleman from Utah made a very able discussion from the standpoint of his individual case, but he is not punished by this bill not becoming a law, because the avenue of the Court of Claims is open to him. He can introduce a private bill, have it referred to the Claims Committee, and then have that committee pass it on to a court of justice or even have it enacted into law by this House, if it is meritorious. Now, my good friend ought not to complain of such a process. He could have a private bill come up separately and have it enacted into law by this House. The gentleman himself said he does not know about the merits of these other claims, and in that he is en-

tirely honest, because he does not. And, as I said a moment ago, there is a multiplicity of claims, and the Postmaster General will not only have to meet the claims that come up here but very likely there will be other claims come up demanding payment.

Blanket authority is given to the Postmaster General to pay out not \$100,000, not \$50,000, but the sky is the limit. He can pay any amount he desires to pay; and, in the face of that and when gentlemen favoring this bill confess upon the floor of this House that they do not pretend to know the equities and justice in the other claims coupled together here, I submit it is a dangerous precedent for this Congress to vote authority to the Postmaster General or to any other single individual to liquidate and pay claims brought against the Government, the number of which are unknown and the amounts and merits of which are unknown. I do not believe this bill should pass, especially in view of the fact that the defeat of it at this time does not deprive any just claimant of any rights he may have.

Now, the gentleman said a private subscription was made by the citizens of his town, but, so far as the report goes, all of the claims listed in the report are filed in the name of the municipalities.

Authority in this case, my friends, was specifically denied to Mr. Jordan. The Government specifically said, "You must not attempt to bind the Government in these matters" to the extent which the gentleman now claims the Government is bound. When the Government goes that far, I submit to you that it is our duty to somewhat look after, and particularly at this time, the interests of the taxpaying citizens of the country.

Then is there not a duty upon the individual citizen who makes contracts even with an agent of the Government? Is there not some duty upon him to make some investigation and to enter into a contract, if any, about which there can be no cavil or dispute in the future?

The CHAIRMAN. The gentleman has consumed five minutes. Mr. ROMJUE. I desire to use a moment or two more. What Member of this House will invest \$10,000 of his own money without having some contract to show under what terms the money is invested? Not one of them. What private citizen anywhere, in Utah or elsewhere, will take his own estate and tie it up—\$10,000 or \$20,000—and then have nothing to show except what is alleged to be a verbal assurance of some Government agent, and that assurance directed specifically by the Government not to be given? Is there a moral obligation there on the part of the Government? I think not. If there is, gentlemen of the committee, a moral obligation on the part of this Government to pay individual citizens who choose to recklessly and negligently invest their own capital or put it out without evidence to show how it is put out, then I submit there is some moral obligation on the individual citizen to go into the Court of Claims and not ask this body to pass a blanket bill providing for the payment of a large number of claims, many of which, in my opinion, may be unjust and inaccurate. No claimant has yet otherwise said than that he does not know how many claims are involved. If those who ask this to become a law, who confess they do not know as to the merits and amounts of all claims, is it not unwise to say the Government should pay them?

Mr. GARRETT of Texas. Will the gentleman yield?

Mr. ROMJUE. Yes.

Mr. GARRETT of Texas. If this precedent is to be established, then why not give the same blanket authority to the Secretary of War and the Secretary of the Navy to settle the multiplied thousands of dollars worth of claims now pending before the War Claims Committee and the Claims Committee, claims growing out of war activities and claims for damages to land and property and everything else. Why not give the same blanket authority?

Mr. ROMJUE. I see no difference in that. And, moreover, the denial of the enactment of this proposed legislation into law does not deprive, if the Chair please, individual citizens who may have a just claim from asserting their rights and having them allowed in another way, but not through the House itself. This bill should, in my opinion, be defeated by striking out the enacting clause. [Applause.]

The CHAIRMAN. The Clerk will read the bill for amendment.

The Clerk completed the reading of the bill.

Mr. ROMJUE. Mr. Chairman, I move that the enacting clause of the bill be stricken out.

Mr. LA GUARDIA. Mr. Chairman, I move that the committee do now rise.

The CHAIRMAN. The question is on the motion to strike out the enacting clause.

Mr. LA GUARDIA. Mr. Chairman, a parliamentary inquiry. I have offered a motion that the committee rise.

The CHAIRMAN. That is a preferential motion. The question is on the motion of the gentleman from New York [Mr. LA GUARDIA] that the committee do now rise.

The motion was rejected.

The CHAIRMAN. The question is on the motion offered by the gentleman from Missouri to strike out the enacting clause. The motion was agreed to.

Mr. ROMJUE. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with the recommendation that the enacting clause be stricken out.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. TILSON, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill S. 1051 and had directed him to report the same back to the House with the recommendation that the enacting clause be stricken out.

The SPEAKER. The question is on agreeing to the recommendation of the committee that the enacting clause be stricken out.

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. RAKER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. RAKER. A point of no quorum would bring a vote now?

The SPEAKER. Yes.

Mr. RAKER. I make the point of no quorum, Mr. Speaker.

The SPEAKER. The gentleman from California makes the point of order that no quorum is present. The Chair will count.

Mr. RAKER. Mr. Speaker, I withdraw the point of no quorum. They are all here anyhow. [Laughter.]

The SPEAKER. The ayes have it, and the House agrees to the action of the committee.

On motion of Mr. BLANTON, a motion to reconsider the vote by which the action of the committee was agreed to was laid on the table.

MAIL-EQUIPMENT SHOPS

Mr. GRIEST. Mr. Speaker, by direction of the Committee on the Post Office and Post Roads and in the absence of the chairman of the subcommittee having charge of the bill, I call up the bill (H. R. 6353) to authorize the Postmaster General to grant sick leave to employees of the mail-equipment shops.

The SPEAKER. The gentleman from Pennsylvania calls up a bill which the Clerk will report by title.

The Clerk read the title of the bill.

The SPEAKER. This bill is on the Union Calendar. The House automatically resolves itself into Committee of the Whole House on the state of the Union, and the gentleman from Michigan, Mr. MAPES, will please take the chair.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of H. R. 6353, with Mr. MAPES in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 6353) to authorize the Postmaster General to grant sick leave to employees of the mail-equipment shops, which the Clerk will report.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Postmaster General be, and he is hereby, authorized and directed to grant to employees of the mail equipment shops, sick leave with pay at the rate of 10 days a year, exclusive of Sundays and holidays, to be cumulative for a period of three years, but that no sick leave with pay in excess of 30 days shall be granted during any three consecutive years: *Provided,* That sick leave shall be granted only upon satisfactory evidence of illness and if for more than two days the application shall be accompanied by a physician's certificate.

Mr. GRIEST. Mr. Chairman, this bill speaks for itself. I do not see how there can be any difference of opinion with regard to it. Sick leave applies to every other bureau and department in the Government, I understand, with this exception. It is recommended by the Post Office Department and I think merits the immediate approval of this House.

The CHAIRMAN. If there is no further debate the Clerk will read the bill for amendment.

The Clerk concluded the reading of the bill.

Mr. GRIEST. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with the recommendation that the bill do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. MAPES, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 6353) to authorize the Postmaster General to grant sick leave to employees of the mail-equipment shops and had directed him to report the same back to the House with the recommendation that the bill do pass.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. GRIEST, a motion to reconsider the vote by which the bill was passed was laid on the table.

Mr. GRIEST. Mr. Speaker, that is all the business the Post Office Committee has to-day.

Mr. BLANTON. Mr. Speaker, I make the point of order that there is no quorum present.

Mr. WAINWRIGHT. Will the gentleman withhold that for a moment?

Mr. BLANTON. I will withhold it.

LEAVE OF ABSENCE

Mr. WAINWRIGHT. Mr. Speaker, on behalf of the gentleman from New York, Mr. CROWTHER, I ask that he may be excused for three days on account of illness.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. CONNERY (at the request of Mr. GALLIVAN) by unanimous consent was given leave of absence indefinitely on account of important business.

Mr. BLANTON. Mr. Speaker, I renew my point of no quorum.

ADJOURNMENT

Mr. LONGWORTH. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 51 minutes p. m.) the House adjourned until Friday, January 2, 1925, at 12 o'clock noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. GIBSON: Committee on the District of Columbia. H. R. 5327. A bill to provide for the payment to the retired members of the police and fire departments of the District of Columbia the balance of retirement pay past due to them but unpaid from January 1, 1911, to July 30, 1915; with amendments (Rept. No. 1070). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. JOHNSON of Washington: A bill (H. R. 11210) to grant certain public lands to the State of Washington for park and other purposes; to the Committee on the Public Lands.

By Mr. RAKER: A bill (H. R. 11211) for the inclusion of certain lands in the Plumas National Forest, the Eldorado National Forest, the Stanislaus National Forest, the Shasta National Forest, and the Tahoe National Forest, and for other purposes; to the Committee on the Public Lands.

By Mr. VARE: A bill (H. R. 11212) to amend sections 405 and 406 of Public Act 242, Sixty-eighth Congress; to the Committee on World War Veterans' Legislation.

By Mr. UPSHAW: A bill (H. R. 11213) to renew patent No. 848913 to Howard P. Mallory, administrator of the estate of Alonzo R. Mallory; to the Committee on Patents.

By Mr. REED of West Virginia: A bill (H. R. 11214) to amend an act regulating the height of buildings in the District of Columbia, approved June 1, 1910, as amended by the act of December 30, 1910; to the Committee on the District of Columbia.

By Mr. CABLE: A bill (H. R. 11215) to promote the erection of a monument in commemoration of the treaty of peace between the United States of America and certain Indian Tribes at Fort Greene Ville, now the site of Greenville, Ohio; to the Committee on the Library.

By Mr. McKENZIE: Joint resolution (H. J. Res. 314) providing for the appointment of a commission to consider and

report to Congress ways and means of establishing within the Pension Office Building a war memorial; to the Committee on the Library.

By Mr. JOHNSON of South Dakota: Resolution (H. Res. 889) for the consideration of House bill 6484; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANDERSON: A bill (H. R. 11216) granting a pension to Hattie Reynolds; to the Committee on Invalid Pensions.

By Mr. COLTON: A bill (H. R. 11217) for the relief of J. C. Irwin & Co. and Charles A. Perry & Co.; to the Committee on Claims.

By Mr. EVANS of Iowa: A bill (H. R. 11218) granting a pension to Nathan W. Hamilton; to the Committee on Pensions.

By Mr. GIBSON: A bill (H. R. 11219) granting an increase of pension to Julia A. Stockwell; to the Committee on Invalid Pensions.

By Mr. JACOBSTEIN: A bill (H. R. 11220) granting an increase of pension to Ellen Douglass Gowin; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11221) granting a pension to Jennie Benjamin; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11222) granting an increase of pension to Henrietta D. Washburn; to the Committee on Invalid Pensions.

By Mr. JOHNSON of Washington: A bill (H. R. 11223) granting an increase of pension to Laura R. Cummings; to the Committee on Invalid Pensions.

By Mr. KEARNS: A bill (H. R. 11224) granting an increase of pension to John Dudley; to the Committee on Pensions.

By Mr. McREYNOLDS: A bill (H. R. 11225) for the relief of Andrew J. Ware; to the Committee on Claims.

Also, a bill (H. R. 11226) for the relief of N. W. Ellis; to the Committee on Claims.

By Mr. MAGEE of Pennsylvania: A bill (H. R. 11227) granting an increase of pension to Virginia Hubley; to the Committee on Invalid Pensions.

By Mr. MANLOVE: A bill (H. R. 11228) granting a pension to Maria E. Smith; to the Committee on Invalid Pensions.

By Mr. ROBSON of Kentucky: A bill (H. R. 11229) granting an increase of pension to Rachel Peace; to the Committee on Invalid Pensions.

By Mr. ROGERS of Massachusetts: A bill (H. R. 11230) granting a pension to Susan O. Jellison; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11231) granting a pension to Gilbert B. Perrin; to the Committee on Invalid Pensions.

By Mr. SEARS of Nebraska: A bill (H. R. 11232) granting a pension to Clotilda M. Hanna; to the Committee on Pensions.

Also, a bill (H. R. 11233) granting a pension to Miriam C. Buck; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11234) granting a pension to Ellen Litzel; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11235) granting an increase of pension to Sarah C. Gross; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11236) authorizing the Treasurer of the United States to refund to the Farmers Grain Co. of Omaha, Nebr., income taxes illegally paid to the United States Treasurer; to the Committee on Claims.

Also, a bill (H. R. 11237) authorizing the Treasurer of the United States to refund to the Nebraska Buick Co. funds illegally covered into the United States Treasury; to the Committee on Claims.

By Mr. TAYLOR of Tennessee: A bill (H. R. 11238) granting a pension to Jane Lawson; to the Committee on Pensions.

Also, a bill (H. R. 11239) granting a pension to Sarah Andrews; to the Committee on Invalid Pensions.

By Mr. UNDERWOOD: A bill (H. R. 11240) granting an increase of pension to William T. Hedges; to the Committee on Pensions.

By Mr. VINSON of Kentucky: A bill (H. R. 11241) granting an increase of pension to Mary J. Herbert; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11242) granting a pension to Meairda Mullins; to the Committee on Invalid Pensions.

By Mr. WATSON: A bill (H. R. 11243) granting an increase of pension to Emma S. Gray; to the Committee on Invalid Pensions.

By Mr. WYANT: A bill (H. R. 11244) granting a pension to Peter Sheplar; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11245) granting an increase of pension to Rebecca Powell; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11246) granting a pension to Jemima Meehling; to the Committee on Invalid Pensions.

By Mr. ZIHLMAN: A bill (H. R. 11247) granting a pension to Amelia Weber; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

3320. By Mr. ANDERSON: Petition of residents of Simpson and Stewartville, Minn., protesting against the passage of compulsory Sunday observance legislation (S. 3218); also from residents of Winona, Winona County, Minn., protesting against the passage of compulsory Sunday observance legislation (S. 3218); also from residents of Austin, Minn.; to the Committee on the District of Columbia.

3321. By Mr. CLARKE of New York: Petition of thirty-fourth congressional district, State of New York, not to concur in the passage of Senate bill 3218, compulsory Sunday observance bill; to the Committee on the District of Columbia.

3322. By Mr. JOHNSON of Washington: Petition of citizens of Cathlamet, Wash., opposing the compulsory Sunday observance bill (S. 3218); to the Committee on the District of Columbia.

3323. Also, petition of various citizens of Clarke and Cowlitz Counties, Wash., opposing enactment of the compulsory Sunday observance bill (S. 3218); to the Committee on the District of Columbia.

3324. Also, petitions of various citizens of Camas, Battle Ground, and Washougal, Wash., opposing the compulsory Sunday observance bill (S. 3218); to the Committee on the District of Columbia.

3325. Also, petition of various citizens of Carrolls and Kelso, Wash., opposing the compulsory Sunday observance bill (S. 3218); to the Committee on the District of Columbia.

3326. By Mr. KETCHAM: Resolution passed by the Benton Harbor City Commissioners, Benton Harbor, Mich., favoring the passage of Senator FLETCHER's bill which provides for the construction of certain public buildings; to the Committee on Public Buildings and Grounds.

3327. By Mr. KOPP: Petition of Grant McKee, Lillie McKee, W. W. Wiley, Grace Mathias, Margaret Greenfield, Retta Wiley, Oscar Mathias, G. W. Lowe, Chas. E. Greenfield, Victor Burden, Edith Burden, C. J. Burden, and Veleda Lowe, of Birmingham, Iowa; M. E. Graves and J. T. Graves, of Bentonsport, Iowa; E. W. Graves and Lillie Graves, of Stockport, Iowa, asking that the House of Representatives do not concur in the passage of the compulsory Sunday observance bill (S. 3218) nor pass any other religious legislation which may be pending; to the Committee on the District of Columbia.

3328. By Mr. SINNOTT: Petition of residents of Portland, Oreg., protesting against the passage of the Sunday observance bill (S. 3218); to the Committee on the District of Columbia.

3329. By Mr. WILLIAMS of Michigan: Petition of Mrs. Nettie Pugh and seven other residents of Albion, Mich., protesting against the passage of Senate bill 3218, known as the Sunday observance bill; to the Committee on the District of Columbia.
